Thanks George. I'd recommend that you develop some text to go with these data to help people understand the units, limits of detection, etc. I'd also recommend that you convert the results to ppb as that is what the public is used to hearing.

Subject: RE: Updated Sample Results

Attached is all of the data available when I ran the query earlier today. It includes lead and copper since I am trying to have one report fill multiple purposes.

Linda,
Here is the updated information and there are two tabs. On one tab the data is sorted by concentration and on the other tab the data is sorted by zip code.

Mel,
I think we need to remove the address if we post this to the website, that is how we handled the November data that was posted. I believe that we should protect the privacy of the individuals that submitted samples when it comes to publishing personal information (addresses) on a website. There are no names but I just want to be sensitive to the issue.

Director, I leave the final decision to you as to yea or nay with respect to addresses on the website.

Subject: Re: Bottle Shipment

Mark - Second shipment of 100 cases from Environmental Express are suppose to be same lot as first shipment and will not need additional lot testing. All boxes must be verified upon arrival that lot matches first shipment lot. If for some reason any box has a different lot number we will need a sample bottle to test. This message was from Lisa Riley at Environmental Express.

We can guarantee the same lot number on all 200 cases that we currently have available of the BPC1172. 100 BPC1172 could ship 1/15/16 and another 100 on 1/21/16.

PLEASE NOTE: We printed labels for the 300 remaining cases to arrive. if the last 200 cases (arrival to still be determined) are a different lot from the first 200 cases (we still don't know if they will be or not), the remaining labels for those 200 cases will need to be destroyed and we will have to print new ones.

Also remember Environmental Express shipments and VWR shipments may arrive close together and it is important to keep them distinguished.

thanks,
Kirby

Importance: High

Here's my take on the language. (Mitch I stole a bunch of your language and then tried to build some additional context around it)

Recently there have been some concerns raised about the possibility of lead being in the bottled water that is being given to the residents of Flint. This concern was raised due to measurements that some residents obtained with a TDS meter that was provided with their zero water brand water filters. The term TDS stands for "Total Dissolved Solids" and is a measurement of all of the minerals and other common chemicals that are present in the water. The TDS meter is not sensitive enough to measure the lead in the water and the purpose for including it with the filter is to help the user determine when it is time to replace the filter.

Although the TDS meter does not measure lead, the concern raised an excellent point that the bottled water that is being distributed should be tested for lead. Therefore, the DEQ has analyzed a sample from each of the 21 brands of bottled water that are in inventory for both lead and copper. The results show that all 21 brands of bottled water had results of "Not Detected". With respect to lead that means that all 21 brands were less than 1 part per billion and for copper all 21 brands were less than 50 parts per billion.

Although bottled water is regulated and must meet safety criteria, it was an excellent suggestion by the residents of Flint that we verify that the bottled water that is being distributed is safe and for that, we are thankful for the suggestion.

Subject: RE: Bottled Water

How's this?

Some Flint residents were provided meters along with water filters that measured something called Total Dissolved Solids (TDS). Reports were received from 3 residents that they had measured donated bottled water with their TDS meters and found results in the "red zone" on the meters. They were concerned that TDS levels correspond to unacceptably high lead levels.

In response to this, DEQ analyzed samples of each type of commercial bottled water, 21 different types in all, for lead and copper. All results were below the detection limit for lead (detection limit = 1 part per billion [ppb]) and copper (detection limit = 50 ppb).

There's also more background information in the attached note from yesterday. I hope this helps.

Good information, Mitch.

I think it is also important to explain that water dissolves naturally occurring salts and minerals as it passes through the ground and then draw the connection that as a result, salts and minerals naturally occur in drinking water. You cannot see TDS, although water that is high in TDS may stain sinks and fixtures, may not taste good, and may have an unpleasant odor. The TDS meters measure the amount of salts and minerals in water and do not measure the amount of lead or copper in water. George – Do we want to indicate that lead and copper can be part of TDS? Regardless, in response to public concerns, samples were analyzed from 21 different brands of commercially canned and bottled water that are being provided to the public. Lead and copper was not present in any of those brands of water (Should we include a link to the data on the website?). We should probably also explain the purpose of the filters and restate the type of filter that is approved for use.

I am aggregable with that language, although I might omit the time as I suspect some of the samples may have been opened at 5:41 PM.

My suggestion to appear on the reports:
This sample was received as a sealed container of finished drinking water. It was opened on 1/19/16 at 5:40pm and an aliquot was transferred to an appropriate laboratory bottle (unit 32CC) for analysis.

Subject: Procurement for Flint Drinking Water Project
Importance: High

Tara, can we please sit down asap and figure out who's doing what in the purchasing process for the Flint project – esp. related to requests from other Departments/Agencies/etc.

As you know, the lab has been ordering bottles and supplies. Today we received an unexpected purchase request via DTMB (from the MSP Emergency Operations center) for an order of bottles to be delivered to Flint, and we want to be sure the proper approvals, tracking and notifications are in place. Delivery of these items in a quick manner is essential, therefore procurement needs to be as streamlined as possible.

Objectives:

1. We need to make sure the lab staff aren't working any more than they absolutely have to on filling out purchasing paperwork/getting quotes as they are very, very busy processing the samples. In regards to bottles, VWR and Sci-Spec can supply the bottles. Who is authoring or the number of bottles needed is unknown to me. No paperwork should be necessary from Kirby to order from either of these contracts, but the DEQ is still responsible for POs, payments, etc.

2. We should look at the p-card as an alternative for further emergency purchases. We've had our lab p-card limits increased temporarily related to one vendor contract; could we check with DTMB to see if they will allow us to continue the exception based on the purchases needs related to the Flint project? (From our understanding, you've asked us to process individual Reqs/PO's for each purchase in order to avoid encumbering large blocks of funding. VWR is a state contract vendor who accepts p-cards. Can we use that instead and/or find out what their minimum limit is for direct billing without having to set up a PO (if any)? The PCard increase was for an emergency purchase of the bottles per Kirby last week from a vendor that was not registered in MAIN. We cannot continue to order the bottles off contract since VRW and Sci-Spec can supply them. I spoke with VRW just within the hour; we do not need to cut a PO for each order; payment can be dealt with by PCard or DV at invoice. DV will be easier to track.

3. We need to avoid duplicate orders or confusion, therefore who should we expect purchase requests from (the lab? the SEMOC?), what are the proper approvals, who is establishing the PO & for which purchases, etc. Who will be verifying that the goods were received and backup documentation is retained? I'm in the dark at this point as to who is authorizing orders from the Emergency Operations center, I am looping in Jeanette Doll, as they will need to be in the conversation to address the concerns you have expressed. Please initiate a meeting for tomorrow morning.

Suggested attendees: yourself, Dawn, Mary Jo, Sylvia R., Lisa R., Melissa S. (DTMB)?

Subject: RE: Vortex units

In re-reading this message, I noted that I said the public water supply program does not review and approve of these devices, and then in the next sentence I said they need to have third party certification if they want our *approval.*

To clarify, Michigan's drinking water program does not determine if these devices are acceptable for use in drinking water treatment. We rely upon the third party certification process employed by NSF and other agencies to provide that assessment. Once that review and approval is granted, the device will be placed on a list that we will suggest be used by anyone wishing to provide this treatment.

However, the public water supply program has a long-standing policy of relying upon a "multiple barrier" approach when dealing with microbial contaminants. We have not accepted point of use or point of entry treatment for contaminants considered to pose ***acute*** public health threats. We have required what is called "complete treatment" to address microbial contaminants in source waters. Complete treatment employs multiple processes (coagulation, flocculation, sedimentation, filtration, disinfection, etc.) so that an unanticipated failure in one step does not immediately result in a public health threat.

Point of use and point of entry treatment devices may be approved in public water systems when dealing with chronic exposure-related health threats such as those posed by most chemical contaminants, but these devices/treatment systems have not been considered adequate to protect against the acute health threats posed by microbial contaminants.

So if an individual wishes to install point of use treatment for any reason, we would recommend they select one that has third party certification that verifies it performs as the manufacturer claims. But it has not been acceptable to rely solely upon a point of use or point of entry treatment device for compliance with microbial drinking water standards in a community public water system.

If you have additional questions, please feel free to contact me.

Subject: Vortex units

Dear Mr. Alexander,

I received the messages discussing information regarding and possible use of the Vortex units for water treatment. The public water supply program in DEQ does not review or approve treatment devices for point of use or point of entry in buildings or homes. However, we tell individuals and/or entities that are marketing these devices that they need to have them independently tested and approved by a third party using National Sanitation Foundation (NSF) protocols if they want our approval. I also added that we require NSF certification for treatment devices where we have such authority, such as installation in an apartment complex, manufactured housing community, condominium development, etc., that has its own wells. .

When we are asked, we also tell individual well owners and individual customers of a public water system that they should be only installing NSF certified devices (or other 3rd party certification that is using NSF protocols) if they so choose to treat their water beyond what is accomplished by the public water system. We tell them that the third-party certification designates that the device will perform as specified or at least as claimed by the manufacturer. NSF testing will also evaluate the potential for the device to cause harm from leaching of materials or components as drinking water passes through it.

So our advice to you is to seek NSF Third Party Certification if you have not already done so. If you have already received this certification, we would have no objection to installation of Vortex Units for the purpose intended.

Richard

Subject: Fw: Legionella information - Vortex units

I am forwarding the information received from Mr. Alexander regarding the Vortex units for water system treatments. This is a follow up to a phone call I had with him yesterday after he reached out to the Governor's office to suggest the use of these products. While I have not seen any significant published literature that supports this technology as an effective mechanism for water treatment, I think that a more thorough review and reply to him by someone in the MDHHS Division of Environmental Health and/or DEQ with expertise in water treatment/filtration is indicated. An evaluation of the efficacy and potential use of these water treatment units falls a bit outside my area of expertise.

I have sent a short reply to Mr. Alexander and told him that this information will be reviewed by one of our water quality experts and that he would then receive a reply.

Please let me know if you need any additional follow up by me.

Just heard from a Sgt. at one of the PODs that several folks were complaining the bottled water is not good based on the test in the photo. I talked to Julia Pieper earlier today to make sure someone would be at the lab to prep the bottled and canned water that would be coming in around 1715. Ms. Pieper agreed to stay to receive and prep the samples. Hopefully results will be available by noon or so. Public messaging will be key once we have the results. The other thing the Sgt. mentioned is that the disgruntled residents were going to post on web site. Let's talk briefly after the results are received. Thank you.

> I estimated 1500 ft2 for about 100 pallets. Here's how I came up with that number. 60 samples back in each box (Sci Spec box size), 8 boxes per pallet (2 layers of 4 boxes will be very heavy), 100 pallets = 48000 samples. 1 pallet I measured was 12 ft2. 100 pallets would occupy 1200 ft2. Extra 300 ft2 to maneuver around pallets should sample retrieval be necessary. Someone chime in if they have a better approach.

Yes, please put in a request. We are beginning to palletize Flint samples at the lab and have one pallet ready to store and another will be ready soon. We have a pallet jack to move pallets to our loading dock and have a forklift at the building to load on a truck. A location close to the lab would be ideal but not required if we need to retrieve samples for any reason.

I have identified a couple of spaces. One is from a private owner next to the lab. I don't think this is a good option. One is in the DEQ GSU building at Filley street about a block from the Lab. This space is temporary and limited.

Subject: HDPE Bottle update

Hello everyone,

Thank you for all of the calls yesterday and today. I would like to update everyone on the status of the VWR order, order number 8018384025 for 150 cases of 71001-158. We have C&G container shipping 42 cases tonight. One case will be going to Kirby at the Lansing lab and 41 cases are to arrive in Flint. When shipments have tracking information we will be able to send the tracking information to all of you.

For the Friday shipment, C&G will now only be able to allot 50 cases to the shipment. I have called and alerted Kirby and the Emergency Management team about this development. They have assured me that this will work fine.

Next week our C&G rep will update us as soon as we know the remaining 58 cases will be shipping. I will continue to update everyone if there are any changes. I will also be sending the tracking information to everyone on this email chain when I receive it.

Please let me know if there is anyone else that needs to be added to this email chain for updates about this bottle order.

If MDEQ can forecast how many more bottles that will be needed in the future we will be able to avoid the rush shipment charges. C&G has waived a 25% fee that usually accompanies the rush order's assembly for this shipment but I do not think they will waive the 25% rush assembly fee for any future orders.

Please let me know if you have any questions.

Best,

Nina

Subject: RE: Water donation for Flint

Hi Bob, thank you for your patience and understanding today. The warehouse we discussed is located at:
2727 Lippincott Blvd., Flint
Warehouse Mgr. Matt Odette

They are expecting the 36,000 bottles of water on pallets to arrive tomorrow. Please send me an estimated arrival time tomorrow so I can alert the Warehouse. Again, thank you for your kind and thoughtful response to the Flint residents in need. It was a pleasure to work this out with you. Janet

Janet,

Can you help me find a place that can receive a semi full of water bottles in Flint tomorrow?

I have spoken to the food bank and they cannot receive a truck until Tuesday of next week...

Any help or direction would be greatly appreciated!

Thank You!

Subject: RE: DEQ Costs since April change over

Hi Jen. A couple clarifying questions to help our response:

- Are you asking for information related only to the Flint project, or are you asking for ALL Lab purchase orders since April 2014?
- We also use p-cards for some purchasing, I assume if we purchased anything on a p-card that you would also want that?
- Are you asking for only DEQ LAB expenses related to the Flint project or are you looking for all DEQ costs?

Just hoping to facilitate a faster query. Thanks!

Someone will be delivering the canned water to the lab this afternoon. They will either pick up the labels and rubber bands at that time or Mark will pick them up in the morning. No one has been by the warehouse yet but Mark seemed to think the way the warehouse manager spoke there was not a great amount that would be coming in.

Jen,

Do you have any problem with me moving on the proposed solution below?

From: Holmes, Virginia (DHHS)
Sent: Thursday, January 14, 2016 10:26 PM
To: Kuzera, Michelle (MSP); Martus, David (DHHS)
Subject: Re: School Sampling Overview

THanks Michelle.

In Gratiot County, Alma College has done consistent water testing and analysis due to the extreme hazardous conditions of the Pine River Water. St. Louis is one of the top super fund sites in the nation. In addition, there are extreme issues with agricultural run off. As a result of these challenges, Alma College has two professors who do routine water testing with college students.

This leads me to wondering if we could determine if one of the colleges in the area would be able to provide students and professors to help with this task. As you said, we will wait to determine if the state wants to have it hired out, but a research scientist could possibly oversee a group of students.

Dave may even know of some people from the area who have these type of skill sets. Because it is happening on the weekend, I could ask my Alma College professor friends if they would be able to volunteer their time.

We will wait for your direction and not do anything until there is a clear direction given. I will fill you in tomorrow on my thoughts from the phone call tonight. I would like to discuss with you how the EOC would like to utilize my staff's time and if there is benefit that we can provide to you. As I told Janet and Dave today - we see our role as helping people to help people.

Thank you for your support tonight. It meant a lot to us.

Subject: Local school district donation of water

Janet

We have been contacted by local school districts, some that will be hosting events and encouraging attendees to donate bottled water. MDE is working on a communication document to share with local districts today. Do you have a checklist or critical items that need inclusion within this document? We would like to include any critical items within that checklist for local school districts.

Thanks

Subject: Iphone

I just dropped my iPhone on the bathroom floor in the SEOC. The face cracked..... It is still workable but will need to get it fixed. I tried to buy a case for it 2 weeks ago but Verizon on Saginaw advised they could not sell me one because it was a state account. Hadn't had time to get one since then. My bad.

This is in response to the attached information received on the 211 line. Mark will be speaking with the Health Group tomorrow and will discuss this.

The testing that the citizens have reported are with the ZeroWater pitcher TDS meter to measure dissolved solids. https://www.zerowater.com/10c-pitcher

ZERO WATER Drinking Water Filters Home Purification ...

www.zerowater.com

Water filter pitcher Zero Water Replacement Filters in-home residential drinking water filtration solution treatment that eliminates virtually all detectable ...

The local EOC is picking up the canned water that one of the citizens had and will deliver it to the lab for testing. The company is also sending a case directly to lab. http://cannedwater4kids.com/

We will need the water analyzed as soon as the lab receives it and report out to all.

Mel, Can you work with the JIC to develop some messaging. The TDS meter measures dissolved solids, which exist in all water and does not specifically measure the lead level of water. I am going to attempt to get a statement from the company now to help alleviate concerns.

I thought the lot testing was already done on this. We need them yesterday.... We have run out of supplies in Flint more than once now and it does not look good for our Department. This process is stressing a lot of staff here other than just DEQ staff. Please try to be proactive on getting the steps completed as accurately and timely as possible. All agencies are responding to this incident 7 days a week and it is expected all of DEQ does the same, not just those deployed to the SEOC and the local EOC. Staff from other Departments are also being held accountable for our shortfalls on being prepared with the adequate supplies. I apologize for my tone but want to make sure the Lab is working as hard as everyone else, if there is something the Lab needs please let me know.

Hi Kirby

Is the lot-testing for the lot from Environmental Express done? We're due to receive the first 7200 bottles early tomorrow (19 January) morning, the next 7200 Wednesday 20 January and the remaining 14,400 on Friday 22 January.

If the lot's good we'll need printed labels ASAP. I'm not sure what time the 100 samples that Mark said would be delivered Tuesday morning are due to arrive, but we'll need to get the labels to Flint ASAP so the kits can get assembled.

Thanks.

Subject: samples

I visited most of the fire stations this afternoon and will visit Pierson Rd. tomorrow. There were very few samples and most staff were not aware that they could accept samples.

Staff was not aware that **we cannot accept samples unless they are in a state-lab provided bottle**. One Red Cross volunteer asked that something official be drafted and sent to the stations clearly stating, for residents to see, that we cannot accept samples collected in any other container.

One thing that most of the volunteers agreed on is that having GCCARD prepare all of the sample bottles delays their arrival to the stations and that most of the stations have time enough to prep them there. If supplies (bottles, flyers and rubber bands) were all provided and they can assemble them on site. This may not work for every location. I'm told the Pierson Rd. location is the busiest and I have yet to visit them.

It seems clear that a few instructional sheets should be available at each firehouse explaining the basic process and do's and dont's so that no matter who is on duty they have the information available to handle most situations. I would be happy to prepare such sheets and laminate them and have them distributed to each station. Of course Mike or someone with the MSP-EIOC-MDEQ should approve them before distribution. I don't know if input is needed from GCCARD, the Red Cross or National Guard or any other person or organization.

Thanks.

Sincerely,

Melanie Poisson, Clerk

Subject: Test Kit Bottles

Just finished a call with Krisztian. Can you get word to Loren (Red Cross Logistics) to isolate and not distribute any more narrow mouth test kit bottles, unless we are completely out of the wide mouths. The narrow mouth bottles are more like a pop bottle with an opening about the size of a quarter. The wide mouths have an opening about two inches. I requested MANG to isolate and not distribute any more narrow mouth bottles at the fire stations unless wide mouths are completely gone. Thank you.

See attached. Similar type of communications will likely continue. Has there been discussion in the SEOC on how these will be handled and whether JIC will be issuing any communications to advise the community of approved solutions and to be alert of potential scams. This particular communication was sent to Congressman Kildee.

Hi Lisa - You should have received a voicemail from one of my colleagues, Mitch Adelman, regarding the 400 cases of 32oz wide mouth bottles BPC1172 we ordered. See email below. I know you gave me an estimate on delivery for 100 shipping immediately, another 100 to ship on 01/21/16 and remaining 200 to be determined. Do you have any ideas on how we can get the remaining 300 cases shipped ASAP. Can you find out for me if there is a bottle manufacturing issue, bottle certification issue, or assembly issue (caps on bottles). We are working under a Federal Emergency. I am not in the office tomorrow, 01/18/16, but will be checking my emails.

Thank you,
Kirby

Subject: Answer to Your Question About Inventory

Hi Mark

I talked to Logistics here. They're the ones populating the inventory spreadsheet that you and I discussed earlier that you had access to.

First, there are more tabs at the bottom, so if you can see the "PODs" tabs, use one of the arrows at the bottom to see the "Warehouse" tabs to the right of the PODs tab. Today's isn't populated, because SEOC hasn't received the paperwork from the locals yet.

Yesterday's Warehouse inventory showed 12,592 test kits available, and from the tally showing here on what was handed out (434 kits by WRT and 70 at PODS) it seems like we should have at least 12,092 kits in the warehouse (perhaps more, since the PODs probably had some that weren't included in the 12,592 count from last night.

For future reference, the warehouse, and I suspect the PODs, are supposed to have their numbers into the SEOC by 6 pm every day, who will then update the spreadsheet accordingly and without haste. Let me know if you need help finding the warehouse tabs on the spreadsheet. See ya

Mitch

Hi Jeanette

Attached is the list of 3 vendors that our lab has been ordering the sample bottles from, which includes the "product ID" number each vendor uses, along with contacts from the suppliers. Sample bottles are one vital component of the test kits. Other components are:
the sample labels, prepared by the DEQ lab, and finally
the sample request form that is attached by rubber band.

I've also attached the procedure we've established with our lab to do "lot testing", which is an important quality assurance/quality control step that will need to be continued by FEMA. The lot-testing should be completed before the kits are assembled, to assure that kits handed out to the public for submitting samples don't have any cross-contamination issues.

Do you know if FEMA plans on using the DEQ lab for sample analysis going forward? We'll need to keep our lab appraised of this so they can manage their workload. Thanks

> Attached is the list of filtration devices that we have provided so far for the city of Flint residents. The only outstanding order we are aware of is the 2500 pitcher replacement filters scheduled for 1/18 delivery. As of last night, resources is reporting about 60,000 faucet filters and 60,000 replacement cartridges. I believe planning or logistics has the best idea as to how long that supply should last.

Subject: Public Health Group Meeting

Working on scheduling a Public Health Group meeting in Flint for Tuesday, January 19, 2016 at 2:30 p.m. EST. It looks like Mike Glasgow, City of Flint and Jim Henry, Genesee County Health Dept. are available. I'm working with April Swartout, GC Health Dept. in an effort to get Mark Valacak, GC Health Director to also attend.

Please contact the appropriate state agency reps to arrange for their attendance at this meeting and advise confirmation of participants and contact information. Suggested minimum agencies, DEQ and DHHS.

Purpose of meeting is to discuss development of one common unified communication (letter) to be distributed to the community with test results and common return point of contact. Development of a common procedure for distribution of results and communication and procedures for immediate communication should also be worked out during this meeting.

Meeting will be held at the Flint County Administration Bldg (1101 Beach St) or Genesee County Health Dept. (630 S. Saginaw St.) and will be confirmed Tuesday morning. DuCharme available to initiate the meeting and facilitate, if necessary..

Thank you.

Subject: Fw: Legionella information - Vortex units

I am forwarding the information received from Mr. Alexander regarding the Vortex units for water system treatments. This is a follow up to a phone call I had with him yesterday after he reached out to the Governor's office to suggest the use of these products. While I have not seen any significant published literature that supports this technology as an effective mechanism for water treatment, I think that a more thorough review and reply to him by someone in the MDHHS Division of Environmental Health and/or DEQ with expertise in water treatment/filtration is indicated. An evaluation of the efficacy and potential use of these water treatment units falls a bit outside my area of expertise.

I have sent a short reply to Mr. Alexander and told him that this information will be reviewed by one of our water quality experts and that he would then receive a reply.

Please let me know if you need any additional follow up by me.

Subject: Legionella information - Vortex units

Dr. Mcfadden,

Picking up on your conversation yesterday on the legionella outbreak, I have inclosed a product list. Our own bacterial tests not including legionella. The only official test we have is from Saiseiko, our sister company, when they used an AVS in a Japanese public bath where they discovered legionella. When they fitted the AVS, a few days later, a test was carried out and there was no detectable legionella.

Please note we are not making claims that Saiseiko products are an anti-legionella product. We make treatment systems that are successful in activation and rejuvenation of the water you drink.

Legionella lies within lime scale deposits. In order to remove them you would need to flush huge amounts of dissolvent through the system to flush the lime scale out. Our AVS and SEM can provide a negative ionic charge to the new scales media preventing it from sticking to existing deposits. Including the removal of positively charged scale ions as the negatively charged ions pass. They will detach and stick to the passing negatively charged ions creating a neutrally charged particle that passes though the system and down the drain. Adding BA ceramics with anti bacterial properties helps change the scale to another form making the environment inhospitable. By adding BA ceramics with antibacterial properties, we are once again making it challenging for the bacteria to grow.

Please see attached report.

Note we are not making claims that Saiseiko products are an anti-legionella product. We make treatment systems that are successful in activation and rejuvenation of the water you drink.

Also the AVS increases dissolved oxygen and if velocity is high it can help break the bacteria cell walls to help reduce oxygen hating bacteria and again velocity and pressure is important to take away other bacterial types. It briefly produces hydrogen peroxide inside the pipe, which is a powerful thing. Negative ions help to neutralize positively charged ions.

See the attached page with the reference to H2O2. - hydrogen peroxide.

In order for me to get you a proper recommendation I will need to know the water line sizes in the infected areas. I will be looking forward to your response.

Blessings and Gratitude,
David Flores

Subject: Flint Water

Hi Keith
We at NSF International hope everything in Flint is on track to be resolved soon.
As you know, NSF International stands ready to support your efforts in any way possible. Please let us know if and when NSF International can be of service.
Today, our President/CEO Kevan Lawlor requested that I follow up with DEQ to donate $10,000 of water filters and/or cartridges for the residents of Flint.
If we can find out what is needed, we can work with our clients whose filters/cartridges are NSF tested and certified, to purchase the products and have them delivered to your distribution center(s).
Please advise who is the most appropriate person to contact regarding this donation.
Best regards
Stan

Subject: RE: Water Heater sediment

Hot water should NOT be used for consumptive purposes (drinking, food preparation, or cooking). Cold water should be drawn from the tap and heated for such purposes.

Hot water dissolves lead more quickly than cold water and is therefore more likely to have greater amounts of lead.

Hot water tanks are recommended to be periodically cleaned to remove existing biofilms and sediments. Failure to routinely conduct this maintenance can lead to premature failure of the tank.

Just as sediment accumulates in the hot water heater tank, it is possible that any lead particulates drawn into the tank may also settle out with the sediment.

Kirby

RE: Bottle Orders

After consultation with DTMB at the SEOC, we (DEQ) need to continue ordering the sample bottles ourselves due to the fact that we've already received an appropriation. When and if our allotment is expended we can revisit having DTMB/logistics do the ordering.

Also DTMB confirmed what you said earlier, i.e. that we should first attempt to order though our contract vendor, and if they can't meet our needs (be it time to supply or number of bottles), we can go to the alternates, starting with other State of MI contract vendors.

Thanks

Mitch

Following the 1600 SEOC call today, I contacted Mayor Weaver to follow up on any potential concerns with use of the *fire stations as sample collection points. Mayor Weaver thought it was an excellent idea if we are able to implement* same. The Mayor agreed it is important to make sample collection convenient for the community and that it is important to get the data quickly. I'll add to activity log. Please advise Capt. Kelenske accordingly.

Please evaluate if necessary to get word out on this via SEOC/JIC or video Krisztian developed. We'll gauge receipt of samples over the next couple of days.

Subject: RE: Civil Rights question

Generally speaking, swimming pools are not tested for lead. The greatest exposure risk from lead in water is from consumption. However, total coliform is something for which pools are tested as the presence of total coliform in water does pose a potential contact exposure risk.

Small children could potentially consume water in a pool but the levels of lead in pool water is likely to be at very low to undetectable concentrations. The reason for this is because lines that are used to fill a pool with water from a municipal supply are going to be flushed out relatively quickly. After that, the water will be coming from the water main and will not be standing in the service lines or have any lengthy contact with other potential sources of contamination.

That said, any pool owner that would like to have their pool water tested for lead is welcome to submit a sample. The only request is that the sample form identify the sample as pool water so that the lab can address any potential issues from high chlorine levels (compared to regular drinking water)

My grammar in this response may need work so this reply is to be used for internal informational purposes and must go through the JIC before it can be released as a public statement.

Thank you!
George

Mike,

The EOC has decided this afternoon to start collection of samples at the Fire Stations. We appreciate your offer to collect the water samples once per day at each fire station (including weekends).

In order to help with that we have obtained 2 storage totes which will be delivered to each fire station. One will be used to pick up samples and the other one left to receive the next batch of samples at the station.

I understand in speaking with Wendy that the pick-up will occur at 3 pm each day (including weekends). I think we can initially start with a schedule like that and see if that works. Thanks again for your cooperation in this effort.

Hi Mike,

You have reached Jen at the SEOC. I am copying Scott on this reply and he can correct if he has additional info.

From my understanding the Point of Distribution (PODs) were not receiving samples and turning away anyone who brought a sample there. This, I believe was an early decision by the City indicating they did not want to be responsible for them. Thousands of test bottles have been distributed and the city has only received 700+. I feel this is a transportation difficulty for the citizen and feel offering the ability to return the samples to the PODs would greatly increase the success of getting samples back.... We will have to monitor how many come back once we get them established as collection sites to determine how often pickup should be done. One a day is a good start to monitor.

Subject: Water Sample Pick-up at Distribution locations

Scott,

I talked with Melanie at the Water Plant yesterday, and she informed me about an inquiry in regards to picking up water samples at the filter distribution points. We can manage to make a stop at each of the locations to check for sample bottles once daily. Do we know if a significant number of samples are being returned to the distribution points? Do you think a daily pickup will suffice?

10,600 test bottles are being delivered tomorrow. Every box needs to be lot checked.
The lab will have the lot tested tomorrow morning.

Someone needs to be at the **DEQ lab tomorrow at 10am** to pick up the labels for that delivery. They will also be getting one box of that same lot that was delivered to the lab for the testing and rubber bands. Have that person also bring over any samples the city has gathered.

Please advise me and Kirby Shane who will be at the lab tomorrow by reply to this email.

Thanks!

I am working on a plan to have the five fire departments which are points of distribution as collection sites as well, originally they declined being collection sites because they did not want to be responsible for the samples. This would just entail having non-identifiable DEQ staff man the stations to collect the samples from citizens. We'll be watching for the 80 samples.
>
> George advised "yes, we need to keep all the Flint samples" so continue to locate a warehouse and I will get with DTMB here to let them know the rumor they heard of DEQ looking is for this purpose. I have identified one potential space so far(not the best option though). Have you inquired about potentially returning samples back to your newly acquired warehouse space if we can work out the logistics? Or would this complicate things further. I'll keep looking near the Lab.
>
> Once you get this next order in with Environmental Express we will take over the ordering here in the SEOC directly by DTMB following the protocols established by you. 400 cases (72/case for a total of 28,800 bottles) were ordered this afternoon from Environmental Express. 100 cases (7200 bottles) will be shipped immediately. We are waiting for shipment estimations for the remaining 300 cases. I'll update you ASAP with tracking information on the first 100 cases and shipment information on the remaining 300 cases. All 400 cases will be the same Lot#, per the vendor, and we are receiving a bottle tomorrow to Lot check. When this Lot check is complete, we will print all 28,800 labels for the entire Environmental Express order. Let's talk tomorrow at our 9:00 AM or 1:00 PM briefing about transferring bottle ordering to DTMB in the SEOC. George is on board with this? We'll need to modify the protocol that we typed up for this procedure.
>
> What I need is the ability to provide data to the GIS folks of the addresses we have completed analysis. I presume we already have that data being collected by some GIS entity?... I don't know the answer to this, but I was at an SMT meeting a few weeks ago and there was a demonstration of a program in development with GIS personnel (I think) on what you're talking about. George, do you remember that? I forget who it was that was giving that presentation, but he might have an idea.

Also, Can I get a copy of the POs for any bottles ordered thus far since Jan 5, 2015? Are you asking for Purchase Orders for bottles ordered since Jan 5, **2016**? Is this to be able to order more bottles by DTMB at the SEOC?

Thanks!

I have a SEOC briefing at 4p so if you try calling I may not be able to answer.

Mark advised there are about 80 samples at the city that Dave will be bringing back with him. I am working on a plan to have the five fire departments which are points of distribution as collection sites as well, originally they declined being collection sites because they did not want to be responsible for the samples. This would just entail having non-identifiable DEQ staff man the stations to collect the samples from citizens.

George advised "yes, we need to keep all the Flint samples" so continue to locate a warehouse and I will get with DTMB here to let them know the rumor they heard of DEQ looking is for this purpose.

Once you get this next order in with Environmental Express we will take over the ordering here in the SEOC directly by DTMB following the protocols established by you.

What I need is the ability to provide data to the GIS folks of the addresses we have completed analysis. I presume we already have that data being collected by some GIS entity?...

Just received a report from the Fire Stations that some citizens are inquiring if they will receive results. My understanding is that the City **will** be provided results of all samples, but individuals **will not** receive results. Please verify if this is correct? Also, can you advise if there has been any message released about testing and how results will be distributed?

Thank you.

Jen - Per the attached form being distributed as part of the test kit, results are reported to Mike Glasgow with the City of Flint. Results will then be distributed to individuals based on item 7, on back side of the form.

We do not have that info available at the EOC. I think Shawn at ARC at GCCARD would be the contact for that info. We did process around 1500 test kits for delivery and most of those were shipped out along with the ones already at GCCARD (probably around 3000 total went out).

10,600 test bottles are being delivered tomorrow. Every box needs to be lot checked.
The lab will have the lot tested tomorrow morning.

Someone needs to be at the **DEQ lab tomorrow at 10am** to pick up the labels for that delivery. They will also be getting one box of that same lot that was delivered to the lab for the testing and rubber bands. Have that person also bring over any samples the city has gathered.

Please advise me and Kirby Shane who will be at the lab tomorrow by reply to this email.

Thanks!

Subject: Re: Freeman coordination

George,

Joe and I will get in contact with Jack early this afternoon to confirm everything for this weekend and the Freeman Project.

What has tentatively been agreed to is:

Friday: Joe and Andy will assist DEQ in completing plumbing profiles for additional Flint schools.

Saturday: LARA's plumbing division will complete faucet and fixture replacements at Freeman Elementary. This will include final inspection and deep flush. Joe and Alesha will assist DEQ with conducting water testing.

Sunday: Joe and Alesha will assist DEQ in conducting re-testing at Freeman Elementary.

I think we just need to confirm start times for all of this work. Like I said, Joe and I will be contacting Jack early this afternoon to finalize all of this.

Thank you for everyone's hard work on this. It is going to be a busy weekend!!

Alesha

> If DLARA is able to complete the replacement of the 9 fixtures on Saturday and then do the subsequent deep flush, we can try to have DEQ staff do the sampling on Sunday provided that DLARA can provide either Joe, Andy or someone else that can point out where the replacements are.

The sampling points should be labeled and given the same identification codes that were used in the first evaluation.

Was Joe able to get all of the materials or are we looking at next weekend on this?

Please include me, Jim and Shelly on e-mails so that we can stay in the loop.

Thank you!

See responses below.

Kirby- I need to know how much a test kit costs (or a box of test kits). $26 to run a Lead and Copper sample at the State Drinking Water Lab.
Also, is the recommendation to conduct the initial test, then wait six months and test again? I can't answer this question. George Krisztian may be able to provide direction.
Also, how many tests per residential house? One? Two? I can't answer this question. George Krisztian may be able to provide direction.

Thanks,
Kirby

MSP-EOC-MDEQ

From: Ducharme, Mark (DEQ)
Sent: Tuesday, January 12, 2016 5:15 PM
To: MSP-EOC-MDEQ
Subject: RE: RADM Request

Can you find out if their Logs Chief or Supply Unit Leader are well qualified to perform receiving and distributing supplies and maintain inventory?

From: MSP-EOC-MDEQ
Sent: Tuesday, January 12, 2016 5:10 PM
To: Ducharme, Mark (DEQ)

Sent: Tuesday, January 12, 2016 5:10 PM
To: MSP-EOC-MDEQ
Subject: RE: RADM Request

Sorry Jen, no we do not have RADM, we often use our staging area managers or Log Chiefs to fill the Supply role. Jim

Sent: Tuesday, January 12, 2016 5:05 PM
To: Fisher, Jim (DNR)
Subject: FW: RADM Request

Hi Jim,

Do you have this? I am going to have them put the request in via the local EOC vs. me but to help facility who this gets *assigned to, I am asking.... Thanks! ~Jen*

To: MSP-EOC-MDEQ
Cc: Schaefer, Scott (DEQ); Eickholt, Jay (MSP)
Subject: RADM Request

Please evaluate availability of a credentialed or otherwise qualified Receiving and Distribution Manager (RADM) to assist with warehouse inventory, tracking, and distribution. Suggested source DNR Wildfire IMT. It would be beneficial if the RADM is also qualified as Supply Unit Leader in case we need the flexibility. This will help us get on top of supply *management issues. Please also make sure the request goes through appropriate chain if DNR is able to provide the* resource. The need is as soon as the resource can deploy. Thank you.

Subject: RE: Email update

4719 bottles, labels, rubber bands are ready to be picked up by DTMB today. 3612(42 cases on three pallets), unlabeled, are at Filley Street warehouse. 1107(13 cases), labeled, 3612(121 sheets of 30) labels, and rubber bands are at the DEQ Lab loading dock. Please advise when these bottles will be picked up. **The Fllley street warehouse will be closing around 4:00PM today.**

Just spoke with Scientific Specialties Representative. 1020(17 cases) to be shipped today to GCCard in Flint to Matt Persel. 10,200(170 cases) tentatively shipping out this Thursday, 01/14/16. 169 of those cases to be shipped to GCCard in Flint to Matt Persel, 1 of those cases to be shipped to DEQ Lab for Lot testing. All bottles (187 cases total) are the same lot per vendor. This will need to be confirmed on arrival at GCCard(per instructions to be sent shortly for review). Once the single case has been received and tested by the Lab, the Lab will print labels to be couriered to GCCard for this entire shipment.

Scientific Specialties Rep is checking on lead time for up to additional 30,000 Wide Mouth bottles from their manufacturer. Also checking on current stock and lead time on additional stock of the Narrow Mouth bottles.

Alternate Vendor - Environmental Express: We can ship 100 cases (72 per case) by Thursday of this week. We can probably ship another 150 cases by early-middle next week. We would be able to send the remaining 50 cases by the end of the month. In regards to availability going forward, this is a popular bottle so future inventory shouldn't be a problem. If our warehouse knows that this will become a recurring order, they will adjust their inventories to accommodate.

Alternate Vendor – VWR: Wide mouth containers are custom made (not available in stock) from C&G Containers mfgr in Louisiana. Lead time 5-7 days for them to package containers and lids and then another 4 days drop ship from C&G mfgr. We can request for them to be shipped sooner with additional charge.

The most I have had to deliver was around 60 and that was usually due to one or two organizations taking multiple samples (sometimes 20 or more). Mike Glasgow used to ship the samples before the "crisis" because there were not very many.

Our ongoing communications will be a great help in successfully serving this community. Thanks!

Importance: High

SEOC SUMMARY OF JANUARY 11, 2016 EVENTS:

This morning I visited the lab and picked up sample bottle and their water analysis form which is extremely complicated. I collaborated with the City of Flint water treatment plant and the DEQ Laboratory to develop a single simplified form for the water test kits after discovering there were multiple forms being distributed. DTMB printed 20,000 copies which will be delivered tomorrow morning to GCCARD along with additional test bottles. I provided the JIC a copy of the sampling form for distribution and link to the website. Red Cross volunteers will report to GCCARD tomorrow morning and will be met by DEQ staff to provide direction on assembly of the kits. (folding the one page form in half and rubber banding around the bottle)

1000 will be shipped from the vendor on Wed. to arrive Thursday or Friday this week. 10,000 additional bottles have been ordered from the current vendor. The vendor advised the bottles are in stock but need to be capped which they complete with manual labor. They will ship in increments as they are capped. Kirby Shane is contacting additional vendors who are able to supply demands more expediently. I will be in contact with Kirby tomorrow to assure demands are met either through the lab orders or via DTMB.

Of each shipment, 1 box to go to the lab for a lot control test. Once the testing is complete the label template will be emailed to the SEOC DEQ representative. DTMB will print the labels and deliver them to GCCARD. The laboratory staff will provide oversight of volunteers to assure the labels are affixed to the appropriate lot of bottles.

Gregg Lundy, DEQ provided training to the 4 teams that will be going door to door beginning tomorrow.

I am coordinating with LARA for the implementation of the Water Faucet Replacement Program at Freeman School.

The Planning Section Chief in the SEOC inquired how many Logistics Section Chief personnel may be available for staffing at the SEOC. I sent an email to Debbie Begalle in follow up to Steve's inquiring same. I also inquired DEQ which has not had any IMT yet complete the Logistics position specific training. This was after 6pm and I don't expect a reply back from Debbie until tomorrow.

The SEOC hours of operations are now 8:00AM – 8:00PM as of 5:45PM today. I will be working on developing a schedule for coverage tomorrow.

TEST KITS DELIVERED	
Date	Amount
1/8/16	1000
1/11/16	500
1/12/16 (on truck 1/11)	1382

Test bottles on hand at lab- 3200 to be delivered 1/13 (DTMB truck will pick up 1/12 PM & deliver to GCCARD the following morning)

TEST KITS ON ORDER NOT YET DELIVERED		
Date	Amount	Expected Delivery Date
1/8/16	1000	1/14 or 1/15
1/11/16	10,000	Varies & will have lab contact daily for numbers

ISSUES:

1. Scheduling of SEOC staff coverage long term.
2. I will connect the Dept of Education representative Louis Burgess with Jack Schinderle, DEQ to de-conflict any school and child care facility lists. This is per George Krisztian this evening.

RISKS:

I am working closely with the DEQ Lab and DTMB to assure supplies are adequate to fulfill the demands of the community for water testing.

Jen,
I had a conversation with EPA Reg Admin and she said that she had been told that the signature on the forms may be impacting people accepting and using filters. George said that the Captain had addressed this issue but I just wanted you to know that it was out there at least with EPA. Thanks-Keith

Importance: High

We will make it happen. Lara will need to let us know when they have completed the install and identified the fixtures that have been replaced. We will then need to coordinate to determine what we need to do to have the sampling occur the following weekend.

We need to coordinate with Tony Sitko to ensure that a deep flush of the entire school is done once the fixtures have been replaced. Many of the lines in the schools have been out of service for several months now and we need to get an accurate picture of what is happening.

Thank you
George

Subject: Follow up on test bottles

1550 bottles will be ready for DTMB at the loading dock today by 1pm

Please send me the remaining numbers of bottles at the lab as soon as possible. Advise when they will be ready for shipment and when they will be ready. DTMB has a deliveries running to Flint daily and can pick up when they are ready. We need to provide all that we have on hand as soon as possible.

1000 will be shipped from the vendor on Wed. (1 box to go to the lab for lot control test) to arrive Thursday or Friday this week. Once the testing is complete the label template will be emailed to me: wolfj1@michigan.gov and MSP-EOC-MDEQ@michigan.gov
I will coordinate with DTMB to have the labels printed and shipped to GCCARD in Flint. 2727 Lippencott, Flint 48507. The contact at GCCARD is Matt Persel

10,000 bottles were ordered today. The vendor needs to cap them (manual labor) and will send in increments (unknown) as they complete.

The lab (who?) is looking into vendors that may be able to provide the bottles quicker.

The Red Cross is providing for volunteers to assemble kits by labeling bottles and rubber banding the directions form to them. The test kits are dispersed at the City Hall, Water Treatment Plant, Fire Departments and via teams which are deploying door to door tomorrow.

I have a call into the county emergency operations center to determine if the Fire Departments are receiving any samples and if so what the logistics are to get them to the Water Treatment Plant or City Hall. A water treatment plant employee (Melanie Poisson) is delivering the samples to the lab as needed. This may change if it becomes a resource need due to the volume of samples coming in. First it would be coordinated through the local EOC and if they do not have the capability the state will coordinate a resource at the State EOC.

A sampling form is being developed for use on this incident. 15,000 copies will be made and delivered to GCCARD by DTMB. No entity affected by this incident will be charged a testing fee to include businesses, etc.

Please advise if I missed anything...

Thanks! ~Jen

Subject: Follow up on test bottles

1550 bottles will be ready for DTMB at the loading dock today by 1pm

Please send me the remaining numbers of bottles at the lab as soon as possible. Advise when they will be ready for shipment and when they will be ready. DTMB has a deliveries running to Flint daily and can pick up when they are ready. We need to provide all that we have on hand as soon as possible.

1000 will be shipped from the vendor on Wed. (1 box to go to the lab for lot control test) to arrive Thursday or Friday this week. Once the testing is complete the label template will be emailed to me: wolfj1@michigan.gov and MSP-EOC-MDEQ@michigan.gov
I will coordinate with DTMB to have the labels printed and shipped to GCCARD in Flint. 2727 Lippencott, Flint 48507. The contact at GCCARD is Matt Persel

10,000 bottles were ordered today. The vendor needs to cap them (manual labor) and will send in increments (unknown) as they complete.

The lab (who?) is looking into vendors that may be able to provide the bottles quicker.

The Red Cross is providing for volunteers to assemble kits by labeling bottles and rubber banding the directions form to them. The test kits are dispersed at the City Hall, Water Treatment Plant, Fire Departments and via teams which are deploying door to door tomorrow.

I have a call into the county emergency operations center to determine if the Fire Departments are receiving any samples and if so what the logistics are to get them to the Water Treatment Plant or City Hall. A water treatment plant employee (Melanie Poisson) is delivering the samples to the lab as needed. This may change if it becomes a resource need due to the volume of samples coming in. First it would be coordinated through the local EOC and if they do not have the capability the state will coordinate a resource at the State EOC.

A sampling form is being developed for use on this incident. 15,000 copies will be made and delivered to GCCARD by DTMB. No entity affected by this incident will be charged a testing fee to include businesses, etc.

Please advise if I missed anything...

Thanks! ~Jen

Subject: IMT support- Flint Water Crisis- Warning Order

Hi Debbie- hope all is well.

I wanted to give you a heads up that IMT support may be requested in the near future to assist with the Flint water crisis. FRD has the only available state-trained personnel who could fill this role (MSP and DEQ is already engaged), mainly Ops, planning, Logistics, and deputy ICs. This would occur in Flint.

I wanted to send this email as a heads-up that we may be requesting personnel in future operational cycles. This is not a formal request at this time.

Thanks,

F/Lt. Steven B. Burton

On Jan 10, 2016, at 5:13 PM, MSP-EOC-MDEQ <MSP-EOC-MDEQ@michigan.gov> wrote:

SEOC SUMMARY OF TODAY'S EVENTS:

Today we identified potential issues with our contracted vendor regarding supply of test water bottles. Kirby Shane (DEQ) is speaking with the vendor tomorrow morning. Our current contract is set to expire in February so we are identifying available courses of action now in preparation. DTMB is aware and will go direct with Kirby tomorrow morning. We are also exceeding our contract numbers.

I also sent a note to Debbie Begalle, acting FRD Chief, regarding the possible request for FRD IMT members to assist in the EOC in Genesee County. DEQ has only 6 trained incident management team members (3 are deployed now) to work in a leadership capacity in an incident management team. FRD is the only other state agency (other than MSP) to possess logistics Chief, Ops Chief, and Incident commander position personnel. Talking with Mark Ducharme, we will probably need them for future continued operations. He will send a request thru the SEOC when appropriate.

TEST KITS DELIVERED:
Test bottles delivered Friday- 1,000 Flint.
Test bottles delivered Monday (tomorrow) - 500 MDARD, 1000 Flint.
Test bottles on hand at lab- TBD.

TEST KITS ORDERED:
Friday- 1,000
Monday- 3,000 (Kirby Shane) bottles will be ordered for direct delivery to the GCCard in Flint. Mark Ducharme will receive, verify clean (thru lab), and label prior to distribution. George had proposed this streamlined process to speed up delivery and ease logistical issues.

Bench-mark for On-hand kits at the GCCARD is 250. 250 is the action point for additional ordering. A simple spreadsheet should be developed tomorrow to track OH numbers at the GCCARD. George, this action point quantity can be adjusted. We need to think about contingencies in case of auto accident, contamination of samples, etc. If these change please advise Lt. Wolf immediately so we can update the master spreadsheet.

ISSUES TODAY:

1. Test kits were distributed this morning at one fire station without instructions. Red Cross assisted in photo copying additional instructions for distribution and we are putting the procedures on the website to further assist residents with proper testing procedures.
2. Recommend one kit makes its way to the SEOC for demonstration purposes to other agencies.
3. I asked the JIC for production of a video (similar to the water filter installation) on the Flint-water webpage on how to correctly sample water. They will discuss.
4. We are currently awaiting a .pdf of instructions on water sampling procedures from George (Kirby) to the SEOC for posting on the webpage. This may occur tomorrow (note to Lt. Wolf).
5. F/Lt. Wolf will be on duty Monday 0800-1700 hrs. Priorities tomorrow include: contract issues, posting a .pdf to flint-water page, DEQ water sampling training (Lundy), tally sheets on schools/ homes tested to date, and the transfer of 1500 kits from the lab to DTMB and MDARD.

RISKS:

The current risk the DEQ faces is ensuring there are enough test kits for future distribution. 3,000 more will be ordered tomorrow but On-Hand levels need to be monitored closely. A failure to provide kits at this point may have significant and cascading effects. George is aware and is tracking.

Nothing further,

F/Lt. Steven B. Burton

Kirby and Lisa,

Please provide a PDF of the sampling instructions.

As an FYI, this is a multipart form. In printing this out the resident will not have a copy of the information.

I do not know if we will be able to provide this information today. It can definitely be available Monday morning.

We can also have a number of forms available if a courier can come to the lab for pickup. We can probably provide a back-up stock so that we do not run into this issue in the future.

Subject: Testing Kits

Jennifer

It was brought to my attention via Red Cross that the water testing kits that were provided at the **Pierson Rd. Fire Station ONLY** yesterday did not include the instructions for water testing. Is this something that the JIC is aware of already?

Thank you,
Jennifer, EMC

Subject: RE: Contract

All – We will be contacting our vendor tomorrow morning to determine immediate product availability, ongoing product availability, and alternate product availability. Some answers to questions below:

Questions they will have are:

1. Is the contract just out of money or is the vendor unable to fill numbers. The Contract will expire at the end of February 2016 and a new contract is in the RFP process set to go out to bid shortly. We will determine if the vendor is able to fill numbers tomorrow morning.
2. If its money, we can add more. The contract will expire at the end of February 2016 and cannot be extended any further to my knowledge.
3. If its vendor unable to get then: We will try to get this information from the vendor tomorrow morning.
    a. Is there an alternate way to test?
    b. Is there only "one bottle" or are there available substitutes? We will determine if the vendor can provide alternate substitutes when we contact them tomorrow morning.
    c. Is the current vendor the manufacturer or are there multiple manufacturers? We will look at additional vendors for supply.
    d. Who will be the contact for the lab for this matter? You or delegated to someone there? What is their contact information. I am the primary contact for this. Carol Smith or Julia Pieper will be secondary contacts if I am unable to be reached.

Thanks,
Kirby

Subject: RE: Contract
Importance: High

Kirby Shane would be the contact to answer these questions. To be clear, I am bringing up a **potential** issue. Kirby has not had the opportunity to place the additional order of 3000 bottles yet but had indicated there might be delivery issues. Kirby should be able to provide more detail once he has spoken with the vendor on Monday morning.

Thank you!

Cc: Wolf, Jennifer (DNR); Shane, Kirby (DEQ)
Subject: RE: Direct Shipment of bottles to Flint

We need to make sure that even though the bottles are sent directly to GCCARD that we go through the proper lot check procedures before releasing the bottles for distribution.

One box of the bottles from the shipment to GCCARD needs to be couriered to the Lab. The Lab will then select a bottle at random for lot checking. Once the bottles pass the lot check they can be labeled with the lot check sticker. Every bottle must have the lot check sticker on it before it can go out for distribution. This will require resources be deployed to the GCCARD apply the stickers.

Kirby will be the contact for any questions regarding these logistics.

Thank you!

MARK- FYI-See changes below-

3,000 bottles will be ordered Monday and shipped directly to the GCCARD. Kirby Shane will be the POC for the order. I am CCing him on this for visibility. George's intent was to take the lab out of the shipping chain for speed and logistical issues.

Mark- everything else is correct in your email.

Also, Ms. Begalle, acting FRD Chief, has been given notice of potential deployment of IMT personnel.

Subject: RE: Direct Shipment of bottles to Flint

Thanks sir. From our conversation earlier, it is my understanding the vendor will ship the bottle delivery directly to the GCCARD and George has already set that up. We'll coordinate shipment of the box of bottles the lab and appropriate follow on actions to affix labels and implement distribution.

From: MSP-EOC-MDEQ
Sent: Sunday, January 10, 2016 12:33 PM
To: Ducharme, Mark (DEQ)
Cc: Wolf, Jennifer (DNR)
Subject: FW: Direct Shipment of bottles to Flint

Mark- see address below for GCCARD.

When bottles are shipped they would need to be received at the GCCARD. (Being ordered Monday) One box would need to be transported to the lab in Lansing to get tested and certified as clean. This will need to be coordinated. Once the test results confirm bottles are sufficient, then labels would need to be affixed to each bottle and then they would need to get to the distribution sites/ teams.

We are also planning on potential vendor delivery issues, if experienced. More to follow on Monday.

POC is Kirby Shane at the lab.

From: Krisztian, George (DEQ)
Sent: Sunday, January 10, 2016 12:00 PM
To: MSP-EOC-MDEQ
Subject: RE: total amount of kits

As of 01/07/16 the DEQ Lab has analyzed nearly 750 Flint samples through the free lead testing offered to residents. In addition, there have been over 2500 samples taken at the 13 Flint community schools that have been evaluated so far.

The city of Flint has typically picked up kits at the lab at the same time that they have dropped off samples and the inventory that they have maintained has been relatively modest up until the emergency declaration.

Subject: Our discussion regarding the formic acid fire on I-94

Hi Jen,

Per our conversation regarding the formic acid fire this afternoon I am advising the following:

First responders and others that have had contact with the smoke or were in near proximity to the formic acid fire and were not wearing proper protective equipment should seek medical attention if they begin to develop respiratory discomfort or difficulty in breathing. It is likely that the smoke and vapors would contain levels of formic acid that were not consumed in the combustion process. As such, this unreacted formic acid could potentially cause respiratory issues.

In addition, formic acid can cause severe skin burns and eye damage. Anyone experiencing discomfort or pain on their skin, eyes or other area should also seek medical attention.

My regular cell phone battery died, you can reach me at (517) 483-3341 on my other phone if you need any additional assistance.

To: MSP-seoclgc
Subject: FW: Needs water test kit

Hey there- this is an odd one.....

Would you mind having someone look at this one for us OR would someone be able to provide her a water test kit?

Lucinda and Scott Latting
3260 Walton
Flint 48504
Flint Township
810-223-8339
Riverview Subdivision, across from McClaren Hospital

When they first turn on water has a strong odor of chlorine
Four large breed dogs displaying unexplainable symptoms
Vet's name is Farm & Pet Vet Care, Whittemore MI Ph.
They have been refused water test kit because they live in the township
In their subdivision some people are on township water and some on city
She would really like her water tested

Please advise

Subject: RE: Home Depot testing kits

Just to add to what Mel said.

Homeowners should be aware that proper lead and copper testing needs to be done using appropriate bottles and sampled using appropriate techniques. It should also be done by a certified lab using an approved method. Homeowners need to be aware that a failure to meet these criteria means that their results may not necessarily accurately reflect their exposure risk to lead.

Thanks -
Folks can use whatever water testing they wish - but for official results they are encouraged to use DEQ or EPA.
Thanks
Mel

On Feb 3, 2016, at 2:17 PM, Meka, John (DNR) <MEKAJ@michigan.gov> wrote:

> I received word that Home Depot is handing out water test kits, perhaps as a marketing tool, that spreads at least from Bay City to Battle Creek. It is a vial in a plastic bag near check-out that people can take home and return to Home Depot for testing. There is another source where people can go online to Good360 and purchase test kits to donate. Perhaps the ECC can look into this as there are no details as far as what type of kit, who is testing, how reliable it is, etc. The concern is that the test results will be different from the DEQ test results, and if the results show higher lead content than the state's test, it could be portrayed in the media that the State of Michigan is trying to skew results or hide something. It might be worth looking into to try and avoid additional media scrutiny.

Subject: RE: GCHD Water Lead Testing Home Visit Log: current as of 2FEB2016 0930

Hello all,

Thank you for the productive meeting this morning. I did hear from the GCHD staff that went out visiting homes today that there was some overlap in who was being visited. Hopefully we can limit that moving forwards.

I have attached a draft protocol for the home visitation plan. Please review and comment by tomorrow. In addition, I have attached the materials that are left with the residents in homes classified as Priority 1 (>=150ppb lead). This includes a short letter left at homes when no one is present. It has been slightly modified to include language about the resident contacting their primary healthcare provider (PCP) about health issues. Most of the questions the GCHD is receiving in this area are outside of their scope and should be handled by the resident's PCP.

Thank you,

Matt

Bryce,

Here is the most current log I have. As of yesterday evening, all "Priority 1" homes have had at least one attempted home visit. We have four new homes on our "Priority 1" list that are being visited today.

We will work with you and Linda to update our home visit protocol as discussed during our meeting today.

Please let me know if you have any questions.

Thank you,

Matt

Please see Tandem's note below. Is it possible to post sample results to common areas in Flint, such as the Points of Distribution Fire Stations, or other locations in addition to the web, unless this is already being done? This is a great idea for those that may not have internet access and again might help get information to residents quicker and help cut down calls to the lab.

Great thinking, Tandem!

Kirby

To: Shane, Kirby (DEQ)
Subject: RESULTS

Kirby, are these reports accessible other than the website? Maybe posted at common areas? I would think that most places would post the results such as apartment buildings. Or if there are other places that are posting the results. If so, please let us know so we can present that as an option when we receive phone calls.

This note is for Friday, February 5, 2016

****NOTE** No. 3 needs to be sent to the following addresses: MSP-SEOCGIS@michigan.gov and MSP-SEOCGIS2@michigan.gov**

Please find attached the full list of residential results through the date listed above (5 attachments). Please note that this version includes concentrations in ppb and the street number is separated from street name to make it easier to find the address. Also, there are pdfs of the two worksheets for people who don't have Microsoft office. All have been prepped for the web minus the naming convention that is usually used. I will follow this format going forward. **If I fail to do that then please let me know**:

1. For the accordion on the lower left under the title "School and Residential Testing Results, the following are to Replace current and renamed to end with this date of February 5, 2016 (3 attachments):

   Asset # 512083 – February 5 2016 Test Results Flint.xlsx
   Asset# 512511 – February 5 2016 Test Results Flint_Sorted By Address.pdf
   Asset# 512510 – February 5 2016 Test Results Flint_Sorted by Lead Concentration.pdf

2. For the same accordion underneath the DEQ reports to EPA, The Test Results Flint DEQ Reports to the EPA Asset needs updating (1 attachment):

   Asset# 512820 - February 5 2016 Test Results Flint_DEQ Reports to the EPA.xlsx

3. The following is for the MSP-SEOCGIS for geocoding (1 attachment) and not prepped for the web; Please send to **MSP-SEOCGIS@michigan.gov and MSP-SEOCGIS2@michigan.gov**

   February 5 2016 Test Results Flint_For MSP-SEOCGIS.xlsx

Please note that the results are for all samples reported out through today February 5, 2016 in all documents. In addition, the workbooks (XLSX) contains two tabs: One has the data sorted by Lead concentration and the other is sorted by address.

Posting this data in a timely manner upon approval from the Governor's office is of the essence so that we can comply with the order issued by EPA.

Please post this to the website ASAP and make sure that all are posted so that people can look at the version that they are interested in.

Thank you!!!

Susan

Hi Liz,

As you are aware, Al will be switching activities to school sampling tomorrow. Accordingly, we will need to swap someone else in for Al to fill the role of accompanying EPA on the High Lead Strike Team. Please let me know if you have a DEQ resource that can backfill in place of Al starting at 0800 tomorrow at 1300 Bluff St., Flint. Same assignment tasks. General field observation and sampling skills are needed, no specialized skills required, and no DEQ attire to be displayed in the community.

Please contact me if you have any questions.

Subject: RE: Document posting through the ECC

This is a great plan. Once the SEOC deactivates, I would only suggest that MSP be consulted to ensure that Trevor can remain as the third backup.

Is this effective immediately? I only ask because Scott Sarka and I are tweaking the website today. Residential water test Reports are posted not only under the tab "DEQ reports to EPA", but also under the Residential Water Test link. We're moving those to a new tab for school and residential test results. This is where the report WITH the addresses should be posted.

If I've confused the issue, then maybe it's best to keep Trevor posting through this weekend, and he can get with Darlene and Eric early next week.

Regards,
Meegan

Subject: Document posting through the ECC

All:

In order to ensure timely and compliant document posting under the EPA Order, the DEQ and the ECC are being given the authority to post documents directly to the Flint water website. The following individuals already have administrative access to the website. They will assume responsibility for document posting.

Primary: Darlene Harris (DEQ)
Back-up: Eric Shaw (DEQ)
Second back-up: Trevor Hawks (MSP)

These individuals either have the tools they need to post at various times of day and night as well as on the weekends, or they will be given the tools, including VPN access and cell phones as needed. Their sole responsibility for this purpose will be to post documents to the Flint Water website that comply with the EPA Order. Meegan Holland in the governor's office and her designees are responsible for all other aspects of the website.

Thanks, and please let me know if you have any questions.

Subject: EPA Web Posting - Status

We wanted to provide a quick status update on the status of the information that must be posted to the website today in order to comply with the EPA Order. The information has been received by the ECC and will be reviewed/prepped for posting on the website within the next hour or so. The documents will then be sent to the Agency PIO (Nicole Colberg) for review. Nicole will then work with the appropriate staff for it to be posted. Per the suggestion and approval of the Governor's Office, we are working to set up DEQ staff to upload the documents to the website. We believe this should be completed in time for them to post the documents today. However, we would like to ensure that Trevor is available as a backup to post this information if it is necessary.

Thank you.

WHO: MSP-EOC-MDEQ

DEADLINE: 3:00 p.m. TODAY

Liz Browne has requested that the MDEQ-ECC-IMT help coordinate getting the 12 iPads that are currently located at the CEOC (Liz spoke with Mark Ducharme) back here to the MDEQ-ECC this afternoon by close of business. There are currently MDEQ staff assisting in Flint at the EOC who can bring them back this afternoon.

Thank you,

MDEQ-ECC-IMT

Thanks Mark,

That's why I try real hard to copy anyone I can think of on these sorts of things. Sometimes it works, sometimes, not so much...

Thanks again!!!
George

Subject: RE: Re-reporting in the simplified format

Hi George,

We put a resource request into the SEOC earlier today for 4 data entry technicians to help get the backlog eliminated. MSP SEOC Logistics should be working it already. Wanted you to be aware so the SEOC is not working duplicative requests. Let me know if you have any questions. Thank you.

Subject: Re-reporting in the simplified format
Importance: High

Hi Bob,

I met with Mike Glasgow at the City of Flint today and we have a process worked out to address the issue of re-reporting samples that were done using the compliance report format. I will be making a resource request to the SEOC to provide 4 clerical staff to the Flint Water Treatment Plant starting next Monday, February 8, 2016. The primary task will be to ensure that there is no backlog with respect to first time test reports and then those resources will be directed to re-

report samples that were reported out on the compliance format. We will go back to October 2, 2015 which is when the State instituted its free lead testing program.

Mike indicated that the city already has a database of addresses from the first time that results were sent out, so in addition to saving a considerable amount of time by mailing them from Flint instead of Lansing, we will also save some time due to the database that they have begun.

Mike,
You and I will need to monitor this very closely and make adjustments should the need arise.

MSP-EOC-MDEQ,
By copy of this email I am formally requesting that the above mentioned resources be provided to the Flint Water Treatment Plant effective next Monday February 8, 2016

Julie,
Please coordinate with the WTP so that they are aware which e-mails contain first time reports and which are re-reports.

Thanks to all!
George

That makes sense.

The message I have been heard from folks here is that there are:

- 4 EPA teams: 1 strike team (dealing with rashes) and 3 sequential sampling teams
- 1 GCHD team: responding to residences with 150 ppb water sample results and providing public health info and commodities
- 1 DEQ team: as Mark described in the note below

Captain Kelenske spoke with the Governor this morning. Richard Baird has informed the Governor that the DEQ has 5 teams of 4 in Flint now. Please provide clarification ASAP. Our knowledge in the SEOC is DEQ has one team of two (1 DEQ/1 DHHS).

Are there any additional team currently deployed in Flint that we are unaware of?

1. Do we know what % of the city's population has turned in their testing kits?

2. And do we know the % of the city's Latino population that has turned in their testing kits?
    a. Related: Is the information about testing kits provided in English and Spanish?
    Information palm cards have been translated and are located on the main Flint Water webpage (www.michigan.gov/flintwater). The palm cards have (so far) been translated into Spanish, Arabic and Mandarin. The translations are on the bottom right of the webpage.

3. DEQ and DHHS are visiting homes whose lead levels are above 150ppb.
    a. Are staff bringing interpreters with them as needed?
    b. What is the policy, if there is one, about checking ID and regarding working with the undocumented population?

Flint residents are encouraged to visit five water resource sites across the city, where they can receive free bottled water, filters, water replacement cartridges and water testing kits. Identification is not required to receive any of these resources. The state's goal is to get a water filter in every household, because filters are the best way to provide access to safe drinking water. As part of the distribution process, members of the National Guard at the water resource sites ask residents seeking filters and replacement cartridges to share their address in order to more accurately gather information for long-term recovery efforts. No resident will be denied resources if an address is not provided.

Also, the Genesee County Sheriff's Department is actively reaching out and working with various organizations to address these issues and assure undocumented workers that they will not be arrested or deported. He is working in conjunction with Our Lady of Guadalupe Church in Flint. He is also reaching out to the media to try to quash the rumors and provide facts.

Subject: sample pickup on the weekends in Flint

I just spoke with the wonderful DOC truck drivers that drops off the Flint samples everyday.
He picks up samples from the Flint water treatment plant M-F at about 9am and City hall about 11:30am with the fire stations in between.
He DOES NOT pick up at the treatment plant or city hall on the weekends because they are closed.
This means if a resident drops off a sample on Friday after he has picked up samples, the sample sits all weekend until it is picked up on Monday.
This delays the results by 3 days for those residents. I suggest any samples left on Fridays at the treatment plant or city hall be brought to a fire station so they are brought to the lab on Saturday.

Cc: MSP-EOC-MDEQ; Sygo, Jim (DEQ)
Subject: Data Entry Assistance to Flint Water Plant

I contacted Melanie, Flint Water Plant, to inquire about the level of volunteer clerical assistance they are receiving and whether that assistance is effective to help the city mail the results within one day of receipt of results. Melanie informed me that one of the volunteers in particular is working out well. However, when I inquired on where they are with progress, I was surprised to hear they have about 4,000 to 6,000 letters to get out. I asked pace and she responded a couple hundred a day and she thought she was about 6 weeks out. She made a few suggestions on what might speed the pace going forward, but I gather she may not understand the urgency to get these out.

My suggestion is for me to put a resource request in the SEOC to get her some data entry tech assistance, whether on site or off-site (up the IT folks), to eliminate the backlog and establish a maintenance program going forward. Thoughts?

This is based on something I think I heard George say, in that our goal is to help the city get the results mailed to residents within one day of receipt of results. Please confirm. If this is correct, we'll work it and get it done. Thank you.

I will follow this format going forward. If I fail to do that then please let me know:
1. For the web page http://www.michigan.gov/flintwater/0,6092,7-345-75251_75373---,00.html , found under the accordion lower left "Keeping lead out: Water Test Results and Reports"/ "Keeping lead out of the home: Tips and Residential Water Test Results", the following are to Replace current and renamed in the content page to end with this date of February 4, 2016 (3 attachments):
Asset # 512083 – February 4 2016 Test Results Flint.xlsx
Asset# 512511 – February 4 2016 Test Results Flint_Sorted By Address.pdf
Asset# 512510 – February 4 2016 Test Results Flint_Sorted by Lead Concentration.pdf
2. For the same accordion underneath the DEQ reports to EPA, The Test Results Flint DEQ Reports to the EPA Asset needs updating (1 attachment):
Asset# 512820 - February 4 2016 Test Results Flint_DEQ Reports to the EPA.xlsx
3. The following is for the MSP-SEOCGIS for geocoding (1 attachment) and not prepped for the web:

February 4 2016 Test Results Flint_For MSP-SEOCGIS.xlsx
Please note that the results are for all samples reported out through today February 4, 2016 in all documents. In addition, the workbooks (XLSX) contains two tabs: One has the data sorted by Lead concentration and the other is sorted by address.
Posting this data in a timely manner upon approval from the Governor's office is of the essence so that we can comply with the order issued by EPA.
Please post this to the website ASAP upon approval of the Governor's office and make sure that all are posted so that people can look at the version that they are interested in.
Thank you!!!

Subject: Re: RESIDENTS

Also discussed with lab staff answering calls, that some residents of Flint have submitted multiple home samples such as kitchen and bath. Is it possible to add a column for the sampling point on the results that are getting posted to the web. This is a data coded field. Residents may be seeing varied lead levels between two different sampling points in their homes, and these can't be distinguished currently based on what's posted.

Thanks!

Subject: RESIDENTS

I wanted to touch base and let you know we are still receiving calls from Flint residents regarding their lead/copper testing. Every customer I have spoken with had informed me that Melonie told them to call us. I spoke with two residents today that stated they received DEQ Drinking Water Lab business cards and were told to call the number on the card. I had spoken with Melonie and she did state she had been given out our information and told the residents to call us. She also informed me that she was behind on sending out the reports and was working mostly by herself. I cannot imagine the workload she is trying to accomplish. However there is a lot of concern. The residents I have spoken with are getting frustrated. Not all residents have internet to check the results and have expressed frustration on given a phone number to call just to get another number to call. Some residents need help to interpret the result and a couple of residents just want confirmation the report is their report.

Also discussed with lab staff answering calls, that some residents of Flint have submitted multiple home samples such as kitchen and bath. Is it possible to add a column for the sampling point on the results that are getting posted to the

web. This is a data coded field. Residents may be seeing varied lead levels between two different sampling points in their homes, and these can't be distinguished currently based on what's posted.

Thanks!

Kirby

Subject: RESIDENTS

I wanted to touch base and let you know we are still receiving calls from Flint residents regarding their lead/copper testing. Every customer I have spoken with had informed me that Melonie told them to call us. I spoke with two residents today that stated they received DEQ Drinking Water Lab business cards and were told to call the number on the card. I had spoken with Melonie and she did state she had been given out our information and told the residents to call us. She also informed me that she was behind on sending out the reports and was working mostly by herself. I cannot imagine the workload she is trying to accomplish. However there is a lot of concern. The residents I have spoken with are getting frustrated. Not all residents have internet to check the results and have expressed frustration on given a phone number to call just to get another number to call. Some residents need help to interpret the result and a couple of residents just want confirmation the report is their report.

Mitch,

In speaking with others in the room here at the ECC we all do not have the exact same recollection of the request you have forwarded to the MSP. It appears the way your request to MSP GIS is worded that the Franchise Parcels that are on the Flint Water System would be excluded from the maps. We need to seek clarity and direction from the scientific staff on this to ensure there is agreement on this issue. I have carbon copied Bryce Feighner, Liz Brown and Dan Lord on this issue to seek their input before implementation of the request.

Thank you,

Subject: Flint water in schools - proposed teleconference for 3pm on Friday

Hello

I am trying to schedule a teleconference between MDARD, the Genesee County Health Department, MDE, and someone from LARA who is working with DEQ (NEED DEQ/LARA NAMES AND CONTACT INFO ASAP FROM SOMEONE) on water investigation at Flint schools for tomorrow at 3pm to discuss the following:

1) Which agency is responsible for water sampling at which Flint school (I understand that LARA is working with DEQ on conducting water sampling at the schools in the attached spreadsheet – MDARD needs to verify so we can drop them from our list, if needed;

2) Getting a list of private/parochial/charter schools NOT being sampled by LARA/DEQ, so MDARD can conduct sampling. (the attached list is confusing, because it appears that there are some parochial, non-public schools, ie St. Paul Lutheran, St. John Vianney School are ON this list being done by LARA.)

3) MDARD is NOT conducting sampling like DEQ/LARA sampling (we only pull one sample from the food service area). Should ALL schools be sampled by DEQ/LARA because it is more comprehensive?

I need to hear back from everyone right away so I can send out the appointment and get us coordinating this issue before it gets more complicated.

If we are getting questions and there is an easy fix as long as the lab sample report can accommodate the added data it makes perfect sense to me. It will also inform us as we are contacting some of these people as to where they took their sample(s).

That being said George has indicated some level of concern with us changing the forms too often. I will let him weigh in.

I am copying Susan Norton and Deb Mackenzie Taylor so they are aware of this discussion.

Subject: Re: RESIDENTS

Also discussed with lab staff answering calls, that some residents of Flint have submitted multiple home samples such as kitchen and bath. Is it possible to add a column for the sampling point on the results that are getting posted to the web. This is a data coded field. Residents may be seeing varied lead levels between two different sampling points in their homes, and these can't be distinguished currently based on what's posted.

Thanks!
Kirby

Subject: RESIDENTS

I wanted to touch base and let you know we are still receiving calls from Flint residents regarding their lead/copper testing. Every customer I have spoken with had informed me that Melonie told them to call us. I spoke with two residents today that stated they received DEQ Drinking Water Lab business cards and were told to call the number on the card. I had spoken with Melonie and she did state she had been given out our information and told the residents to call us. She also informed me that she was behind on sending out the reports and was working mostly by herself. I cannot imagine the workload she is trying to accomplish. However there is a lot of concern. The residents I have spoken with are getting frustrated. Not all residents have internet to check the results and have expressed frustration on given a phone number to call just to get another number to call. Some residents need help to interpret the result and a couple of residents just want confirmation the report is their report.

Subject: Flint water in schools - proposed teleconference for 3pm on Friday

Hello

I am trying to schedule a teleconference between MDARD, the Genesee County Health Department, MDE, and someone from LARA who is working with DEQ (NEED DEQ/LARA NAMES AND CONTACT INFO ASAP FROM SOMEONE) on water investigation at Flint schools for tomorrow at 3pm to discuss the following:

1) Which agency is responsible for water sampling at which Flint school (I understand that LARA is working with DEQ on conducting water sampling at the schools in the attached spreadsheet – MDARD needs to verify so we can drop them from our list, if needed;

2) Getting a list of private/parochial/charter schools NOT being sampled by LARA/DEQ, so MDARD can conduct sampling. (the attached list is confusing, because it appears that there are some parochial, non-public schools, ie St. Paul Lutheran, St. John Vianney School are ON this list being done by LARA.)

3) MDARD is NOT conducting sampling like DEQ/LARA sampling (we only pull one sample from the food service area). Should ALL schools be sampled by DEQ/LARA because it is more comprehensive?

I need to hear back from everyone right away so I can send out the appointment and get us coordinating this issue before it gets more complicated.

Subject: RE: MDEQ High Lead Task Force Teams Clarification Required ASAP

I asked for and attended a meeting in the GCHD office this morning at 10:00 am. The purpose of the meeting was to provide coordination amongst the various federal, state and local entities that were reaching out to occupants at addresses where high lead and/or copper water results have been reported. I had not seen the DEQ plan until this morning.

Jim Henry, GCHD, had been reaching out to these addresses, but as of this morning there were 49 discrete addresses on the list and he is no longer able to reach them all. EPA and ATSDR/NCEH resources in Flint have been working with Jim to contact the occupants with some assistance from my staff in HHS Division of Environmental Health since last Friday 1/29/16.

ATSDR/NCEH have developed a spreadsheet to track these activities and reported that they were able to make person-to-person contact with 56% of the 49 addresses. Informational materials were left at the addresses where no one answered the door.

When the EPA teams are able to gain access, they collect water samples of 1) filtered water through the filter in use, 2) unfiltered tap water. They give the resident a new filter and return the next day to collect another filtered water sample. The health advice is the same as on the DEQ lab report: where lead levels > 150 ppb, pregnant women and infants should drink bottled water until we can further evaluate the efficacy of the filters. EPA believes (and may report today) that the high levels are associated with particulate matter in the aerators.

I talked with Kory earlier and he is with Robin Oeming, DEQ. They had visited 2 homes, at least one of which had not had person-to-person contact from an EPA team.

I am not aware of the plans for blood testing other than we will encourage the residents to get tested.

MDHHS Lead Safe Homes Program intends to offer these residents a full lead inspection such as we provide for families of elevated blood lead (EBL) children. That includes at least 14 tap water samples, plus lead dust, paint, soil inspections as well as household items that could contain lead. If we include plumbing replacements, we'll need licensed plumber to work under the direction of certified lead abatement

contractors. We may need consultation with LARA on this but have not yet engaged them. It is vitally important that all lead abatement work be done in accordance with state and federal regulations to ensure the safety of the residents, workers, and the public.

Importance: High

Linda and Bryce,

The SEOC understands that you were in a meeting together today in Flint and discussed the contacts that have been made to homes that tested over 150 ppb. Other Federal and local and state agencies may have been at this meeting as well. We were informed that Jim Henry was also at this meeting and provided information as to the local outreach that has already been conducted. We have been informed that Jim Henry reported that all of the homes have been contacted. Dr. Scott reported that Jim said that 56% of the homes had 1:1 contact and the rest had information left on the door. Apparently the message has been, "Drink out of water bottles, and how to get water sampled. There was also a question regarding the number of children in the home and questions about rashes. The information also included encouraging residents to be tested."

We have received information that there is concern in the community about the number of teams visiting these homes. Please let us know in the SEOC what your plans are moving forward. Let us know what coordination is going on with the EPA as we have also been informed that MDEQ has a team member on the EPA teams and that Kory was assigned to an EPA team. We were under the impression that Kory was with the MDEQ Team.

Please coordinate efforts and report to the SEOC what the true situation in the field is and the plans moving forward. We do not want to complicate something that you have already worked out and we may just not know about since your meeting this morning.

If the plan includes a plumber, LARA needs to be aware of this as well. There are concerns about the scope of work of the plumbers for these teams.

I let Kory know that if residents need a ride to get blood testing, that we will make arrangements for this. The Local EOC is working to obtain bus passes, and individuals who are on Medicaid can also obtain free transportation. This should be included in your plan.

Thank you for all of your hard work.

Respectfully,
Kathy Wahl, MDHHS EMC

Subject: FW: RESIDENTS COntacting DEQ Lab for Results

Mark & Chris

Please see notes from DEQ Lab below. It is counter-productive for the City to be referring local residents to the DEQ lab to inquire about sample results, as we have limited resources which we need to focus on receiving, analyzing and reporting sample results, which get forwarded to the City timely. If you need additional resources that can't be met at the local level, and the additional resources we provided earlier are insufficient, please submit another resource request so that we can help in that way. Thanks!

Mitch

Subject: FW: RESIDENTS

FYI – Based on our phone call today regarding the Lab getting calls about sample results. Sounds like Melanie at the City of Flint is directing residents to call the lab. She may need more assistance getting reports mailed out. Is there a number the residents should be calling to get test results other than the lab, like a hotline, where someone can quickly pull up there address to locate a test result quickly? See Tandem's note below.

Thanks!

Subject: RESIDENTS

I wanted to touch base and let you know we are still receiving calls from Flint residents regarding their lead/copper testing. Every customer I have spoken with had informed me that Melonie told them to call us. I spoke with two residents today that stated they received DEQ Drinking Water Lab business cards and were told to call the number on the card. I had spoken with Melonie and she did state she had been given out our information and told the residents to call us. She also informed me that she was behind on sending out the reports and was working mostly by herself. I cannot imagine the workload she is trying to accomplish. However there is a lot of concern. The residents I have spoken with are getting frustrated. Not all residents have internet to check the results and have expressed frustration on given a phone number to call just to get another number to call. Some residents need help to interpret the result and a couple of residents just want confirmation the report is their report.

Subject: RE: Residential samples>100 ppb lead

Hi Julia

I need to double check something. Is there a chance that two sample results > 100ppb were reported on 2/3/2016 that you didn't have a chance to copy us on? We have two notes from you today with sample results > 100 ppb. Only one of those results, Sample # LG07032, is > 150. The other two results > 100 we got copied on are sample #'s: LG07601 & LG07654.

When we got the spreadsheet with results through today, two other samples for which we don't have the note from you have concentrations > 100: i.e. sample #'s LG07383 & LG07364.

No big deal if you couldn't get us that note with the latter 2 sample results before you left today, we're just wanting to make sure that the numbers that we report to the Governor are solid. Thanks!

Mitch

Subject: Resource Request for DEQ Staff for HIGH LEAD INITIAL VISIT PLAN for TODAY, 2/4/2016
Importance: High

UPDATE: Given some uncertainty about what role the plumbers are to play on the **High Lead Response Task Force (i.e. # 4 in the Plan)** the plumbers are demobilizing today and we are now asking for just the identification of a the DEQ person that will be on the Task Force. This person should be on standby to mobilize yet today including tomorrow.

The DHHS resource that is now in Flint will now accompany the Initial Outreach Team.

DuCharme with Local EOC advises that plumber (DLARA), and MDHHS SEOC advises that DHHS staff will be on-site today and prepared to begin the High Lead Response Task Force follow-up visits (#4 in the attached plan) after the Initial Outreach Team in the "High Lead Initial Visit Plan". He's requesting a DEQ staff person, in addition to Al Taylor who's on the Initial Visit team, to accompany DLARA and DHHS for the High Lead Response Task Force.

Please advise on availability.

DHHS staff will report to the EOC at 1101 Beach St at 11:30.

I see a correction that may need to be made. 5.b. indicates test results greater than 150ppb are emailed to MDHHS.

Residential sample results greater than 100ppb are emailed. Was this the process that was to be described or was it the intent to say 150ppb?

Sample numbers LG07364 and LG07383 are samples for MDARD, not residential. That is why they did not appear on the spreadsheet. Do you need notification of these as well? The reports were sent to MDARD.

Subject: RE: Residential samples>100 ppb lead

Hi Julia

I need to double check something. Is there a chance that two sample results > 100ppb were reported on 2/3/2016 that you didn't have a chance to copy us on? We have two notes from you today with sample results > 100 ppb. Only one of those results, Sample # LG07032, is > 150. The other two results > 100 we got copied on are sample #'s: LG07601 & LG07654.

When we got the spreadsheet with results through today, two other samples for which we don't have the note from you have concentrations > 100: i.e. sample #'s LG07383 & LG07364.

No big deal if you couldn't get us that note with the latter 2 sample results before you left today, we're just wanting to make sure that the numbers that we report to the Governor are solid. Thanks!

Mitch

Director Creagh will be discussing with Director Lyon.

This was information, and direction for both agencies, that came out of a conversation with the Governor's office staff late yesterday and had to be turned around by 7:30 PM last night.

I see a correction that may need to be made. 5.b. indicates test results greater than 150ppb are emailed to MDHHS.

Residential sample results greater than 100ppb are emailed. Was this the process that was to be described or was it the intent to say 150ppb?

Please see the attached documents below. These are what came out of yesterday's conversations with the governor's office and they outline the associated home outreach between DEQ and DHHS. They should be shared with the appropriate staff that are beginning to go door-to-door today with the various strikeforce teams. These are high-level guiding documents that we can discuss in more detail as needed this morning.

Thank you!

Subject: RE: FTP Site - File Transfer of PII to EPA

FYI

Talked to Heather Shoven again, she was asked to set up an FTP site on her side and they were waiting for us to upload to the EPA FTP site. I discussed with Heather that DTMB had set up a secure FTP site for this transfer and that we upload the files to that site. So there was a cross communication issue.

Heather is going to contact Loren Denton with EPA, who was provided the log-in and password for the DEQ FTP site, and download files from DEQ site.

She will follow-up if there are additional issues.

George:

We at the SEOC-DEQ agree. We've been asked to provide that breakdown by the Governor's office, and have asked them to keep those statistics for internal use only, due to the potential for people to derive some meaning that doesn't exist.

FYI, after the below summary was sent, they asked for and we provided the # >100 ppb: 78 (1%)

Thanks

Mitch

Thank you

We probably do not need to keep track of 5-15 and over 30 ranges

Each range has an implication associated with it

I do want to emphasize that I appreciate everything you guys are doing

Thanks again!
George

Al Taylor will be the person for tomorrow. Taylora@michigan.gov and 517-614-7335.

Please provide summary of expectations for his assignment.

Will resources be needed beyond Friday?

Subject: Flint Response Badges

USEPA contacted me to inquire if the Flint Response Badges that were provided last week (the same badges the volunteer canvassing teams used) are copyright protected? They would like to reproduce the badge image in the sit rep but don't want to violate copyrights if there are any. Please inquire as appropriate in the SEOC and advise accordingly. Thank you.

Per note below, GM in Flint has some R&D folks with ideas around the quality and performance and may be able to offer support.

Is this something the ECC (Public Health Group?) can please follow up on and let us know if any recommendations ensue? Thanks!

Subject: RE: GM Warehousing Space

Hello, Jay how are you?
I know you are very busy however, I have two questions.

1) Have you had conversations with our two facilities representatives relative to the warehousing space? Do you need anything additional I can help with. Again, I just ask to be kept in the loop as I coordinate our organizational response.

2) Finally, our R&D team has some interest around assisting with water filters, not necessarily acqurining them, but, they have ideas around the quality and performance and may be able to offer support. Is there a contact on the Emergency Operations Team that you could connect me with?

Thank you!
Karen

Hello Karen,

Jamie Gaskin looped me into an email from you on warehouse space in the Flint area that we may be able to use.

I have some background questions I need answers to. Are you available to talk sometime this afternoon? I am able to accommodate any time.

Thank you,

Jay Eickholt

Thank you

We probably do not need to keep track of 5-15 and over 30 ranges

Each range has an implication associated with it

I do want to emphasize that I appreciate everything you guys are doing

Thanks again!
George

To: MSP-EOC-MDEQ
Subject: RE: Today's Lead Results Greater Than 100 ppb

Mitch:

Let's upload today's water test results into a map. We need to include this map in the Governor's briefing.

- City divided into zip codes
- Data points placed on parcels to indicate the following:
  - Results over 15ppb
  - Results over 30ppb
  - Results over 100ppb
  - Results over 150ppb
  - Results over 500ppb

Thanks,
Ben

Cc: Sobieski, Sue (DNR); MDEQ-ECC-IMT; MSP-EOC-MDCH
Subject: Today's Lead Results Greater Than 100 ppb

Per the attached from the DEQ lab, today we had 3 results above 100 parts per billion (ppb):

Lead	1,234 ppb	48503
Lead	115 ppb	48503
Lead	1,231 ppb	48503

These numbers will be included in the spreadsheet that gets posted to the web this evening.

Mitch

Subject: Conf Call - High Lead Level Task Force

As agreed on this morning for the 1100 call, we will conduct a follow up call this afternoon at 4:30 PM.

Agenda

- GCHD Report: Number of homes visited with >150 ppb
- The process that will be used beginning tomorrow including:
  - team composition
  - how the home dwellers will be notified
  - Finalize what documents will be provided by MDHHS for the visits
  - Other resource needs for the teams
- Begin thinking about homes with ≥ 100 ppb

Subject: Water Donations

Follow Up Flag: Follow up
Flag Status: Flagged

Hi Jen

A local pastor stopped by the DTMB warehouse today and said they have 5 pallets of water bottles they'd like to donate to Flint, but aren't sure how to get it there. Is there some place where people can drop off water bottles here in Lansing for the Flint residents? If not, Keith Hawes offered to take them on Monday since he has a crew going to the Flint State Office Building on that day if that's an option. And if that is a solution, he'd need to know where to take them once they get to Flint.

Thanks

Subject: Water Purifier Co. Inquiry

April,

I was contacted by Ms. Lin Gul of Blue Water Co., Kansas City 913-593-3115. According to Ms. Gul, their company donated water purifiers to:

Catholic Charities of Shiawassee & Genesee Co.
901 Chippewa
Flint 48503

And

Shelter of Flint
605 North Saginaw St.
Flint 48502

They are alleging the inspector is sampling improperly and that the water should be testing at acceptable levels for lead.

We do not have these operations on our 'to do' list. Any assistance would be appreciated.

Subject: Re: Information clarification

Currently we do not seem to have a unified voice on this and we need to all agree on the numbers

DHHS needs to take the lead on this as my recommendation would be for bottled water for formula regardless of the lead level but that may run contrary to what current health recommendations are statewide and the health experts should direct this.

From: Ducharme, Mark (DEQ)
Sent: Wednesday, February 03, 2016 10:58 AM
To: MSP-EOC-MDEQ
Subject: RE: Need Answer for EPA Resident Contact

Breakdown of observations reported by Robin Oeming:

- January 25, 2016 – Chlorine testing four locations – Rite Aid, University Market, Salem Housing Office, and McDonalds on Stuart. Addresses not provided but should be able to be obtained.
- January 26, 2016 – picked up bottles from state lab and delivered to EPA in preparation of testing
- January 27, 2016 – logistical supply assistance and delivery of EPA collected samples to UPS for shipment to EPA laboratory
- January 28, 2016 – identified four high lead homes, but haven't been visited yet
- February 1, 2016 – Chlorine testing at 1829 Delaware (E. Side Mission) and 1917 Delaware (E. Side Mission different building). Sequential sampling at Saints of God Church (Forrest Ave.)
- February 2, 2016 – half day of briefings and meetings, no field activities
- February 3, 2016 – logistical assistance, planning for high lead home strike team, discussion on starting up recycling program (advised Oeming that recycling program initiated and GC EOC will get plastic water recycling bags and recycling information to EPA Command Post).

I've also requested an update from Oeming prior to 1530 each day and I'll provide to MSP-EOC-MDEQ for daily sit rep. Contact me if you have questions. Thank you.

Subject: FW: High Lead Home Strike Team

A conference call took place yesterday afternoon where brainstorming for the development a team to include EPAs Strike Team, DHHS, DEQ and a plumber would fulfill the need to address all of the residents need rather than operating independently. Initially the Jeff Lippert, (See EPA Org Chart) thought this could work. He then called me directly and advised the UCG, specifically the EPA representative, Mark Durno, declined offering an alternative. I requested Jeff to email me with the response which is below. EPAs Strike Teams consist of 3 personnel. 2 EPA and 1 DEQ (Observer). The joint team proposal was for a four member team: 1 EPA, 1 DEQ, 1 DHHS, 1 Plumber.

Subject: High Lead Home Strike Team

Jen,

EPA feels that having a large strike team show up at a resident's home who may have not even received their sample results yet, would be overwhelming.

EPA proposes the following:

EPA continues to schedule high lead home visits to offer sampling of the water from their filter. While we are there and conducting our filter pilot sampling, we offer them the services of the State Strike Team, which would include those services the State would like to bring to the table, including plumbers, health professionals, bottled water delivery, etc. If the resident agrees, we can call in the State Strike Team who will respond with these services.

Subject: EPA SitReps

Attached are SitReps from EPA. Note in SitRep 11 in Operations it states they coordinated with DEQ & DHHS. The Strike Team is part of the Water Branch, not very detailed here but Jeff Lippert advised their process as follows:

Diane Russell, EPA Community Involvement would attempt to locate contact information for residents and schedule testing with the Strike Force. If unable to locate contact information they would conduct a knock and talk, requesting to sample filtered water. This would be done by use of a Hach test. They would attempt to mitigate high levels of lead by cleaning aerators and inspecting any whole home filters to determine if their were immediate sources of lead that could be removed. If unable to mitigate high lead levels they would draw a sample for analysis in the EPA laboratory.

Met with Tony Voirin, US Dept. HHS, as follow up to their request for DEQ participation in the Federal Unified Coordination Group (UCG). Purpose of the meeting was to understand what they are asking of DEQ, expectations, time commitment, and role(s). In short, they are asking for DEQ to participate in UCG meetings/calls at 0830 each day (0900 this Sunday). They also want DEQ to participate as a Liaison. On M, W, and F, the UCG will include discussion of objectives and they also requested DEQ participation in command and general staff meetings and tactics to assist in the production of an incident action plan (IAP), but only from the perspective of listening to make sure their tactics don't interfere with any tactics the DEQ may implement rather than incorporating DEQ tactics. They expect to wrap up with tactics by noon on M, W, and F.

I responded that I would inform DEQ leadership of the specifics of their request and asked if they could provide a copy of the UCG call information, meeting schedule, and current operational period IAP, which they provided.

From a prior email, I understand Chief Deputy Director Sygo will participate in the UCG meeting/call tomorrow.

Please contact me at if you have any questions.

Subject: RE: Urgent Request

Hi Dave,

I am checking with Mark Ducharme. We appreciate the strong support from the Red Cross and all the great volunteers! However, logistically, I do not think we could use that many volunteers to assemble the kits. Based on our storage and work space limitations; I think about 50 volunteers is the maximum we could use to assemble water sampling kits and that is only my opinion.

I am waiting to hear from Mark Ducharme on the logistics on our end to see if we can make this work today or not.

Thanks again for all the great help!

Subject: RE: Flint Water - MSHDA Housing Choice Voucher Program

MSP/SEOC team,

We have a landlord that needs a referral to someone that can advise him on further lead reducing systems beyond the faucet filters. The family that resides in his unit has small children that have degraded health conditions that may be due to lead exposure. He has had the water tested a few times, but we are not equipped to advise him on test results or further remediation actions.

Can you please let me know who he should contact for guidance with this kind of situation?

Thank you for your help, Kelly

Subject: RE: Flint Water - MSHDA Housing Choice Voucher Program

Thank you Wendy. Per Lisa it appears that the "lobby drop offs" you referenced occurred prior to MSHDA's direct involvement in the deliveries/installations, and were coordinated with the building managers. When MSHDA learned that some of the managers were not promptly installing our team took steps to install and deliver ourselves. There were some units that were not responsive which did not receive filters, and those filters were left with the property managers.

If any of the above is inconsistent with your understanding of the situation, please let me know. It is important to me that we verify proper distribution of the filters to MSHDA properties.

Subject: RE: Flint Water - MSHDA Housing Choice Voucher Program

Tori:

I don't mean to question your information. However, I'd be interested to know where this occurred since I personally oversaw the installation and distribution of most of these filters, delivered hundreds and installed nearly 50 myself. If there was a break in our system I'd like to know where it occurred so it can be prevented in the future. Which property or properties are you speaking of?

Kevin Elsenheimer
Executive Director, MSHDA

Subject: RE: Flint Water - MSHDA Housing Choice Voucher Program

Good morning everyone,

Yes, we can help with this. However, there was some confusion with the original filter delivery. We asked that each resident personally be handed or install a filter, but later determined they were dropped off in the lobby and many didn't get theirs and we ended up sending a few hundred more. Can we ensure that this doesn't happen with the replacement cartridges? It is imperative that we reach every resident. Thanks for your help and understanding.

Please let me know when you would like to pick them up or if you need them delivered, to where? Also, please send me the point of contact information.

Thanks so much everyone,
Wendy

Hi Lisa,

This request should be made to the MSP Logistics desk, also on this email.

Logistics – Can you follow up?

Thanks,
Tori

Subject: RE: Flint Water - MSHDA Housing Choice Voucher Program

Good morning,

I have included everyone from the original January 13, 2016 dialogue in the hopes that I am reaching out the proper individuals to assist us with our current request. If I am not, please direct me to the proper people and I will reach out to them.

Brian Mills, CEO of MSHDA, was able to secure approximately 3,000 filters from MSP on 1/15/16. Those filters were installed in MSHDA funded rental properties (approximately 1,400 units) and distributed to HUD funded Housing Choice Voucher Program participants and landlords for installation in their rental properties (approximately 600). We appreciate that the Governor's office and MSP logistics aided us in this successful effort by providing the water filters. Now that the filters have been distributed, the next step is proper maintenance of those filters to ensure continued efforts towards health and safety are met.

We are requesting that the Governor's office and MSP logistics provide MSHDA with 1,2000 replacement cartridges (2 per household) for our Housing Choice Voucher program households. Our office began inspecting HCV rental properties yesterday to verify proper installation of the water filters and those inspections will continue throughout the month. If we can obtain these cartridges from you today, we can make sure that 2 filters are provided to each household during these inspections. The households we inspected yesterday and today would be revisited to provide them with this important resource.

Please let me know the steps you require from MSHDA to obtain these 1,200 replacement cartridges from your offices. We would like to begin distributing them to our Flint families as early as tomorrow.

Thank you.

Subject: FW: Flint Water - MSHDA Housing Choice Voucher Program

Logistics - Please see below. This should be a top priority to ensure water filters are available for these housing units. Also, please assist in providing Director Elsenheimer, cc'd here, the information his representative should know in regards to SEOC operations.

Peggy - All city of Flint residents should be using water filters or bottled water for drinking and cooking purposes. There are 5 fire stations that are open from 9am - 9pm distributing water filters, bottled water, refill cartridges for the filters and water testing kits. Their locations along with more information can be found here: http://mi.gov/deq/0,4561,7-135-3313_3675_73946---,00.html

The MSP logistics folks will take the lead from here.

Thank you,

Subject: Flint Water - MSHDA Housing Choice Voucher Program

Good Afternoon Laura,

Thank you for talking with me this morning regarding the water situation in Flint. I work with MSHDA's Housing Choice Voucher Program (formerly called Section 8). MSHDA subsidizes approximately 800 rental units in Flint. Approximately 90 of these households have children under the age of six living in the unit.

MSHDA would like to know how to determine the boundaries of the affected area. If MSHDA sends you a list of the MSHDA assisted units would you be able to provide verification of which units are in the affected area and which units have already been verified as having the water filters in place?

Please clarify the purpose of the water pitchers with filters. Are these intended for all units or just for the units with faucets that are not compatible with the filter? Are there any other requirements for units with faucets that are not compatible with the filter?

To help meet MSHDA's requirement for safe and sanitary housing for all voucher holders, MSHDA would like to obtain the following:

- 800 water pitchers with filters
- 1600 faucet filters (one for the kitchen and one for the bathroom)
- 1600 or more replacement cartridges for the filters

These numbers will be reduced if some of the 800 units are not in the affected area or if they have already received the filters.

MSHDA is currently dialoging about an inspection process for the impacted units. Please send me additional information regarding the water testing process that you mentioned during our conversation. MSHDA will need to know specific details including how the testing is done, which faucets in each unit need to be tested (with our without filter), who

makes the determination of the safety of the water, and any steps MSHDA would need to take such as sending the water samples out for further evaluation.

Please let me know if you need any additional information.

Thanks Laura,

Peggy

> Please find attached the full list of residential results through the date listed above (4 attachments). Please note that this version includes concentrations in ppb and the street number is separated from street name to make it easier to find the address. Also, there are pdfs of the two worksheets for people who don't have Microsoft office. All have been prepped for the web minus the naming convention that is usually used. I will follow this format going forward. **If I fail to do that then please let me know**:
>
> 1. For the web page http://www.michigan.gov/flintwater/0,6092,7-345-75251_75373---,00.html , found under the accordion lower left "Keeping lead out: Water Test Results and Reports"/ "Keeping lead out of the home: Tips and Residential Water Test Results", the following are to be added (3 attachments):

Asset # 512083 – February 2 2016 Test Results Flint.xlsx
Asset# 512511 – February 2 2016 Test Results Flint_Sorted By Address.pdf
Asset# 512510 – February 2 2016 Test Results Flint_Sorted by Lead Concentration.pdf

2. For the same accordion underneath the DEQ reports to EPA, The Test Results Flint DEQ Reports to the EPA Asset needs updating:

   Asset# 512663 - February 2 2016 Test Results Flint_DEQ Reports to the EPA.xlsx

Please note that the results are for all samples reported out through today February 2, 2016 in all documents. In addition, the workbooks (XLSX) contains two tabs: One has the data sorted by Lead concentration and the other is sorted by address.

Posting this data in a timely manner is of the essence so that we can comply with the order issued by EPA.

Please post this to the website ASAP and make sure that all are posted so that people can look at the version that they are interested in.

Thank you!!!

Susan

Subject: RE: Full List of Residential Results for February 2, 2016
Importance: High

This note is for Tuesday February 2, 2016

Please find attached the full list of residential results through the date listed above (4 attachments). Please note that this version includes concentrations in ppb and the street number is separated from street name to make it easier to find the address. Also, there are pdfs of the two worksheets for people who don't have Microsoft office. All have been prepped for the web minus the naming convention that is usually used. I will follow this format going forward. **If I fail to do that then please let me know**:

1. For the web page http://www.michigan.gov/flintwater/0,6092,7-345-75251_75373---,00.html , found under the accordion lower left "Keeping lead out: Water Test Results and Reports"/ "Keeping lead out of the home: Tips and Residential Water Test Results", the following are to be added (3 attachments):

   Asset # 512083 – February 2 2016 Test Results Flint.xlsx
   Asset# 512511 – February 2 2016 Test Results Flint_Sorted By Address.pdf
   Asset# 512510 – February 2 2016 Test Results Flint_Sorted by Lead Concentration.pdf

2. For the same accordion underneath the DEQ reports to EPA, The Test Results Flint DEQ Reports to the EPA Asset needs updating:

   Asset# 512663 - February 2 2016 Test Results Flint_DEQ Reports to the EPA.xlsx

Please note that the results are for all samples reported out through today February 2, 2016 in all documents. In addition, the workbooks (XLSX) contains two tabs: One has the data sorted by Lead concentration and the other is sorted by address.

Posting this data in a timely manner is of the essence so that we can comply with the order issued by EPA.

Please post this to the website ASAP and make sure that all are posted so that people can look at the version that they are interested in.

Thank you!!!

Subject: RE: Urgent Request for SBA Application Submission

Importance: High

Keith, et.al.

SEOC needs an answer by 16:30 so I attempted to draft a response based on our conversation. Please take a look and either edit to your liking, send something better, or otherwise we'll provide something like below:

At this time we cannot give a definitive answer to the question. There are still disagreements among the scientific community as to when a sufficient quantity of protective film from the addition of the corrosion control inhibitors will be built up to sufficiently reduce the concentrations of lead in the distribution system to a yet-to-be determined "safe" level of lead in individual faucets.

Thanks

Subject: Resource request

The lab needs a clerical person to look at the back side of all of the sample slips since January 1, 2016 to document samples that have gone through a filter

The person doing this must document the sample numbers in a spreadsheet

This is only for the flint residential lead and copper samples

The spreadsheet is then to be forwarded to me

Kirby and Carol and Julie
Please let me know if there should be additional information that should be documented

This should take less than a week for one person

Subject: Re: RUSH REQUEST - HOW MANY LOCATIONS IN THE ATTACHED ARE RESIDENCES

I spoke with George Krizstian a moment ago. He indicated that the address data relative to the samples comes in as generic address information and is not defined as residential or commercial locations. To make that determination as to parcel type he thought that it might be determined by entering the addresses into Google Maps or some other online map tool and view in birds eye or satellite view.

Unfortunately I don't believe we will have this information for the 8:00 am deadline. If you have viewed my previous email it was sent before I made that clear. It is my understanding we have not been previously asked to determine residential vs. commercial for the briefings. We will check at our ECC briefing if there is a different option to obtain the residential vs. commercial data.

Subject: RE: Lead / Copper Data

Thank you. I didn't receive the distribution sites you alluded to that were attached in your email. If you wouldn't mind forwarding those along so we have them correctly identified, we'll be sure our tenants, landlords and or property managers are directed to these locations where testing materials are located accordingly.

Brian.

Subject: RE: Lead / Copper Data

Wendy,

Just to clarify, HUD and its relationship with the Flint County Housing Commission for HUD financed properties is unrelated/separate from the MSHDA's properties that we finance and or manage directly.

As a team this morning, we discussed whether or not MSHDA should be taking similar actions (water quality testing for the tenants and homeowners residing in single homes and apartment complexes financed or managed by MSHDA) and the consensus was that we should.

Therefore, I would like ask if there is a point of contact or information sharing we should use/provide when directing our landlords, home-owners and tenants to test their water.

Is testing of water being centralized by ways of logistics like filters are now? Or, should we direct our landlords, property managers or residents to pick up water testing materials at any of the five stations in the city?

Thank you,

Brian.

Brian Mills

Subject: RE: Lead / Copper Data

According to HUD staff, HUD did send letters to their Flint properties making water testing mandatory and allowing the properties to use their reserves to pay for it. Someone from HUD will forward the letters to me. I'll send to you once I receive it.

Subject: RE: Lead / Copper Data

I haven't heard anything from HUD on this either though it might be that public housing units are overseen by the Public and Indian Housing part of HUD whereas our PBCA and Section 8 contracts are overseen by the Multifamily part of HUD. I think having testing done would be a good idea to at least see how the filters are working now that they are in place.

Mike

Subject: Re: Lead / Copper Data

I have not. But if a similar request had come through us it would've most likely been PbCA.

Mike/Daphne - have we heard anything from HUD?

Might not be a bad idea on our portfolio regardless of if they're requiring it.

Thank you, Mel.

I received a call and email today from Pastor Frank Woods who was in the meeting yesterday. He also works for the Flint Housing Commission and they are being asked

by HUD about testing for the public housing units. Pastor Woods said it has not been done. Do you have any information on when/if this will be scheduled?

Pastor Woods has requested a meeting with the Flint Public Housing Executive Director and Harvey and I want to have an answer for him prior to the meeting.

Thank you,
~Stacie

Subject: Full List of Residential Results for February 1, 2016
Importance: High

This note is for Sunday February 1, 2016

Please find attached the full list of residential results through the date listed above (4 attachments). Please note that this version includes concentrations in ppb and the street number is separated from street name to make it easier to find the address. Also, there are pdfs of the two worksheets for people who don't have Microsoft office. All have been prepped for the web minus the naming convention that is usually used. I will follow this format going forward. **If I fail to do that then please let me know**:

1. For the Home page in the upper left Accordion, Under "In Your Home", the following are to be added (3 attachments):

Asset # 512083 – February 1 2016 Test Results Flint.xlsx
Asset# 512511 – February 1 2016 Test Results Flint_Sorted By Address.pdf
Asset# 512510 – February 1 2016 Test Results Flint_Sorted by Lead Concentration.pdf

2. For the EPA TAB under DEQ Reports to the EPA [http://www.michigan.gov/flintwater/0,6092,7-345-73954_75358—,00.html], I don't see a posting for this to provide an asset number but this needs to be uploaded to this tab:

   February 1 2016 Test Results Flint_DEQ Reports to the EPA.xlsx

Please note that the results are for all samples reported out through today February 1, 2016 in all documents. In addition, the workbooks (XLSX) contains two tabs: One has the data sorted by Lead concentration and the other is sorted by address.

Posting this data in a timely manner is of the essence so that we can comply with the order issued by EPA.

Please post this to the website ASAP and make sure that all are posted so that people can look at the version that they are interested in.

Thank you!!!

> http://ardgroup.net/Demo_Wastewater.html
>
> This demonstration showed how to turn sewer water into drinking water in minutes. That same process could be used for Flint's lead contaminated water. We know this because ARDG is actively involved in treating hydraulic fracturing water which is heavy in dissolved solids.

The ideal solution will have Flint turning sewer water into drinking water as shown in the demonstration, but if Flint's clean water and sewer water infrastructure do not overlap, we could focus on cleaning the current drinking water supply.

Next step: if interested we would like to bring an ARDG engineer to Michigan to answer questions and gain the information necessary to make a specific proposal to relieve your current crisis.

I am a former county official and understand the unique issues faced with public financing and projects. I have time to discuss this Wednesday, and could carve time out Tuesday.

Civil Service Rule

2-19 Legal Representation

If an employee is named in any civil claim or action alleging negligence or other actionable conduct arising out of employment in the classified service, the employee may request that the appointing authority provide the services of an attorney at state expense to represent the employee. If the appointing authority determines either (1) that the conduct alleged occurred during the course of the employee's employment and within the scope of the authority delegated to the employee or (2) that the employee's conduct occurred during the course of the employee's employment and the employee had a reasonable belief that the employee's conduct was within the scope of

authority delegated to the employee, the employee is entitled to legal representation at state expense, subject to the following conditions:

(a) (a) If the appointing authority authorizes legal representation at state expense, the appointing authority shall first request that the attorney general represent the employee. If the attorney general declines to represent the employee, the appointing authority may, at its option, either hire an attorney to represent the employee or authorize the employee to hire an attorney. If the employee hires an attorney, the appointing authority shall reimburse the employee for all necessary and reasonable attorney fees and costs incurred.

(b) (b) The appointing authority is not required to provide legal services at state expense in connection with prosecution of a criminal suit against an employee.

(c) (c) Nothing in this rule requires an appointing authority to reimburse an employee or insurer for legal services to which the employee is entitled under a policy of insurance.

Hi Ginna,

Sorry to completely flood your email; but we just got an offer from a water testing company that will sell their reusable testing kits for somewhere between $5-6 that have large quantities and I wanted to know if you could use a large quantity, as I know the deadline for the emergency funds is quickly approaching. Are you all purchasing long-term product with those funds, or are they to limited to do so?

I have a request - do you have a donor management software system we could use.

We are overwhelmed trying to track and manage the information coming in.

Any ideas would be so appreciated - if you have a system that we could use that would be fabulous!

To: MSP-EOC-MDEQ
Cc: Krisztian, George (DEQ); Shirey, Burrell (DEQ); Hagler, Gary (DNR)
Subject: Lead Pipe

In response to a previous inquiry, Mike Glasgow (Flint Water Plant) communicated that he should be able to come up with a few sections of lead pipe that DEQ could use to evaluate whether unknown pipe materials in the ground can be identified using DEQ geophysical equipment. Mr. Glasgow also indicated the city may be removing a few sections of lead pipe from the ground in a couple of weeks. As such, if geophysical bench studies are promising, then it may be possible to coordinate a pilot survey of in ground lead pipe sections immediately before the city removes them in a couple of weeks to see if geophysics may be a useful to identify the unknown pipe sections. Currently, the efficacy of these methods are unknown.

Subject: ECC update

Jen/Mitch,

Summary of today's meeting:

1. I have the IAP and could bring it to the SEOC if you need it. As a reminder, this is not a public document and is confidential. In addition, do NOT write anything one them (notes, etc.) because then it has to be saved as an official document which may fall under FOIA.
2. The ECC is working on a process and identifying a clear path for posting documents on the web for the "DEQ Reports to the EPA" tab.
3. Sentinel site testing/locations:
    a. Sites to be identified and verified sent to GIS mappers by 2/5
    b. Testing scheduled to start on 2/8
    c. More information will be supplied to SEOC DEQ in order to generate the resource request for a LEO to be a part of the sampling team.
    d. There will be at least 10 teams (perhaps more if needed) consisting of a plumber, two DEQ personnel, and a law enforcement officer (LEO)
    e. Data from the Sentinel site testing provided to the director prior to April 15th.
    f. A suggestion was made to have addresses pre-printed on the form for these sites.
    g. Dave Forstat suggested that parcel I.D. numbers need to be added in order to complete proper mapping of the locations.

4. Sue Sobieski created an ECC team email address to be used instead of hers.

All: Tim Henry of EPA indicated that the 3:00 will be a conference call.

The call in number for 3:00 is 877-226-9607, Access Code 9826143648, EPA will be the host.

Liz and Bryce, per Dan please send to EPA Tim Henry and Tom Poy the documents EPA will need to review during the conference call. They are unable to do any video conferencing.
Tim's email is Henry.Timothy@epa.gov and Tom's email is Poy.Thomas@epa.gov

Bryce, for the people already in Flint for the 1:30 meeting, do you want me to try and find a room in Flint for the 3:00 conference call OR will you handle via your phones while traveling?

For those who will stay in Lansing, I can find a conference room with a phone, Rosemarie is looking right now as I do not have anything available on the 6th Floor for 3:00-5:00.

I'll keep you posted. Thank you.

Yes this is residential testing. There is no need to do anything differently. All residents may test and are encouraged to do so.

Subject: RE: Lead / Copper Data

According to HUD staff, HUD did send letters to their Flint properties making water testing mandatory and allowing the properties to use their reserves to pay for it. Someone from HUD will forward the letters to me. I'll send to you once I receive it.

Subject: RE: Lead / Copper Data

I haven't heard anything from HUD on this either though it might be that public housing units are overseen by the Public and Indian Housing part of HUD whereas our PBCA and Section 8 contracts are overseen by the Multifamily part of HUD. I think having testing done would be a good idea to at least see how the filters are working now that they are in place.

Mike

Subject: Re: Lead / Copper Data

I have not. But if a similar request had come through us it would've most likely been PbCA.

Mike/Daphne - have we heard anything from HUD?

Might not be a bad idea on our portfolio regardless of if they're requiring it.

Thank you, Mel.

I received a call and email today from Pastor Frank Woods who was in the meeting yesterday. He also works for the Flint Housing Commission and they are being asked by HUD about testing for the public housing units. Pastor Woods said it has not been done. Do you have any information on when/if this will be scheduled?

Pastor Woods has requested a meeting with the Flint Public Housing Executive Director and Harvey and I want to have an answer for him prior to the meeting.

Thank you,
~Stacie

I can get authorization for someone from DEQ to have rights to post to the Flint Water website. Please advise on who this individual should be.

Agreed. We are connected to FEMA GIS and will work first thing Monday to solidify some things with the UCG. Now that we have a SEOC POC, DHHS POC and I believe DEQ POC for the UCG I think we will make some progress.

Mark- let's see what the SEOC GIS comes up with as far as the UCG GIS. I know DEQ/DNR GIS and the SEOC GIS have been connected.

Subject: RE: Web Page Update Request

Hello, We have a couple things moving on the website right now. First it is being redesigned, the new design should roll out in the first half of this week. It should be the finished design moving forward. I will make certain that there is an EPA documents section when it becomes available to use.

I believe I am to post three documents: Monthly Operational Reports, the Timeline and a weekly status report in that section.

I don't think I've seen these documents yet, so I don't have a section created for it on the website; Although a document was sent to me yesterday while I was out that I posted this morning in the "in the home" section. Below is a link to that document. It could be the weekly status report. I'm unsure.
http://www.michigan.gov/documents/flintwater/Flint_Water_EPA_Narrative_Public_Website_Post_01292016_1743_512517_7.pdf?20160131110749

Please let me know if that is the document and I'll make sure to post it in the EPA documents section.

Thanks!

Trevor

Gabe and Amanda-

Please see the below. Has anyone called a meeting or requested information from all the state and federal partners that are performing these door to door water test? Is there a plan being drafted to address this? If I was a homeowner and had multiple agencies coming to my door to collect water, I don't think I would be too impressed.

Let me know if there is something I can do to help. If you can tell us (the JIC) what the plan is we can begin to tell the public and our local partners

Thanks

Hi Chris,

As was mentioned on the 8:30 a.m. call, we will need more details on what the water testing plan is; who is going door-to-door, what credentials they are wearing, will they enter homes, etc. Once someone provides us with this information, the JIC can assist in doing some public messaging about this.

Subject: Re: FW: Additional Zip Codes

Attached is a list of what are called "franchise locations". They are on Flint water but it may be charged through the municipality. It is a complete list. Other than that you may access property lookup via the City of Flint website to search for any property by name or address and if it is listed they are billed by Flint and therefore receive water from Flint.

Please note that with the volunteers that are helping the DEQ lab sort samples there has been some confusion and samples are often mixed in regardless of there origin.

Subject: RE: IMPORTANT - Important Request Regarding City of Flint Water

Jaime,

As we discussed I wanted to follow up on this and let you know what I know.

MDEQ and MLARA are working with the all Flint Community Schools to sample, replace equipment and provide support to the school system. Additionally sampling is being done over the weekends due to the requirement that the water has not been used for a minimum period of time prior to sample collection.

Contacted Sean D, Liaison to Genesee County HD regarding this question, and verified with MDEQ/MDHHS the above information.

I also verified with Sean D. that MDARD/Genesee LHD will be following up with parochial/private/charter schools in the affected area, both sampling, guidance and assessment of the facilities actions.

Discussion with MDEQ verified that they will continue to work with LARA at the schools on replacement and sampling and are developing a plan to expand the program to include child care facilities and some others, a plan should be available for review within the next 24 hours please contact Jen at the EOC desk for further details if needed.

Additionally as we discussed in the activity log it was noted that MDE would be contacting the Flint community schools. I also found reference to a document being developed by MDE for distribution to schools that was in the process of being condensed (from ten pages to two) which I believe also address the issues being raised in this email thread.

I would suggest that the Food Program director be directed to the school system superintendent for information on which schools have been sampled and what actions they will need to take as a result of the sampling and replacement of fixtures that have been identified by MDEQ/LARA.

MDARD has supplied through the JIC the requirements for Food Service (restaurants/bars etc.) and Food establishments on how to manage their water use in response to this incident. To my knowledge that document was posted to the Flint Water response webpage.

Let me know if you have any additional questions.

Subject: Next Step

Chris-
We (many people in Silicon Valley) would like to help, and we keep trying to work with the people trying to solve the Flint water crisis. MSU Alumni Assoc in NorCal is now engaged. So is the Chairman of the Board of Cal Water, Peter Nelson, the #6 largest public utility in the USA.

We keep getting zero feedback, no guidance, so we are doing what we can: working with churches and with relatives in Flint.

Tomorrow, we will pull additional water samples from several places, and run those through an EPA certified lab. I expect that we'll have data that shows we can pull water directly from the Flint River, run it through our purifier, and have 100% of all pathogens destroyed, zero lead, zero arsenic, etc. Plus a few more tests from various Flint tap water sources. Of course, with 0.5 micron filtration and 72k mV/cm**3/sec, no pathogen can survive. EPA certified lab tests from multiple states can document that. In addition, the science is well understood. But we'll do it – yet again – with a lab in Michigan, using Flint water sources – in order to try to increase the chances that the gov't people in charge of the fix will pay attention.

Can you or your designee get on a phone call, no recording, no press, just you, me and Peter Nelson, explain where your "fix" is really, and use the engineering resources of Cal Water to help out?

Wishing you continued good luck. What happened in 2014 and in 2015 can't be changed. Going forward, it's about stopping all additional lead contamination, and making the water 100% safe to drink/shower in/etc for the people in the Flint Muni water district.

MSP-EOC-MDEQ

From:	Melanie Poisson <mpoisson@cityofflint.com>
Sent:	Wednesday, January 27, 2016 9:12 AM
To:	Michael Glasgow; Ducharme, Mark (DEQ); MSP-EOC-MDEQ; tpage@uwmich.org; Wendy Braun
Subject:	Procedure for those with high lead results

As I am processing the results of the lead/copper tests to send to residents I am often asked who they should contact if their lead level exceeds 15ppb. My most recent instructions for referring those with high lead results is to forward them via email to Mike Glasgow.

I suspect that the County or State or EPA will, if they haven't already done so, create one or more resources or contacts for residents to go to when they discover their lead level is above 15ppb.

Perhaps an information sheet should be created specifically for these residents.

Please advise.

Sincerely,
Melanie Poisson, Clerk

Subject: FW: breaks out when showering

Hi Mark

Per our telephone discussion just now, I'm forwarding the information about one specific complaint about rashes that our Community Health folks plan on working with ATSTD/CDC on. We're requesting that EPA collect all appropriate water samples to enable a full analysis of the water at this address:
for bacterial contamination, and a full metals and organics panel. Lead is not associated with skin rashes, but other contaminants are and we need to find out what, if any, other contaminants are in the water.

In addition, we discussed that it would be ideal if Community Health can forward to the EPA the other addresses and contact information for which they've received complaints of rashes, so that EPA could also test there for appropriate parameters to see if we can identify a cause.

Looking forward to our ongoing collaboration on this matter. Thanks!

Hey Jen,

According to the City of Flint Liaison 48531, 48550, and 48557 are "specialized" zip codes. 48550 is listed as "Buick City" and 48557 is listed as "GM Tech Center". Still working on if they fall under the Flint Water Authority.
Thanks,
Joe

Hi Chrissy,

I am in the EOC with Janet and we have a solution to help remove some of the loose cases of water from your facility and transport them. Mobile Medical Response (MMR) will be sending a truck and volunteers to load the water. I will send them with your contact information so they can be in touch once they arrive on site.

Jay

Hi Janet,

We're currently overloaded, especially with regular (almost daily) donations coming in from ArtVan. If we could get some help moving the water out to other locations, we'd be happy to continue accepting donations.
One problem we're running into is that somehow word is being spread that we're accepting semi-trailers. WE ARE NOT! We don't have the capacity or ability or anything to unload them.

Thanks,

Chrissy Cooper

Hello Everyone,

I wanted to send a general update out to everyone because next week I will be at a National Sales Conference and booked in meetings for 3 days. I do not want any of you not to have access to support when I am away. I have been working closely with the VWR government support team and they understand the importance of your needs. Please let us know of any new order that could be needed so we can make certain the order is closely watched within VWR.

As a point of contact internally within VWR, please contact Shasta Dixon. Lewis McMillan will also be at the sales meeting but he would like you to contact him if you do need extra assistance. His schedule at the meeting is more flexible than mine should you need any more help.

Updates for items needed and shipping information for orders are below.

Bottle Needs:

We have to date 47 cases (144 bottles per case) shipped to the Flint site. We have shipped 2 cases to the Lansing lab for lot verification. We have 50 more cases from the same lot shipping to Flint as of today, but I do not have the tracking information. For the remaining cases we will have status updates next week and these will be a new lot, one case will go to the Lansing lab.

Your VWR order number is 8018384025.

Nitric Acid Needs:

We have 4 cases (6 bottles in a case) sent out to the Lansing lab this week. I have also sent a sample bottle of the BDH brand to Kirby for evaluation. An estimation of 200 possible bottles may be needed in the future (34 cases). We have worked with our internal team for help with sourcing for this chemical and we have found stock within our warehouse and at the suppliers.

MK662346 (sold in cases of 6) Stock: 47 of the 2500 ML bottles in the Batavia Warehouse. (Avantor has 590 in stock as well) so we could replenish quickly (this is the original ordered product)

BDH30462.5LPC (sold in cases of 6) Stock: 390 of the 2500 ML bottles in different Warehouses around the nation, we can supply more from the manufacturer
(this is the secondary source we have sampled)

EM-NX0407-2 (sold by the each) Stock: 554 of the 2500 ML bottles in the Batavia Warehouse
(this product can also be sampled if requested)

Thank you all for working with VWR and myself these past weeks, I have been honored to help with this emergency in my State.

Please reach out to Shasta and Lewis in the beginning of the week, and I will be back in town on Wednesday (1/27) in the afternoon if you need me for anything please let me know.

Best,

Nina

Jen, thank you very much for your help this morning.

Please let us know when you are able to determine if we can ship the 4 truckloads of our cannedwater4kids canned water.

We would like to tell the Brewery where we store our inventory and trucking company that everything will be okay to ship.

Greg

Hello Mr. Stromberg,

The citizens received a Total Dissolved Solids Meter with a ZeroWater pitcher:
https://www.zerowater.com/10c-pitcher

I am working with Doug at ZeroWater (630-805-1773) to address the concerns and provide accurate information to the citizens regarding the capabilities of the meter. The citizens misinterpreted the elevated levels on the meter, presuming it meant there was elevated levels of lead in the metered water. These citizens have been informed the difference of the TDS meter and a laboratory analysis for lead and copper. I will be requesting Doug to also call the citizens to reiterate this. The citizens lack trust in any water they are provided and have been using the supplied TDS meters to test any bottled or canned water they have received from the city.

Feel free to give me a call if you would like to discuss. I will keep you informed as to any messaging developed to address the concerns.

Thank you,

Hey Calix,

I wanted to pass on that we just created a group in AGOL called "Lead Mapping Working Group" and put an account for DNR to access it to support lead mapping. They are looking to provide up to 5 staff to round the corner in getting all the old service data into a digital format. We are about 50% complete now having used EMHSD staff. Hopefully, they can get everything updated in about a week.

Importance: High

Jen I am writing this email to you because we were preparing to ship to your Flint, MI city 4 more full truckloads this week (212,000 of 12oz cannedwater4kids aluminum cans).

Our Joan Roehre, contacted the same person whose name is Jay at Genesee Emergency Operations phone n our first 2 truckloads we shipped and we were told that the State mandated and is not accepting any more canned water because of too many false/positive test results. Our Joan Roehre was told to call

Do you have any information confirming this directive and if you do is it our cans that are the problem or someone else's.

We weren't aware or told that there were additional issues.

We are a very lean e-charity with limited resources (Mostly Volunteers) and we spent the last week investing our time and limited precious resources to get this water shipped to your Flint, MI.
In fact we had an independent owner truck driver who volunteered his services for free to get this water to your city.

We do need your help and direction Jen because I have put everything on hold today and this is costing our supplier and transportation people lost time and business.

Thank you very much for your understanding and help..

Per Mark Johnson, ATSDR R5, I'm expecting that Dr. Michelle Watters (preventative medicine doc with ATSDR/CDC) will arrive either Sunday or Monday to provide support. Dr. Watters' assistance should be requested in this situation as well. I will contact Mr. Folts to obtain any additional information that could be of assistance and let him know we are following through on his situation.

MSP-EOC-MDEQ

From: JICManager
Sent: Sunday, January 24, 2016 6:21 PM
To: Brown, Melanie (DEQ); MSP-EOC-MDEQ; Creagh, Keith (DEQ); Krisztian, George (DEQ)
Subject: RE: USE THIS VERSION: Description of testing data to be included in tonites press release

Do we have all inclusive data to put in the news release? Or are we including the three phases of documentation?

From: Brown, Melanie (DEQ)
Sent: Sunday, January 24, 2016 6:18 PM
To: MSP-EOC-MDEQ; JICManager; Creagh, Keith (DEQ); Krisztian, George (DEQ)
Subject: USE THIS VERSION: Description of testing data to be included in tonites press release

While the results are encouraging, and they are trending in the right direction, there are still areas of concern. We are in the process of setting up a formal sampling protocol which will be representative of the entire distribution system and we will revisit these sites routinely so we can establish a baseline and do trend analysis.

The units in the reports are expressed in milligrams per liter (mg/L) also known as parts per million (ppm). In order to convert to parts per billion, multiply the result by 1,000.

For example, a result of 0.004 (mg/L) would equal 4 parts per billion (ppb).

We recognize that not all of the samples within the program may be sampling points recognized as Tier 1 sampling sites under the lead and copper rule. The reason we are collecting this data is because we are trying to get an overall assessment of the system and to identify potential areas of concern.

Subject: Fwd: Sample Information from DEQ

Good morning Mel,

Is the below testing information something we should do news release about, either a stand-alone or in our nightly one?

Please advise.
Thanks,
Shanon

Subject: Sample Information from DEQ
Below is some good information from DEQ SEOC desk:

Since the implementation of the Residential monitoring through January 22, 2016 the numbers are as follows:
1186 total Residential Samples have been reported
1099 Samples are at or below the Action Level of 15 ppb (92.7%)
966 Samples are at or below 5 ppb (81.5%)
87 Samples exceed the Action Level of 15 ppb (7.3%)

Since January 7, 2016 through January 22, 2016 the numbers are as follows:
514 total Residential Samples have been reported
477 Samples are at or below the Action Level of 15 ppb (92.8%)
432 Samples are at or below 5 ppb (84.0%)
37 Samples exceed the Action Level of 15 ppb (7.2%)

Since January 19, 2016 through January 22, 2016 the numbers are as follows:
341 total Residential Samples have been reported
322 Samples are at or below the Action Level of 15 ppb (94.4%)
432 Samples are at or below 5 ppb (87.4%)
19 Samples exceed the Action Level of 15 ppb (5.6%)

There are approximately 1000 additional samples that have been received at the Lab and are in process.

INTERNAL USE ONLY – LIMIT DISTRIBUTION TO GOVERNOR'S OFFICE

Update 1/23/16 – 19h Day (18th Full Day) After Governor's Declaration of an Emergency

Mission focus for the day:
- Receive, store and increase quantities of supplies
- Increase efficiency of warehouse operations
- Continue door to door/Flint Water Response Teams (FWRTs)
- Prepare appeal on denial of Category B under the Presidential Emergency Declaration
- Work on plan for Volunteer Expansion (to increase the utilization of the volunteer force to distribute commodities over the longer term), Ongoing Resourcing, and Long Term Recovery - recovery plan/transition of PODs

Attached Documents:

* SitRep 18

Status on Governor's request letter to the President:

* Appeal denial received on the Major Disaster Declaration. Nothing more can be done on this.
* Denial of Individual Household Program and Category B under the Emergency Declaration received this date. We have 30 days to appeal and EMHSD staff is gathering information for the appeal.

Key items for tomorrow to note are:
- We will have 15 National Guard/state/local agency, type 3 teams personnel).
- We will have 40 ARC, type 5 teams (personnel).

Items to Note
- Deployed 15 state/local teams and 40 ARC Flint Water Response Teams to the field today.
- Created a media monitoring report and looked for misinformation. A call was made to WILX to amend their article that implied that the State was not distributing water to undocumented immigrants. The news release was also sent to WILX about how the State is not requiring identification to receive water resources.
- SEOC Logistics worked on future resource planning and a local business commodity supply plan.
- Drafted talking points for Monday's press conference with Governor Snyder, Colonel Etue, and the Mayor.
- Put in place a place to control POD distribution as much as possible. SKU numbers are being lined out on commodities to prevent or minimize returns for cash.
- Information reported to the JIC:

o As of 1/23/16, 4 pm for PODs and 5 pm for FWRT (start date was Tuesday, 1/12/16)

1. Homes visited by the FWRTs to date.

To Date

1/23/2016

37,943

6,323 National Guard
7,361 ARC

1. Distributed: Includes outstanding data from yesterday- PODs after 5 pm, ARC worksheets and local EOC hotshots.
Commodity

Total to Date

1. Number of cases of water

148,866

1. Filters

86,843

1. Filter cartridges

194,622

1. Test kits

25,586

1. Total number of customers on the Flint water system
   * 29,944 paying customers
   * ~45,000 hookups (This is our high end target #)
   * ~39,000 includes apartment complexes (The is the low end target #)

1. Resources purchased:
   * Cases of water 133,662 (additional 24,634 donated)
   * Filters 115,700
   * Filter Cartridges 266,200
   * Test kits 61,161

1. Teams going out tomorrow:

* 15 National Guard State (folks) type 3 teams---Goal tomorrow 300 homes per team
* 40 ARC olks) type 5 teams---Goal tomorrow 100 homes per team

Local EOC
Operations:

- Worked to identify all vulnerable populations to help streamline Hot Shot/Rapid Response Team process.
- Working on plan for church water distribution and POD locations.
- Looking at possible alternative locations for PODs in difficult traffic areas. The city identified some but they are just as bad as the current ones.
- Working on finalizing a recycling plan for the incident.
- Lt. Roach sent up the church information to Tom Webber. She also received one church site that will act as a potential church mega site.
- SEOC GIS to provide a layer for the vulnerable populations so that Team Rubicon can get to them and track in the iPad.

New Standing Information Requirements

1. Number of homes visited each day:
a. 1/23/16, As of 5 pm, 13,684 homes were visited today
2. Total number of homes visited:
a. 37,943, does include duplicate counts from the second canvasing
3. Total number of National Guard on the ground:
a. 276
4. Total Number of Volunteers each day:
a. 310 volunteers for 1/23/2016
5. Number of homes with filters:
a. 17,595 homes had filters, per entered GIS data as of 1/22/2016,
6. Number of Water filters distributed (each day and to date):
a. 4,156 were distributed on 1/23/2016, and total distributed to date is 86,843
7. Cases of Bottle water distributed (each day and to date):
a. 27,462 were distributed on 1/23/2016, and total distributed to date is 148,866
8. Number of testing kits distributed (each day and to date):
a. 2,171 were distributed on 1/23/2016, and total distributed to date is 25,586
9. Number of people tested for elevated blood levels (kids, adults, total):
a. Unknown at this time until we get the data
10. Number of people with elevated blood level (kids, adults, total):
a. Unknown at this time until we get the data
11. Number of homes with safe drinking water (Not sure whether it's possible right now to provide this number):
a. Unknown at this time

Chris

INTERNAL USE ONLY – LIMIT DISTRIBUTION TO GOVERNOR'S OFFICE

Update 1/22/16 – 18h Day (17th Full Day) After Governor's Declaration of an Emergency

Mission focus for the day:

- Receive, store and increase quantities of supplies
- Increase efficiency of warehouse operations
- Continue door to door/Flint Water Response Teams (FWRTs)

- Plan for next phase with MSP and NG personnel
- Prepare appeal on denial of Category B under the Presidential Emergency Declaration
- Work with HHS personnel to ensure they have all items needed for operations

Attached Documents:

* SitRep # 17
* Briefing provided to the HHS Undersecretary by FEMA (due to time only finished 75%)

Status on Governor's request letter to the President:

* Appeal denial received on the Major Disaster Declaration. Nothing more can be done on this.
* Denial of Individual Household Program and Category B under the Emergency Declaration received this date. We have 30 days to appeal and EMHSD staff is gathering information for the appeal.

Key items for tomorrow to note are:
- 15 National Guard/State/Local (s olks) type 3 teams
- 40 ARC (olks) type 5 teams
- Deliveries going out to all churches on our list we have been working with (21) for Sunday services.
- I will not be in the SEOC Saturday. Tony Katarsky will be the acting SEOC state director. I will be available by phone (wrestling meet).
- Sunday, Lt. Mike Johnson will be acting SEOC state director but I may be in for some of the day.
- Monday I am out on a college visit with my son...I will be available by phone and Tony will again be acting.

Items to Note
- Deployed 15 state/local teams and 15 ARC Flint Water Response Teams to the field today.
- SEOC Operations worked on getting local contact into the JIC along with developing messaging for resources and donations.
- SEOC Planning worked on the further development of long term strategy.
- Recovery branch continued coordination with Red Cross on volunteers and the Michigan National Guard for Friday and Saturday.
- SEOC logistics worked with FEMA/DHHS on warehouse tracking status/strategy, coordinated resources, and donations management.
- Have had a number of media request concerning resources for immigrants and population less proficient in English. Clarified with a news release that we are not requiring ID but we are asking for addresses to assist with long term recovery. Nobody will be denied resources if they fail to provide us an address.
- Have received numerous inquiries from celebrities on how they can assist and donate.
- We are validating a lot of data but what we have currently is 38,144 parcels in Flint that are not considered "vacant". This does not mean all parcels have a tenant, there are a lot of houses that are empty.

o 26,673 water subscribers in Flint (not including franchise).
§ Water Subscribers with a Filter = 15,399 (57.7%)
§ Water Subscribers without a Filter = 11,274 (42.2%)

- With our second pass we are getting more information as to why people do not have a filter. Looking into whether these include homes connected but nobody currently living there. We are refining the data.

o 11,471 Non-Water Subscribers in Flint.
§ Non Water Subscribers with a Filter = 2,196 (19%)
§ Non Water Subscribers without a Filter = 9,275 (81%)

o The SEOC Ops Chief has been directed to firm up all numbers with GIS. We have a GIS specialist from FEMA Region V also deployed to the SEOC to assist. ArcGIS has advised us that the amount of data we have collected is more than some major disasters in other states. We are looking into getting their personnel more engaged to ensure we are using all the tools available for analysis.

- SEOC Finance Chief is working on costs to date and all SEMCs were advised to tighten up their records and ensure we have accountability of all costs.
- Information reported to the JIC:

o As of 1/22/16, 4 pm for PODs and 5 pm for FWRT (start date was Tuesday, 1/12/16)

1. *Homes visited by the FWRTs to date.*
To Date

1/22/2016

37,697

5,920

2. Distributed: Includes outstanding data from yesterday (PODs after 5 pm, ARC worksheets and local EOC hotshots.)
Commodity

Total to Date

1. Number of cases of water

121,404

1. Filters

82,687

1. Filter cartridges

191,704

1. Test kits

23,415

3. Resources purchased:
a. Cases of water 130,782 (additional 21,682 donated)
b. Filters 115,700
c. Filter Cartridges 266,200
d. Test kits 61,161

4. Teams going out tomorrow:
a. 15 National Guard State ( ) folks) type 3 teams -- Goal tomorrow 300 homes per team

b. 40 ARC folks) type 5 teams -- Goal tomorrow 100 homes per team

Local EOC
Operations:
- Worked to identify all vulnerable populations to help streamline Hot Shot process.
- Working on plan for church water distribution and POD locations.
- Looking at possible alternative locations for PODs in difficult traffic areas.

o Working on finding a new POD for 3 and 6. We are aware that the mayor would need to approve this.

- Coordinated water donations and delivery areas.
- Last minute large donations of water and volunteers expected during the weekend.
- Working on finalizing a recycling plan for the incident.
- The Jail water has been tested and is fine. The prisoners are not being poisoned and the local health department is working on clearing this issue up.
- Working on a plan with the churches to have 4 mega sites for churches (N,E,S,W) and have smaller churches work through these sites to get supplies. Churches are interested in the recycling program, putting information in their bulletins and also used a collection sites.
- Team Rubicon is coming tomorrow to assist with home deliveries.
- Continuing with recycling plan. Need to identify sites with city. Local EOC has visited areas with the local contractor.

Chris

INTERNAL USE ONLY – LIMIT DISTRIBUTION TO GOVERNOR'S OFFICE

Update 1/21/16 – 17h Day (16th Full Day) After Governor's Declaration of an Emergency

Mission focus for the day:
- Receive, store and increase quantities of supplies
- Increase efficiency of warehouse operations
- Continue to implement the logistics plan and adjust as needed
- Continue door to door/Flint Water Response Teams (FWRTs) - "Phase II"
- Plan for next phase with MSP and NG personnel for Governor approval – "Phase III"
- Prepare for appeal on denial of Category B under the Presidential Emergency Declaration
- Work with HHS personnel to ensure they have all items needed for operations

Attached Documents:

* SitRep 16
* Draft Water Operations Plan for moving to next phases (Discussion document)
* Resident Water Sample Results Map (Not for public distribution)
* January 13-19 comparison map

Status on Governor's request letter to the President

* Emergency declaration received. Pending decision of Major Disaster appeal and any denials under the Emergency Declaration (e.g. Category B). We have not been denied category B yet ... POTUS/FEMA has not given it to us though. I believe we may get a denial of category B in conjunction with the Major Disaster appeal decision. We will have 30 days to appeal.

* Category B is critical in that it is for Emergency Protective Measures which includes (but is not limited to) EOC related costs, supplies and commodities, safety inspections, and in limited circumstances "water testing and treatment

supplies in the immediate aftermath of the incident to counter a specific threat." We purposely put our start date of this incident to be April 25, 2014 in hopes we get category B and could get 75% federal funds for many other costs all the way back to 2014 – long shot but would be huge if we land this.

Key items for tomorrow to note are:

- The logistics plan will be fully executed tomorrow with all teams.
  - We will have 18 National Guard/state/local agency, type 3 teams (personnel), with a goal of 300 homes per team.
  - We will have 15 ARC, type 5 teams personnel), with a goal of 100 homes per team.

Items to Note

- We are using the terms Phase II, Phase III, etc. These are for internal discussion for planning and not meant for public dissemination at this time unless it is determined to be beneficial.
- The draft operations plan (attached) was completed in conjunction with MSP and NG personnel to initiate discussion on our next steps as to WRTs and PODs.
- The WH issued a statement that $80 million dollars in aid to MI mostly to repair Flint water infrastructure. We do not have additional information on this. This may be existing federal funds provided to MI that is just being opened up for other use. FEMA does not have any information on this.
- We have been advised we exceeded the $5 million under the emergency declaration. We are at $7.6 million.
- FEMA has advised that any donated items can be used to offset the state cost share. We are working on the mechanism with FEMA to do this.
- Deployed 18 state/local teams and 10 ARC Flint Water Response Teams to the field today.
- SEOC logistics worked to project future orders of water resources and commodities.
- Released updated JIC map at 1800 displaying updated field team activity and integrating historic paper records that have been entered into the tracking system for field team activity.
- DEQ test kits are only being provided to those who ask for them.
- I made contact with Senator Ananich aid, Julie Townsend, who was a POC for his volunteers. They are set to work next week on the 30th.
- MDOT met with city personnel to look at Station 6 POD and other PODs to see how traffic flow can be facilitated and safety increased. Additional report out due 1/22.
- A request from MSP MC3 for NG Cyber personnel (at $32,000 for 30 days or less) was initiated. This is to assist with the cyber attacks that have occurred/future attacks related to Flint Water. PENDING APPROVAL. NG advised this would have to be funded with existing funds at this time and to make adjustments.
- MDARD Food Program staff have completed assessments of all 21 food businesses (including restaurants) that were located in the highest risk area. In addition, they have completed assessments at 34 food businesses in the medium risk area, and have scheduled 28 appointments to collect water samples.
- Dr. Nicole Lurie, the Assistant Secretary for Preparedness and Response from the US Department of Health and Human Services (HHS), in addition to the HHS Regional Coordinator and other CDC staff, visited the CHECC and SEOC this morning and provided commentary to CHECC and SEOC staff/EMCs. She also attended a briefing from FEMA before departing to visit Flint.
- Parents of boarding students at the Michigan School for the Deaf were notified of the elevated lead results in Stevens Hall. All fixtures in the dormitory are scheduled to be replaced by January 24, 2016. Lt Gov. has scheduled visit on January 25.
- Valley Area Agency on Aging (VAAA) continues to take calls from seniors and caregivers needing access to water and filters. VAAA is providing this information to the local EOC each afternoon for follow-up.
- Information reported to the JIC:

  - As of 1/21/16, 4 pm for PODs and 5 pm for FWRT (start date was Tuesday, 1/12/16)

1. Homes visited by the FWRTs to date.

Phase 1

Phase 2

30,770

5,409

1. Distributed: Includes outstanding data from yesterday - PODs after 5 pm, ARC worksheets and local EOC hotshots.
Commodity

   * 29,944 paying customers
   * ~45,000 hookups (This is our high end target #)
   * ~39,000 includes apartment complexes/multi family (The is the low end target #)

1. Resources purchased:
   * Cases of water 124,398 (additional 20,098 donated)
   * Filters 115,700
   * Filter cartridges 243,200
   * Test kits 61,161

1. Teams going out tomorrow:
   * 18 National Guard/State/Local folks) type 3 teams -- Goal tomorrow 300 homes per team
   * 15 ARC folks) type 5 teams -- Goal tomorrow 100 homes per team

Local EOC

• Attended ARC meeting with VOADs to discuss volunteer management and strategies.
• Attended meeting with Plumbers and Pipefitters Union to assess the need for long term cooperation for filter installation and fixture
replacement.
• Requested and received confirmation of deployment of Team Rubicon (starting on 01/23/2016).
• Facilitated Flint & Genesee Chamber of Commerce representation at the EOC.
• Addressed security issues at Fire Station 3, 6 and 8 PODs (residents concerned about criminal activity).
• Coordinating with SEOC Logistics to receive information on purchasing strategy and volumes for filter equipment.
• Met with Genesee County Planning Commission, United Way of Genesee County and Michigan Community Service Commission to clarify
recycling plans and potential volunteer utilization.
• Coordinated and verified deliveries of supplies to apartment complexes.
• Identified potential locations for recycling stations.

Chris

Update 1/20/16 -- 16th Day (15th Full Day) After Governor's Declaration of an Emergency

Mission focus for the day:
- Receive, store and increase quantities of supplies
- Increase efficiency of warehouse operations
- Continue to implement the logistics plan and adjust as needed
- Continue door to door/Flint Water Response Teams (FWRTs)
- Prepare for second phase of door to door operations
- Submitted appeal to FEMA Region V

· Prepare for appeal on denial of Category B under the Presidential Emergency Declaration

Attached Documents:

* SitRep 16

Status on Governor's request letter to the President:

* Emergency declaration received.

Key items for tomorrow to note are:
· Five copies of the State/FEMA agreement will need to be signed by the Governor. Capt. Kelenske has them and will coordinate delivery.
· The logistics plan will be fully executed tomorrow with all teams.
o We will have 18 National Guard (MSP supported), type 3 teams personnel), with a goal of 300 homes per team.
o We will have 10 ARC, type 5 teams personnel), with a goal of 100 homes per team.
· Dr. Luri from HHS will be at the SEOC ~10:00 p.m.
· A second phase is starting tomorrow which will include more refined questions as to type of filter systems each person has. This will assist with sustainment operations.
· DOC prison work crew personnel (6-7) will be at the warehouse to keep the area clean. A lot of trash is generated in the warehouse and was becoming an issue.

Items to Note
· Deployed 10 state/local (NG, MSP, Local) teams and 10 ARC Flint Water Response Teams to the field today.
· MSP and local Sheriff's Department continue to provide over watch for WRTs.
· Aqua Hydrate contacted me to donate 5000 cases a month (4 semis) for a year. I was advised by Lindon Nelson this was a Governor/Mayor/Senator Ananich and Meekhof initiative and a press release was going to go out soon (TBD). Logistics is following up with them.
· News release sent from Governor's office about the appeal to the President of the disaster declaration.
· SEOC Logistics worked with JIC and Governor's office to establish a business resource submission tab on www.helpforflint.com<http://www.helpforflint.com><http://www.helpforflint.com>
· SEOC Operations continued to develop and finalize Phase 2 canvassing roll out.
· Meeting held with Dr. Luri from HHS.
· Capt. Kelenske and other state agency financial personnel attended the appropriations hearing.
· End of day – concerns with the mass amounts of volunteers showing up and wanting to help. This can cause logistical issues but staff was working to get additional tasks for volunteers outside of the WRTs. We will continue to work on ways to involve more volunteers.
· Additional 5 person NG team for warehouse support approved.
· Information reported to the JIC:

o As of 1/20/16 as of 4 pm for PODs and 5 pm for FWRT (start date was Tuesday, 1/12/16)

1. 29,317 homes visited by the FWRTs to date.

2. Distributed: Includes outstanding hard copy data from yesterday (PODs after 5 pm, ARC worksheets and local EOC hotshots).
a. Number of cases of water 90,337
b. Filters 73,229
c. Filter cartridges 185,852
d. Test kits 19,866

3. Total number of customers on the Flint water system
a. 29,944 paying customers
b. 45,000 hookups (This is our high end target #)
c. 39,000 includes apartment complexes (The is the low end target #)

4. Resources purchased:
a. Cases of water 111,630 (additional 18,502 donated)
b. Filters 115,700
c. Filter cartridges 243,200
d. Test kits 61,161

5. Teams going out tomorrow:
a. 18 National Guard olks) type 3 teams—Goal tomorrow 300 homes per team
b. 10 ARC (lks) type 5 teams—Goal tomorrow 100 homes per team

Local EOC
Operations:
- Addressed reports of water contamination in distributed bottled and canned water. Confirmed that water is safe to drink through testing by MDEQ. Coordinating with JIC and MDEQ for improved public information on the issue.
- Identifying options to reroute unsolicited offers for supplies and services outside of the EOC. Coordinating to set up 800 number.
- Attended meeting with Flint & Genesee Chamber of Commerce to discuss coordination of efforts, representation at EOC, and improved messaging.
- Attended meeting with Community Foundation of Greater Flint to discuss coordination of neighborhood groups and improved messaging.
- Coordinated with MDARD to provide additional lead testing at restaurants, and signage for safe locations.
- Coordinating with SEOC Logistics to receive information on purchasing strategy and volumes for filter equipment.
- Coordinated and verified deliveries of supplies to apartment complexes.
- Discussed logistics requirements of delivery requests for homebound residents with SEOC Logistics.

Chris

INTERNAL USE ONLY – LIMIT DISTRIBUTION TO GOVERNOR'S OFFICE

Update 1/19/16 – 15th Day (14th Full Day) After Governor's Declaration of an Emergency

Mission focus for the day:
- Receive, store and increase quantities of supplies
- Increase efficiency of warehouse operations
- Continue to implement the logistics plan and adjust as needed
- Continue door to door/Flint Water Response Teams (FWRTs)
- Prepare for possible surge in FWRTs utilizing NG personnel
- Prepare plans for next phase of operation – Second sweep of city

Attached Documents:

* SitRep 14

Status on Governor's request letter to the President:

* Emergency declaration received.
* Appeal letter pending.

Key items for tomorrow to note are:

- The logistics plan will be fully executed tomorrow with all teams.
  - We will have 9 National Guard, type 3 teams personnel), with a goal of 300 homes per team.
  - We will have 10 ARC, type 5 teams personnel), with a goal of 100 homes per team.

Items to Note

- Deployed 5 state/local teams and 11 ARC Flint Water Response Teams to the field today.
- Messaging being developed for concerns regarding the Total Dissolved Solids (TDS) meters and citizens' concerns with those meters indicating "lead" in bottled water. Testing of water to be done by DEQ to ensure we have solid messaging.
- DTMB is working to secure space in Flint for FEMA staff.
- Press release went out this afternoon to announce that the US Department of Health and Human Services will lead the federal response in Flint. Capt. Kelenske to meet with Dr. Nicole Lurie, HHS Assistant Secretary for Preparedness and Response (ASPR), on Thursday. The goal of the federal response will be to help state and local leaders identify the size and scope of the problem, and work with them to make and execute a plan for mitigation of the short- and long-term health effects of lead exposure.
- 5 Additional NG personnel being requested to assist with Warehouse inventories.
- NG personnel on the ground with the WRTs tomorrow with more transitioning in.
- Released updated JIC map at 1800 displaying updated field team activity and integrating historic paper records that have been entered into the tracking system for field team activity.
- LG is going to be in Flint working at one of the PODs on Wednesday.
- Information reported to the JIC:

  - As of 1/19/16 as of 4 pm for PODs and 5 pm for FWRT (start date was Tuesday, 1/12/16)

1. 22,129 homes visited by the FWRTs to date.

2. Distributed: Includes outstanding data from yesterday - PODs after 5 pm, ARC worksheets and local EOC hotshots.
   a. Number of cases of water 77,794
   b. Filters 69,730
   c. Filter cartridges 184,457
   d. Test kits 16,671

3. Total number of customers on the Flint water system
   a. 29,944 paying customers
   b. 45,000 hookups (This is our high end target #)
   c. 39,000 includes apartment complexes (The is the low end target #)

4. Resources purchased:
   a. Cases of water 95,760 (additional 16,056 donated)
   b. Filters 115,700
   c. Filter cartridges 243,200
   d. Test kits 61,161

5. Teams going out tomorrow:
   a. 9 National Guard folks) type 3 teams---Goal tomorrow 300 homes per team
   b. 10 ARC folks) type 5 teams----Goal tomorrow 100 homes per team

Local EOC
Operations:

* Attended public health group meeting with GCHD, City of Flint Water Department and MDEQ to discuss water test information being returned to residents, to allow residents a greater understanding of results.
* Attended recycling/trash management group meeting with DEQ, Republic Services, Keep Genesee County Beautiful and Genesee County Planning Commission. Provided projections on current and anticipated bottle distributions.
* Coordinated deliveries of supplies to faith-based organizations, apartment complexes and homebound residents.
* Coordinated with Comcast to set up locations for distribution of filters (distributed 60 filters on 01/19/2016).

Chris

INTERNAL USE ONLY – LIMIT DISTRIBUTION TO GOVERNOR'S OFFICE

Update 1/18/16 – 14th Day (13th Full Day) After Governor's Declaration of an Emergency

Mission focus for the day:
- Receive, store and increase quantities of supplies
- Continue to implement the logistics plan and adjust as needed
- Continue door to door/Flint Water Response Teams (FWRTs) and PODs
- Prepare for possible surge in FWRTs utilizing NG personnel
- Work to bring FEMA IMAT personnel up to date following the Presidential Emergency declaration.
- Complete appeal for Presidential Major Disaster Declaration denial.

Attached Documents:

* SitRep 13
* Side by side comparison of homes with filters January 13th compared to January 18th. This should be hitting the media tonight. This took longer to create than I wanted but is the image I have wanted to show progress of getting filters in to the field.

Status on Governor's request letter to the President:

* Appeal in process.

Key items for tomorrow to note are:
- The logistics plan will be fully executed tomorrow with all teams.
  - We will have 5-6 state/local agency, type 3 teams (personnel), with a goal of 300 homes per team.
  - We will have 10 ARC, type 5 teams personnel), with a goal of 100 homes per team.
  - NG will be bringing in personnel to prep for surge.

Items to Note
- Beginning tomorrow the operational periods will be 7 days long.
- The CDC/ATSDR (Agency for Toxic Substances Disease Registry) has deployed a team to Michigan.
- An Arabic version of the palm card was reviewed and approved. This was developed via Arab American and Chaldean Council.
- Deployed 12 state/local teams and 10 ARC Flint Water Response Teams to the field today.
- DTMB is working to secure space in Flint for FEMA staff.
- Cost analysis to investigate if it would be more cost effective for FEMA to purchase water vs the SOM.

- ARC news release concerning the Volunteer Reception Center (VRC) sent out today.
- Media availability conducted today at 3pm at the VRC.
- Since 1/14/16 Michigan 2-1-1 has received three direct reports of bottled water testing positive for lead. DHHS SEOC Desk and DEQ SEOC Desk was able to contact two of the callers. The Zero Water filter (pitcher) has a handheld test device so people know when to change the filter. This TDS Meter measures dissolved solids (it is not a lead test). This was explained and we are going to work on messaging to ensure this does not cause issues. Dissolved solids are in all water. The water from the callers is going to be tested and a case of water from one of the companies will also be sent to DEQ for testing. Brands are Spartan Spring Water and Canned Water for Kids. The filter company is also going to work on messaging and work with us on this matter.
- Information reported to the JIC:

o As of 1/17/16 as of 5 pm (start date was Tuesday, 1/12/16)

1. 21,393 homes visited by the FWRTs to date.

2. Distributed:
a. Number of cases of water 37,313
b. Filters 53,713
c. Filter cartridges 169,520
d. Test kits 7,379

3. Total number of customers on the Flint water system
a. 29,944 paying customers
b. 45,000 hookups (This is our high end target #)
c. 39,000 includes apartment complexes (The is the low end target #)

4. Resources purchased:
a. Cases of water 82,992 (additional 16,056 donated)
b. Filters 115,700
c. Filter cartridges 243,200
d. Test kits 61,161

5. Teams going out tomorrow:
a. 5-6 State (folks) type 3 teams---Goal tomorrow 300 homes per team
b. 10 ARC folks) type 5 teams---Goal tomorrow 100 homes per team

Local EOC
Operations:
- Continuing to work with faith based organization to distribute resources.
- Working with colleges to obtain volunteers for canvassing.

Chris

Update 1/17/16 – 13th Day (12th Full Day) After Governor's Declaration of an Emergency

Mission focus for the day:
- Receive, store and increase quantities of supplies
- Continue to implement the logistics plan and adjust as needed
- Continue door to door/Flint Water Response Teams (FWRTs), PODs
- Prepare for possible surge in FWRTs utilizing NG personnel

· Work to bring FEMA IMAT personnel up to date following the Presidential Emergency declaration.

Attached Documents:

* SitRep 12

Status on Governor's request letter to the President:

* Emergency declaration received.
* Limited to direct assistance so we will need to ask for the Individual Housing Program but that is something I will work on with FEMA.
* Major disaster declaration denied. The appeal is being developed with a draft to Paul Smith by later afternoon 1/18/16.

Key items for tomorrow to note are:
· The logistics plan will be fully executed tomorrow with all teams.
o We will have 12 state agency, type 3 teams , personnel), with a goal of 300 homes per team.
o We will have 12 ARC, type 5 teams personnel), with a goal of 100 homes per team.

Items to Note
· Deployed 11 state/local teams and 10 ARC Flint Water Response Teams to the field today.
o 4,963 homes visited today.
· DTMB is working with DSEMIC and NC3 to monitor social media for information on cyber-attack yesterday.
01/16/16

• Approximately 5:00PM, Michigan.gov<http://michigan.gov><http://michigan.gov> began to experience slowness in web page load time. Approximately 10 minutes later the Michigan.gov<http://michigan.gov><http://michigan.gov> site became inaccessible caused by of a denial of service attack.

• IBM team was able to implement a mitigation strategy to stop the attack that began at 5:00PM. At 6:24PM the michigan.gov<http://michigan.gov><http://michigan.gov> websites were again available to the public.

• Approximately 7:30PM, a new attack was initiated on the michigan.gov<http://michigan.gov><http://michigan.gov> environment. The attack focused on the DNS servers and resulted in michigan.gov<http://michigan.gov><http://michigan.gov> becoming inaccessible. Additionally, due to the nature of the attack other IBM customers were affected as well. IBM was able to implement a new mitigation strategy that resulted in the excessive traffic being blocked. At 7:53PM the websites were restored to normal operation.

• Shortly after the michigan.gov<http://michigan.gov><http://michigan.gov> websites were restored, the State of Michigan was notified by our internet service providers that a DDoS attempt was made against our SOM DTMB servers in the external DMZ. Once detected, this attack was blocked and Michigan Cyber Security saw no signs of any other types of attacks.

01/17/16

• Genesee County was unable to access MiCIMS due to the State increasing filters. Michigan Cyber Security made adjustments to filter settings and their access to MiCIMS was restored.

• DTMB reached out to the City of Flint CTO, Paul Knific, offering any support they need. Right now they feel they have bigger issues than trying to get some of the things back online.

We currently do not have any additional information on the attacks on the City of Flint (cityofflint.com<http://cityofflint.com><http://www.cityofflint.com>) or Flint Township Police (flinttownshippolice.org<http://flinttownshippolice.org><http://www.flinttownshippolice.org>) websites. We'll continue to pass information along as we receive it.

- Information reported to the JIC:

o As of 1/17/16 as of 7pm (start date was Tuesday, 1/12/16)

1. 16,353 homes visited by the FWRTs to date. We believe we have ~24,000 homes with filters; still trying to validate. This is from the data we received from prior to the SEOC activation (trying to validate the data) plus the PODs and door to door operations since activation.

2. Distributed:
a. Number of cases of water 27,195
b. Filters 50,432
c. Filter cartridges 168,605
d. Test kits 4,861

3. Total number of customers on the Flint water system
a. 29,944 paying customers
b. 45,000 hookups (This is our high end target #)
c. 39,000 includes apartment complexes (The is the low end target #)

4. Resources purchased:
a. Cases of water 57,456 (additional 12,884 donated)
b. Filters 108,520
c. Filter cartridges 239,081
d. Test kits 28,901

5. Teams going out tomorrow:
a. 12 State (folks) type 3 teams---Goal tomorrow 300 homes per team
b. 12 ARC folks) type 5 teams----Goal tomorrow 100 homes per team
Local EOC

Operations:

* Facilitated activation of the Genesee County/Genesee Health System MOU for mental health services.
* Coordinated supplies for distribution to students at the U of M Flint campus.
* Still concerned about people going to every fire station and collecting water/filters.
* Coordinated trash pickup at Fire Station PODs with the City Liaison officer.
* Coordinated hotshot deliveries of supplies to home bound population.

Chris

INTERNAL USE ONLY – LIMIT DISTRIBUTION TO GOVERNOR'S OFFICE

Update 1/16/16 – 12th Day (11th Full Day) After Governor's Declaration of an Emergency

Mission focus for the day:

- Receive, store and increase quantities of supplies
- Continue to implement the logistics plan and adjust as needed
- Continue door to door/Flint Water Response Teams (FWRTs)
- Prepare for possible surge in FWRTs utilizing NG personnel
- Work with FEMA personnel to prepare for engagement following the Presidential Emergency declaration

Attached Documents:

* SitRep 11

Status on Governor's request letter to the President:

* Emergency declaration received. Federal Coordinating Officer (FCO) is David Samaneigo (Sam) who has been my LNO from FEMA. We began discussions on a transition to FEMA support last night. His team is headed to MI at this time and we will have our first coordination meeting on Sunday.
* The request for a Declaration of a Major Disaster was denied. FEMA advised this event does not fit the legal definition of a major disaster (natural incident or fire, flood, or explosion). This information has been provided since prior to the event to elected officials in Flint and the legislature. We are reviewing the chances for an appeal and I have already discussed this with the FCO.

Key items for tomorrow to note:

- The logistics plan will be fully executed tomorrow with all teams.
  - We will have 10 state agency, type 3 teams (personnel), with a goal of 300 homes per team.
  - We will have 10 ARC, type 5 teams l personnel), with a goal of 100 homes per team.
- I will be back on duty Sunday.
- We have been working with some of the churches. Contact was made with 14 churches for Sunday distributions. Interaction with the pastors has been very positive.
- A logistics briefing will be provided to see how many more teams we can put in the field.

Items to Note

- LT Gov visited the local EOC today; discussed local EOC operations.
- Deployed 11 state teams and 10 ARC Flint Water Response Teams to the field today.
- DEQ sampling kits are now being received at the PODs.
- DEQ sampled two Head Start facilities and worked with GIS to obtain future sample sites.
- The Freeman School pilot was delayed due to some parts not arriving as scheduled. Testing was to be done Sunday but may not occur until Monday.
- NG will have a total of personnel in the PODs for distribution. Mission has not changed.
  - NG soldiers have been in the PODS. nore processing in tomorrow with start date of 1/18 in the PODS. The TAG and I will be discussing future use of NG personnel door to door next week.
- Information reported to the JIC:

  - As of 1/16/16 7pm (start date was Tuesday, 1/12/16)

1. 11,324 homes visited by the FWRTs to date. We believe we have ~24,000 homes with filters; still trying to validate. This is from the data we received prior to the SEOC activation plus the PODs and door to door operations since activation. 3,850 homes were visited today (4,000 was the goal).

2. Distributed:
   a. Number of cases of water 20,876

b. Filters 47,935
c. Filter cartridges 167,401
d. Test kits 3,322

3. Total number of customers on the Flint water system
a. 29,944 paying customers
b. 45,000 hookups (This is our high end target #)
c. 39,000 includes apartment complexes (The is the low end target #)

4. Resources purchased:
a. Cases of water 57,456 (additional 12,884 donated)
b. Filters 108,520
c. Filter cartridges 239,081
d. Test kits 28,901

5. Teams going out tomorrow:
a. 10 State (6-9 folks) type 3 teams---Goal tomorrow 300 homes per team
b. 10 ARC (2-4 folks) type 5 teams----Goal tomorrow 100 homes per team

Local EOC

Operations:

* Provided direction to Operations and Logistics Section to initiate water sample collection at PODs.
* Lt. Roach worked with faith based organizations today reference water and filter distribution. Additional churches were supplied with water, filters and test kits.
* Still concerned about people going to every fire station and collecting water/filters.
* Station #6 (POD) has associated safety concerns due to proximity of street and lack of suitable parking. We are working to resolve.

Subject: SEOC Update 1/15/16 - Flint Water - Limited Distribution

INTERNAL USE ONLY – LIMIT DISTRIBUTION TO GOVERNOR'S OFFICE

Update 1/15/16 – 11th Day (10th Full Day) After Governor's Declaration of an Emergency

Mission focus for the day:
- Receive, store and increase quantities of supplies
- Pilot the logistics plan and adjust as needed
- Continue with door to door/Flint Water Response Teams (FWRTs)
- Prepare for possible surge in FWRTs utilizing NG personnel
- Work with FEMA personnel to ensure we get a Presidential Declaration of a Major Disaster and Emergency

Attached Documents:

* SitRep 10

Status on Governor's request letter to the President:

* All documents for the presidential request have been submitted to FEMA. Numerous calls and meetings took place between me and FEMA today.
* When we get the declaration(s) ... I will set up a legislative/congressional call to explain and provide bullet points as to what programs we will received. The Federal Coordinating Officer assigned will also be with me to answer questions. This has helped in the past.

Key items for tomorrow to note are:
- The logistics plan will be fully executed tomorrow with all teams.
  - We will have 10 state agency, type 3 teams (personnel), with a goal of 300 homes per team.
  - We will have 10 ARC, type 5 teams (personnel), with a goal of 100 homes per team.
  - A pilot team was used to test our logistics plan today and with 60% strength they had 160% output (830 homes).
- I will be off tomorrow but available by cell. Tony Katarsky will be SEOC State Director. I will be back in on Sunday.

Items to Note
- LT Gov visited the local EOC and SEOC today. He was able to hear our final briefing for the day.
- Held a short session managing stress with SEOC staff. Two handouts were put in MICIMS for all state and local personnel to view.
- Deployed 10 state teams and 5 ARC Flint Water Response Teams to the field today.
- Standing requirements were created for the JIC so we can get information to the media every day. Below are the current ones we have in place and we should have something out tonight according to the JIC.

  - As of 1/15/16 as of 7pm (start date was Tuesday, 1/12/16)

1. 7474 homes visited by the FWRTs. We believe we have ~24,000 homes with filters but are trying to validate that information. This is form the data we received from prior to the SEOC activation plus the PODs and door to door operations since activation.

2. Distributed:
   a. Number of cases of water 18,576
   b. Filters 45,916
   c. Filter cartridges 165,382
   d. Test kits 3,217

3. Total number of customers on the Flint water system
   a. 29,944 paying customers
   b. 45,000 hookups (This is our high end target #)
   c. 39,000 includes apartment complexes (The is the low end target #)

4. Resources purchased:
   a. Cases of water 44,688 (additional 12,884 donated)
   b. Filters 78,520
   c. Filter cartridges 163,081
   d. Test kits 18,761

5. Teams going out tomorrow:

a. 10 State folks) type 3 teams—Goal tomorrow 300 homes per team
b. 10 ARC folks) type 5 teams—Goal tomorrow 100 homes per team

Local EOC

Home Deliveries:

* Still receiving lists from the Valley Area Agency on Aging (VAAA) on home deliveries and forwarding these to the Sheriff's office. They are going through a lot of homes. 120 out of 125 homes were completed yesterday.

Operations:

* We sent staff to visit Fire Station 6 and the warehouse today. Fire station 6 traffic was congested and that was during a "slow" time. The National Guard is identifying what is needed to alleviate this. MSP is working on providing uniform presence as needed. An additional iPad at each location will hopefully help relieve the amount of time that people are spending at the distribution sites.
* Lt. Roach worked with faith based organizations today reference water and filter distribution. Additional requests from churches were made and I approved the locations so they could be ready for Sunday. Lt. Roach was told by one of the pastors that he met with the Gov today and expressed how much he appreciated the efforts put forth. We should have 14 for this Sunday. We are working on how we can increase this output.
* Still concerned about people going to every fire station and collecting water/filters. NG personnel observed vehicles with several cases of water an overheard saying they were heading to the next station. Some people were helping themselves and taking more than one case at a time. Per the NG they cannot physically stop people from doing so. The NG is going to try to change staging in the fire stations to try to prevent this.
* Flint PD is going to check in every day with the EOC and provide a specific contact person. They are also going to help with traffic issues at the PODS. Will ask Flint PD to provide a presence when water is off loaded at a POD to help prevent people from "helping themselves."

Chris

INTERNAL USE ONLY – LIMIT DISTRIBUTION TO GOVERNOR'S OFFICE

Update 1/14/16 – 10th Day (9th Full Day) After Governor's Declaration of an Emergency

Mission focus for the day:
- Receive, store and increase quantities of supplies
- Prepare/approve logistics plan and finalize lease on warehouse space/begin to move supplies from GCCARD to new warehouse
- Continue with door to door teams and finalize planning for future team use
- Submit request for a Presidential Declaration of a Major Disaster and Emergency
- *Continue to work on long term recovery items (DHHS, DEQ, MDARD)*

Attached Documents:

* SitRep 9

Status on Governor's request letter to the President:

* All documents for the presidential request have been submitted to FEMA. I had a lengthy conversation with the FEMA Region V Administrator reference the request prior to sending.

Key items for tomorrow to note are:

- The door to door teams will continue in the morning.
- We will continue to ramp up door to door operations with additional teams. Teams continue to focus on the high lead level areas and additional data is being analyzed to focus mission areas.
- ARC will increase the number of their Water Response Teams.
- Supply burn rates as well as projections on how many teams will be needed to put filters in all homes within 3 and 5 days will be completed. Analysis will be done to see in NG personnel may be needed to finish in quicker manner.

Items to Note

- DEQ was notified of the number of homes who are willing to have them take additional samples in the future (current number (114). This question was added to the App being used by the Water Response Teams. Data will be provided when needed.
- LT Gov is scheduled to be at the local EOC and SEOC (~4:30) tomorrow to see the operations.
- Secured 80,000 sq. ft. of a warehouse today. Working to consolidate all resources in one location. Tomorrow will be the first day of full implementation of our logistics plan.
- Email sent to state employees to request volunteers for weekend.
- Media monitoring showed no incorrect information today.
- Michigan Association of Broadcasters is sending PSA to radio stations.
- Coordinating with Red Cross on volunteers for weekend.
- Deployed 8 Water Response Teams to the field today (approx. 120 volunteers). 78 Red Cross volunteers active across the operation today.
- National Guard is ramping up to have 3 soldiers per shift at each POD tomorrow. Will also have a Public Affairs Officer at the JIC and liaison at the local EOC.
- Senator Ananich visited the SEOC today to see how things operate. The visit went well and he seemed happy with the number of staff working the Flint event. He tweeted out a message indicating there is still a lot of work to be done but all are working hard.
- DHHS

o The Community Health Emergency Coordination Center (CHECC) is working on the following:

§ A nutrition plan
§ Education materials, messaging, and working with local agencies
§ Developing a community assessment for disaster behavioral health services.

- Lined up the delivery of filters to two large apartment complexes and a student housing complex.
- We have the list of individuals needing home service (additional contacts will be sent to the Ops Chief at the Local EOC each day at 4:00). Info will be provided to the sheriff's office for action.
- Water Response Team Numbers (this is not the total of homes with filters – I will provide that number tomorrow but it appears we have filters in over half the residences):

INTERNAL USE ONLY – LIMIT DISTRIBUTION TO GOVERNOR'S OFFICE

Update 1/13/16 – 9th Day (8th Full Day) After Governor's Declaration of an Emergency

Mission focus for the day:

- Receive, store and increase quantities of supplies
- Prepare/approve logistics plan and close lease on warehouse space
- Continue with door to door teams and finalize planning for second wave increase (+15 teams – total for 1/14/16 will be 20)
- Continue to work on Governor's Declaration of an Emergency

Attached Documents:

* SitRep 8

Status on Governor's request letter to the President:

* All support data from state Agencies and local jurisdictions collected as of 6:00 pm on 01-13-16
* Current timeline:
  * First draft completed and ready for review by State Department Directors (including the Attorney General) by 11:00 am on 01-14-16
  * State agency reviews due back by 1:00 pm on 01-14-16 for revision of the draft
  * Revised draft to Captain Kelenske by 2:00 pm on 01-14-16 for review and forwarding to the Governor for final review
  * Final draft (based on Governor's review) submitted to FEMA Region V Administrator by no later than cob 01-14-16 but hopefully sooner. FEMA is aware and ready to receive.

Requests and potential response from FEMA/President

* The letter will request all programs eligible under the Stafford Act including Public Assistance, Individual Assistance, Hazard Mitigation, FEMA's coordination of assistance from other Federal agencies and direct assistance from FEMA
* The letter will also request potential direct reimbursement from other Federal agencies such as EPA, CDC, HUD, DHHS and SBA
* This request is in coordination with the request for Non-Stafford Act federal assistance already requested and received by the State (technical assistance and administration, but no direct reimbursement of disaster costs)

* Direct Federal assistance from FEMA in the form of Individual Assistance to homeowners for household repairs (repair and/or replacement of water service lines and Other Needs Assistance to reimburse for water filters, bottled water, etc.) is a possibility
* Direct Federal assistance from FEMA in the form of Public Assistance is not as likely as it is mostly replacement of publicly owned water distribution lines (and not the direct result of damage from a natural cause)
* If Stafford Act assistance is denied (Public Assistance, Individual Assistance and Hazard Mitigation) FEMA could still provide coordination of assistance from other Federal agencies if the President declares a disaster (or emergency) for the State of Michigan

Key items for tomorrow to note are:

- The door to door teams will continue at 9 a.m. – 5 p.m. Thursday morning and continue through the weekend.
- We will continue to ramp up door to door operations with additional teams. Teams are focusing on the high lead level areas and additional data is being analyzed to focus mission areas.
- MNG will have a press event at the armory with incoming soldiers and MG Vadnais.

Items to Note

- Received information that Rev. Jesse Jackson will be in town 1/17/16 at 1:30 at the Heavenly Host Church of the Harvest of Dartmouth St, Flint.
- Managed and corrected misinformation on NG role.
- Senator Ananich is stopping by the SEOC tomorrow morning 0845. I am meeting with him and his Chief of Staff. Short visit as he has a 0930 at the Capitol.
- Working with Comcast so they can put teams in the field for distribution.
- Penske is going to give us 15-20 trucks over the weekend.
- Contact made with Two Men and a Truck for resources.
- Meeting set with Google where they will brief me and key staff potential tasks.
- Coordinated with Flint Mass Transportation Authority (MTA) to include Fire Station PODs on bus routes.
- Tomorrow I will have a projection as to the number of teams needed to get all citizens filters in their homes in 5 days / 3 days.
- We are standardizing team structure and supply deployment to increase efficiencies. Mission Ready Package (MRP) specifications will be sent out for other entities to assist with door to door. They will then be able to arrive as a MRP, get supplies, receive a mission location and deploy.
- 5 Water Response Teams were in the field again today. Below are the numbers from the 2 days of just the Water Response Teams (there are paper copies with data still to be entered from the PODs). I was just briefed by the ARC logistics planner and there are efficiencies we can put in place to increase homes touched per day. The next version of the app will provide more granular details. Additional 30 tablets were configured by DTMB today for field implementation to include use in the PODs.

· We show 17,276 residences with filters (this does not include data entry to be completed from POD or other locations).
o We have 35,378 service hookups but with apartments, multi residence dwellings, etc we would be around 45,000.
· Logistics Support
o The American Red Cross Logistics Planner provided me a brief and I approved the plan forward. The current plan includes:
§ Mission – A filter in every home ASAP.
§ 4 Distribution Methods
· PODs (5)
· Water Response Teams (20 effective tomorrow and this will increase)
· Local EOC "Hot Shots" (these are calls for functional needs, unable to get to a POD location due to ??, etc). Personnel dispatched with supplies.
· Local EOC support for other local requests (Faith based for distribution, etc.)
§ Three warehouse locations at this time
§ How to better leverage ARC resources

· Supplies – Daily Numbers

o Replacement Cartridges - 30,700 delivered.

o Water (cases) - 19,152 cases delivered

· Budget projection completed and will be submitted to SBO for review.

· Notes from Water Response Team Command (MSP)
o Very good synergy between Flint Post troopers and Genesee County Sheriff command and deputies in effective and efficient deployments for distribution efforts.
o Great attitude and efforts by uniforms and volunteers to make important contributions to the City of Flint on water response team deployments.
o Clear direction and coordination in the field of supply teams by lieutenants and troopers. No confusion. Clearly defined roles.

All personnel continue to be fully committed to fixing this as quickly as possible.

Chris

Update 1/12/16 – 8th Day (7th Full Day) After Governor's Declaration of an Emergency

I apologize in advance for the length of this report. With the supply issues we had the last couple of days I wanted to share our inventory plus what we anticipate to ensure we do not have supply issues.

Mission focus for the day:

- Receive, store and increase quantities of supplies
- Fine-tune logistics
- Increase and deploy door to door teams (4 state teams added to teams from the Sheriff's Department)
- Increase collaboration and messaging of collaboration with local agencies (specifically the Sheriff's Department)

Attached Documents:

* SitRep 7
* Executive Order Activating the National Guard

Key items for tomorrow to note are:

- The Governor signed an Executive Order activating the National Guard. Mission will be to relieve ARC volunteers at the PODs (Fire Stations) which will free up the ARC volunteers for door to door activities.

o I have briefed the ARC Disaster Officer on this plan.

- The Governor requested, through FEMA Region V, support from the Federal Emergency Management Agency (FEMA) to bring together and identify other federal agencies that may have programs and funding that could be dedicated to assisting Flint as part of an interagency recovery plan. One of the existing LNOs has been identified as the POC for this. He will be a great liaison for the FWIACC.
- The door to door teams will continue at 0830 Wednesday morning and continue through the weekend and ramp up door to door operations with additional teams. Teams are focusing on the high lead level areas.
- We will look at all commodities and see where we are and where we need to be while working with the ARC logistics specialist.

Items to Note

- PSA video sent out to Flint citizens on resources available.

- Water

o Today's numbers - 7,824 cases of water arrived today, 1/12/16 (109 pallets)
o Ordered:
§ 19,152 cases of water are going to arrive Wednesday, 1/13/16 (266 pallets)
- 1/3 is going to GCCARD and the rest is going to the new warehouse
§ 12,768 cases to arrive daily beginning Thursday through Saturday (177 pallets a day)

- Filters

o Today's numbers
§ Ordered on 1/11/16 and delivered 1/12/16 direct to GCCARD
- 2,000 – Brita filter faucet mounts
§ Filter Replacements
- 2,400 – Brita filter replacements (single pack)
- 8,000 – Brita filter replacements (two pack)
o Ordered on 1/12/16 to arrive Wednesday
§ Faucet Mounts – To be delivered direct to GCCARD on 1/13/16 (Wednesday)
- 10,000 – PUR Vertical faucet mount
- 2,500 – PUR Horizontal mount
§ Replacement Filters – To be delivered direct to GCCARD on 1/13/16 (Wednesday)
- 10,000 – PUR replacement filters (3 pack)
- 10,000 – PUR replacement filters (single pack)
§ PUR Combination Pack – to be delivered to GCCARD on 1/13/16 (Wednesday)

- 10,700 – PUR combo packs

- To arrive Thursday
  - Zero Water Pitcher (8 Cup) – Delivering direct to GCCARD on 1/14/16 (Thursday)
    - 1,300 – Zero Water pitchers
  - Faucet Mounts – Delivering direct to GCCARD on 1/14/16 (Thursday)
    - 11,000 – PUR vertical faucet mount
    - 1,500 – PUR Horizontal faucet mount
    - 5,000 – Brita faucet mount
    - 10,000 – Brita adv faucet mount white
    - 12,000 – Brita adv faucet mount chrome
  - Replacement Filters – Delivering direct to GCCARD on 1/14/16 (Thursday)
    - 117,600 – PUR replacement filter

- Test Kits
  - 6601 unassembled kits arrived at GCCARD today, 1/12/16.
  - 500 have been assembled and are ready for distribution
  - 1000 additional unassembled kits have been ordered to be delivered at GCCARD (no ETA yet)
  - 10,142 unassembled kits to arrive at GCCARD early next week

- Second warehouse – Located in Flint
  - 100, 000 square feet of secure warehouse obtained.
  - Accepting commodities beginning Wednesday, January 13

- Logistics Support
  - The American Red Cross Logistics Planner arrived from DC today as requested. I outlined what her mission was and how I saw the progression forward. This logistics planner will assist in streamlining the inventory and distribution process now and into the future.

- Door to Door Numbers
  - Today the app implementation for the field went extremely well. There were a few issues that were quickly addressed. One related to how form fields should be filled out. Another was getting styluses for teams so that they don't have to remove their gloves in the cold. All very simple to fixes.
  - We are working on version 2.0 so this can be used at the PODs
  - We should be able to greatly optimize distribution in the near future as we mapped the active water subscribers from Flint's DPW and are adding them to the field team members apps. Of the ~56,000 possible addresses, this reduces the number of possible homes to visit down to ~29,000.
  - Notes from the field commander:
    - "Today we started out the day using two groups that consisted of approximately 10 people in each group. We eventually combine groups with Genesee County Sheriff's group and they brought two more groups with approx. 10 people (Local UAW) in each group. This made us a lot more efficient and we were able to set up a game plan. Tomorrow I feel we will be more efficient and we will have a better plan in place to get the maximum output out of our resources."
  - In the end, there were 394 total home visits with the following breakdowns:
    - 217 Door Hangers
    - 152 Vacant Homes
    - 117 Water Distributions
    - 112 Filters
    - 3 Pitchers
    - 48 Water Test Kits
    - 211
  - CALL VOLUME:
    - 185 calls for water-related issues had been received as of 4:45 pm.

· Logistics made contact with Comcast and will be supplying them with filters and replacement cartridges for their deliveries in their work trucks as they make services calls. They will follow our procedures for reporting (our checklist).

Chris

Update 1/11/16

The focus today was the media event and getting the supplies and logistics on track. Most of the activity today was working on logistics for the water and other supplies.

Attached Documents:

* SitRep 6

Key items for tomorrow to note are:
· The door to door teams will start at 0830 Tuesday morning. It is reported that troopers are going to the door but DHHS employees are the lead with a troop car nearby.
o State and local GIS created an App today for the teams to use tomorrow but I see potential use at distribution sites.
o The App data will be used for our maps as we survey the public/distribute supplies and we will be getting real time metrics through the site from the field send back to the SEOC. We are using Android tablets tomorrow but in the future can use any mobile device for this.

Items to Note
· It was reported that only one POD (Station 5) was out of water longer than 30-45 minutes. This site was ~2 hours without water and part of that was the truck went to the wrong station. Trucks were sent as soon as the local EOC was notified.
· We also did not receive a DHHS shipment that was to come in which caused some filter delivery issues.
· Supplies are limited at this time; however, we are getting our shipments starting at 0630 tomorrow.
· We have Home Depot giving us 12,768 cases (this was a late development so the SitRep indicates half the amount) of water every day starting tomorrow. We are still working with other distributors too.
· ARC is flying in a logistics planner tomorrow. Three additional staff with be with her to shadow and help. We are turning warehouse logistics over to ARC logistics. We are moving tomorrow to a process that has a distribution center (GCCARD) and a warehouse that is 100,000 square that will maintain mass quantities. Staff has continually been placing orders for supplies to ensure we get a head of this. The intent is to keep the warehouse full so we do not have these continual issues of supplies.
· Began mapping lead service lines (anticipate having draft of lead service lines Friday).
· Coordinated with local IT managers overseeing filter tracking system to streamline data collection.

Local Emergency Operations Center
• Working to coordinate resources at the local level to maintain adequate supplies at all PODs.
• Demand has exceeded supplies and supplies are moving rapidly from PODs today. Working to make sure POD managers notify us when they start running low.
• Working to establish a warehouse for local resource storage.
• Established trigger points for resources at PODs and hourly inventory reporting from the PODs.
• Discussed potential long term water sources between local EOC and SEOC.
• Established planning cycle/meeting scheduled for 1/12/16.
• Local EOC EMHSD staff with Natasha Henderson to request deployment of City representative at local EOC.

Chris

Update 1/10/16

Attached Documents:

* SitRep 5
* Door card (English version but Spanish version will be ready for Tuesday)

I have a local EOC section listed below but state personnel are heavily engage in management of both locations. We occasionally hit some road bumps with this event but all personnel are working well together to accomplish our goals (especially state agency personnel).

I have had good discussion with FEMA LNOs. Two statements have been developed from our discussions that hopefully helps put this in more context but if it is more confusing I apologize:

1. In the immediate response, the State, in collaboration and coordination with city of Flint and county of Genesee are working to get water, water filters, and testing kits to the affected population. In conjunction, the state will coordinate with federal agencies to ascertain what resources can come to bear to help mitigate the issue.

1. If asked about a federal declaration from FEMA, we need to articulate the definition of major and emergency declaration and state or note to ourselves that it appears to not qualify; however, there may exist opportunities to leverage federal assistance from some agencies (i.e....EPA) under their own authority to help address this issue.

- We need to really manage expectations on the potential for a federal declaration...not that we will not go after one but it will be difficult to get.
- A major disaster is defined in the Stafford Act as any "nature catastrophe (including hurricane, tornado, storm, high water, windriven water, tidal wave, tsunami, earthquake, volcanic eruption, landslide, mudslide, snowstorm, or drought) or, regardless of cause any fire, flood, or explosion.....causes damage of sufficient severity and magnitude, to warrant major disaster assistance.....to supplement the efforts and available resources of States, and local government....."
- An emergency declaration is "is any occasion or instance for which, in determination .....assistance is needed to supplement State and local efforts and capabilities to save lives and protect property and public health and safety or to lessen or avert the threat of a catastrophe....."
  - o This is limited to immediate and short-term assistance (I hate to put times on this but short-term is like 3 weeks), essential to save lives, protect public health and safety and property.
- Severity of the situation is "A finding that the situation is of such severity and magnitude that effective response is beyond the capability the state and affected local governments, and that the state requires supplementary federal emergency assistance to save and to protect property....
- Nature of assistance for Emergency Declaration is for "Debris removal, emergency protective measures, direct federal assistance...."
  - o Debris Removal = self-explanatory and we do not have this
  - o Emergency Protective measures = water, commodities, transportation (remember ... to supplement what the locals and state are already doing if we need more)
  - o Direct federal assistance= what specific type of work is requested, and what are the reasons why the state/local government cannot perform or contract for performance. Essentially what is the need that state/local govt cannot provide. I can see this being something we need but we may be able to get this outside a federal declaration under the federal agencies own authority to help address this issue.

Back to the update...

Key items for tomorrow to note are:

- Training is occurring for the door to door teams scheduled for Tuesday morning.
- Deploying an additional MSP District Coordinator to the local EOC for command and control support.
- Deploying two DTMB trucks and two drivers for sustained logistical support for the week.
- Media event with the Governor in Flint.
- New Incident Action Plan starts (1/11 0800 -1/13 0800 operational period). Our objectives are as follows:

1. Ensure all households within impacted community have required resources.
2. Ensure accurate tracking and accounting of all commodities.
3. Improve and maintain public information strategy.
4. Develop a long term public health and services plan.
5. Ensure adequate staffing to support operational requirements.
6. Identify possible assistance programs.
7. Develop an approved GIS strategy.
8. Maintain coordination between partner agencies and organizations.
9. Enhance situational awareness and common operating picture of all activities.
10. Develop a comprehensive Recovery Plan.

Items to Note

- All 9 churches had filter systems/replacement filters, information sheets, and water test kits delivered as requested by each pastor/reverend on Sunday. We did not think we could get them water due to the limited time but we did end up getting water to all 9 churches with the other items.
- Fire station resource locations stayed open from 9a to 9p and will continue with those hours until further notice (Staffing is in place until Saturday). ARC is staffing these locations.
- The media event was held at Fire Station No. 1 and report back is that it went well and the spirit of collaboration between local, state, non-governmental partners is strong was relayed.
- The four door to door teams will have the hours of 8:30 a.m. to 5 p.m.
  - Each will have logistics support from DTMB, security from MSP, and contact personnel from DHHS.
  - The door card is attached that will be left if no one is home.
- Worked to identify a storage location within the City of Flint for water and supplies. G-CARD is identified as temporary location but we are moving toward a state run warehouse operation (looking at private sector partners to assist, especially with the warehouse management side).
  - GCCard is large enough, centrally located and comes staffed. GCCard has 75,000 sq ft with warehouse managers to assist with tracking resources coming in and out.
- GIS will provide us daily updates of how much was distributed each day but note we have a delay in data entry from delivery to entry in the GIS system. Over the weekend there was a problem locally with staffing to get this completed. A solution is in place and will be implemented so we get timely data. Distributed to date (as of 1/8/16).
  - 12,386 filters
  - 1,985 replacement filters
  - 354 Pitchers
  - 2500 Lead Testing Kits
- Establishing and tracking of resources is a priority. Staffing has been assigned to get a good handle on these to ensure distribution sites maintain an appropriate level of inventory. I have requested trigger points get put in place so we do not get below certain levels in the main warehouse location.
  - Contacts with some large water distributors have been made and their and our logistics chiefs will connect first thing this week.
  - We have ordered an additional (expedited delivery with ETAs tomorrow)
    - § 40,000 Brita Filters
    - § 40,000 Brita Replacement Filters
    - § 1000 Zero 8-Cup Pitchers
    - § 1000 Zero 8-Cup Pitchers

§ 2000 PUR Replacement Filters
§ 93 Pallets of water (about 6700 cases)
· GIS continues to produce multiple maps for use.
· JIC Items
o Requested PSA on the radio. Media has been approved and working with MAB.
o Requested JIC to contact Comcast and Dish Network for availability for continuous running of filter install/replacement and test kit video.
o A news release will likely going out tomorrow regarding canvassing in neighborhoods. Continued social media messaging.
§ Tuesday – embed state PIO with one of the canvassing teams to liaison with media.
§ JIC moving tomorrow to Flint.

Local Emergency Operations Center

I am providing you some information on some issues we ran into at the PODs. This has been addressed with additional state resources and processes put in place so we do not run out of resources. Public concerns/complaints have not been brought to my attention at this time. Staff is working very hard to ensure we do not run out of supplies at the PODs and they understand the consequences. No one in the Local EOC or State EOC is happy the follwoing occurred and I felt you should know in case it is brought up. Again, I believe we have fixed this and I take full responsibility for any supplies not being on site.

Fire Station Inventory Levels:
Station 1:

* Only time without supplies - 15 minutes without water while the truck was unloaded.
Station 3:

* Ran out of replacement filters around 7:00, replacement filters delivered around 7:30. Had to pick up replacement filters from Home Depot and deliver.
Station 5:

* Ran out of water around 5:00, water was delivered around 6:30. We needed to find additional trucks because DTMB drivers were over hours. The ARC stepped up and found a truck to go and pick up a pallet of water and deliver.
* Somewhere between 4:00-6:00 they ran out of lead test kits. No way to restock these because City facilities were closed and could not reach anyone.
Station 6:

* Around 5:00 ran out of water, filters, and replacement kits. Replacement kits were delivered around 7:30. Additional water and filters were delivered after 9:00 due to the DTMB drivers heading back to Lansing. Food Bank was called and had to get drivers in to operate trucks, pick up water from the School District, load and deliver to all sites. Delays occurred with weather conditions and needing to use last minute sheriff EOC staff to load due to issues with City workers. City workers were scheduled to help and left around 7:00 without helping.
* 2 pallets of water were dropped off in the afternoon and within 1 hour were gone. This was much faster than we expected. On 1/9 they didn't go through 2 pallets of water at any station for the hours 9:00-4:00.
* We received news that a reverse 9-1-1 call notified residents of water which caused an unanticipated amount of people obtaining water. There was also a report of 1 person walking out with 2 cases of water and trying to sell in the parking lot.
Station 8:

* Around 7:00 ran out of filters and lead tests. Filters were delivered around 8:00 from the food bank trucks.

* Hourly reports were requested in the morning from volunteers but this information was not received as to the status throughout the day. Early inventory of supplies took between 1 hour-1.5 hours to receive in the EOC. We were not advised of low counts, just zero numbers.
* Reports received that the last couple of hours were slow.
* Residents were advised of the other sites and the opportunity to obtain supplies.

Restocking Plan

* United Way set up meeting with Food Bank to discuss.
* Had EOC meeting on this topic to discuss options.

Churches:

* All 9 churches received waters, filters, and informational bulletins.
* Lt Roach received positive feedback from 3 of the pastors.
* No complaints were received.

Signage:

* Provided information to SEOC on signage requirements at the fire stations.

Storage:

* Researched storage spaces; established temporary site at GCCARD.

Personnel:

* Lack of local EOC leadership (seems somewhat checked out) with IC and Deputy IC (doing an okay job).
* Captain TaFoya (Genesee County) helped tremendously today with all the plans outlined above and attended the press conference.
* Tina Martinez at the Food Bank and Matt Purcell at GCCARD were extremely helpful in getting last minute operations set up.

Chris

Update 1/9/16

SitRep 4 attached for more in depth information. The below only contains some items worked on today and while the format in the attached SitRep is not perfect (it is created automatically by MICIMS) it does contain a lot more information you may want to read. I also attached one of our maps. It is our filter distribution map. All filters handed out by anyone working with us feeds into this now. We are continuing to refine these and at this time there is a delay in the upload of address data but we are working on it. We have a ways to go to get filters in every home but this will help direct us to those who need still them. We also are working on identifying abandoned homes.

Key items for tomorrow to note are:

- 9 churches will have ARC volunteers and filters for distribution. Some may also get water.
- 5 fire stations are a distribution point for water, filter systems/replacement filters, and water test kits. While only open today until 4 p.m., tomorrow and until further notice they are open from 9a to 9p.
- Media event will take place on the above tomorrow.

Items to Note

- 211 has some issues with call load but it is being worked on. 2-1-1 Director contacted MDHHS PIO to discuss/resolve caller wait times and messaging. We anticipate an increase in activity tomorrow in 211 calls so we requested and received an increase to staff 211.
- We are shifting tasks the SEOC took on that are handled more effectively and efficiently at the local EOC. We have established command and control in their EOC. We are running things there but that is not being made public. We are doing this in partnership but we are clearly handling the operation with state personnel oversight.
- A 3rd FEMA LNO arrived today upon my request. This has nothing to do with a Presidential request for a declaration but support for some other items I want worked on for long term recovery.
- We continue morning calls with the local EOC leadership and local emergency manager on what our goals for the day are as well as any issues/concerns.
- Five 5 fire stations have received water, water filters, replacement cartridges, and water testing kits with American Red Cross personnel at each location to assist with delivery of resources and collection of addresses receiving them. These locations will be open from 9a – 9p daily until determined they are no longer needed. Those picking up water testing kits will be advised that they can return the test kits to the fire departments (where they will be picked up and taken to the Flint City Hall), the Flint Water Treatment Plant, or they can take them directly to the Flint City Hall. For those unable to return the kits, 211 can make arrangements for pick up the kits. We understand response to these sites has been positive thus far. The Genesee County EOC will be monitoring these supplies and request replacement of products as needed.
  - A call is going out tomorrow morning to advise this information ... I do not believe it was every resident but Tori Sachs has that info if needed.
- I approved a press release today to advise the public that all levels are working together to ensure delivery of filters, test kits and water; noting that all of these items were delivered to the 5 Flint fire department stations. It was stressed that the public should be aware that the local and state agencies have been working cooperatively to assist the residents - and will continue to do so. This was done to hopefully end or at least minimize the "who can get water and filters out first" when all of this has been connected with the state and coordinated since the state declaration was put in place.
- The arrangement of 2,000 filters, to be taken to 9 local churches on Sunday, January 10, is ongoing. The filters have been secured; they are now in the possession of the DTMB. DTMB will return to Flint on Sunday morning to deliver these to necessary locations. The American Red Cross will be on site at each church to assist with distribution and recording addresses (for GIS). The local EOC is working to ensure these arrangements are complete and run smoothly. Future engagement with the faith based community will occur to assist with additional distribution.
- A Flint City liaison has not been in the EOC but starting Monday this will be in place to keep the Flint Mayor appraised of activities being conducted in the city. She also has been advised she can call me at any time if she needs anything.
- Training has been confirmed for the door-to-door operation scheduled to start Tuesday. Four teams are initially scheduled with more to potentially be put in place. These are the teams that will be handing out water, filter systems/replacement filters, test kits and information. If nobody is home, a door hanger with information is being left. DHHS personnel and one MSP trooper will be on these teams.
  - Training will take place at 1 p.m. on Monday afternoon at the DHHS office on Clio Road. DEQ and DHHS will provide the training.
    - § Training is so those going door to door can explain what the filters do, how to install them, if they need install help to call 211 who has a list of people who can install the filters, and answer any other questions versus just handing them the filter.
  - Hours of operation will be Tuesday through Friday from 8:30 a.m. to 5 p.m. AT THIS TIME. I am reevaluating these times to increase contact with someone versus just leaving information.
  - Logistics are being finalized for the teams and trucks to handle stocking and re-stocking of materials during daily operations.
  - GIS maps will provide guidance on deployment locations for these teams and other teams in the field.
- A pilot project at Freeman Elementary with LARA and DEQ has been initiated to see if replacing certain plumbing components in faucets at the school will drop the lead level.

MSP/EMHSD GIS Section Updates

Accomplished Today (January 9):

- Produced a Point of Distribution Map. Contains four types of distribution points; Churches, Water Resource Sites, Filter Distribution Sites, Water Distribution Sites.
- Produced Filter Distribution Map.
- Developed process of how best to handle geocoding the household filter locations, worked on processing the data.
- Worked on map of franchise customers outside of Flint City.
- Produced maps for MDARD on food establishments and Local Health Departments.
- Produced map of Church Filter Distribution map for DTMB.

Local Emergency Operations Center

· The state has deployed : personnel to the Genesee County EOC to ensure we have command and control at the local level. On 1/8/15 The state personnel took over the incident management functions of the Genesee County EOC (not public). The arrival of additional staff allowed the local Emergency Management Coordinator to delegate tasks which relieved a tremendous amount of stress.

· Additional Sherriff staff (·positions) will be shadowing the state incident management team to allow for transition to the county personnel later in the incident when we are comfortable with them handling things. Not sure when that will be but we have secured a direct bill hotel for staff to stay in Flint as long as needed.

· With the additional staff, the Local EOC will be able to take over functions previously handled by the SEOC including:

o Logistical activities to support church operations.
o Logistical activities to support fire stations operations.
o Coordinate Donations Management activities and draft donations management plan
o Coordinate Volunteer Management activities
o Identify local storage/staging facilities
o Overall inventory tracking
o Tracking of Points of Distribution (PODs)

Chris

INTERNAL USE ONLY – LIMIT DISTRIBUTION TO GOVERNOR'S OFFICE

Update 1/8/16

SitRep 3 attached.

There is a significant difference in what is being presented by the media and what the local EOC is relaying to us at the SEOC. It is also being driven by the media that this is a state versus local response (who is providing more and quicker versus a coordinated effort between all). That said, I advised SEOC personnel that perception is reality in some eyes and we are to move forward to address items that typically are addressed at the local level. I have ordered the SEOC open all weekend due to make the quick wins that we need and continue to get the coordination and collaboration in place that is needed (but make gains on our own as needed).

Items to Note

· Two FEMA LNO's arrived today and are in the SEOC. A third LNO was requested from FEMA due to some unique issues with this event to include having to deploy more or my staff to the local EOC to get more structure and/or find out why there is an issue with the message the media is showing versus what we are hearing from the local EOC.

- We finally received from the local EOC 8 locations (we were told originally early in the week they had 80-90) that are their Points of Distribution (PODs) for water in conjunction with the local food bank. The PODs are not getting water from the food bank even though the food bank has water. We are going to resolve this issue as we can help deliver the water to the PODs but we were not aware of this. 8 PODs is not enough locations if water needs to be distributed to citizens. Speaking with the ARC Regional Administrator later today, I believe ARC got water to those locations but I need to confirm that in the morning. The food bank reported they had 376 cases of water.

- We have learned that a low number of residents are testing their water when DEQ can test 400 kits per day. This is an added focus that we believe can be increased through dissemination of test kits with the filters and any water.

- I found out the Mayor was okay with using fire stations as distribution points for water, filters, and water test kits. While this did not come to me through the local EOC, I advised we needed to get water, filters, and test kits to these locations for tomorrow. The distribution at 5 Flint Fire Department stations has been coordinated to be in place by 10:00 am tomorrow morning.

- DTMB has provided a truck and driver to pick up water test kits from DEQ lab in Lansing, water from the Food Bank and water filters and replacement cartridges from GCARD in Genesee County.

- 10 American Red Cross (ARC) volunteers will meet the DTMB truck at GCARD at 9:00 am to be provided information about filters. Instructions will be included in water test kits. They will then report to the 5 fire stations to assist in distribution of resources to the public and track addresses of same.

- Residents will be told where they can drop off their water test kits, or that they can return them to the fire station the next day. Coordination will occur on pick up of water test kits daily to be taken to the Flint City Hall, who will then delivery them to the DEQ testing lab.

- STILL FINALIZING - We have made available 2,000 Filters for distribution on Sunday as parishioners leave mass/services. This will be 200 filters for 10 churches in Flint. While this is a small number of churches, we do not want to waste an opportunity to hand out filters and this seems like a quick way to so. The filters will be put on the DTMB truck on Saturday for delivery to TBD locations for distribution. Logistics remain undetermined as I am still waiting on a list of the churches, pastors/reverends/hours or services/etc. The DTMB truck will be returning to Lansing approximately 11:00 a.m. so we need to finalize this quickly on Saturday. We may utilize ARC to assist with this.

- The Recovery branch is working with the JIC to develop a door hanger card. DTMB is working on the printing portion of the hanger card. Recovery will also be finalizing logistics over the weekend for neighborhood canvasing to occur early next week. 40 volunteers have signed up to attend training on Monday afternoon to complete this task. The mission will be to deliver water sample kits along with water filters/replacement cartridges, and water.

- It appears that 211 has become overloaded. DHHS is researching ways to increase capacity for calls.

- A Volunteer Management Coordinator is in the Genesee County EOC as of today.

- A Donations Management Coordinator has been requested and she will be in the Genesee County EOC Saturday.

- DHHS had a conference call with GM today; they indicated they can provide cash, and supplies, but primarily manpower. No commitments were made at this point. We inquired as to availability of warehouse space and trucks. It was left as GM being a major resource pool that we can tap into as we determine missions. Further conversations will occur, but primarily GM just wanted us to know they are there if needed.

- An additional EMHSD staff member was sent to the Genesee County EOC to act as Operations Section Chief and obtain awareness of the situation there.

- GIS staff met with various parts of Genesee County/Flint personnel to try to get a handle on data available.

- GIS continues to work with local GIS personnel with three GIS staff going to Flint today to work with them. GIS staff is working with U of M on how best to proceed with digitizing water lines for long term recovery.

Chris

UPDATE 1/7/16

A summary of some of today's SEOC activities is provided below. Attached is the following:

- Today's SitRep which contains more information than below.

- The resource request/task assignment sheet for your situational awareness. This is how locals request resources as well as how we track resources and any assignments and/or tasks that are to be completed.

- JIC Task Tracking – for your situational awareness on how we are tracking requests and assignments. Once someone is assigned a task or resource request it allows them to document what work has been or will be done as shown at the bottom of the document.

Items to note:

- I received a document this evening from Genesee County which appears to be damage assessment information. Analysis of this will occur tomorrow. It appears to be infrastructure and costs to fix it and no other impacts.

- I spoke with Jamie Curtis, Genesee County Commissioner, this evening. A very good relationship is in place with him, especially with our District Coordinator (DC). I also have our DC working on developing stronger relationships with the Mayor/Mayor's office.

- GIS staff continue to obtain data and work with County and City personnel to get a picture of where resources have been provided, need to be provided, as well as infrastructure locations (pipes) that could be affected.

- Personnel and agencies have been tasked with developing a plan to get people in the community to deliver information, hand out filters, etc. This would target those areas we are showing minimal or no filter distribution based on the data we are collecting. The plan is to get them in the field by Tuesday and the plan will be provided to me tomorrow.

- Filters can be obtained at the following locations:

- Michigan Department of Health and Human Services office, 125 E. Union St., Flint, MI 48502

- Michigan Department of Health and Human Services office, 4809 Clio Road, Flint, MI 48504

- Genesee County Community Action Resource Department office, 2727 Lippincott, Flint, MI 48507

- Genesee County Community Action Resource Department office, 601 N. Saginaw, Flint, MI 48502

* Conducted briefing with local EOC and county executive.
* Conducted briefing with state agencies (daily updates).
* Began work to schedule legislative/congressional conference calls. Tentatively scheduled for 2 p.m. Friday.
* JIC continued to develop messaging.
* Provided input to local EOC regarding best methods of identifying health and non-structural impacts for damage assessment process.
* Deployed two EMHSD/SEOC liaisons to assist the local EOC.
* Published the Incident Action Plan and continued assignment of objectives/tasks.
* FEMA Liaison Officers just arrived in Lansing to assist command and general staff.
* I spoke with Harvey a few times and he should have talking points later tonight or tomorrow a.m. for his use and also for others who may speak to media outside of state government who may benefit from our messaging.
* We held a media round table at 1 P.M. at the SEOC. Dr. Wells and I spoke and answered questions to numerous media outlets.
* Local agencies and NGOs continue to provide water and filters to citizens.
* The website, www.michigan.gov/flintwater<http://www.michigan.gov/flintwater><http://www.michigan.gov/flintwater>, was update with information and links to assistance to include 211. Additional recommendations were provided to include information on the testing water in homes.

EMHSD GIS:
Accomplished Today:

- Reproduced Socio-Economic Status Map

- Reproduced Predicted Affected Populations Map

- Cleansed old data and reports for water filter distributions

- Created draft map of water filter distributions (Refinement needed before releasing final product)

- Scheduled on-site visit with Flint GIS Department and Genesee County GIS Department

- Formatted databases to host content

- Researched service line database creation and scheduled meeting with U of M Flint to discuss timelines and resource needs

- Generated water infrastructure map (does not include building service lines)

Tasks for Tomorrow:

- Meet with Flint City GIS
- Meet with Genesee County GIS
- Meet with U of M Flint GIS
- Finalize water filter distributions map
- Finalize plan for data distribution methods

Chris

UPDATE 1/6/16

A summary of today's SEOC activities is provided below. I tried to distill this as best I could but there has been a lot of activity and discussion to get an accurate assessment of the situation. Attached is the final draft of objectives and tactics for the operational period and agency situation report (SitRep) which has more SEOC agency information. I have implemented weekly operational periods.

Advise if you want anyone else copied or off this distribution.

Daily Update

* Set goals for SEOC and identified response/recovery emphasis
* Requested FEMA liaison officers (LNO) from FEMA Region V. Two LNOs will be on site by ~3 p.m. 1/7/16. Both are known contacts to me and some staff and one has worked extensively with me during the SE MI flooding in a command and control position. These personnel have been specifically tasked with this mission. THEY ARE NOT HERE TO ASSIST WITH A PRESIDENTIAL DECLARATION REQUEST BUT TO ASSIST ME.
* PIOs from multiple agencies were here and established the Joint Information Center (JIC). News released pushed out on this. I am very happy with the PIO work and movement toward coordinated messaging.
* Held briefing for State Agency Emergency Management Coordinators, which included presentations from DEQ and DHHS subject matter experts to ensure situational awareness and to develop a common operating picture.
  * I opened the briefing by identifying our initial goals, items to think about while subject matter experts were briefing us, and how we are to move forward, find quick wins, and regain trust.
  * MDHHS – Elevated Blood Lead Levels
    * Dr. Elizabeth Wells gave an in depth summary of lead poisoning and what has occurred in terms of health monitoring throughout the Flint crisis.
  * MDEQ – Water Testing Protocols
    * Mr. George Krisztian of MDEQ gave an in depth summary of the testing protocols and summary results that as they have developed throughout the emerging crisis.
* Developed Incident objectives, strategy and tactics (see attached)
* Identified SEOC and state agency staff positions
* Assigned work tasks for SEOC operation period from 0800 January 6, 2016 to 1700 January 8, 2016

* Reviewed planned actions, prepared final draft Incident Action Plan

* Made contact with the Genesee County Emergency Manager first thing in the morning and held a conference call mid-day to discuss roles. Daily 0830 command conference calls with local EOC command staff starts tomorrow. Tomorrows call will include the County Commissioner and the City Administrator (both invited). Topics include the incident action plan objectives and establishing better local coordination, command and control to facilitate integration with the SEOC. The local EOC is not functioning as it needs to with personnel and local coordination and we are working on that issue.
* I will be in Flint tomorrow for a 2 p.m. media round table with local officials that was set up by the JIC.

* The attached initial objectives will be updated at least every operational period and as needed. I listed the objectives below but the tactics to accomplish them is in the attached if you want further information.

1. Activate the State Recovery Task Force (SRTF).

2. Establish and maintain coordination between the City of Flint, Genesee County, state and federal agencies, and appropriate medical experts.

3. Obtain and maintain situational awareness and common operating picture of all activities.

4. Establish SEOC operational period and hours of operations.

5. Investigate and identify all available programs for assistance with direct or related impacts, including the federal Lead Pipe Replacement Program.

6. Develop a comprehensive GIS strategy.

7. Coordinate response and recovery activities with MIVOAD and identify potential mission areas.

8. Establish and coordinate routine communication between SMEs and coordinate technical assistance among state agencies and to local agencies.

9. Provide technical assistance to the local Damage Assessment process.

10. Establish a Joint Information Center (JIC) and develop a public information strategy.

11. Monitor MI CIMS for resource requests and address as appropriate.

12. Establish and disseminate cost center information for the incident.

- Additional tasks include:

  * Determine what federal agencies are already involved and their status
  * Identify potential water supplies
  * Determine where affected homes are located, where filters/pitchers (and replacements) were installed/provided, and determine who needs filters, etc.
  * Determine how filter distribution is handled, and if it can be handled more efficiently and effectively
  * Determine what mechanisms are in place for nutrition supplementation

EMHSD GIS Accomplishments:

* Hosted a conference call to begin coordination with Flint City and Genesee County GIS departments and the SEOC
* Established a daily call with county and city GIS personnel to synchronize GIS efforts in support of the Flint water crisis at 8:30 A.M.

* Began consolidating local data from local GIS practitioners into a consolidated database, to include:
  * Water Pipeline Locations
  * Filter Distribution Locations
  * November 25, 2015 Water Monitoring Results (Partial, some data remains to be digitized)
  * Affected School Locations
  * Predictive analysis of blood lead levels for affected area
  * Updated Parcels
  * Demographics
  * Block Groups
* Produced a map for the filter distribution locations
* Began contacting specialists who developed historic maps depicting the Flint Water Crisis to obtain the data

Subject: Update - Genesee County Declaration

Below are some key points for your situational awareness (FYSA) that have taken place or will take place within the next 15 hours.

- I was on the phone with Sean Kammer, Assistant to the Flint City Administrator, when the declaration hit the news so I advised him immediately. He was going to let the City Administrator know.

- I contacted MSP Lt. Roach, 3rd District Coordinator, who was at the Genesee County EOC and advised her to let the County EM know the declaration status.

- State Emergency Management Coordinators (SEMCs) were notified via our notification system with additional information in an email.

  - This included information on the SEOC activation and a 0900 briefing for SEMCs.

  - Some subject matter experts will provide us an update to establish a common operating picture.

- We have been in contact with FEMA Region V watch desk ... they will be on the call tomorrow and continue to monitor the situation.

- I have been in contact with the FEMA Region V Administrator to keep him updated.

- Operational period for the SEOC will be M-F, 0800 to 1700 at this time.

- Situation Reports (SitReps) will be provided in the evenings.

- An Incident Action Plan will be developed tomorrow.

Call me with any concerns or questions.

To: plangc
Subject: Test Results from MDEQ Data

Good Evening,

We ran the counts and found the following based on a results of higher than/less or equal to 0.015 (mg/L)

Of 853 tests:

68 tests were greater than 0.015 mg/L – (matched to 40 parcels)
785 tests were less than or equal to 0.015 mg/L – (matched to 577 parcels)

It's important to note that parcels don't take into account multiple tenants (such as duplexes and apartment complexes); that count was a basic match from the address location to an individual parcel.

I can tell you that it looks like about 12 of the tests did have an address associated.

Capt.,
Thanks for the report. I think the "432"samples ≤ 5ppb is a typo...see below:

"Since January 19, 2016 through January 22, 2016 the numbers are as follows:
341 total Residential Samples have been reported
322 Samples are at or below the Action Level of 15 ppb (94.4%)
432 Samples are at or below 5 ppb (87.4%)
19 Samples exceed the Action Level of 15 ppb (5.6%)"

Best,
Harvey

>
> 432 Samples are at or below 5 ppb (84.0%)

37 Samples exceed the Action Level of 15 ppb (7.2%)

Since January 19, 2016 through January 22, 2016 the numbers are as follows:

341 total Residential Samples have been reported

322 Samples are at or below the Action Level of 15 ppb (94.4%)

298 Samples are at or below 5 ppb (87.4%)

19 Samples exceed the Action Level of 15 ppb (5.6%)

There are approximately 1000 additional samples that have been received at the Lab and are in process.

> 37 Samples exceed the Action Level of 15 ppb (7.2%)

Since January 19, 2016 through January 22, 2016 the numbers are as follows:

341 total Residential Samples have been reported

322 Samples are at or below the Action Level of 15 ppb (94.4%)

298 Samples are at or below 5 ppb (87.4%)

19 Samples exceed the Action Level of 15 ppb (5.6%)

There are approximately 1000 additional samples that have been received at the Lab and are in process.

Chris

Subject: *Food facilities testing*
Importance: High

I need to know how the MDARD samples are being identified for the food facilities testing so that they can be included in the Governor's daily report.

Who the report is going to will probably get me the information I need. Hopefully there is a centralized person. If not, anything that is common to all of the MDARD samples but different from the residential samples will work.

Thank you!
George

Here's what I have from the Governor's team on information they'd like each night. I didn't touch base with DHHS yet about providing daily information on blood lead level testing. Thanks to Mitch Adelman for getting the ball rolling on the DEQ test results.

The list:

1. # of homes visited each day
2. Total number of homes visited
3. Total # of National Guard on the Ground
4. Total number of volunteers each day
5. # of homes with filters
6. # of Water filters distributed (Each day and to date)
7. Cases of bottled water distributed (Each day and to date)
8. # of Water testing kits distributed (Each day and to date)
9. # of water testing kits returned/sampled (each day and to date)
10. # of people tested for elevated blood levels (Kids, adults, total)
11. # of people with elevated blood levels (Kids, adults, total)
12. # of homes with safe drinking water (Not sure whether it's possible right now to provide this number)

Number of samples above the action level from the daily number of samples analyzed;

If we can segregate out the MDARD samples of food establishments, the same metrics for them are requested.

I discussed this with George Krisztian after speaking with Meegan, and he thinks we can begin providing this information tomorrow. Thanks all.

Good Evening,

I have communicated this request with the MDEQ Emergency Management Coordinator in the SEOC, who has made contact with the EPA. The EPA has confirmed that they will test water supply on Monday, and are interested in obtaining information regarding any additional calls that have been received with similar complaints of rashes caused by the water. EPA offered to test those locations as well. The CHECC maintains a log of calls received to the CHECC hotline and will query that log for this information tomorrow to be provided to DEQ and the EPA.

Thank you,
Jennifer Lixey Terrill

Subject: Re: Request from Governor's Office for Daily Sample Metrics

I asked the chief of state to provide standing information requirements so I could provide the gov the same info in my nightly report. So all the below will be filtered into my nightly report versus different state agencies sending him a report each night correct?

Thank you very much!
We're evaluating if we can print locally, but need to find someone to pay for this, find out the right paper color (through DEQ), etc., so this might not work out.

To: MSP-seoclgc
Subject: RE: Supply needs for sample kits.

The initial request for us to provide more forms came from the ARC chapter, so I assume that they are running out of forms.
I will try to confirm through the ARC rep here if they received a large shipment on Thursday.

Subject: RE: Supply needs for sample kits.

Henik -- that were supposed to be delivered with the ipads on Thursday evening. I know you received the ipads.
The resource request said to deliver them to the VRC for the ARC to assemble the kits – ARE they there???

Importance: High

They were dropped off Thursday evening with the ipads by MDOC.
Confirmed by DTMB; now DEQ is asking.

Mitch (DEQ) is calling Joe D. to double check.

Hi Henrik,

Here is the request for the Sample Analysis Sheets and labels.

Thanks,

Joseph DeGrazia
Incident Management Specialist

From: Van Riper, Eric (DEQ)
Sent: Saturday, January 23, 2016 1:51 PM
To: DeGrazia, Joseph (DEQ)
Cc: Ducharme, Mark (DEQ)
Subject: Supply needs for sample kits.

Joe:

103 boxes (72 bottles per box) and five boxes (144 per box) of sample kits were picked up today by corrections and taken to the Clio road warehouse. They also delivered 90 additional boxes (72 per box) today that should be completed by days end. Corrections is going to let me know how many unprepared boxes remain at the warehouse. Two boxes were taken to the michigan school of the deaf this morning and given to Liz brown for her sampling today.

I need more sample analysis sheets and labels. If the test kit preparation is going to continue, I suggest that another 20 boxes of sheets. I also may need more labels depending on what is at the warehouse.

I'll let you know more after I hear back from corrections.

Currently, there is a Community Volunteer Reception Center set up at the Red Cross of America, 1401 Grand Traverse St, Flint. This is the location you would go to register to volunteer.

We have had a tremendous response to assist with this recovery effort, especially for this weekend! Jobs change day-to-day and upon demand. The current opportunities for spontaneous volunteering right now are listed below:

- Warehouse: Out between 8am and 4pm (multiple shifts)
- Dock: Out between 8am and 4pm (multiple shifts)
- Data Entry: 2 shifts of 9am – 1pm and 2pm – 6pm. Varies upon demand
- Testing kit assembly: Times continuous and vary upon demand

If you are part of a team or group, you could also participate in mobile distribution (going to door-to-door). Please schedule in advance of the day your group wants to volunteer by contacting Victoria Fryer: victoria.fryer@redcross.org. She will need to plan out how to engage your efforts for this work.

I have passed along your name and contact information to the VRC staff, and they will record your details for potential engagement.

Thank you,
The Michigan Community Service Commission

Subject: VWR contact for 1/24 - 1/27 and updates

Hello Everyone,

I wanted to send a general update out to everyone because next week I will be at a National Sales Conference and booked in meetings for 3 days. I do not want any of you not to have access to support when I am away. I have been working closely with the VWR government support team and they understand the importance of your needs. Please let us know of any new order that could be needed so we can make certain the order is closely watched within VWR.

As a point of contact internally within VWR, please contact Shasta Dixon. Lewis McMillan will also be at the sales meeting but he would like you to contact him if you do need extra assistance. His schedule at the meeting is more flexible than mine should you need any more help.

lewis_mcmillan@vwr.com

Updates for items needed and shipping information for orders are below.

Bottle Needs:

We have to date 47 cases (144 bottles per case) shipped to the Flint site. We have shipped 2 cases to the Lansing lab for lot verification. We have 50 more cases from the same lot shipping to Flint as of today, but I do not have the tracking information. For the remaining cases we will have status updates next week and these will be a new lot, one case will go to the Lansing lab.

Your VWR order number is 8018384025.

Nitric Acid Needs:

We have 4 cases (6 bottles in a case) sent out to the Lansing lab this week. I have also sent a sample bottle of the BDH brand to Kirby for evaluation. An estimation of 200 possible bottles may be needed in the future (34 cases). We have worked with our internal team for help with sourcing for this chemical and we have found stock within our warehouse and at the suppliers.

MK662346 (sold in cases of 6) Stock: 47 of the 2500 ML bottles in the Batavia Warehouse. (Avantor has 590 in stock as well) so we could replenish quickly (this is the original ordered product)

BDH30462.5LPC (sold in cases of 6) Stock: 390 of the 2500 ML bottles in different Warehouses around the nation, we can supply more from the manufacturer
(this is the secondary source we have sampled)

EM-NX0407-2 (sold by the each) Stock: 554 of the 2500 ML bottles in the Batavia Warehouse
(this product can also be sampled if requested)

Thank you all for working with VWR and myself these past weeks, I have been honored to help with this emergency in my State.

Please reach out to Shasta and Lewis in the beginning of the week, and I will be back in town on Wednesday (1/27) in the afternoon if you need me for anything please let me know.

Best,

Nina

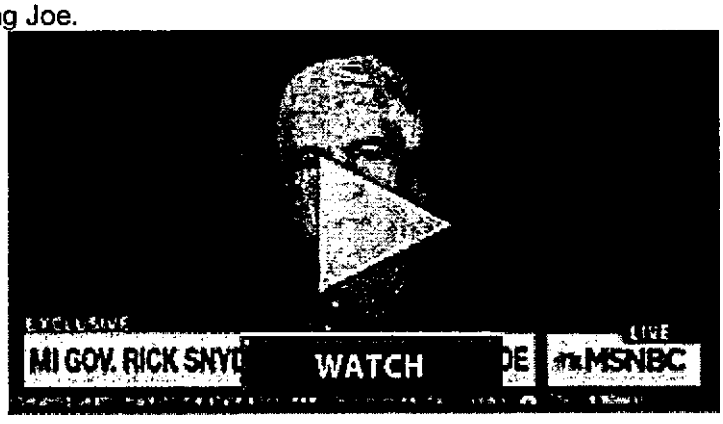
How we are fixing the Flint water crsis

Governor Rick Snyder has committed to spending the rest of his time as Governor to fixing the Flint water crisis. Over the last few days, he has sat down to explain what happened and how we're fixing the Flint water crisis. Watch the interviews below and be sure to read the Governor's Op-Ed in the USA Today.

Governor Snyder on Morning Joe

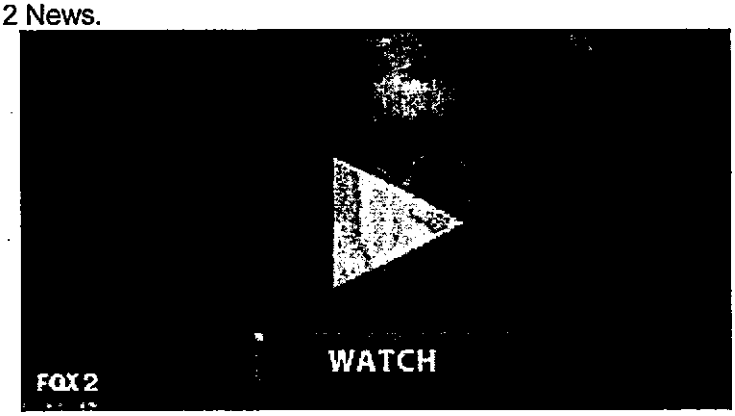
"What is so frustrating and what makes you so angry is you have a handful of experts who were career civil servants that made terrible decisions, in my view. We have to live with the consequences, and they worked for me, so I accept that responsibility. We are going to fix this problem." Watch Governor Snyder address how we are fixing the Flint water crisis on Morning Joe.



Governor Snyder with Charlie LeDuff on Fox 2 Detroit

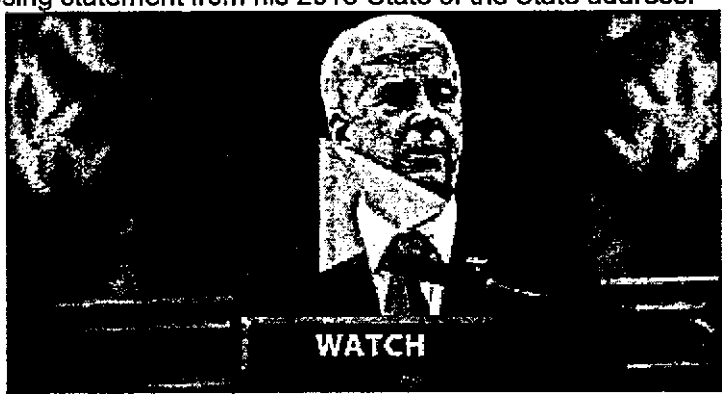
"I feel awful about this. These are people. They've been harmed. You can't feel good about that. The people of Flint have been harmed and a major influence of that harm

came from people who worked for me, and I feel responsible for that. But I am committed to solving the problem and addressing the damage as much as possible for the rest of the time I'm Governor." Watch Governor Snyder address the Flint water crisis with Charlie LeDuff on Fox 2 News.



Governor Snyder's 2016 State of the State

"Michiganders don't quit, we don't give up, instead we will work with even more passion and commitment to truly improve our state. For everyone who's chosen to make Michigan their home, this is more than a promise, this is my commitment." Watch Governor Snyder's full closing statement from his 2016 State of the State address.



Governor in USA Today: "I will fix this, and I mean it."

"Residents in one of Michigan's proud cities cannot drink their water. That's unacceptable. The crisis in Flint arose from missteps at all levels of government — local, state and federal. But as governor, I take responsibility for what these families are going through, and I'm holding people in my administration accountable for their failures." **Click here to read the Governor's full op-ed.**

Washington Post: "Michigan Gov. Rick Snyder is in a tough spot, but he's his own best spokesman"

Snyder has born the brunt of criticism in the local health crisis that has turned into a national scandal. But unlike many other politicians facing crises of leadership, Snyder may also be his own best counter-programming. **Click here to read the full story in the Washington Post.**

MSP-EOC-MDEQ

From: MSP-EOC-MDARD
Sent: Friday, January 22, 2016 12:45 PM
To: MSP-EOC-MDEQ
Subject: Lab questions from MDARD

Hi Jen,

A couple questions for you:

1. Is the DEQ list of certified labs acceptable to consider water testing submitted by establishments as acceptable.
2. Is the EPA is taking over water sampling, what is their objective and if so, how will this impact MDARD's sampling activities at City of Flint food establishments. (MDARD is scheduling water sampling through to February 5, 2016.)

Kay.

Sent: Friday, January 22, 2016 12:30 PM
To: Kelenske, Chris (MSP); MSP-EOC-MDEQ
Cc: Towne, Karen (LARA); Zimmer, Mike (LARA)
Subject: RE: School for the Deaf

Captain Kelenske,

DEQ and LARA are currently on sight at the Michigan School for the Deaf. Construction has started in the dormitory and is slated to last the next 3 days. Because of this, DEQ and LARA will be focused on completing the water mapping in the other 2 school buildings today and then complete water testing at those 2 building tomorrow. After construction in the dormitory is complete we will have to coordinate with the school to test the dormitory separately.

If you have any questions or concerns, please contact me on my cell phone at

Thank you,

Alesha

From: Kelenske, Chris (MSP)

To: MSP-EOC-MDEQ; MSP-EOC-MDLARA
Subject: School for the Deaf

When the school first heard of the water lead issue back in September, they conducted their own testing at the school… which came back with clear results. The administrators at the school closed down the fountains and have been purchasing 35-gallon water dispensers (150 gallons/week) from Culligan that are placed near the drinking fountains. They also placed water filters at the cafeteria drinking fountain and kitchen sink for use in cooking/food prep.

MSD has been on the waiting list to get tested by DEQ since mid-December. The landlord (Lurvey-White Ventures) on its own, decided to have another test done on January 14 – this time testing both the school and the dorm. The dorm test came back with the elevated lead levels in the water.

DEQ has confirmed test date for January 29, 2016 at 8:00 a.m. Request is to test both school and dormitory.

The school received word on January 21 from the landlord that they will expedite the replacements of the 62-65 faucets in the dorm beginning tomorrow (Friday) and expect to have them all replaced by the end of the weekend.

There are 167 total students at the school, 75 of which board in the dorm.

The landlord and school administration also are looking at either replacing the shower heads in the dorm, or installing in-line filters to the showers. In the

meantime, resident students are using the showers at the school, which has been tested and found to be lead-free.

The parent letters were sent out January 20, 2016, by postal service and on the schools webpage. The next scheduled Parents Meeting is February 9, when parents can come and ask questions. The letter also informed the parents that they can contact Janet Kelley at the school in the interim.

We are trying to locate the job corp school but nobody has information as to what school that is. If we can get more information on that we can look into it.

Chris

Subject: Zip Codes on Flint Water

Jen,

Are you able to verify whether or not the following Zip Codes are on the Flint Water Authority System: 48531, 48550-48557?

Medicaid includes these zip codes in their reports on Flint, indicating that they are included in the city of Flint. However, they are not included in the list of 16 zip codes that have been identified for the response. Do these ZIPs get their water from a different water system and is that why they are not included?

Thank you,
Jennifer Lixey Terrill

To: Wolf, Jennifer (DNR); MSP-EOC-MDEQ
Subject: RE: Samples

OK, I talked to Mark and he thinks that there were a few hundred at least, and he'll try to get better numbers to us, or to have Joe DeGrazia to get them to us early. I talked to Corrections and they're ON for sample gathering in Flint and delivering to out lab on Friday. I had to extend the resource request that you made yesterday, as it could have been read to only be for 1 day. SO, if we want to have DOC to do the sample run on Saturday and/or Sunday, we should let DOC know as early as you can on Friday morning.

Per my discussion with DuCharme, it seems like we probably ought to have Kirby have people analyze samples this weekend, and even if they don't, ought to supply contact information for the DOC truck driver and whoever will be in-taking samples at the lab, in to avoid the truck arriving and inability to connect with sample receiving.

Also, Marks goin home so Joe Degrazia is taking over, and Mark or Joe will send his contact info.

Subject: pick ups

Just thought you might like to know the Water Plant received over 57 samples today. That's how many I have in my office and prepared. I can take them to Lansing tomorrow along with 8 samples provided by MDARD (they are testing local restaurants).

I can pick up more from other locations but I'd like to know how many to expect so I can determine if there is enough room in the vehicle.

Please advise.

Sincerely,

Melanie Poisson, Clerk

From: DAVID HORNAK <DHORNAK@hpsk12.net>
Date: January 21, 2016 at 2:49:02 PM EST
To: All Staff <AllStaff@hpsk12.net>
Subject: Important Message regarding Dimondale Elementary

Greetings Holt Public,

I am writing to share a memo that was sent to our Dimondale families. Every three years, we are required by the Department of Environmental Quality (DEQ) to test the drinking water at Dimondale Elementary. I am writing to inform you that elevated levels of lead were discovered during routine testing this past summer.
We immediately began to correspond with our Dimondale families and below you will find a memo sent on August 25, 2015 as well as our mid-year update memo that was sent today. The safety and health of all of our stakeholders continues to be a priority!

See below:

Sincerely,

David G. Hornak, Ed.D.
Superintendent, Holt Public Schools

January 21, 2016

Dear Dimondale Elementary Parents and Guardians,

In an effort to continue communication with all of you, I would like to provide you with a mid-year update concerning the water situation at Dimondale Elementary.

A random drinking water test, which is required by the Department of Environmental Quality (DEQ), was performed over the summer and elevated levels of lead were found in two of the samples. In August, I sent out information to all families about this situation and assured you that water stations would be available for all students since all drinking fountains would be disabled. Those water stations are still in place and the students and staff at Dimondale have adapted very well to this system for accessing drinking water.

Since that time, the district has been in constant communication with the DEQ and the Barry/Eaton County Health Department to work on resolving this issue. As part of this communication, I would like you to be aware that repairs were made to drinking bubblers, unused plumbing lines were removed and water supply lines were replaced with braided stainless supply lines. Each upgrade was completed with the overall improvement of the water quality in mind.

The next random water sample test to evaluate the lead levels will be conducted in March. We will continue to communicate the results of our water sample tests and remain hopeful that the improvements that we have completed will have a positive result.

In an event that you have additional questions regarding this issue, please contact me at
or by email at SuptOfc@hpsk12.net
Sincerely,

David G. Hornak, Ed.D.
Superintendent, Holt Public Schools

***A copy of this email has also been sent to each family with children attending Dimondale Elementary.*

August 25, 2015

Dear Dimondale Elementary Parents and Guardians,

In an effort to over communicate with you, I would like you to read the following announcement.

Every three years, we are required by the Department of Environmental Quality (DEQ) to test the drinking water at Dimondale Elementary. I am writing to inform you that elevated levels of lead were discovered during routine testing. Although the samples were taken in the summer, we are taking precautionary measures by providing alternative potable water sources for the students and staff to enjoy until we can have additional water samples analyzed.

The DEQ has a nationwide rule that allows lead drinking water levels to be at or below 15 parts per billion. As indicated above, this round of sampling occurred when the building was dormant, which may have contributed to the results being slightly higher than normal.

Moving forward, the water at Dimondale Elementary is safe for daily hand washing. We are safely disabling all water fountains in the building until we can complete the next round of analysis. Families can help by sending a filled reusable water bottle to school on a daily basis. When needed, children may refill a water bottle at one of the five water stations placed throughout the building.

We are looking forward to the beginning of the 2015-16 school year. By remaining true to our increased level of communication this year, we hope you find comfort in the proactive nature of our actions. By providing the DEQ with additional water samples, temporarily disabling water fountains, and by providing drinkable water for the students and staff to enjoy, we have been permitted to begin the school year as scheduled on September 8, 2015!

In the event you have additional questions regarding this issue, please contact me at
or by email at SuptOfc@hpsk12.net.

Sincerely,

David G. Hornak, Ed.D.
Superintendent, Holt Public Schools

Subject: HDPE Bottle update

Hello everyone,

Thank you for all of the calls yesterday and today. I would like to update everyone on the status of the VWR order, order number 8018384025 for 150 cases of 71001-158. We have C&G container shipping 42 cases tonight. One case will be going to Kirby at the Lansing lab and 41 cases are to arrive in Flint. When shipments have tracking information we will be able to send the tracking information to all of you.

For the Friday shipment, C&G will now only be able to allot 50 cases to the shipment. I have called and alerted Kirby and

the Emergency Management team about this development. They have assured me that this will work fine.

Next week our C&G rep will update us as soon as we know the remaining 58 cases will be shipping. I will continue to update everyone if there are any changes. I will also be sending the tracking information to everyone on this email chain when I receive it.

Please let me know if there is anyone else that needs to be added to this email chain for updates about this bottle order.

If MDEQ can forecast how many more bottles that will be needed in the future we will be able to avoid the rush shipment charges. C&G has waived a 25% fee that usually accompanies the rush order's assembly for this shipment but I do not think they will waive the 25% rush assembly fee for any future orders.

Please let me know if you have any questions.

Best,

Nina

Hello Mr. Stromberg,

The citizens received a Total Dissolved Solids Meter with a ZeroWater pitcher:
https://www.zerowater.com/10c-pitcher

I am working with Doug at ZeroWater to address the concerns and provide accurate information to the citizens regarding the capabilities of the meter. The citizens misinterpreted the elevated levels on the meter, presuming it meant there was elevated levels of lead in the metered water. These citizens have been informed the difference of the TDS meter and a laboratory analysis for lead and copper. I will be requesting Doug to also call the citizens to reiterate this. The citizens lack trust in any water they are provided and have been using the supplied TDS meters to test any bottled or canned water they have received from the city.

Feel free to give me a call if you would like to discuss. I will keep you informed as to any messaging developed to address the concerns.

Thank you,

Kathy one of my team members asked is it possible for you to send us one of the testers that are being used in the home. Also, can you tell us who gave your citizens these testers and who is the manufacturer? We have contacts with University of Wisconsin Milwaukee labs and state certified testing. We would like them to re-test our water in cans that is from the same batch sent to your citizens and to test the accuracy of the tester being used.

Thank you very much.

Subject: RE: HDPE Bottle update Tracking included

Hello everyone,

I have left messages with some of you and I was able to talk with Jennifer Wolf at the Emergency Management center. We have had problem with the full shipment being overnight shipped to MI. We apologize for the confusion for the shipment not going out next day air. The overnight shipping costs for this shipment would have totaled into the thousands, closing in on $10,000 for the total amount of cases shipped on Tuesday. Our supplier did not think that this was approved. However, we have worked to find a solution so this lot can be tested by Kirby tomorrow.

What have done to remedy the situation this afternoon is ship one case (of the same lot) overnight to Kirby Shane at the MDEQ lab. Five cases will be shipped overnight to the Flint location so they have them on hand. Kirby will get two cases of this lot, one tomorrow and one Friday due to this error.

I apologize for the shipping confusion and I hope that our solution to ship 6 cases tonight will be acceptable to everyone else. Thank you Jennifer for letting me know this works for you.

Jennifer and I have discussed the shipment for the remaining cases and we do not need to send any other cases overnight, they should be fine with stock as the Tuesday shipment will arrive soon after the 5 cases tomorrow.

Please let me know if anyone has questions. Thank you.

Best,

Nina

MSP-EOC-MDEQ

From: Nina_Cole@vwr.com
Sent: Wednesday, January 20, 2016 10:10 PM
To: Shane, Kirby (DEQ)
Cc: Adelman, Mitch (DEQ); Andy_Garrison@vwr.com; Johnson, Dora (DEQ); Krisztian, George (DEQ); Lewis_McMillan@VWR.COM; MSP-EOC-MDEQ; MSP-EOC-MDTMB; Pieper, Julia (DEQ); Premoe, Tara (DEQ); Sambiagio, Melissa (DTMB); Smith, Carol (DEQ); Wolf, Jennifer (DNR)
Subject: RE: HDPE Bottle update Tracking included

Hello everyone,

I have left messages with some of you and I was able to talk with Jennifer Wolf at the Emergency Management center. We have had problem with the full shipment being overnight shipped to MI. We apologize for the confusion for the shipment not going out next day air. The overnight shipping costs for this shipment would have totaled into the thousands, closing in on $10,000 for the total amount of cases shipped on Tuesday. Our supplier did not think that this was approved. However, we have worked to find a solution so this lot can be tested by Kirby tomorrow.

What have done to remedy the situation this afternoon is ship one case (of the same lot) overnight to Kirby Shane at the MDEQ lab. Five cases will be shipped overnight to the Flint location so they have them on hand. Kirby will get two cases of this lot, one tomorrow and one Friday due to this error.

I apologize for the shipping confusion and I hope that our solution to ship 6 cases tonight will be acceptable to everyone else. Thank you Jennifer for letting me know this works for you.

Jennifer and I have discussed the shipment for the remaining cases and we do not need to send any other cases overnight, they should be fine with stock as the Tuesday shipment will arrive soon after the 5 cases tomorrow.

Please let me know if anyone has questions. Thank you.

Best,

Nina

Hello Everyone,

Please see below for the tracking information for the shipments that will arrive tomorrow.

The 41 cases going to Flint, MI are being shipped UPS Freight, tracking # 319315780
1 case going to Lansing, MI UPS Ground, tracking # 1Z91AE800371241770

Best,

Nina

Subject: HDPE Bottle update

Hello everyone,

Thank you for all of the calls yesterday and today. I would like to update everyone on the status of the VWR order, order number 8018384025 for 150 cases of 71001-158. We have C&G container shipping 42 cases tonight. One case will be going to Kirby at the Lansing lab and 41 cases are to arrive in Flint. When shipments have tracking information we will be able to send the tracking information to all of you.

For the Friday shipment, C&G will now only be able to allot 50 cases to the shipment. I have called and alerted Kirby and the Emergency Management team about this development. They have assured me that this will work fine.

Next week our C&G rep will update us as soon as we know the remaining 58 cases will be shipping. I will continue to update everyone if there are any changes. I will also be sending the tracking information to everyone on this email chain when I receive it.

Please let me know if there is anyone else that needs to be added to this email chain for updates about this bottle order.

If MDEQ can forecast how many more bottles that will be needed in the future we will be able to avoid the rush shipment charges. C&G has waived a 25% fee that usually accompanies the rush order's assembly for this shipment but I do not think they will waive the 25% rush assembly fee for any future orders.

Please let me know if you have any questions.

Best,

Nina

MSP-EOC-MDEQ

From: DeVriendt, Chris <CDeVriendt@co.genesee.mi.us>
Sent: Wednesday, January 20, 2016 12:44 PM
To: Hunter, Janet (DHHS); MSP-seoclgc; MSP-EOC-MDEQ
Subject: RE: Another Way to Handle Potable water

I really do not see this as a viable solution to the current crisis. This would still require someone to fill the containers and there are no bulk tankers in use (nor should there be in my professional opinion). The only possible use of such a product would be in very, very limited scenarios like the one with a immune-compromised child (with other conditions) that must be bathed in 'clean' water. If such a use would be authorized, the local health department might be a better distribution point for the item since they are geared for health/needs assessment.

The resident's information that I mentioned can be released to such an agency and they can work on implementation.

Good Morning

Here are several personal issues that came out again last night that need to be addressed.

I did speak with Jen Wolf about the test kits. She said a large shipment is coming in today and will be distributed to the pods.

From: Stoken, Laura (GOV)

Subject: Flint Residents Needing Help

Hi Team,

The Governor's office received many voicemails overnight- I called all folks back but these are the folks that have experienced issues when reaching out for help: Please note the two individuals who have had their water shut off.

Has a Kohler sprayer sink so the regular filter won't fit- Doesn't have a pitcher- Needs a filter that goes under the sink that filters the water from there

- Called last week and the sheriff's office last week- they said they would bring her a pitcher but still no one has brought that even
- Susan has many Doctors appointments so someone needs to call her before they come.

- Water was shut off so has no running water - $8000.00 outstanding bill
- Needs water – bottled
- Doesn't have a filter- but also has no running water

Went to 4 fire stations for water test kit- all were out. They all said they had them in the morning but run out by the time he gets out of work
Also wants a blood test

(I called her back and left her a voicemail- it would be nice to have an answer when she calls back or for someone from MSP-Leg call her directly)
Received a flyer from the Governor's office in the mail but she didn't think she had city of Flint Water- now she is very upset
Lives in Hunters Ridge Subdivision

Disabled- 2-1-1 said they would send someone to her house by last Wednesday and still no delivery-
Also needs someone to help her put the filter on her sink because her "hands don't work right"
Needs Water, Needs Filter

Owns 20 rental properties in Flint and has questions about the pipes in his properties and how he can help

Water was shut off to his home because he owes $4,000
Needs water and testing Kit- filter if his water gets turned back on

Thank you,

Laura Stoken

Subject: Re: Water donation for Flint

The truck will be there between 8 and 8:30 am.

Also, so I can inform our team that worked hard to get this truck here, can you help with some information?

Is this the site the water will be distributed or if not, what are the addresses of satellite distribution? When will water be distributed?

Any details you could provide...

Thank you so much for your help!

-Rob

Subject: HDPE Bottle update

Hello everyone,

Thank you for all of the calls yesterday and today. I would like to update everyone on the status of the VWR order, order number 8018384025 for 150 cases of 71001-158. We have C&G container shipping 42 cases tonight. One case will be going to Kirby at the Lansing lab and 41 cases are to arrive in Flint. When shipments have tracking information we will be able to send the tracking information to all of you.

For the Friday shipment, C&G will now only be able to allot 50 cases to the shipment. I have called and alerted Kirby and the Emergency Management team about this development. They have assured me that this will work fine.

Next week our C&G rep will update us as soon as we know the remaining 58 cases will be shipping. I will continue to update everyone if there are any changes. I will also be sending the tracking information to everyone on this email chain when I receive it.

Please let me know if there is anyone else that needs to be added to this email chain for updates about this bottle order.

If MDEQ can forecast how many more bottles that will be needed in the future we will be able to avoid the rush shipment charges. C&G has waived a 25% fee that usually accompanies the rush order's assembly for this shipment but I do not think they will waive the 25% rush assembly fee for any future orders.

Please let me know if you have any questions.

Best,

Nina

MSP-EOC-MDEQ

From: MSP-EOC-MDARD
Sent: Tuesday, January 19, 2016 11:14 AM
To: MSP-EOC-MDCH; MSP-EOC-MDEQ
Subject: FYI Bottle Water regulations Total Disssolved Solids

Jen, Jen,

Here is the language from the 21 CFR part 165 and links for both bottled water regulations. MDARD and the Michigan Food Law have adopted the CFR's for the inspection and regulation of Food establishments which includes bottled water manufacturers.

Sec. 165.110 Bottled water.

(a) *Identity* --(1) *Description.* Bottled water is water that is intended for human consumption and that is sealed in bottles or other containers with no added ingredients except that it may optionally contain safe and suitable antimicrobial agents. Fluoride may be optionally added within the limitations established in 165.110(b)(4)(ii). Bottled water may be used as an ingredient in beverages (e.g., diluted juices, flavored bottled waters). It does not include those food ingredients that are declared in ingredient labeling as "water," "carbonated water," "disinfected water," "filtered water," "seltzer water," "soda water," "sparkling water," and "tonic water." The processing and bottling of bottled water shall comply with applicable regulations in part 129 of this chapter.

(2) *Nomenclature.* The name of the food is "bottled water," "drinking water," or alternatively one or more of the following terms as appropriate:

(i) The name of water from a well tapping a confined aquifer in which the water level stands at some height above the top of the aquifer is "artesian water" or "artesian well water." Artesian water may be collected with the assistance of external force to enhance the natural underground pressure. On request, plants shall demonstrate to appropriate regulatory officials that the water level stands at some height above the top of the aquifer.

(ii) The name of water from a subsurface saturated zone that is under a pressure equal to or greater than atmospheric pressure is "ground water." Ground water must not be under the direct influence of surface water as defined in 40 CFR 141.2.

(iii) The name of water containing not less than 250 parts per million (ppm) total dissolved solids (TDS), coming from a source tapped at one or more bore holes or springs, originating from a geologically and physically protected underground water source, may be "mineral water." Mineral water shall be distinguished from other types of water by its constant level and relative proportions of minerals and trace elements at the point of emergence from the source, due account being taken of the cycles of natural fluctuations. No minerals may be added to this water.

Here are the links if you care to the 21 CFR part 129, the standards for which the building and operations must meet: http://www.ecfr.gov/cgi-bin/text-idx?SID=60a1346a673645ea20ec50ff2dcb4474&mc=true&node=pt21.2.129&rgn=div5
And 21 CFR part 165 the standards by which the water will be tested and analyzed in order to meet the standards outlined in part 129: http://www.ecfr.gov/cgi-bin/text-idx?SID=60a1346a673645ea20ec50ff2dcb4474&mc=true&node=pt21.2.165&rgn=div5

The citizens misinterpreted the elevated levels on the meter, presuming it meant there was elevated levels of lead in the metered water. These citizens have been informed the difference of the TDS meter and a laboratory analysis for lead and copper. I will be requesting Doug to also call the citizens to reiterate this. The citizens lack trust in any water they are provided and have been using the supplied TDS meters to test any bottled or canned water they have received from the city.

Kathy one of my team members asked is it possible for you to send us one of the testers that are being used in the home. Also, can you tell us who gave your citizens these testers and who is the manufacturer? We have contacts with University of Wisconsin Milwaukee labs and state certified testing. We would like them to re-test our water in cans that is from the same batch sent to your citizens and to test the accuracy of the tester being used.

Thank you very much.

Greg

To: MSP-EOC-MDEQ; Doug Kellam
Cc: Koran Peterson
Subject: RE: Meter understanding

Jen:
Good morning, I sent you a text message earlier with an update to the confusion and a solution with regards to the TDS meter enclosed with our products.

For product, we will prepare a message (either outside the carton or attached to the meter itself) with an abbreviated version of the following communication to help clarify how the meter is used.

Flint Resident:
The TDS meter (Total Dissolved Solids) is NOT intended to measure Lead levels in your water. The meter is not sensitive enough to determine maximum safe lead levels, but only TOTAL dissolved solids, which will largely effect taste. The Zerowater filter WILL reduce lead to a safe level as long as it is not used past maximum capacity. Please test your water regularly with the meter and change your filter when the meter reads 006 or higher.

I have also copied our customer service department for consistency in their response (use the above language) should they receive any additional calls; they will also reach out to the (2) customers below.

Sincerely,
Tony Petruzzi

Kathy one of my team members asked is it possible for you to send us one of the testers that are being used in the home. Also, can you tell us who gave your citizens these testers and who is the manufacturer? We have contacts with University of Wisconsin Milwaukee labs and state certified testing. We would like them to re-test our water in cans that is from the same batch sent to your citizens and to test the accuracy of the tester being used.

Thank you very much.

Greg

Good Evening Mr. Stromberg,

Thank you for taking the time to speak to me on the phone tonight. I have contacted our representative of the Department of Environmental Quality and she said that you can ship a case of the canned water to our DEQ Laboratory at 3350 N. Martin Luther King Boulevard, Lansing, MI 48906. They will provide additional testing.

We appreciate your support and assistance with this issue.

Respectfully,

Kathy thank you very much for your phone call this evening and letting us know about the citizen complaints you received about our canned water.

I will be traveling tomorrow early am to Minneapolis and I will try to send a case of our water when I return from my trip tomorrow early evening.

If you need any other information please let me know.

Greg

PS – Do you have this person's name for your DEQ I should ship to?

Subject: Re: School Sampling Overview

THanks Michelle.

In Gratiot County, Alma College has done consistent water testing and analysis due to the extreme hazardous conditions of the Pine River Water. St. Louis is one of the top super fund sites in the nation. In addition, there are extreme issues with agricultural run off. As a result of these challenges, Alma College has two professors who do routine water testing with college students.

This leads me to wondering if we could determine if one of the colleges in the area would be able to provide students and professors to help with this task. As you said, we will wait to determine if the state wants to have it hired out, but a research scientist could possibly oversee a group of students.

Dave may even know of some people from the area who have these type of skill sets. Because it is happening on the weekend, I could ask my Alma College professor friends if they would be able to volunteer their time.

We will wait for your direction and not do anything until there is a clear direction given. I will fill you in tomorrow on my thoughts from the phone call tonight. I would like to discuss with you how the EOC would like to utilize my staff's time and if there is benefit that we can provide to you. As I told Janet and Dave today - we see our role as helping people to help people.

Thank you for your support tonight. It meant a lot to us.

Hi Lisa - You should have received a voicemail from one of my colleagues, Mitch Adelman, regarding the 400 cases of 32oz wide mouth bottles BPC1172 we ordered. See email below. I know you gave me an estimate on delivery for 100 shipping immediately, another 100 to ship on 01/21/16 and remaining 200 to be determined. Do you have any ideas on how we can get the remaining 300 cases shipped ASAP. Can you find out for me if there is a bottle manufacturing issue, bottle certification issue, or assembly issue (caps on bottles). We are working under a Federal Emergency. I am not in the office tomorrow, 01/18/16, but will be checking my emails.

Thank you,
Kirby

To: MSP-EOC-MDEQ; MSP-SEOC12
Subject: Public Health Group Meeting

Working on scheduling a Public Health Group meeting in Flint for Tuesday, January 19, 2016 at 2:30 p.m. EST. It looks like Mike Glasgow, City of Flint and Jim Henry, Genesee County Health Dept. are available. I'm working with April Swartout, GC Health Dept. in an effort to get Mark Valacak, GC Health Director to also attend.

Please contact the appropriate state agency reps to arrange for their attendance at this meeting and advise confirmation of participants and contact information. Suggested minimum agencies, DEQ and DHHS.

Purpose of meeting is to discuss development of one common unified communication (letter) to be distributed to the community with test results and common return point of contact. Development of a common procedure for distribution of results and communication and procedures for immediate communication should also be worked out during this meeting.

Meeting will be held at the Flint County Administration Bldg (1101 Beach St) or Genesee County Health Dept. (630 S. Saginaw St.) and will be confirmed Tuesday morning. DuCharme available to initiate the meeting and facilitate, if necessary.

Thank you.

Subject: Re: samples

Thanks I will be happy to work with Jay.

The information I am thinking is very basic but the purpose would be to avoid confusion and minsinformation about what to tell residents. For example, one Red Cross volunteer admitted to me that he was instructing residents to flush the water before taking the sample. As you know, this is exactly the opposite of what the instructions say. What I am suggesting is a simple, bullet-style list of what is accurate to say when passing out tests or taking them in. Everyone seems to have different ideas about the process which may or may not have come from a trustworthy source.

I am recommending the same for other operations such as water and filter distribution but that's not my area of experience or duties. Merely a suggestion from personal observation.

Thanks!

Subject: samples

I visited most of the fire stations this afternoon and will visit Pierson Rd. tomorrow. There were very few samples and most staff were not aware that they could accept samples.

Staff was not aware that **we cannot accept samples unless they are in a state-lab provided bottle**. One Red Cross volunteer asked that something official be drafted and sent to the stations clearly stating, for residents to see, that we cannot accept samples collected in any other container.

One thing that most of the volunteers agreed on is that having GCCARD prepare all of the sample bottles delays their arrival to the stations and that most of the stations have time enough to prep them there. If supplies (bottles, flyers and rubber bands) were all provided and they can assemble them on site. This may not work for every location. I'm told the Pierson Rd. location is the busiest and I have yet to visit them.

It seems clear that a few instructional sheets should be available at each firehouse explaining the basic process and do's and dont's so that no matter who is on duty they have the information available to handle most situations. I would be happy to prepare such sheets and laminate them and have them distributed to each station. Of course Mike or someone with the MSP-EIOC-MDEQ should approve them before distribution. I don't know if input is needed from GCCARD, the Red Cross or National Guard or any other person or organization.

Thanks.

To: MSP-EOC-MDEQ
Subject: RE: samples

Jen,

I got a call from the Red Cross about lack of space to store water test kits as they assemble them. They recommended box truck or large enclosed trailer that they could pick up the test kits in and pull from as they need them. The warehouse should be able to pick up the completed kits as they are ready.

There are free Penske trucks available and the SEOC should be able to get one to the site. If they can't we could work out something on this end.

Subject: Requested Information - Health and Environmental Branch

Lt. Covey,

Below, please find the bullets of information requested from the Health and Environmental Branch. Please let me know if you have any questions.

MDARD

- Updated requirements for food establishments using City of Flint water; mailed on 1/14 and includes offer to collect samples for free.
- Visiting food businesses to ensure they understand requirements.
- Will be visiting restaurants, in coordination with Genesee County Health Department
- Reached out to veterinary clinics and coordinated with the Genesee County Animal Control to contact animal related businesses to see what water system they're on and ensured that they were familiar with the Flint water situation.
- Reached out to Flint Food Works / Food Hub and the Food Bank of Eastern Michigan and offered additional assistance.

MDHHS – Health

- Activated the Community Health Emergency Coordination Center (CHECC)
- Staffing a hotline to field calls that were to be sent to the Local Health Department while the LHD is closed for furlough, weekends, and holidays
- Developing a nutritional plan for education and messaging
- Gathering information in preparation for disaster behavioral health response, if a presidential declaration is approved.
- *Epidemiology branch continues to assist work with local health department on blood lead testing and case management*
- Communicating to healthcare providers through WebMD Medscape.
- Coordinating health information messaging with the JIC.

MDLARA

- Ongoing effort to reached out to all licensed Healthcare facilities in the affected area to gather information and access any needs they may have, to include: Child Care facilities, Adult Foster Care, and others.
- LARA and it's Bureau of Construction Codes - Plumbing Division will complete the "Freeman School Faucet Replacement Pilot." This weekend to include:
    - On-site assessment plumbing to identify plumbing components of concern and prioritize sample sites.
    - Identify and replace faucets, lines, connectors with lead free components.
- Re-collect water samples to test and analyze.
- Offered to assist with lab testing, utilizing the MIOSHA Lab and Scientists as appropriate in coordination with DEQ.
- Provided MDHHS with a list of licensed healthcare facilities to coordinate the distribute nutritional information.
- Worked with the Office of New Americans to assist with translation of messaging

MDEQ

- Facilitating supply of water test kits to all Flint Water Treatment Plant customers in collaboration with City and County personnel.
- Laboratory services is processing samples for lead and copper analysis.
- Providing staff at SEOC during all operational hours to coordinate agency services, capabilities, activities and response to resource and information requests.
- Providing staff support at the Joint Information Center.
- Coordination and cooperation with various state agencies for sampling plans and implementation strategies for all state regulated facilities to include the provision of resources.
- Staffing at the local level to assist with resource and response management
- Verified NSF/ANSI 53 certifications of products delivered to citizens
- Produced a video of a water test sampling video for public guidance

Thank you,
Jennifer

Subject: more bullets

From 1/13
The Department of Environmental Quality (DEQ) completed the following activities:
• DEQ staff deployment as a field observer to assist in tracking water kit supplies and samples
• Coordination of DEQ and LARA personnel for Freeman School Faucet Replacement plan and school testing over the weekend

1/12

Delivery of 6101 water test kits to GCCARD
• Verification of NSF/ANSI 53 certified filters for future ordering
• Arranged for DEQ staff deployment to supervise volunteers assembling water kits at GCCARD
• Arranged for DEQ staff deployment as a field observer to assist in tracking water kit supplies and samples
• Established additional vendors for supply of water test bottles

1/11

Delivery of 1500 water test kits to MCCARD
• 10,000 water test bottles ordered
• Sampling form developed in collaboration with the City. 20,000 printed.
• SEOC Staffed
• DEQ personnel supporting local needs

1/10
The Department of Environmental Quality (DEQ) Laboratory (lab) provided 1000 water test kits for stock at Flint points of distribution. 500 kits have been prepared for MDARD inspectors for pickup Monday morning. 1000 additional kits will be prepared for pickup Monday for supply for the teams scheduled to begin on Tuesday. 3000 kits are being ordered Monday morning to supplement stock. DEQ lab staff are scheduled to provide training to the teams in Flint on Monday afternoon. Contracts are being identified and examined to possibly expand vendor capabilities for providing additional resources.

DEQ staff are coordinating with Licensing and Regulatory Affairs (LARA) for the implementation of the Freeman Elementary faucet replacement plan.

DEQ and DNR staff are supporting state and local activities where needed.

1/9

The Department of Environmental Quality (DEQ) Laboratory (lab) provided 1000 water test kits for stock at points of distribution . 500 kits have been prepared for Department of Agriculture and Rural Development inspectors for pickup Monday morning. 1000 additional kits will be prepared for pickup Monday for supply for the teams scheduled to begin on Tuesday. Additional supplies continue to be ordered to provide for testing kits. DEQ lab staff are scheduled to provide training to the teams in Flint on Monday afternoon.

DEQ staff are coordinating with Licensing and Regulatory Affairs (LARA) for the implementation of the Freeman Elementary faucet replacement plan.

F/Lt. Wolf continues to fully support the State Emergency Operations Center as the DEQ representative coordinating department resources and capabilities and other duties as assigned by the State Director. DEQ staff are supporting local activities where needed.

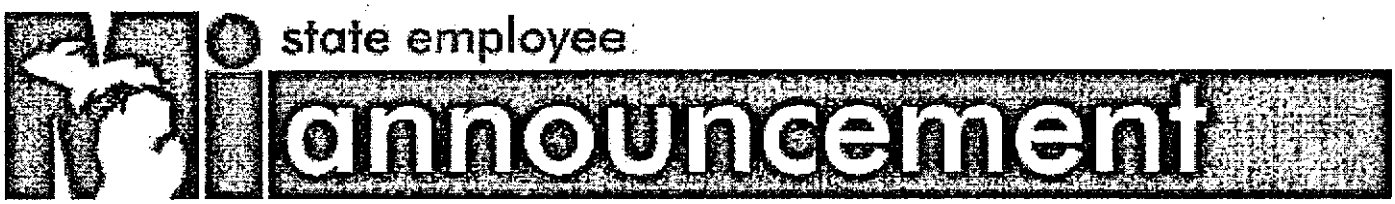
Subject: Volunteer Opportunity in Flint



The State Emergency Operations Center (SEOC) is coordinating a response to the ongoing health and safety issues in the city of Flint's drinking water. Teams from the Michigan State Police, Genesee County Sheriff's Department, Michigan Department of Health and Human Services, and volunteer organizations have been delivering bottled water, water filters, replacement cartridges and water testing kits at homes in the city of Flint since Tuesday.

To help with this critical work, the SEOC is looking for volunteers to expand this effort and continue this distribution during the upcoming holiday weekend. Teams are being assembled for shifts on Saturday, January 16; Sunday, January 17; and Monday, January 18, 2016. If you are interested in volunteering your time for this critical work, please complete the information in one of the attached surveys (depending on which day you are volunteering).

To volunteer on Saturday, January 16, https://www.surveymonkey.com/r/28NVJBL

To volunteer on Sunday, January 17, https://www.surveymonkey.com/r/26NMJKK

To volunteer on Monday, January 18, https://www.surveymonkey.com/r/26P7P5G

Volunteers will begin their assignment at the Local Emergency Operations Center located in the Genesee County Administration Building located at 1101 Beach St, Flint at 9 a.m. and end by 4 p.m. Parking is available at the corner of Beach Street and 8th Street. Lunch will be provided. This is strictly a volunteer effort, as all three days will be unpaid. Volunteers are responsible for their own transportation; mileage reimbursement for personal vehicles is not authorized. Volunteers should dress for working outdoors and wear foot attire appropriate for walking.

This opportunity is for state employees and their immediate family members 16 years of age or older only, others looking to assist should volunteer through the American Red Cross in Flint. The volunteer coordination center for the Red Cross is located at 1401 S. Grand Traverse, Flint, MI. They are open from 9 a.m. to 7 p.m.

For more information on the state's response efforts, visit www.michigan.gov/flintwater.

Subject: Updated Tactics

Hi Jen,

Would you please provide me with any updates to or comments on the following tactics, so that I can include them in the 204 forms? I need to have it updated by 12:30 if possible please.

Task:
1. Ensure stock of 2,000 assembled kits in the warehouse at all times.
2. Develop outreach strategy with JIC and Water Resource Teams for outreach on stressing the importance of returning water samples.
3. Develop a plan to handle the potential surge of samples from the City of Flint residents.
4. Develop a plan to track the potential large number of samples.
5. Order 10,000 additional test kits.
6. Identify additional staff to assemble test kits.

Thank you,
Jennifer

$1 per kit. $26 cost of analysis. The question of retesting has been brought up and it is too early to know. Need to factor in the tests for schools etc where they are drawing four tests per test point just for the initial test. Alesha can inform some on the schools.

Subject: Critical Task Updates

Jen,

As "Branch Director," I have to update the following information in MICIMS related to our objectives and critical tasks. Would you please provide updates on the following?

Objective1: Ensure all households within impacted community have required resources.

Critical Task: Coordinate, conduct, and analyze water testing.

Task:
MDARD Pick up 500 water sampling test kits 1/11/16
Ship 1000 water sampling test kits to Flint 1/11/16, transported by DTMB transporting (pick up at 1200)
Order additional 3000 water sampling test kits and ship them directly to Flint 1/11/16
Identified potential contract issues.
Continue working with DTMB ensure contingencies are in place if needed.
2500 water samples taken and analyzed from schools so far.
750 water samples not from the schools, analyzed at lab to date.

Thank you,
Jennifer

Subject: RE: Freeman Faucet Replacement Program

Good morning,

I will know a lot more about timing after today. Joe Madziar is going up to Freeman Elementary today to get a complete material list put together for this project. We will then order everything we need.

We spoke with Tony Sitko yesterday and he said he would make the school and staff available whenever we (meaning LARA and DEQ) were ready to go.

I will keep you posted as I know more.

Alesha

Subject: RE: Freeman Faucet Replacement Program
Importance: High

We will make it happen. Lara will need to let us know when they have completed the install and identified the fixtures that have been replaced. We will then need to coordinate to determine what we need to do to have the sampling occur the following weekend.

We need to coordinate with Tony Sitko to ensure that a deep flush of the entire school is done once the fixtures have been replaced. Many of the lines in the schools have been out of service for several months now and we need to get an accurate picture of what is happening.

Thank you
George

The most I have had to deliver was around 60 and that was usually due to one or two organizations taking multiple samples (sometimes 20 or more). Mike Glasgow used to ship the samples before the "crisis" because there were not very many.

Our ongoing communications will be a great help in successfully serving this community. Thanks!

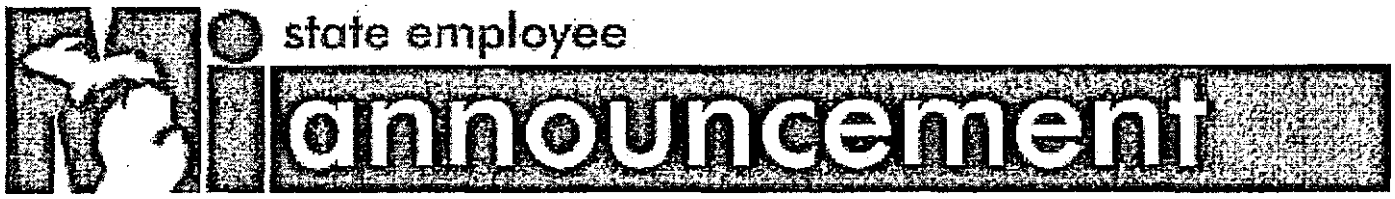
Subject: Michigan 529 College Savings Program Webinars



Michigan Education Trust (MET) and Michigan Education Savings Program (MESP) are encouraging parents and grandparents to learn more about college savings by offering monthly webinars beginning in January through October on the second and fourth Tuesday of the month as well as November 15 and December 6, 2016. These webinars will cover program details of MET and MESP.

Webinar sessions are scheduled to last one hour including time for questions and answers. You may be allowed administrative leave to participate in a webinar; however, you must obtain your supervisor's approval before participating. If you are unable to participate in a scheduled Webinar, a power point document is available.

To participate in a webinar session, visit the calendar of events to select the date you would like to participate. Once you have selected a webinar, click "RSVP today" and the "RSVP" site will provide login instructions.

Questions regarding the scheduled Webinars may be directed to the MET office at (517) 241-4884 or 1-800-638-4543 outside the Lansing area. Program information may be obtained by calling MET at 1-800-MET-4-KID (1-800-638-4543) or MESP at 1-877-861-MESP (1-877-861-6377). Enrollment booklets are available on line at MET www.SETwithMET.com or MESP www.misaves.com.

Subject: Returning Test Samples

Hi Jen,

Richard confirmed that the message to the public is still the same, for them to take their water samples to City Hall or the Water Treatment Facility to be picked up and tested. If people aren't able to take them to either of those two sites, then they are instructed to call 2-1-1 and 2-1-1 will coordinate for volunteers to pick-up their sample and take it to one of those two locations. Those volunteers were GCCARD volunteers, but may be ARC now also. That's being coordinated locally.

Does that answer your question?

Jen

Subject: Training Points

Can you confirm the following items are set to be discussed by Gregg Lundy tomorrow at the training in Flint?

- Filters/Replacement cartridges/Pitchers (DEQ)
  - Installation of filters and replacement filters
  - Use of filtered/unfiltered water
- Water Test Kits (DEQ)
  - Purpose of testing
  - How they work
  - No fee

I don't think we need to go too far into the weeds on some of this, but those in the field need to be able to answer some of these questions if asked.

Let me know if you have any questions.

Thanks,

Brianna

Capt.,
Thanks for the report. I think the "432"samples ≤ 5ppb is a typo...see below:

"Since January 19, 2016 through January 22, 2016 the numbers are as follows:
341 total Residential Samples have been reported
322 Samples are at or below the Action Level of 15 ppb (94.4%)
432 Samples are at or below 5 ppb (87.4%)
19 Samples exceed the Action Level of 15 ppb (5.6%)"

Best,
Harvey

> Since January 7, 2016 through January 22, 2016 the numbers are as follows:
>
> 514 total Residential Samples have been reported
>
> 477 Samples are at or below the Action Level of 15 ppb (92.8%)
>
> 432 Samples are at or below 5 ppb (84.0%)
>
> 37 Samples exceed the Action Level of 15 ppb (7.2%)
>
> Since January 19, 2016 through January 22, 2016 the numbers are as follows:
>
> 341 total Residential Samples have been reported
>
> 322 Samples are at or below the Action Level of 15 ppb (94.4%)
>
> 298 Samples are at or below 5 ppb (87.4%)
>
> 19 Samples exceed the Action Level of 15 ppb (5.6%)

There are approximately 1000 additional samples that have been received at the Lab and are in process.

Chief

Per the attached, top of page 4 and footnote 15, we may want to move the end date from 1940 to about 1970 or 1975 for your tax record/water meter suggestion...

No. This is the first Ive seen this – this has not come by me or thru the JIC at all.
Who can explain to me why this needs to go out?
Please advise
Thanks
Mel.

To: Brown, Melanie (DEQ)
Subject: FW: Attached Doc for review

Mel,

Not sure if you know about this. Apparently DEQ is working on a letter that they are going to ask Flint to send to its customers. I have some concerns about this letter, noted below.

Paul C. Smith
Deputy Legal Counsel
Office of the Governor – Legal Division

517.241.5598 (office)
(cell)

Subject: RE: Attached Doc for review

I have some questions about this letter:

1. Is there a legal requirement that this document be mailed by a certain date?
2. Is there a legal requirement that the letter contain certain information?
3. Why is DEQ writing the letter for Flint? Is DEQ going to order Flint to send the letter in a particular form?
4. Is the information about running cold water consistent with our safety recommendations? I thought it had to be filtered to be safe for consumption.
5. How is a person supposed to find out if their pipes are lead? Isn't that something we are working on in our emergency response?

Comments:

Somebody from DEQ/GOV communications needs to review this before it goes out to Flint. And when we reach out to Flint, it should be coordinated through Harvey Hollins in our office.

Paul,

I'm glad you caught that. I meant to flag that as well. To be clear, I believe this letter would be sent out by the City of Flint as a requirement of the Lead and Copper Rule. It would not be a DEQ document. Nonetheless, I agree that Flint shouldn't send out something that says their failure to sample correctly, in the current context, isn't an emergency. They should just not make the statement.

Peter

Subject: RE: Attached Doc for review

This letter should NOT go out in its current form. For starters, it would be very confusing for DEQ to send out a document saying "this is not an emergency."

Subject: samples with paperwork not attached
Attachments: SCAN1987.pdf

Mike
Per our discussion today.
I have attached the paperwork for 2 samples which came in a box today and were not attached to the sample bottles with the supplied rubber bands.
We have no way of knowing which paperwork went with which bottle. Thus we are not testing them.
If you could have someone contact these homeowners and bring them another bottle that would be great.

Also, yesterday we received one sample with white paperwork and the only information on the paperwork was date and time collected.
No name. no address. Nothing else. This is not getting tested.

Thank-you!

MSP-EOC-MDEQ

From: Tom Page <tpage@uwmich.org>
Sent: Thursday, January 21, 2016 7:29 PM
Subject: 2-1-1 Update Flint Water Response for Thursday, January 21, 2016
Attachments: 2016-01-21 MI211 Flint Water Daily Update.docx; EM_3375_211Call_Maps_1_09_thru_1_14_16.pdf

This is the daily 2-1-1 summary on the Flint Water Response for Thursday, January 21, 2016

GENERAL INFORMATION:

- ☑ **RESOLVED:** ACLU of Michigan has agreed to take referrals from 2-1-1 for callers asking about the Flint class action lawsuits. The number for the ACLU Paralegal is is 313-578-6802. This information has been added to the 2-1-1 database and is searchable under the term "Class Action Litigation".
- ☑ The JIC released an official statement regarding concerns of lead in bottled water based on readings from the TDS (Total Dissolved Solids) meter provided with Zerowater brand filters. The statement clarifies the meter does not test for lead. MDEQ tested each of the 21 brands of water being distributed for lead and copper – results indicated 'Not Detected" for both contaminants. At the request of SEOC 2-1-1 is sharing this information only if there is a direct question from callers about bottled water safety.
- www.flintwaterclassaction.com/ is a web site set up by one of the law firms filing a calls action suit. The site has a notice there will be an informational meeting on the class action lawsuit on February 16, 2016 from 6:30 pm – 8:30 pm at 432 N. Saginaw Street, Flint, MI in the North Bank Grand Ballroom at University of Michigan Flint Campus.
- The SEOC OPS Health and Env MDEQ Desk contacted 2-1-1 about calls coming to the SEOC desk from the general public and asked 2-1-1s help tracking down the source of the calls. 2-1-1 verified SEOC contact information is *not* listed in the 2-1-1 database. **IF YOU HEAR OF ANYONE RECEIVING INAPPROPRIATE REFERRALS FROM 2-1-1, PLEASE NOTIFY tpage@uwmich.org WITH DETAILS AND WE WILL WORK TO ADDRESS THE PROBLEM AS SOON AS POSSIBLE.**
- Earlier this week Michigan 2-1-1 provided the FEMA Voluntary Agency Liaison (VAL) based at the SEOC in Lansing with 2-1-1 data for the week of January 10. They have mapped the data to provide a visual presentation of needs. (See attached). Please respond to this email if you think it would be useful for 2-1-1 to share additional data FEMA for mapping.

CORRECTIONS AND CLARIFICATIONS

None today

CALL VOLUME:

Call volume was still higher than average today, but much more manageable. Average wait time was down significantly.

- Call volume yesterday (Wednesday January 20) was one of the highest ever for the Michigan 2-1-1 system. Central Michigan staff were at the phones until 8:30 pm to return all calls received. People using the callback feature expressed no upset or dissatisfaction with the wait for a return call.

SPECIAL NEEDS/REQUESTS

- A follow up on yesterday's concern from realtors about closing on properties at-risk for lead contamination, another realtor called 2-1-1 asking for a filter for a house she just sold. 2-1-1 informed her that new residents will be able to pick up filters, or that filters are available for purchase, but the current relief efforts are focused on household residents.

- 2-1-1 has also received several calls from churches, nursing homes and business owners asking about filters for their establishments. They were told filters for businesses and organizations are available for purchase, but the current relief efforts are focused on household residents.
- In response to a question, 2-1-1 verified that Flint residents can get free replacements as their filters are used up. They are available at the same locations as other water resources. Homebound residents can call 2-1-1 to register for home delivery.

☐ 2-1-1 has received a few calls asking what to do with empty water bottles. **Does the City of Flint offer recycling? If not, what are the options for people to dispose of the empty plastic bottles?**

RUMOR CONTROL

- Residents continue to mistrustful about local water quality and do not believe the information that it is safe for washing and other needs. This is leading to increased demand for additional bottled water, including one caller who requested enough to fill her bathtub (2-1-1 tried to reassure her and provided the DHHS hotline for more information).
- Niagara bottled water, one of the brands being distributed at fire stations, experienced a recall in the summer of 2015 due to an E. Coli concern. 2-1-1 has received several calls concerned about the safety of Niagara water. Callers are being reassured and sent to the Niagara recall website for more information at http://www.niagarawater.com/consumer-notice/.

UNRESOLVED

- ☐ **From 1/15/16:** 2-1-1 is trying to identify a resource to pick up test kits from homebound/senior residents who cannot drop off test kits at designated sites.
- ☐ **From 1/18/16:** Is there a timeframe for how long bottled water will be distributed? Locals are asking how long this will continue.
- ☐ **From 1/18/16:** One of the top questions is when will canvassers be in specific neighborhoods. Callers would like to know so they can arrange their schedules. Is this information available for 2-1-1 to share?
- ☐ **From 1/18/16:** Callers are asking about shower heads that can filter water for bathing. 2-1-1 continues to receive reports of rashes attributed to bathing in unfiltered water.
- ☐ **From 1/20/16:** Michigan 2-1-1 heard an anecdotal report today that real estate agents are reluctant to close sales in Flint because they cannot verify the any properties are free from lead contamination. **Is there are state agency or partner who can give real estate agency and home inspectors information on their potential liability.**
- ☐ **From 1/20/16:** Another rumor reported is that Legionella can be aerosolized and inhaled if people boil water on the stove or use a humidifier to humidify the air in their homes. **Can a health professional verify the risk of boiling Flint water or using it in an ultrasonic/cool mist humidifier?**

Nina,
Can you help me with the attached spreadsheet? The orangish highlighted portion from VWR? I need to have my numbers right.... If you could put dates and the numbers of bottles ordered and any notes that apply, that would be extremely helpful.

Thanks!!!!

Hello everyone,

I have left messages with some of you and I was able to talk with Jennifer Wolf at the Emergency Management center. We have had problem with the full shipment being overnight shipped to MI. We apologize for the confusion for the shipment not going out next day air. The overnight shipping costs for this shipment would have totaled into the thousands, closing in on $10,000 for the total amount of cases shipped on Tuesday. Our supplier did not think that this was approved. However, we have worked to find a solution so this lot can be tested by Kirby tomorrow.

What have done to remedy the situation this afternoon is ship one case (of the same lot) overnight to Kirby Shane at the MDEQ lab. Five cases will be shipped overnight to the Flint location so they have them on hand. Kirby will get two cases of this lot, one tomorrow and one Friday due to this error.

I apologize for the shipping confusion and I hope that our solution to ship 6 cases tonight will be acceptable to everyone else. Thank you Jennifer for letting me know this works for you.

Jennifer and I have discussed the shipment for the remaining cases and we do not need to send any other cases overnight, they should be fine with stock as the Tuesday shipment will arrive soon after the 5 cases tomorrow.

Please let me know if anyone has questions. Thank you.

Best,

Nina

Subject: HDPE Bottle update

Hello everyone,

Thank you for all of the calls yesterday and today. I would like to update everyone on the status of the VWR order, order number 8018384025 for 150 cases of 71001-158. We have C&G container shipping 42 cases tonight. One case will be going to Kirby at the Lansing lab and 41 cases are to arrive in Flint. When shipments have tracking information we will be able to send the tracking information to all of you.

For the Friday shipment, C&G will now only be able to allot 50 cases to the shipment. I have called and alerted Kirby and the Emergency Management team about this development. They have assured me that this will work fine.

Next week our C&G rep will update us as soon as we know the remaining 58 cases will be shipping. I will continue to update everyone if there are any changes. I will also be sending the tracking information to everyone on this email chain when I receive it.

Please let me know if there is anyone else that needs to be added to this email chain for updates about this bottle order.

If MDEQ can forecast how many more bottles that will be needed in the future we will be able to avoid the rush shipment charges. C&G has waived a 25% fee that usually accompanies the rush order's assembly for this shipment but I do not think they will waive the 25% rush assembly fee for any future orders.

Please let me know if you have any questions.

Best,

Nina

Subject: FW: 2-1-1 Update Flint Water Response for Wednesday, January 20, 2016
Attachments: 2016-01-20 MI211 Flint Water Daily Update.docx

This is the daily 2-1-1 summary on the Flint Water Response for Wednesday, January 20, 2016

GENERAL INFORMATION:

- The governor's state of the state address last night generated a few calls to 2-1-1 – with the significant additional capacity 2-1-1 added there was no wait for callers to reach an agent.

CORRECTIONS AND CLARIFICATIONS

None today

CALL VOLUME:

Call volume was extremely high today leading to hold time up to 25 minutes for callers.

Statewide: 4,248 calls were received –over 3x the daily average call volume

Flint Water: 580 callers chose the Flint Water option – 180 more water calls than any other day

- 2-1-1 operated at the outer limit of the partners' capacity today. Every available agent in the state, as well as supervisors and managers, handled calls, and the callback feature was extensively used – this offers callers the option of keeping their place in queue and having 2-1-1 call back when an agent is available.
- Today was the opening of scheduling for free tax prep services – traditionally a very high volume day for 2-1-1. The spike in demand appears to result from a combination of tax assistance, the governor's address, and the prominent mentions of 2-1-1 on michigan.gov/flintwater and helpforflint.com web sites.
- Also contributing to the long wait time were a slow response time for the cloud-based 2-1-1 database. The vendor was contacted and is working to reduce lag-time on the system.

- This morning the JIC forwarded an email from the governor's office reporting two complaints that callers tried to reach 2-1-1 last night and experienced a 30-45 minute wait for an answer. Michigan 2-1-1 reviewed the overnight call demand and found a single caller who was *not* seeking water-related help had 14 minute wait. Of the 56 total overnight calls, 4 had wait-times over two minutes. The average time to answer was 49 seconds. Of the seven (7) Flint Water calls received, the average time to answer was 37 seconds and all Flint Water calls were answered in under two minutes.

SPECIAL NEEDS/REQUESTS

☑ The Genesee County Health Department, DHHS and the Michigan 2-1-1 state office had a conference call to coordinate referrals for people in Flint seeking information from a health professional. GCHD is at their capacity to handle these calls and cannot take additional referrals from 2-1-1. DHHS has agreed to take ALL referrals from 2-1-1 for Flint health information (water safety, lead, and Legionella). **Resolution: Until further notice 2-1-1 will refer all callers with lead and Legionella questions to the DHHS hotline at 888-535-6136.**

☑ Michigan 2-1-1 worked with Flint Water Service Center to discuss their high volume of calls from area residents who are trying to verify whether or not they are on the Flint water system. **Resolution: The Service Center will continue monitoring their capacity and contact 2-1-1 if there is a need to change messaging or how 2-1-1 handles these referrals.**

RUMOR CONTROL

- ☐ Michigan 2-1-1 heard an anecdotal report today that real estate agents are reluctant to close sales in Flint because they cannot verify the any properties are free from lead contamination. **Is there are state agency or partner who can give real estate agency and home inspectors information on their potential liability.**
- ☐ Another rumor reported is that Legionella can be aerosolized and inhaled if people boil water on the stove or use a humidifier to humidify the air in their homes. **Can a health professional verify the risk of boiling Flint water or using it in an ultrasonic/cool mist humidifier?**

UNRESOLVED

- ☐ **From 1/15/16:** 2-1-1 is trying to identify a resource to pick up test kits from homebound/senior residents who cannot drop off test kits at designated sites.
- ☐ **From 1/18/16:** Is there a timeframe for how long bottled water will be distributed? Locals are asking how long this will continue.
- ☐ **From 1/18/16:** One of the top questions is when will canvassers be in specific neighborhoods. Callers would like to know so they can arrange their schedules. Is this information available for 2-1-1 to share?
- ☐ **From 1/18/16:** Callers are asking about shower heads that can filter water for bathing. 2-1-1 continues to receive reports of rashes attributed to bathing in unfiltered water.

Sent: Tuesday, January 19, 2016 7:22 PM
Subject: FW: 2-1-1 Flint Water Response for Tuesday, January 19, 2016
Attachments: Flint one-pager.pdf; Flint Water Timeline.pdf; SOTS press release.pdf

Moments before mailing this update, the governor's state of the state information on Flint was released. See attached.

This is the daily 2-1-1 summary on the Flint Water Response for Tuesday, January 18, 2016

GENERAL INFORMATION:

☑ **Positive tests from bottled water:** Thanks to SEOC and DEQ for following up with water testing company, Zerowater, to clarify why people could get a positive response when they test their bottled water. 2-1-1 will use this language and let the JIC know if callers have additional concerns or questions:

"The TDS meter (Total Dissolved Solids) is NOT intended to measure Lead levels in your water. The meter is not sensitive enough to determine maximum safe lead levels, but only TOTAL dissolved solids, which will largely effect taste. The Zerowater filter WILL reduce lead to a safe level as long as it is not used past maximum capacity. Please test your water regularly with the meter and change your filter when the meter reads 006 or higher."

- Zerowater is adding a message to the filter and TDS meter packaging to provide this information. Their customer service team also has this information. Zerowater Customer Service is 1-800-503-2939, open M-F 9am–9pm Eastern.
- MDEQ also contacted the three callers reporting positive tests, provided them a resupply of water and picked up the bottles that tested positive for a lead and copper analysis in the DEQ laboratory.

- 2-1-1 partners have coordinated to increase staffing to handle any call surge based on the governor's state of the state address.
  - The 2-1-1 database went down around 6:00 pm. The vendor was contacted and indicated this outage will likely last several hours. This will delay reporting on today's calls and callers needs as this data will have to be compiled by hand.

CORRECTIONS AND CLARIFICATIONS

- **CORRECTION:** Yesterday's item re: the minister calling for assistance for assistance was actually offering his church as a water distribution site – I misunderstood he was waiting on a water delivery. but no water had been delivered. 2-1-1 has received several calls offering to provide additional distribution sites. These offers are being forwarded to Jamie-Lee Venable at United Way of Genesee County.

- **CLARIFICATION:** It is Genesee County employees who are periodically furloughed, not City of Flint.
  Upcoming Genesee County closure dates are:
  February 12-15: Presidents Day
  March 25 – Good Friday
  May 27-30 – Memorial Day

CALL VOLUME:

☐ Call volume was substantially higher than average today (Tuesday). The high volume had some impact on the time it took to answer calls, but there were no reports of caller dissatisfaction.

☐ The Genesee County Health Department has asked 2-1-1 to refer callers with lead and Legionella questions to the DHHS hotline that was available over the weekend. 2-1-1 is awaiting confirmation that the state hotline will be regularly staffed before implementing this change.

SPECIAL NEEDS/REQUESTS

☑ Business owners asking for water filters. Per Jamie-Lee Venable at UWGC, 2-1-1 is directing business owners to the Chamber of Commerce.

RUMOR CONTROL

- *One caller reported hearing rumors of contaminated bottled water. See first item under General Information for guidance on handling of these calls going forward.*

UNRESOLVED

☐ **From 1/13/16:** No solution reported yet for a paralyzed man who needs a water testing kit delivered. He needs a test kit delivered since he is homebound when he does not have an aide available. 2-1-1 has this contact information.

☑ **From 1/14/16:** 2-1-1 continues receiving calls from elderly residents in senior apartment complexes (non-subsidized housing) needing water resources delivered. They cannot carry bottled water with canes or walkers, nor stand in line for extended periods. **Is the sheriff's office handling these deliveries now?** ***RESOLUTION:*** *Per agreement with the Sheriff's Department, each time residents call, 2-1-1 will forward their information to the Department for follow up.*

☑ **From 1/15/16:** 2-1-1 has heard from several callers expressing concerns law enforcement is either providing or accompanying all deliveries of water resources to qualifying residents. One wheelchair bound man demanded to be removed from the filter delivery list due to fear of the police. 2-1-1 attempted to provide reassurance, but the caller was adamant being removed. **Is there a water delivery option for residents who are concerned about contact with law enforcement?** ***RESOLUTION:*** *The teams have at least one law enforcement representative with each group that goes to residents homes. 2-1-1 Staff will try to reassure callers that canvass teams are only at the residence to provide water resources.*

☐ **From 1/15/16:** 2-1-1 is trying to identify a resource to pick up test kits from homebound/senior residents who cannot drop off test kits at designated sites.

☐ **From 1/18/16:** Is there a timeframe for how long bottled water will be distributed? Locals are asking how long this will continue.

☐ **From 1/18/16:** One of the top questions is when will canvassers be specific neighborhoods. Callers would like to know so they can arrange their schedules. Is this information available for 2-1-1 to share?

☐ **From 1/18/16:** Callers are asking about shower heads that can filter water for bathing. 2-1-1 continues to receive reports of rashes attributed to bathing in unfiltered water.

Just heard from a Sgt. at one of the PODs that several folks were complaining the bottled water is not good based on the test in the photo. I talked to Julia Pieper earlier today to make sure someone would be at the lab to prep the bottled and canned water that would be coming in around 1715. Ms. Pieper agreed to stay to receive and prep the samples. Hopefully results will be available by noon or so. Public messaging will be key once we have the results. The other thing the Sgt. mentioned is that the disgruntled residents were going to post on web site. Let's talk briefly after the results are received. Thank you.

Subject: Procurement for Flint Drinking Water Project
Importance: High

Tara, can we please sit down asap and figure out who's doing what in the purchasing process for the Flint project – esp. related to requests from other Departments/Agencies/etc.

As you know, the lab has been ordering bottles and supplies. Today we received an unexpected purchase request via DTMB (from the MSP Emergency Operations center) for an order of bottles to be delivered to Flint, and we want to be sure the proper approvals, tracking and notifications are in place. Delivery of these items in a quick manner is essential, therefore procurement needs to be as streamlined as possible.

Objectives:

1. We need to make sure the lab staff aren't working any more than they absolutely have to on filling out purchasing paperwork/getting quotes as they are very, very busy processing the samples. In regards to bottles, VWR and Sci-Spec can supply the bottles. Who is authoring or the number of bottles needed is unknown to me. No paperwork should be necessary from Kirby to order from either of these contracts, but the DEQ is still responsible for POs, payments, etc.

2. We should look at the p-card as an alternative for further emergency purchases. We've had our lab p-card limits increased temporarily related to one vendor contract; could we check with DTMB to see if they will allow

us to continue the exception based on the purchases needs related to the Flint project? (From our understanding, you've asked us to process individual Reqs/PO's for each purchase in order to avoid encumbering large blocks of funding. VWR is a state contract vendor who accepts p-cards. Can we use that instead and/or find out what their minimum limit is for direct billing without having to set up a PO (if any)? The PCard increase was for an emergency purchase of the bottles per Kirby last week from a vendor that was not registered in MAIN. We cannot continue to order the bottles off contract since VRW and Sci-Spec can supply them. I spoke with VRW just within the hour; we do not need to cut a PO for each order; payment can be dealt with by PCard or DV at invoice. DV will be easier to track.

3. We need to avoid duplicate orders or confusion, therefore who should we expect purchase requests from (the lab? the SEMOC?), what are the proper approvals, who is establishing the PO & for which purchases, etc. Who will be verifying that the goods were received and backup documentation is retained? I'm in the dark at this point as to who is authorizing orders from the Emergency Operations center, I am looping in Jeanette Doll, as they will need to be in the conversation to address the concerns you have expressed. Please initiate a meeting for tomorrow morning.

Suggested attendees: yourself, Dawn, Mary Jo, Sylvia R., Lisa R., Melissa S. (DTMB)?

Attachments: Copy of SEOC SCHEDULE 1_25-2_2.macom.xlsx

Proposed changes. I agree getting someone else from DNR would be a steep learning curve so you'll see I penciled me in for a little more time than you proposed, based on what's on my calendar, so check it out and we can discuss when you've got a few minutes.

With respect to Sat/Sunday 1/30/31, I too can go either way, so want to defer to you depending on Tanner's schedule. If we do a long day each I'd prefer to take the Saturday shift, only because there's a 5:15 MSU BB game that I'd like to watch on Sunday, but that's not too big of a deal. Talk to you soon.

Mitch

Subject: Schedule 1/25-2/2

Here is my draft. Steve is in Aruba so right not it is just you and I. I have another person approved to fill in and can see if he is avail though would have to sit in for a day and he is DNR so would be pretty difficult to bring him up to speed. Let me know your thoughts. Also your thoughts on the weekend of the 30-31... if you want to split both days or each get a long day and a day off. I am good either way.

Thanks Mitch!

Dear Representative Inman,

It has been brought to my attention that Michigan has been buying water filters for the City of Flint. I am interested in finding out what brand, model, and types of filters were purchased for Flint.

Thank you for your assistance retreiving this information,

Subject: 2-1-1 Flint Water Response for Monday, January 18, 2016

This is the daily 2-1-1 summary on the Flint Water Response for Monday, January 18, 2016

GENERAL INFORMATION:

****** 2-1-1 NEEDS SPECIFIC GUIDANCE ASAP ON WHAT TO TELL CALLERS WITH QUESTIONS ABOUT BOTTLED WATER *TESTING POSITIVE FOR LEAD.*******

Since 1/14/16 Michigan 2-1-1 has received three direct reports of bottled water testing positive for lead. The attached .wav file has information from a staff member at a group home in Flint. The home tested bottled water received from a fire station and it came back positive for unsafe lead levels. The group home attempted to return the water to the fire station, but the station would not accept it and told them to call 2-1-1. 2-1-1 has contact information for the three callers making reports.

- At 2:30 pm today this request went to Katie Dunkle at DHHS- Office of Public Health Emergency Preparedness (the team that handled health questions while Genesee Health Department was closed this weekend). At 4:23 pm the SEOCOPS Health and Env MDEQ desk is following up with the callers reporting lead in bottled water, but as of 5:14 pm there is no formal guidance on how 2-1-1 should respond to these calls.

- Is there a timeframe for how long bottled water will be distributed? Locals are asking how long this will continue.

☐ One of the top questions is when will canvassers be specific neighborhoods. Callers would like to know so they can arrange their schedules. Is this information available for 2-1-1 to share?

☐ A local minister called 2-1-1 twice over the weekend for assistance because his church was listed as a water distribution site, but no water had been delivered. **Is there a master list of additional community distribution sites, e.g. senior centers, churches? Is there any schedule available showing when water will be delivered to different sites?**

☑ Can 2-1-1 get a calendar of any future furlough closures for Genesee County government so we can properly refer callers? **Jamie Gaskin at United Way of Genesee County verified the only upcoming furlough dates for City of Flint employees are Presidents Day Weekend, Friday Feb. 12 through Monday, Feb. 15.**

<u>CALL VOLUME:</u>

- Weekend call volume was manageable with 2-1-1 partners in SE Michigan and Grand Rapids providing extra capacity to the regular overnight service provided by Gryphon Place in Kalamazoo. There was a spike on Saturday morning and another on Sunday that led to a short periods where answer times hit 10 minutes before additional capacity could be brought online to reduce wait times under two minutes.
  - **326 calls on Saturday 1/16**
  - **244 calls on Sunday 1/17**

- Today (Monday) Gryphon Place brought in 3x normal staffing to handle the holiday volume for Central Michigan, including Flint, along with GP's regular territory in SW Michigan. As of 2:30 pm "Staff have been taking calls non-stop, but wait times are still within two minute goal".

- The health information hotline staffed by DHHS over the holiday weekend received approximately 25 calls over the weekend, including Monday.
  - Is the JIC is monitoring demand on the Genesee Health Department hotline to ensure they have adequate capacity to handle demand? Could DHHS provide additional staffing if needed?

<u>SPECIAL NEEDS/REQUESTS</u>

- Demand from seniors and homebound residents for water delivery remains high. 2-1-1 continues to maintaining this information and is providing daily updates to the Sheriff's Department.

  ☑ 2-1-1 is documenting the tracking homebound residents needing bottled water for medical devices as an unmet water need – the Sheriff's Department is including these with other homebound deliveries as their capacity allows.

☐ Callers are asking about shower heads that can filter water for bathing. 2-1-1 continues to receive reports of rashes attributed to bathing in unfiltered water.

☐ Business owners are asking for water filters. As one said, "What about us?" Over the weekend 2-1-1 received calls from a golf course and a large factory owner. The factory needs "100s of water filters – we got 3". How would the JIC like 2-1-1 to handle inquiries from businesses for assistance?

RUMOR CONTROL

- See first item in today's report on concerns about lead in bottled water.

☐ An unofficial 'Flint Police Operations' Facebook page posted an item telling people to call 2-1-1 if they had large parking lots to host 18 semi-trucks bringing in water to distribute. 2-1-1 was able to coordinate with the EOC to have the post removed within a few hours.

UNRESOLVED

☐ **From 1/13/16:** No solution reported yet for a paralyzed man who needs a water testing kit delivered. He needs a test kit delivered since he is homebound when he does not have an aide available. 2-1-1 has this contact information.

☐ **From 1/14/16:** 2-1-1 continues receiving calls from elderly residents in senior apartment complexes (non-subsidized housing) needing water resources delivered. They cannot carry bottled water with canes or walkers, nor stand in line for extended periods. ***Is the sheriff's office handling these deliveries now?***

☐ **From 1/15/16:** 2-1-1 has heard from several callers expressing concerns law enforcement is either providing or accompanying all deliveries of water resources to qualifying residents. One wheelchair bound man demanded to be removed from the filter delivery list due to fear of the police. 2-1-1 attempted to provide reassurance, but the caller was adamant being removed. **Is there a water delivery option for residents who are concerned about contact with law enforcement?**

☐ **From 1/15/16:** 2-1-1 is trying to identify a resource to pick up test kits from homebound/senior residents who cannot drop off test kits at designated sites.

Subject: FW: Message from 211 - Positive Lead tests of bottled water
Importance: High

Katie,

The attached .wav file was left earlier today for Michigan 2-1-1 from a staff member at a group home in Flint. They tested bottled water received at a fire station and it came back positive for unsafe lead levels. The group home attempted to return the water to the fire station, but the station would not accept it and told them to call 2-1-1.

MI211 has been reporting this concern for the past week, but have had no response from the JIC. This is the third call to 2-1-1 from a Flint resident personally reporting bottled water contaminated with lead. We have contact information for all three callers making first-person reports of lead in water they have received from official distribution sites.

We have had additional calls from people saying they have heard rumors about problems with bottled water.

2-1-1 needs help getting out in front of this concern with accurate information from a reliable source. Can your team provide any guidance?

Thanks,

Tom Page | Executive Director

Importance: High

Hi Tom,

This is the 3rd caller I've heard from directly about the water bottles testing positive for lead. Attached is her voicemail – the Fire Station told her to call us but unfortunately we haven't received any guidance yet around this. I have 2 other callers contact information that I need to return their call when we have messaging. Please advise!

Thanks!

See attached notes.

Roger Cargill with Schupan needs a three day turnaround for the printing of the card that will accompany the recycling collection bags, so the sooner we finalize the card the better.

Hi Bryce & Steve

Please see request below from Genesee County for staff to assist in the establishment of a viable long term recycling program in the city of Flint, with emphasis to recycle plastic water bottles and packaging materials associated with supplies that are currently being distributed within the community in response to the water emergency.

Please reply with either Emily or Matt's contact information or make contact directly and advise whether one of them or suitable alternate is available to attend the meeting on TUESDAY MORNING, January 19 @ 11:00 am. Thanks!

Mitch

Subject: Flint Recycling

Please contact Emily Freeman, Recycling Specialist and/or Matt Flechter, Recycling Market Development Specialist, to arrange for them to meet with state and local personnel in the Genesee County EOC, Administration Building (basement), 1101 Beach St, Flint on Tuesday, January 19, 2016 at 11:00 a.m. EST. The purpose of the meeting is to assist in the establishment of a viable long term recycling program in the city of Flint, with emphasis to recycle plastic water bottles and packaging materials associated with supplies that are currently being distributed within the community in response to the water emergency.

See attached. Similar type of communications will likely continue. Has there been discussion in the SEOC on how these will be handled and whether JIC will be issuing any communications to advise the community of approved solutions and to be alert of potential scams. This particular communication was sent to Congressman Kildee.

Attached is the list of 3 vendors that our lab has been ordering the sample bottles from, which includes the "product ID" number each vendor uses, along with contacts from the suppliers. Sample bottles are one vital component of the test kits. Other components are:
the sample labels, prepared by the DEQ lab, and finally
the sample request form that is attached by rubber band.

I've also attached the procedure we've established with our lab to do "lot testing", which is an important quality assurance/quality control step that will need to be continued by FEMA. The lot-testing should be completed before the kits are assembled, to assure that kits handed out to the public for submitting samples don't have any cross-contamination issues.

Do you know if FEMA plans on using the DEQ lab for sample analysis going forward? We'll need to keep our lab appraised of this so they can manage their workload. Thanks

Attached is the list of filtration devices that we have provided so far for the city of Flint residents. The only outstanding order we are aware of is the 2500 pitcher replacement filters scheduled for 1/18 delivery. As of last night, resources is reporting about 60,000 faucet filters and 60,000 replacement cartridges. I believe planning or logistics has the best idea as to how long that supply should last.

I am forwarding the information received from Mr. Alexander regarding the Vortex units for water system treatments. This is a follow up to a phone call I had with him yesterday after he reached out to the Governor's office to suggest the use of these products. While I have not seen any significant published literature that supports this technology as an effective mechanism for water treatment, I think that a more thorough review and reply to him by someone in the MDHHS Division of Environmental Health and/or DEQ with expertise in water treatment/filtration is indicated. An evaluation of the efficacy and potential use of these water treatment units falls a bit outside my area of expertise.

I have sent a short reply to Mr. Alexander and told him that this information will be reviewed by one of our water quality experts and that he would then receive a reply.

Please let me know if you need any additional follow up by me.

Dr. Mcfadden,

Picking up on your conversation yesterday on the legionella outbreak, I have inclosed a product list. Our own bacterial tests not including legionella. The only official test we have is from Saiseiko, our sister company, when they used an AVS in a Japanese public bath where they discovered legionella. When they fitted the AVS, a few days later, a test was carried out and there was no detectable legionella.

Please note we are not making claims that Saiseiko products are an anti-legionella product. We make treatment systems that are successful in activation and rejuvenation of the water you drink.

Legionella lies within lime scale deposits. In order to remove them you would need to flush huge amounts of dissolvent through the system to flush the lime scale out. Our AVS and SEM can provide a negative ionic charge to the new scales media preventing it from sticking to existing deposits. Including the removal of positively charged scale ions as the negatively charged ions pass. They will detach and stick to the passing negatively charged ions creating a neutrally charged particle that passes though the system and down the drain. Adding BA ceramics with anti bacterial properties helps change the scale to another form making the environment inhospitable. By adding BA ceramics with antibacterial properties, we are once again making it challenging for the bacteria to grow.

Please see attached report.

Note we are not making claims that Saiseiko products are an anti-legionella product. We make treatment systems that are successful in activation and rejuvenation of the water you drink.

Also the AVS increases dissolved oxygen and if velocity is high it can help break the bacteria cell walls to help reduce oxygen hating bacteria and again velocity and pressure is important to take away other bacterial types. It briefly produces hydrogen peroxide inside the pipe, which is a powerful thing. Negative ions help to neutralize positively charged ions.

See the attached page with the reference to H2O2. - hydrogen peroxide.

In order for me to get you a proper recommendation I will need to know the water line sizes in the infected areas. I will be looking forward to your response.

Blessings and Gratitude,
David Flores

Subject: Potential Assistance Programs

State Emergency Management Coordinator:

As discussed in this morning's briefing, your agency has been identified to research potential assistance programs (private, state, federal, etc.) that may be available to address the short- and long-term recovery needs in response to the Flint water incident. Earl Zuelke, FEMA Long-Term Recovery, has made contact with some federal agencies to assist with this research. Feel free to touch base with him in the SEOC.

Attached is a copy of the Non-Stafford Act Recovery Guide. Appendix 2 (pg. 24-26) provides a list of some potential federal programs. This list is **not** all-encompassing; however, it will provide a starting point if any of these programs may apply to the response and recovery for this incident.

Provide the following information, *at a minimum*, on potential assistance programs for individuals and/or government support in response to this incident:

- Program Name
- Agency Responsible for program
- Point of Contact
- Type of Support (Individual or Government)
- Eligibility Guidelines
- Benefits Available
- Application Process

This information shall be submitted to Brianna Briggs, the Recovery Branch Chief, at briggsb3@michigan.gov by **COB Friday, January 15.**

Let Brianna (cell phone below) know if you have any questions on this request.

Thank you,

Brianna Briggs
Recovery Branch Director

Subject: Test Kit Sample Results

Just received a report from the Fire Stations that some citizens are inquiring if they will receive results. My understanding is that the City will be provided results of all samples, but individuals will not receive results. Please verify if this is correct? Also, can you advise if there has been any message released about testing and how results will be distributed?

Thank you.

Attachments: IMG_1260.jpg; IMG_1261.jpg

A quick clarification on your note below (highlighted). Please verify that every box has the same Lot #s labeled on them. Attached are Lot # labels to verify. IMG 1260 is Vendor label Lot # 6-080-001 and should be on every box. IMG 1261 is Manufacturer label Lot #s 3558401 and 4120261 and one or the other of these 2 lot labels should be on every box. If there are any boxes with anything different please separate out and let me know.

Thanks!

Importance: High

10,600 test bottles are being delivered tomorrow. Every box needs to be lot checked.
The lab will have the lot tested tomorrow morning.

Someone needs to be at the **DEQ lab tomorrow at 10am** to pick up the labels for that delivery. They will also be getting one box of that same lot that was delivered to the lab for the testing and rubber bands. Have that person also bring over any samples the city has gathered.

Please advise me and Kirby Shane who will be at the lab tomorrow by reply to this email.

Thanks!

Hi Jen/DEQ-EMC

Please see note below from Jackson Co. DHHS staff interested in donating water to Flint residents and let us know best advise to direct their good will. I see from the attached release from the Joint Information center (JIC) that the Red Cross is coordinating donations. If that's the preferred way to send donated water is there a contact number to forward to Jackson DHHS and other potential donors. Thanks

Subject: Teaming Up With Our DHHS Family in Flint and Genesee County

Good Evening Everyone,

As many of you are aware, there is a serious water crisis in Flint, MI. We are asking MDHHS members of Jackson County to stand with Genesee County to donate water (cases or gallon jugs) towards this initiative until the water issue is resolved. Although Jackson County is not directly affected by this crisis, it will be a great way to try and support those communities that are impacted.

In the past, Jackson County has come together with minimal effort to provide support to worthy causes, are you willing to support or volunteer to this one? Donations will be collected January Monday 25th- Friday 29th. To donate please contact Andrea Burks 2nd Floor or Niya Moore 2nd floor or Zoe Lyons 3rd floor.

One of my good friends at DHHS who lives in Flint said this, "Cooking over the holidays was a chore using filtered water for everything. You can't rinse fruit, meat, boil for spaghetti. Brush teeth. I went though a lot of water. A gallon a day for just my husband, dog and I drinking it and making coffee. I have a faucet filter but it's only good for 100 gallons and comes out in a slow stream."

So just imagine ... How hard this is for everyone when you consider this information.

For your efforts, if you donate one case or a couple jugs of water (or more as it will clearly be used) you will receive one week of casual dress. We are also looking for volunteers to help drive the cases to Flint.

Let's see what we can do!!

Zoe

Cc: Pieper, Julia (DEQ); Smith, Carol (DEQ); Krisztian, George (DEQ); Ducharme, Mark (DEQ)
Subject: RE: Email update

4719 bottles, labels, rubber bands are ready to be picked up by DTMB today. 3612(42 cases on three pallets), unlabeled, are at Filley Street warehouse. 1107(13 cases), labeled, 3612(121 sheets of 30) labels, and rubber bands are at the DEQ Lab loading dock. Please advise when these bottles will be picked up. **The Filley street warehouse will be closing around 4:00PM today.**

Just spoke with Scientific Specialties Representative. 1020(17 cases) to be shipped today to GCCard in Flint to Matt Persel. 10,200(170 cases) tentatively shipping out this Thursday, 01/14/16. 169 of those cases to be shipped to GCCard in Flint to Matt Persel, 1 of those cases to be shipped to DEQ Lab for Lot testing. All bottles (187 cases total) are the same lot per vendor. This will need to be confirmed on arrival at GCCard(per instructions to be sent shortly for review). Once the single case has been received and tested by the Lab, the Lab will print labels to be couriered to GCCard for this entire shipment.

Scientific Specialties Rep is checking on lead time for up to additional 30,000 Wide Mouth bottles from their manufacturer. Also checking on current stock and lead time on additional stock of the Narrow Mouth bottles.

Alternate Vendor - Environmental Express: We can ship 100 cases (72 per case) by Thursday of this week. We can probably ship another 150 cases by early-middle next week. We would be able to send the remaining 50 cases by the end of the month. In regards to availability going forward, this is a popular bottle so future inventory shouldn't be a problem. If our warehouse knows that this will become a recurring order, they will adjust their inventories to accommodate.

Alternate Vendor – VWR: Wide mouth containers are custom made (not available in stock) from C&G Containers mfgr in Louisiana. Lead time 5-7 days for them to package containers and lids and then another 4 days drop ship from C&G mfgr. We can request for them to be shipped sooner with additional charge.

Subject: Filters

When you make the calls ask for the Brita Faucet filters and the Brita replacement filters.

Do not order Brita pitchers they are not NSF certified for lead.

Ask for PUR faucet filters and replacement filters.

Ask for Zero cup pitchers as they are the only pitchers certified for lead removal and are NSF53 certified. They come in 8 cup and 23 cup pitchers.

I thought I had the purchase order in an email but I don't.

Hi Steve,

Is it possible to pull the instruction sheet from the manufacturer's webpage? Also, is there the option of scanning the form and posting it?

Jennifer

I'm certain we can make the video if we have an expert willing to work with us on camera. I can sit down with them, storyboard it out and shoot it. I'll edit and work with the content expert to be sure the final product is correct.

Not a tough video to make.

I noticed a youtube video on the Flint water website, on how to change your water filter. Can we look at getting one for how to test your water (with the free test kit) as well?

I am trying to track down the instructions at this time.

Importance: High

We can get messaging on social media and will make sure that it's up on the website. Looping in MDEQ PIOs to get it out through their channels – they handle water testing and have the instructions.

Karen or Mel – I didn't see the testing instructions online. Can you send them to me?

The concern is surrounding the people who already picked-up the filters from that station yesterday without the instructions. Will public information messages include the simple step instructions for those who may not have received the written instructions yesterday?

Jennifer

It was brought to my attention via Red Cross that the water testing kits that were provided at the **Pierson Rd. Fire Station ONLY** yesterday did not include the instructions for water testing. Is this something that the JIC is aware of already?

Thank you,
Jennifer, EMC

Subject: RE: DEQ New Lease Request in Lansing Area Assigned (2016-0095)

Hi DTMB Real Estate Team,

We are concerned with the criteria listed below as this lease needs to be expedited because it is directly related to the Flint water crisis. Is there a way to get this in front of the AD board right away vs. having to wait for their next meeting?

Also, do you have an estimated time frame as to how quickly we can take possession of this property?

Thanks so much for your help on this one.

Subject: DEQ New Lease Request in Lansing Area Assigned (2016-0095)

The following New Lease request has been received in the DTMB Real Estate Division and assigned as noted:

New Lease No: 11870
Address: 3306 N. Martin Luther King Blvd., Lansing
Request: New Lease – for controlled storage space for Remediation Division to store drinking water samples from Flint.
Assigned to: Maureen Bailey
Point of Contact: Maureen Bailey @ (517) 284-7929 or BaileyM1@michigan.gov
Project# 2016-0095

Per the requirements of Sec. 221 of the DMB Act:

- All leases must be approved by the State Administrative Board
- Leases exceeding $500,000.00, annual base cost require approval of the joint capital outlay subcommittee (JCOS).
- Rental Agreements exceeding $500,000.00, annual base cost require notification to the JCOS and to the fiscal agencies within 5 business days of execution.

- Renewals of an existing lease will require the approval of JCOS if the renewal results in changes to the lease that would cause it to meet the requirements above.

TESTING INFORMATION

Metal	Result In Parts Per Billion (ppb)
Copper	150
Lead	179

What the Results Mean: The result tells you how much lead and copper is in the water

- If the result for Copper is "Not Detected", that means the amount of copper in the water was less than 50 ppb.
- If the result for Lead is "Not Detected", that means the amount of lead in the water was less than 1 ppb.

- No matter what your lead result is, you should continue to use an NSF certified filter until the Public Health Emergency Declaration has been lifted.

- Filtered or bottled water should be used for all drinking, cooking and washing of fruits and vegetables.
- Filtered or bottled water should also be used for children brushing their teeth and for watering pets.

If your lead result is greater than 150 ppb:

- Contact the Genesee County Health Department at (810) 257-3603 (if you have not already been contacted)
- Use only bottled water for drinking if you are pregnant
- Use only bottled water for infants for drinking water and for making baby formula

Please note, other faucets in your home may have higher levels of lead, even if this sample was low. Do not drink or cook with water from other faucets unless they have been tested and have a filter.

TESTING INFORMATION

Metal	Result In Parts Per Billion (ppb)
Copper	200
Lead	127

What the Results Mean: The result tells you how much lead and copper is in the water

- If the result for Copper is "Not Detected", that means the amount of copper in the water was less than 50 ppb.
- If the result for Lead is "Not Detected", that means the amount of lead in the water was less than 1 ppb.

- No matter what your lead result is, you should continue to use an NSF certified filter until the Public Health Emergency Declaration has been lifted.

- Filtered or bottled water should be used for all drinking, cooking and washing of fruits and vegetables.
- Filtered or bottled water should also be used for children brushing their teeth and for watering pets.

If your lead result is greater than 150 ppb:

- Contact the Genesee County Health Department at (810) 257-3603 (if you have not already been contacted)
- Use only bottled water for drinking if you are pregnant
- Use only bottled water for infants for drinking water and for making baby formula

Please note, other faucets in your home may have higher levels of lead, even if this sample was low. Do not drink or cook with water from other faucets unless they have been tested and have a filter.

Incident Action Plan

For the

Flint Water Incident

Incident #2015-10-01

2/06/2016

Prepared by the MDEQ-ECC-IMT

INCIDENT OBJECTIVES	1. Incident Name Flint Water 2015-10-01	2. Date 2/05/2016	3. Time 1900

4. Operational Period
2-06-2016 0900 - 1700

5. General Control Objectives for the Incident (include alternatives)

Maintain clear communications and flow of information with the divisions and agencies working on the Flint Water Incident.

Continue Implementation of steps in accordance to the plan to fulfill or meet the tasks handed down in the EPA Order of January 21, 2016.

Continue Implementation of steps as outlined in the Flint Drinking Water Response Plan and timeline to establish safe drinking water through appropriate DEQ staff.

Track status and progress of DEQ's actions with respect to EPA Flint Drinking Water Task Force Recommendations.

3. Incident Name Flint Water 2015-10-01	4. Operational Period Date: 02/06/2016 Time: 0900 - 1700	

5. Operations Personnel

Operations Chief	Lee Osterland-DNR	Division/Group Supervisor	Director Creagh-DEQ / Amy Epkey-DEQ

6. Resources Assigned this Period

Resource Designator	Leader	Number Persons	Trans. Needed	Drop Off Pt./Time	Pick Up Pt./Time
Tech. Specialist	Jim Sygo-DEQ	1	NO	0800/ECC	1700/ECC
Tech. Specialist	George Kriszlian-DEQ	1	NO	0800/ECC	1700/ECC
Agency Advisor	Dan Lord-DNR	1	NO	0800/ECC	1700/ECC

7. Group Objectives

- Implement actions in accordance with the Safe Drinking Water Act and EPA Administration Order: The Michigan Department of Environmental Quality (MDEQ) will work cooperatively with the United States Environmental Protection Agency (EPA) and the City of Flint to implement the department's duties under the Safe Drinking Water Act and the EPA Administrative Order issued on January 21, 2016.

- Continue Coordination with the City of Flint: The DEQ and other State agencies will continue to meet with the City of Flint at least weekly to identify additional actions needed until these meetings are no longer applicable.

8. Special Instructions

- Review timelines pertaining to EPA order and make sure deadlines are met.
- Follow web posting data format protocol.
- Data compiled from sentinel sampling sites will be available and delivered to the Director prior to April 15th.
- Draft a correspondence letter to the residence where lead concentrations are above 150ppb, followed by letter to surrounding residences for volunteer sampling.
- Jim Sygo will draft a letter to Dr. Lurie addressing the information flow between State and Federal agencies in regards to daily reporting of ongoing sampling.

DIVISION ASSIGNMENT LIST	1. Branch: DEQ	2. Group: Infrastructure
3. Incident Name: Flint Water 2015-10-01	4. Operational Period: Date: 02/06/2016	Time: 0900-1700

5. Operations Personnel

Operations Chief	Lee Osterland-DNR	Division/Group Supervisor	Amy Kohlhepp-DEQ

6. Resources Assigned this Period

Resource Designator	Leader	Number Persons	Trans. Needed	Drop Off Pt./Time	Pick Up Pt./Time
Tech. Specialist	Paul McDonald-DEQ	1	NO	0800/ECC	1700/ECC

7. Group Objectives

- Inventory City of Flint Lead Service Lines: The DEQ may consult and coordinate with other services (such as plumbers, contractors, etc) to prepare a comprehensive inventory through the use of mapping which covers the inside of the schools in regards to lead service lines in Flint.

- Inventory City of Flint Lead Service Lines: The DEQ may consult and coordinate with other services (such as plumbers, contractors, etc) to prepare a comprehensive inventory through the use of mapping which covers the outside infrastructure of the schools in regards to lead service lines in Flint.

- Identify all faucets at Schools that will be replaced and identify potential replacement faucets at other Public Locations: The Michigan Department of Licensing and Regulatory Affairs will be working in conjunction with DEQ to replace all fixtures in Flint's 200 public schools, anticipated replacements at daycares, and anticipated replacements at other places of congregation.

8. Special Instructions

- Provide any mapping information to GIS support.
- Jack Schinderle will take over Group Supervisor responsibilities upon return.
- Remain in contact with LARA to acquire information regarding supply lines to school, types of lines inside of schools, and how lines are being tracked/documented.

Prepared by (Resource Unit Leader)	Approved by (Planning Section Chief)	Date	Time

DIVISION ASSIGNMENT LIST	1. Branch DEQ	2. Group Public Health
3. Incident Name Flint Water 2015-10-01	4. Operational Period Date: 02/06/2016	Time: 0900 - 1700

5. Operations Personnel

Operations Chief	Lee Osterland-DNR	Division/Group Supervisor	Richard Benzie-DEQ

6. Resources Assigned this Period

Resource Designator	Leader	Number Persons	Trans. Needed	Drop Off PT./Time	Pick Up PT./Time
Tech. Specialist	Bryce Feighner-DEQ	1	NO	0800/ECC	1700/ECC
Tech. Specialist	Kris Philip-DEQ	1	NO	0800/ECC	1700/ECC
Tech. Specialist	Susan Leeming-DEQ	1	NO	0800/ECC	1700/ECC
Tech. Specialist	Laura Verona-DEQ	1	NO	0800/ECC	1700/ECC

7. Group Objectives

- Establish metrics needed to meet criteria for Safe Drinking Water: The DEQ will coordinate with all partners, including the Department of Health and Human Services (DHHS), the City of Flint, Genesee County Health Department, EPA, and others, to determine what criteria are needed in order to declare the water in Flint Safe.

- Evaluate plan for KWA source; consult long term plan and appropriate leadership.

- Create workgroup to devise Long Term Goals.

8. Special Instructions

- Identify and set up a meeting with the pertinent entities once initial data points are obtained.
- Mitigate span of control issues.
- Implement response plans to identify what actions will take place at specific lead thresholds.
- Coordinate DEQ response plan with EPA and DHHS response plans handling lead results above 150ppb.

Prepared by (Resource Unit Leader)	Approved by (Planning Section Chief)	Date	Time
		2/5/16	1935

DIVISION ASSIGNMENT LIST	1. Branch: DEQ	2. Group: Testing/Sampling
3. Incident Name: Flint Water 2015-10-01	4. Operational Period: Date: 02/06/2016	Time: 0900 - 1700

5. Operations Personnel

Operations Chief	Lee Osterland-DNR	Division/Group Supervisor	Liz Browne-DEQ

6. Resources Assigned this Period

Resource Designator	Leader	Number Persons	Trans. Needed	Drop Off PT./Time	Pick Up PT./Time
Tech. Specialist	Steve Sliver-DEQ	1	NO	0800/ECC	1700/ECC
Various DEQ Staff				0800/ECC	1700/ECC

7. Group Objectives

- Complete sampling of highest priority homes: Those areas identified as having the greatest risk for lead exposure. Ensure training needs are met for the Flint Drinking Water Sampling Teams on how to properly pull a sample for collection purposes. The team will visit the 200 identified sites once every two weeks for two months (February-March) to pick up samples, verify integrity of samples and maintain good processes.

- Assure Access to Sampling for all Flint Residents: Outside the greatest risks areas provide additional sampling to all residents. Ensure Residents will receive an official laboratory report, indicating whether or not lead or copper were detected in their water.

- Coordinate monitoring of blood lead levels of residents in High Priority Homes with DHHS. Blood level testing and analysis will occur by the DHHS and/or Genesee County Health Department. Blood level testing will occur in conjunction with the first, second, third and fourth water sampling activities.

- At schools and other public locations the Michigan Department of Licensing and Regulatory Affairs will be working in conjunction with DEQ to replace all problematic fixtures in Flint's 200 public schools, daycares, and other places of congregation.

- Test Drinking Water Distribution System: The DEQ will coordinate with the City of Flint on weekly testing of the drinking water distribution system to determine if there are any issues with lead occurring within the system.

- Verify Lab Results: All residential, school, distribution system, and other tests will be completed at the DEQ laboratory. A random set of samples will be split and samples will be analyzed by the National Science Foundation (NSF) to validate the results.

8. Special Instructions.

- Ensure sampling follows Testing Plan Process and Protocols.
- Establish sampling teams to respond to residences with lead concentrations above 150ppb.
- Provide Residential Sampling team information to ECC on a daily basis by 1200.
- Identify future personnel available for implementing group operations.
- Consider ways to increase sampling as needed.
- Download data from DEQ Laboratory database and sort per established format.
- Mitigate span of control issues.
- Coordinate with GIS support and Infrastructure group to develop sampling/testing forms to reflect GIS data format needs.
- Coordinate with GIS support and testing/sampling group to develop water line type forms to reflect GIS data format needs.

Incident Action Plan

For the

Flint Water Incident

Incident #2015-10-01

2/15/2016

Prepared by the MDEQ-ECC-IMT

INCIDENT OBJECTIVES	1. Incident Name Flint Water 2015-10-01	2. Date 02/14/2016	3. Time 1530

4. Operational Period
02-15-2016 0800 - 1700

5. General Control Objectives for the Incident (include alternatives)

- Provide for the safety and welfare of all responders and residents within the incident area.
- Continue implementation of steps as outlined in the Flint Drinking Water Response Plan to establish safe drinking water utilizing appropriate DEQ staff.
- Ensure implementation of steps to meet the requirements set forth in EPA Administrative Order of January 21, 2016.
    - Complete initial round of Sentinel Site testing and data collection
    - Initiate 15 – 149 ppb residential testing operations
    - Develop and implement a plan to identify the 10,618 parcels identified as services with unknown service line types
    - Submit required documentation related to Item #62 no later than 02/18/2016
- Track status and progress of DEQ's actions with respect to EPA Flint Drinking Water Task Force Recommendations.

Safety Message:

- Clearly understand assignments and be accountable for meeting determined objectives.

Tech. Specialist	George Krisztian-DEQ	1	NO	0800/ECC	1700/ECC
Agency Advisor	Dan Lord-DNR	1	NO	0800/ECC	1700/ECC

7. Group Objectives

- Implement actions in accordance with the Safe Drinking Water Act and EPA Administration Order: The Michigan Department of Environmental Quality (MDEQ) will work cooperatively with the United States Environmental Protection Agency (EPA) and the City of Flint to implement the department's duties under the Safe Drinking Water Act and the EPA Administrative Order issued on January 21, 2016.

- Continue Coordination with the City of Flint: The DEQ and other State agencies will continue to meet with the City of Flint at least weekly to identify additional actions needed until these meetings are no longer applicable.

8. Special Instructions

- Clearly understand assignments and be accountable for meeting determined objectives.
- Complete objectives and timeline for the Flint Water Interagency Committee.
- Review timelines pertaining to EPA order and make sure deadlines are met.
- Data compiled from sentinel sampling sites will be available and delivered to the Director prior to April 15th.
- Establish communication link with city of Flint regarding plans, 10,000 unknown service lines and other issues.

Resource Designator	Leader	Number Persons	Trans. Needed	Drop Off Pt./Time	Pick Up Pt./Time
Tech. Speciolist	Paul McDonald-DEQ	1	NO	0800/ECC	1700/ECC

7. Group Objectives

- Inventory City of Flint Lead Service Lines: The DEQ may consult and coordinate with other services (such as plumbers, contractors, etc) to prepare a comprehensive inventory through the use of mapping which covers the inside of the schools in regards to lead service lines in Flint.

- Inventory City of Flint Lead Service Lines: The DEQ may consult and coordinate with other services (such as plumbers, contractors, etc) to prepare a comprehensive inventory through the use of mapping which covers the outside infrastructure of the schools in regards to lead service lines in Flint.

- Identify all faucets at Schools that will be replaced and identify potential replacement faucets at other Public Locations: The Michigan Department of Licensing and Regulatory Affairs will be working in conjunction with DEQ to replace all fixtures in Flint's 200 public schools, anticipated replacements at daycares, and anticipated replacements at other places of congregation.

8. Special Instructions

- Clearly understand assignments and be accountable for meeting determined objectives.
- Prepare reports for newly identified high schools.
- Continue to coordinate Sentinel Sampling Effort with Environmental Assistance Center (EAC).
- Provide any mapping information to GIS support.

Tech. Specialist	Susan Leeming-DEQ	1	NO	0800/ECC	1700/ECC
Tech. Specialist	Laura Verona-DEQ	1	NO	0800/ECC	1700/ECC

7. Group Objectives

- Establish metrics needed to meet criteria for Safe Drinking Water: The DEQ will coordinate with all partners, including the Department of Health and Human Services (DHHS), the City of Flint, Genesee County Health Department, EPA, and others, to determine what criteria are needed in order to declare the water in Flint Safe.

- Evaluate plan for KWA source; consult long term plan and appropriate leadership.

- Create workgroup to devise Long Term Goals.

8. Special Instructions

- Clearly understand assignments and be accountable for meeting determined objectives.
- Prepare reports for newly identified high schools.
- Ensure school data from LARA has been obtained through the SEOC.
- Continue to coordinate Sentinel Sampling Effort with Environmental Assistance Center (EAC).
- Provide any mapping information to GIS support.

DIVISION ASSIGNMENT LIST	1. Branch DEQ	2. Group Field (formerly Testing/Sampling)
3. Incident Name Flint Water 2015-10-01	4. Operational Period Date: 02/15/2016	Time: 0800 - 1700

5. Operations Personnel

Operations Chief	Lee Osterland-DNR	Division/Group Supervisor	Liz Browne-DEQ

6. Resources Assigned this Period

Resource Designator	Leader	Number Persons	Trans. Needed	Drop Off Pt./Time	Pick Up Pt./Time
Tech. Specialist	Steve Sliver-DEQ	1	NO	0800/ECC	1700/ECC
Task Force 1	Joe DeGrazia-DEQ	6	NO	0800/CEOC	1700/CEOC
Task Force 2	Dave Wierzbicki -DEQ	6	NO	0800/CEOC	1700/CEOC
Various DEQ Staff				0800/ECC	1700/ECC

7. Group Objectives

- Complete sampling of highest priority homes: The team will visit the 200 identified sites once every two weeks for two months (February-March) to pick up samples, verify integrity of samples and maintain good processes.

- Assure Access to Sampling for all Flint Residents: Outside the greatest risks areas provide additional sampling to all residents. Ensure Residents will receive an official laboratory report, indicating whether or not lead or copper were detected in their water.

- Coordinate monitoring of blood lead levels of residents in High Priority Homes with DHHS. Blood level testing and analysis will occur by the DHHS and/or Genesee County Health Department. Blood level testing will occur in conjunction with the first, second, third and fourth water sampling activities.

- At schools and other public locations the Michigan Department of Licensing and Regulatory Affairs will be working in conjunction with DEQ to replace all problematic fixtures in Flint's 200 public schools, daycares, and other places of congregation.

- Test Drinking Water Distribution System: The DEQ will coordinate with the City of Flint on weekly testing of the drinking water distribution system to determine if there are any issues with lead occurring within the system.

- Verify Lab Results: All residential, school, distribution system, and other tests will be completed at the DEQ laboratory. A random set of samples will be split and samples will be analyzed by the National Science Foundation (NSF) to validate the results.

8. Special Instructions.

- Clearly understand assignments and be accountable for meeting determined objectives.
- Continue Sentinel Sampling effort. Resolve any equipment and supply issues. Support operations.
- Begin planning for next phase of testing and data collections.
- Identify future personnel available for implementing group operations.
- Download data from DEQ Laboratory database and sort per established format.

TESTING INFORMATION

Metal	Result In Parts Per Billion (ppb)
Copper	150
Lead	1844

What the Results Mean: The result tells you how much lead and copper is in the water

- If the result for Copper is "Not Detected", that means the amount of copper in the water was less than 50 ppb.
- If the result for Lead is "Not Detected", that means the amount of lead in the water was less than 1 ppb.

- No matter what your lead result is, you should continue to use an NSF certified filter until the Public Health Emergency Declaration has been lifted.

- Filtered or bottled water should be used for all drinking, cooking and washing of fruits and vegetables.
- Filtered or bottled water should also be used for children brushing their teeth and for watering pets.

If your lead result is greater than 150 ppb:

- Contact the Genesee County Health Department at (810) 257-3603 (if you have not already been contacted)
- Use only bottled water for drinking if you are pregnant
- Use only bottled water for infants for drinking water and for making baby formula

Please note, other faucets in your home may have higher levels of lead, even if this sample was low. Do not drink or cook with water from other faucets unless they have been tested and have a filter.

TESTING INFORMATION

Metal	Result In Parts Per Billion (ppb)
Copper	660
Lead	401

What the Results Mean: The result tells you how much lead and copper is in the water

- If the result for Copper is "Not Detected", that means the amount of copper in the water was less than 50 ppb.
- If the result for Lead is "Not Detected", that means the amount of lead in the water was less than 1 ppb.

- No matter what your lead result is, you should continue to use an NSF certified filter until the Public Health Emergency Declaration has been lifted.

- Filtered or bottled water should be used for all drinking, cooking and washing of fruits and vegetables.
- Filtered or bottled water should also be used for children brushing their teeth and for watering pets.

If your lead result is greater than 150 ppb:

- Contact the Genesee County Health Department at (810) 257-3603 (if you have not already been contacted)
- Use only bottled water for drinking if you are pregnant
- Use only bottled water for infants for drinking water and for making baby formula

Please note, other faucets in your home may have higher levels of lead, even if this sample was low. Do not drink or cook with water from other faucets unless they have been tested and have a filter.

Date Collected: 02/04/2016
Date Received: 02/05/2016

TESTING INFORMATION

Metal	Result In Parts Per Billion (ppb)
Copper	590
Lead	780

What the Results Mean: The result tells you how much lead and copper is in the water

- If the result for Copper is "Not Detected", that means the amount of copper in the water was less than 50 ppb.
- If the result for Lead is "Not Detected", that means the amount of lead in the water was less than 1 ppb.

- No matter what your lead result is, you should continue to use an NSF certified filter until the Public Health Emergency Declaration has been lifted.

- Filtered or bottled water should be used for all drinking, cooking and washing of fruits and vegetables.
- Filtered or bottled water should also be used for children brushing their teeth and for watering pets.

If your lead result is greater than 150 ppb:

- Contact the Genesee County Health Department at (810) 257-3603 (if you have not already been contacted)
- Use only bottled water for drinking if you are pregnant
- Use only bottled water for infants for drinking water and for making baby formula

Please note, other faucets in your home may have higher levels of lead, even if this sample was low. Do not drink or cook with water from other faucets unless they have been tested and have a filter.

TESTING INFORMATION

Metal	Result In Parts Per Billion (ppb)
Copper	220
Lead	145

What the Results Mean: The result tells you how much lead and copper is in the water

- If the result for Copper is "Not Detected", that means the amount of copper in the water was less than 50 ppb.
- If the result for Lead is "Not Detected", that means the amount of lead in the water was less than 1 ppb.

No matter what your lead result is, you should continue to use an NSF certified filter until the Public Health Emergency Declaration has been lifted.

- Filtered or bottled water should be used for all drinking, cooking and washing of fruits and vegetables.
- Filtered or bottled water should also be used for children brushing their teeth and for watering pets.

Important: For children younger than 12 months of age, use *only* bottled water to make formula, for drinking water, and to make any other food product.

If your Lead result is greater than 150 ppb OR your Copper result is greater than 1,300 ppb:

- Contact the Genesee County Health Department at (810) 257-3603 (if you have not already been contacted)
- Use only bottled water for drinking, cooking and washing fruits and vegetables.

Please note, other faucets in your home may have higher levels of lead, even if this sample was low. Do not drink or cook with water from other faucets unless they have been tested and have a filter.

Everyone can use unfiltered tap water for washing your dishes and clothes, and for cleaning your house. You can also shower and give kids baths in unfiltered tap water, but keep kids from getting the bath water in their mouths. No amount of Lead is safe for kids.

Collected By:
County: Genesee
Sample Point: BATHROOM

Date Collected: 01/24/2016
Date Received: 01/25/2016

TESTING INFORMATION

Metal	Result Parts Per Billion
Copper	110
Lead	2

What Your Results Mean:

- "Not Detected" means that no amount of that metal was found in your water
- The lowest number that the lab reports for lead is 1 ppb
- The lowest number that the lab reports for copper is 50 ppb

- The Action Level is the number that is used to help determine regulatory compliance
- The Action Level for Lead is 15 ppb
- The Action Level for Copper is 1,300 ppb

- No matter what your lead result is, you should continue to use a filter until the Public Health Emergency Declaration has been lifted.

Collection Address:
Collected By:
County: Genesee
Sample Point: BATHROOM

Date Collected: 01/24/2016
Date Received: 01/25/2016

TESTING INFORMATION

Metal	Result Parts Per Billion
Copper	Not detected
Lead	13

What Your Results Mean:

- "Not Detected" means that no amount of that metal was found in your water
- The lowest number that the lab reports for lead is 1 ppb
- The lowest number that the lab reports for copper is 50 ppb

- The Action Level is the number that is used to help determine regulatory compliance
- The Action Level for Lead is 15 ppb
- The Action Level for Copper is 1,300 ppb

- No matter what your lead result is, you should continue to use a filter until the Public Health Emergency Declaration has been lifted.

System Name/Owner:
Collection Address:
Collected By:
County: Genesee
Sample Point: BATHROOM

Date Collected: 01/22/2016
Date Received: 01/25/2016

TESTING INFORMATION

Metal	Result Parts Per Billion
Copper	60
Lead	Not detected

What Your Results Mean:

- "Not Detected" means that no amount of that metal was found in your water
- The lowest number that the lab reports for lead is 1 ppb
- The lowest number that the lab reports for copper is 50 ppb

- The Action Level is the number that is used to help determine regulatory compliance
- The Action Level for Lead is 15 ppb
- The Action Level for Copper is 1,300 ppb

- No matter what your lead result is, you should continue to use a filter until the Public Health Emergency Declaration has been lifted.

TESTING INFORMATION

Metal	Result Parts Per Billion
Copper	180
Lead	Not detected

What Your Results Mean:

- "Not Detected" means that no amount of that metal was found in your water
- The lowest number that the lab reports for lead is 1 ppb
- The lowest number that the lab reports for copper is 50 ppb

- The Action Level is the number that is used to help determine regulatory compliance
- The Action Level for Lead is 15 ppb
- The Action Level for Copper is 1,300 ppb

- No matter what your lead result is, you should continue to use a filter until the Public Health Emergency Declaration has been lifted.

TESTING INFORMATION

Metal	Result In Parts Per Billion (ppb)
Copper	220
Lead	145

What the Results Mean: The result tells you how much lead and copper is in the water

- If the result for Copper is "Not Detected", that means the amount of copper in the water was less than 50 ppb.
- If the result for Lead is "Not Detected", that means the amount of lead in the water was less than 1 ppb.

No matter what your lead result is, you should continue to use an NSF certified filter until the Public Health Emergency Declaration has been lifted.

- Filtered or bottled water should be used for all drinking, cooking and washing of fruits and vegetables.
- Filtered or bottled water should also be used for children brushing their teeth and for watering pets.

Important: For children younger than 12 months of age, use *only* bottled water to make formula, for drinking water, and to make any other food product.

If your Lead result is greater than 150 ppb OR your Copper result is greater than 1,300 ppb:

- Contact the Genesee County Health Department at (810) 257-3603 (if you have not already been contacted)
- Use only bottled water for drinking, cooking and washing fruits and vegetables.

Please note, other faucets in your home may have higher levels of lead, even if this sample was low. Do not drink or cook with water from other faucets unless they have been tested and have a filter.

Everyone can use unfiltered tap water for washing your dishes and clothes, and for cleaning your house. You can also shower and give kids baths in unfiltered tap water, but keep kids from getting the bath water in their mouths. No amount of Lead is safe for kids.

TESTING INFORMATION

Metal	Result In Parts Per Billion (ppb)
Copper	1960
Lead	1234

What the Results Mean: The result tells you how much lead and copper is in the water

- If the result for Copper is "Not Detected", that means the amount of copper in the water was less than 50 ppb.
- If the result for Lead is "Not Detected", that means the amount of lead in the water was less than 1 ppb.

- No matter what your lead result is, you should continue to use an NSF certified filter until the Public Health Emergency Declaration has been lifted.

- Filtered or bottled water should be used for all drinking, cooking and washing of fruits and vegetables.
- Filtered or bottled water should also be used for children brushing their teeth and for watering pets.

If your lead result is greater than 150 ppb:

- Contact the Genesee County Health Department at (810) 257-3603 (if you have not already been contacted)
- Use only bottled water for drinking if you are pregnant
- Use only bottled water for infants for drinking water and for making baby formula

Please note, other faucets in your home may have higher levels of lead, even if this sample was low. Do not drink or cook with water from other faucets unless they have been tested and have a filter.

Date Collected: 01/30/2016
Date Received: 01/31/2016

TESTING INFORMATION

Metal	Result In Parts Per Billion (ppb)
Copper	1890
Lead	115

What the Results Mean: **The result tells you how much lead and copper is in the water**

- **If the result for Copper is "Not Detected", that means the amount of copper in the water was less than 50 ppb.**
- **If the result for Lead is "Not Detected", that means the amount of lead in the water was less than 1 ppb.**

- No matter what your lead result is, you should continue to use an NSF certified filter until the Public Health Emergency Declaration has been lifted.

- **Filtered or bottled water should be used for all drinking, cooking and washing of fruits and vegetables.**
- **Filtered or bottled water should also be used for children brushing their teeth and for watering pets.**

If your lead result is greater than 150 ppb:

- **Contact the Genesee County Health Department at (810) 257-3603 (if you have not already been contacted)**
- **Use only bottled water for drinking if you are pregnant**
- **Use only bottled water for infants for drinking water and for making baby formula**

Please note, other faucets in your home may have higher levels of lead, even if this sample was low. Do not drink or cook with water from other faucets unless they have been tested and have a filter.

DRINKING WATER LEAD AND COPPER SAMPLING INSTRUCTIONS

Thank you for helping to monitor for lead and copper in your drinking water.

It is important that you follow these instructions so we obtain an accurate measurement of the lead and copper in your drinking water.

Do not open the bottle until instructed in step 3. Do not touch the inside of cap or bottle.

1. **The water in the house must not have been used for a minimum of six (6) hours prior to sampling.** The best times to sample are early morning or after returning from work. **Do not flush the sample tap before sample collection.**

2. Select a cold water faucet in the **KITCHEN** or **BATHROOM** that is commonly used for drinking and has been used within the last 24 hours. **No other faucets are acceptable for collection.** If the faucet is connected to a faucet mount filter, water softener, iron filter or reverse osmosis system, etc. the treatment device must be removed or bypassed.

When was the faucet last used before sampling? Date 1/31/16 TIME 6:30 (AM)/PM

Is there a faucet-mount filter? ☐ YES ☒ NO If YES, was it bypassed? ☐ YES ☐ NO

Is this faucet connected to a home treatment device such as a water softener, a reverse osmosis unit, an iron removal device OR is any kind of additive used in the home? ☐ YES ☒ NO

If YES, please describe: _____

If YES, was it bypassed? ☐ YES ☒ NO

3. Open sample bottle and place below the faucet and gently open the **COLD** water tap. If you have a single handle faucet, turn it fully to the **COLD** side. Fill the sample bottle to within an inch of the top with the "first draw" of **COLD** water.

4. Tightly cap the sample bottle

If any plumbing repairs or replacement has been done in the home since the previous sampling event, please note this information here:

If YES, please describe: N/A

5. Fill out the collection information on the front, answer the questions below and sign the form.

6. Attach this form to the bottle and return it to either **Flint City Hall or the Flint Water Plant.**

7. Thank you again for your help. We will send you your individual results within 30 days of receiving them from the laboratory. A summary of information on this year's lead and copper monitoring will be printed in the annual water quality report that will be made available by July 1 of this year. Contact your water supply if you have questions.

If you have any questions contact:

City of Flint Water Plant 4500 N. Dort Hwy. Phone: 810-787-6537 ext. 3501

I have read the Drinking Water Lead and Copper Sampling Instructions and have taken a tap sample in accordance with these directions.

Incident Action Plan

For the

Flint Water Incident

Incident #2015-10-01

2/17/2016

Prepared by the MDEQ-ECC-IMT

INCIDENT OBJECTIVES	1. Incident Name Flint Water 2015-10-01	2. Date 02/16/2016	3. Time 1800

4. Operational Period
02-17-2016 0800 - 1700

5. General Control Objectives for the Incident (include alternatives)

- Provide for the safety and welfare of all responders and residents within the incident area.
- Continue implementation of steps as outlined in the Flint Drinking Water Response Plan to establish safe drinking water utilizing appropriate DEQ staff.
- Ensure implementation of steps to meet the requirements set forth in EPA Administrative Order of January 21, 2016.
    - Enroll at least 402 sites, with at least 60 having lead service lines in the Sentinel Program.
    - Initiate 15 – 149 ppb residential testing operations
    - Develop and implement a plan to identify the 10,618 parcels identified as services with unknown service line types
    - Submit required documentation related to Item #62 no later than 02/18/2016
- Track status and progress of DEQ's actions with respect to EPA Flint Drinking Water Task Force Recommendations.

Safety Message:

- The weather for this week is changing to warmer and possibly windy and rainy days with cold nights. Be careful of possible early morning ice on roads and sidewalks.

Detailed forecast for
Genesee County

Wednesday
Cloudy, then gradually becoming mostly sunny, with a high near 30. North northwest wind 8 to 11 mph, with gusts as high as 20 mph.

Wednesday Night
Partly cloudy, with a low around 9. North northwest wind around 5 mph becoming calm in the evening.

Thursday
Increasing clouds, with a high near 30. South southeast wind 6 to 14 mph, with gusts as high as 20 mph.

Thursday Night
A chance of snow showers, freezing rain, and sleet. Cloudy, with a low around 26. Breezy. Chance of precipitation is 30%.

Friday
Showers likely. Cloudy, with a high near 50. Breezy. Chance of precipitation is 60%.

Friday Night
A chance of rain and snow showers. Mostly cloudy, with a low around 37. Breezy.

Saturday
Partly sunny, with a high near 46. Breezy.

Saturday Night
Mostly cloudy, with a low around 30.

Sunday
Partly sunny, with a high near 43.

Sunday Night
Mostly cloudy, with a low around 28.

Agency Advisor	Dan Lord-DNR	1	NO	0800/ECC	1700/ECC
Outreach Coordinator	Liz Browne-DEQ	1	NO	0800/ECC	1700/ECC

7. Group Objectives

- Implement actions in accordance with the Safe Drinking Water Act and EPA Administration Order: The Michigan Department of Environmental Quality (MDEQ) will work cooperatively with the United States Environmental Protection Agency (EPA) and the City of Flint to implement the department's duties under the Safe Drinking Water Act and the EPA Administrative Order issued on January 21, 2016.

- Continue Coordination with the City of Flint: The DEQ and other State agencies will continue to meet with the City of Flint at least weekly to identify additional actions needed until these meetings are no longer applicable.

8. Special Instructions

- Clearly understand assignment and be accountable for meeting determined objectives.
- Complete objectives and timeline for the Flint Water Interagency Committee.
- Review timelines pertaining to EPA order and make sure deadlines are met.
- Data compiled from sentinel sampling sites will be available and delivered to the Director prior to April 15th.
- Assist with efforts of 10,000 plus unknown service lines.
- EPA Item 62 due February 20th.

7. Group Objectives

- Inventory City of Flint Lead Service Lines: The DEQ may consult and coordinate with other services (such as plumbers, contractors, etc) to prepare a comprehensive inventory through the use of mapping which covers the inside of the schools in regards to lead service lines in Flint.

- Inventory City of Flint Lead Service Lines: The DEQ may consult and coordinate with other services (such as plumbers, contractors, etc) to prepare a comprehensive inventory through the use of mapping which covers the outside infrastructure of the schools in regards to lead service lines in Flint.

- Identify all faucets at Schools that will be replaced and identify potential replacement faucets at other Public Locations: The Michigan Department of Licensing and Regulatory Affairs will be working in conjunction with DEQ to replace all fixtures in Flint's 200 public schools, anticipated replacements at daycares, and anticipated replacements at other places of congregation.

8. Special Instructions

- Clearly understand assignment and be accountable for meeting determined objectives.
- Work with GIS unit to produce maps showing all the schools within the Flint service water lines and also identifying schools with completed fixture replacement.
- Prepare reports for newly identified high schools.
- Provide any mapping information to GIS support.
- Continue to monitor and update school fixture upgrade/replacement progress.

Prepared by (Resource Unit Leader) David Lemmien	Approved by (Planning Section Chief)	Date 2/16/16	Time 2016

DIVISION ASSIGNMENT LIST	1. Branch DEQ	2. Group Field (formerly Testing/Sampling)
3. Incident Name Flint Water 2015-10-01	4. Operational Period Date: 02/17/2016	Time: 0800 - 1700

5. Operations Personnel

Operations Chief	Lee Osterland-DNR	Division/Group Supervisor	Susan Leeming-DEQ

Various DEQ Staff				0800/ECC	1700/ECC
LOFR	Brian Mench	1	NO	0800/CEOC	1700/ECC

7. Group Objectives

- Complete sampling of highest priority homes: The team will visit the 200 identified sites once every two weeks for two months (February-March) to pick up samples, verify integrity of samples and maintain good processes.

- Assure Access to Sampling for all Flint Residents: Outside the greatest risks areas provide additional sampling to all residents. Ensure Residents will receive an official laboratory report, indicating whether or not lead or copper were detected in their water.

- Coordinate monitoring of blood lead levels of residents in High Priority Homes with DHHS. Blood level testing and analysis will occur by the DHHS and/or Genesee County Health Department. Blood level testing will occur in conjunction with the first, second, third and fourth water sampling activities.

- At schools and other public locations the Michigan Department of Licensing and Regulatory Affairs will be working in conjunction with DEQ to replace all problematic fixtures in Flint's 200 public schools, daycares, and other places of congregation.

- Test Drinking Water Distribution System: The DEQ will coordinate with the City of Flint on weekly testing of the drinking water distribution system to determine if there are any issues with lead occurring within the system.

- Verify Lab Results: All residential, school, distribution system, and other tests will be completed at the DEQ laboratory. A random set of samples will be split and samples will be analyzed by the National Science Foundation (NSF) to validate the results.

8. Special Instructions.

- Clearly understand assignment and be accountable for meeting determined objectives.
- Continue planning efforts for the 60/402 Director initiative.
- Continue Sentinel Sampling effort. Resolve any equipment and supply issues. Support operations.
- Begin planning for next phase of testing and data collections.
- Identify future personnel available for implementing group operations.
- Download data from DEQ Laboratory database and sort per established format.

Tech. Specialist	Laura Verona-DEQ	1	NO	0800/ECC	1700/ECC

7. Group Objectives

- Establish metrics needed to meet criteria for Safe Drinking Water: The DEQ will coordinate with all partners, including the Department of Health and Human Services (DHHS), the City of Flint, Genesee County Health Department, EPA, and others, to determine what criteria are needed in order to declare the water in Flint Safe.

- Evaluate plan for KWA source; consult long term plan and appropriate leadership.

- Create workgroup to devise Long Term Goals.

8. Special Instructions

- Clearly understand assignment and be accountable for meeting determined objectives.
- Continue efforts to meet February 18th deadline on EPA item 62.
- Implement response plans to identify what actions will take place at specific lead thresholds.
- Coordinate DEQ response plan with EPA and DHHS response plans handling lead results above 150ppb.
- Identify and set up a meeting with the pertinent entities once initial data points are obtained.

U.S. ENVIRONMENTAL PROTECTION AGENCY
POLLUTION/SITUATION REPORT
Flint Drinking Water Response - SitRep #11

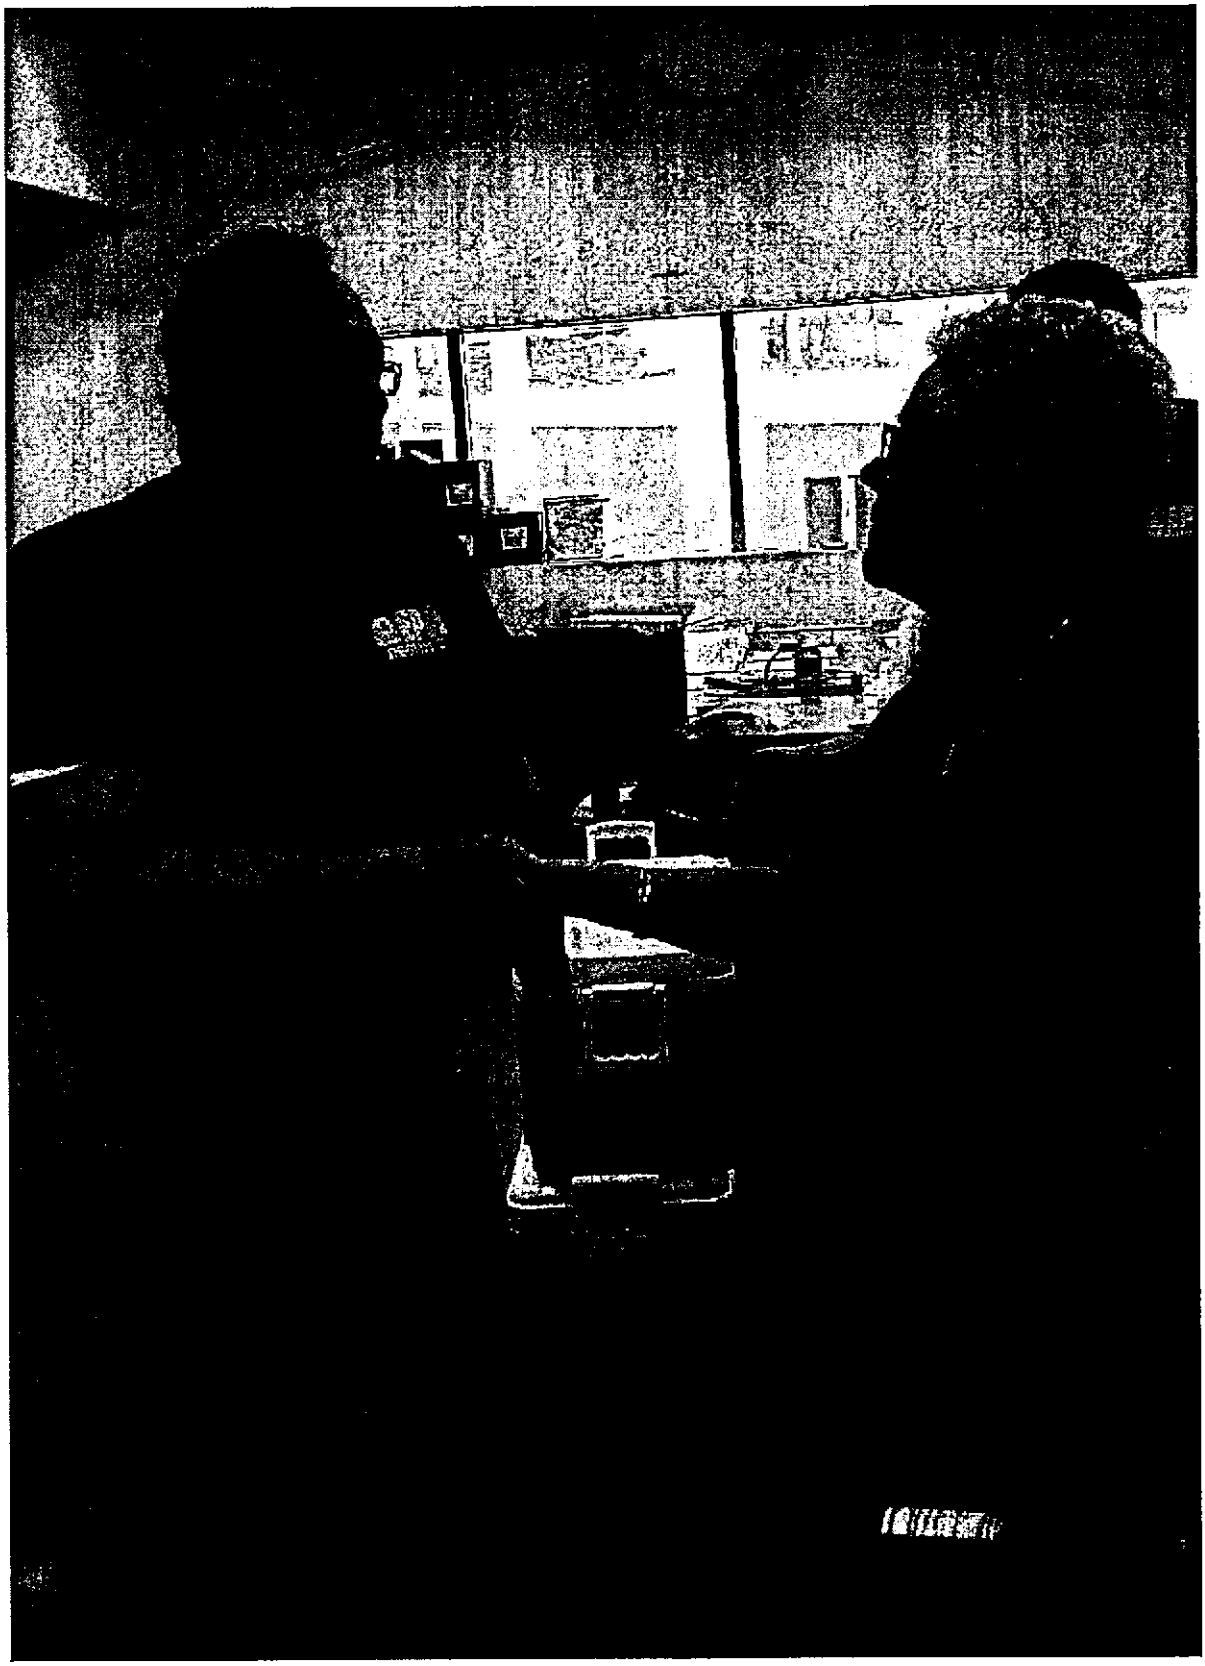
UNITED STATES ENVIRONMENTAL PROTECTION AGENCY
Region 5

Subject: SitRep #11
Flint Drinking Water Response
Flint, MI

To: Flint Drinking Water Response Distribution List

Through: Mark Durno, Unified Command Liaison
From: Jaime Julian, Situation Unit Leader

Date: 2/2/16
Reporting Period: 2/1/16, 1700 hours – 2/2/17, 1700 hours



1 Introduction

U.S. EPA R5 has deployed a team to assist with the Flint Drinking Water Response. EPA is participating as part of a Unified Command Group with Office of the Assistant Secretary for Preparedness and Response (ASPR), the U.S. Environmental Protection Agency (U.S. EPA), the Centers for Disease Control (CDC), the Federal Emergency Management Agency (FEMA). Both ASPR and CDC are a part of Health and Human Services (HHS), which is the lead agency for this response.

1.1 *Incident Command Post*

The U.S. EPA Incident Command Post (ICP) is at Kettering University at 1300 Bluff Street. The staging area and Mobile Command Post (MCP) are located at this address. The Unified Command Post (UCP) is at 125 E. Union St.

1.2 EPA Operations Objectives

- Ensure health and safety of the public and response personnel.
- Collect, coordinate, manage, and communicate environmental and public health data.
- Determine the effects of reintroduced orthophosphate in reducing lead in the drinking water system through sequential sampling.
- Coordinate with EPA Office of Research and Development (ORD) system assessment of the drinking water system, including chlorine residual monitoring.
- Determine field efficacy of preventive measures.
- Respond to health agency requests for environmental sampling.
- Maintain effective communications with HHS, unified command, cooperating agencies, and the public.
- Determine a path forward with the community, coordinating agencies, Michigan Department of Environmental Quality (MDEQ), City of Flint, and health agencies to ensure the safe use of drinking water.

1.3 Unified Command Senior Leadership Objectives

- Provide immediate access to safe water.
- Ensure the safety of and public confidence in the water supply.
- Understand and address immediate health needs from potential lead exposure.
- Mitigate other impacts of the water contamination crisis on the residents of Flint.

2 *Activities During Reporting Period*

2.1 Operations Branch

- EPA Administrator attended morning Operations briefing.
- Gave a tour of the ICP to the Director of the CDC.
- Coordinated with MDEQ and Michigan Department of Health and Human Services (MDHHS) regarding High Lead Homes Strike Team.
- Worked with Water Branch and Region 5 Emergency Operation Center (EOC) to develop appropriate skill set for High Lead Homes Strike Team.
- Finalized procurement of a field lead testing device to be piloted by the High Lead Homes Strike Team.

- Worked with Community Involvement to determine route for EPA Administrator's tour of Flint.

2.2 Water Branch

- Performed lead sequential sampling at 2 homes.
- Performed grab sampling at 2 homes.
- Performed sampling at 1 home per citizen request.

2.3 *ORD Water Assessment Team*

- Verified and sampled 8 sites for the chlorine monitoring plan.
- Discussed chlorine monitoring with the Administrator of Flint City Schools, who indicated he would prefer EPA not sample at schools, citing concerns with press, parents, and children. In order to proceed, he requested a meeting with MDEQ, a city representative, and EPA. We are waiting for the school district to respond with a time/date for the meeting.

2.4 Data Management/GIS Team

- Met with water team to finalize field data collection tool.
- Worked with ORD to integrate their data collection with field data collection tool.
- Completed Scribe data import for Chlorine data as of 2/1/2016.
- Published Chlorine data to be consumed on Geoplatform.
- Developed flow charts for EPA data management and partner Common Operation Picture.
- Reviewed, tested and made updates to sampling application software.
- Created an FTP site on ER Cloud Server to be shared with Water Division.

2.5 Public Affairs/Community Involvement

2.5.1 Public Affairs

- Coordinated EPA press conference featuring Administrator Gina McCarthy and Acting Regional Administrator for EPA's Chicago Office, Robert Kaplan, at the ICP in Flint. WSMH TV, Detroit News, EE News, Detroit Channel 7, ABC12, Michigan Public Radio, WNEW, Flint Journal, AP, Reuters, World Socialist Website, Sinclair Broadcasting Group attended. Bob Kaplan was interviewed on-camera with ABC 12 and WNEW.
- Issued a press update last night reminding Flint residents to take specific steps to reduce potential lead contamination that may be present in the drinking water system—remove debris from faucet aerators, hot water heaters, and whole house filtration systems.
- Developed EPA hotline (800-426-4791) and email address (flintwater@epa.gov) for information about EPA's response efforts. The hotline will provide immediate, telephonic translation in multiple languages.

2.5.2 Community Involvement

- Assisted Water Branch during sampling efforts.

- Contacted local leaders to schedule water sampling and address their concerns about sampling, results and drinking water quality.
- Called local residents and set up appointments for various sampling types.
- Met CDC liaison and exchanged contact information in order to collaborate on future community outreach efforts.

2.6 Situation & Resource Unit

- Developed situation report.
- Updated and reported current staffing levels.
- Working on scheduling plan/rotations with R5 EOC.
- Developed procedures for mobilization and demobilization procedures/personnel log.
- Developing a demobilization checklist.

2.7 Logistics

- Provided EPA Administrator a tour of Mobile Command Post.
- Assisting with setup for EPA Administrator press conference.
- Received and distributed high-visibility safety vests from Region 5 safety office.
- Transported water samples to Region 5 Laboratory in Chicago.
- Issued key cards and badges as needed.

2.8 Unified Command Liaison

- Conducted daily review of overall management objectives and participated in Incident Management Team (IMT) planning process.
- Reported EPA operations accomplishments, focusing on incoming critical sampling results.
- Coordinated GIS requests between UCP and EPA.
- Facilitated EPA Administrator discussion at UCP and with health partners.

3 Staffing/Personnel

As of 1500 hours, 36 personnel were checked into the EPA ICP. The current organizational chart is included as Appendix A. (Please note that the chart does not include all personnel, just the main contacts for each Branch/Team/etc.)

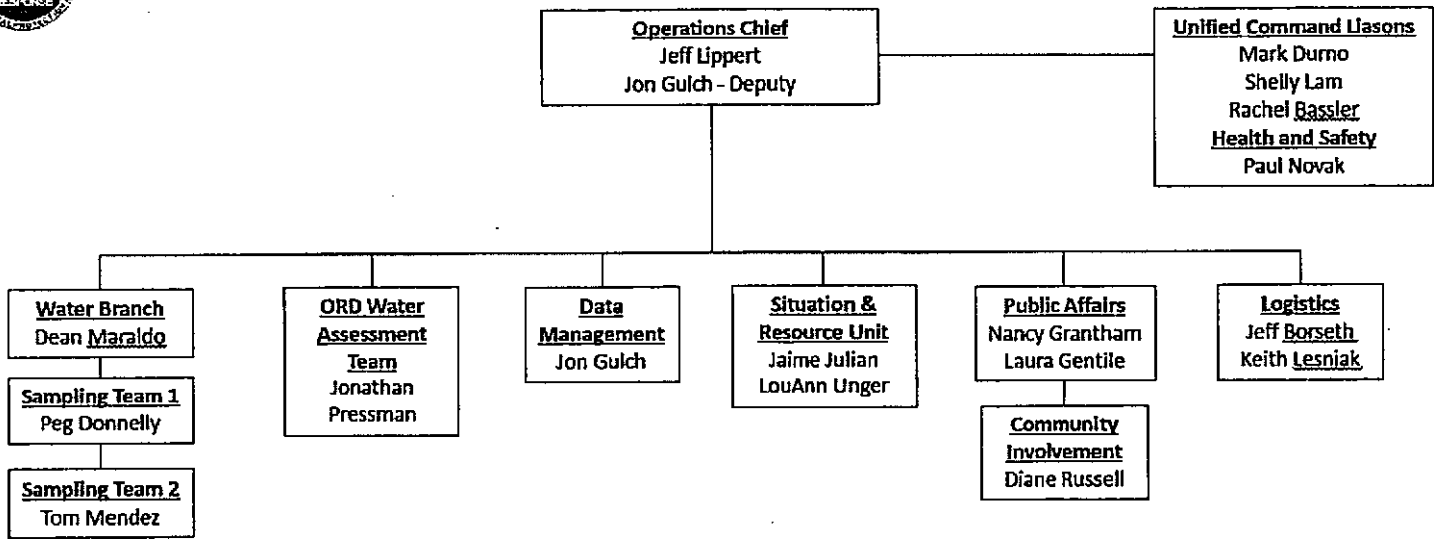
4 Definition of Terms

Acronym	Definition
ASPR	Assistant Secretary for Preparedness and Response
ATSDR	Agency for Toxic Substances and Disease Registry
C&GS	Command and General Staff
CDC	Centers for Disease Control
DEQ	Department of Environmental Quality
DHS	Department of Homeland Security
DMP	Data Management Plan
EOC	Emergency Operations Center
ER	Emergency Response
ERB	Emergency Response Branch

FEMA	Federal Emergency Management Agency
GIS	Geographic Information System
HASP	Health and Safety Plan
HHS	Health and Human Services
HQ	U.S. EPA Headquarters
ICP	Incident Command Post
IMT	Incident Management Team
IT	Information Technology
MDHHS	Michigan Department of Health and Human Services
MDEQ	Michigan Department of Environmental Quality
MDOH	Michigan Department of Health
OPS	Operations Branch
ORD	Office of Research and Development
R5	U.S. EPA Region 5
SitRep	Situation Report
SOC	Secretary's Operations Center
UCP	Unified Command Post
UPS	United Parcel Service
USDA	United States Department of Agriculture
U.S. EPA	United States Environmental Protection Agency
WD	U.S. EPA Region 5 Water Division

APPENDIX A: Organizational Chart

Flint Drinking Water Response Operations



UCG Flint Situational Summary
2/3/16
As of 1700

Flint, MI Water Contamination Information Collection Plan Report

EEI # Information Required

20 Water infrastructure testing locations
No information

21 Contaminants and quantity per testing location
No information

22 Water infrastructure assessment implementation timeline
No information

23 Change/Delay of water lead testing: Include causes for delay, anticipated effects of delay
No information

24 Determination of pipe damage
No information

25 Determination of where lead is in the pipes
No information

26 Number of individuals evaluated (blood tests)
No information

27 Geographic density of households evaluated (blood tests)
No information

28 Percentage of total expected individuals evaluated (blood tests)
No information

29 Geographic density of households above threshold results
No information

30 Average time between evaluation result and distribution of protective actions
No information

31 Opening of Family Assistance Centers
No information

32 Family Assistance Center Locations (MARC – Multiagency Resource Center)

N/A

33 Number of first time visits

SAMHSA – Flint	1
Total	94

37 Agencies operating in Flint, MI
ASPR, CDC, EPA, DHS/FEMA, HUD, SAMHSA, USDA/FNS

38 Under what authorities are federal agencies operating
Working under own authorities.

39 Significant activities since the last report
UCG Flint

- ASPR/EPA/CDC/FEMA Conducted daily review of overall management objectives.
- UCG objectives and agency updates provided during command and general staff meeting
- Operations Section: Oriented incoming Operations Section Chief to UCG operational tempo and products; worked with UCG to identify Task Force Leaders for upcoming planning cycle; initiated request for two Nurse Case Managers to be rostered as specified on earlier Task Order
- Planning Section: Initiated development of IAP for next operational period; maintained accountability of UCG and agency field staff; maintained roster of UCG and field staff; facilitated planning process; and developed daily Situational Summary

- Logistics Sections: Provided ground transport for CDC personnel; received tasker request for Plotter... developing working solutions; discussed decompression Plan for borrowed assets.
- Admin/Finance: Continue to work directly with Travel (David Gaines) to ensure inbound and outbound personnel have adequate travel. Updated the Master Roster and cross walked with RMS to ensure that all rosters have been captured. Sent appropriate time sheets to the appropriate Administrative Officers.

Health and Medical Task Force

CDC

- Met with EPA Sampling Team Lead to clarify priorities for current sampling process; verified that the main focus is to use sequential sampling strategy to characterize the extent of lead contamination throughout the Flint water system
- Met with EPA Operations Team Lead and Community Involvement Team Lead to discuss public health staff (GCHD, CDC/ATSDR) to participate with EPA Strike Force teams that will be going to residents for detailed testing of residences with >150 ppm lead or residences were there are reported health concerns (e.g. rashes)
- Coordinating with MI DHHS on the development of a protocol for responding to future rash complaint follow-ups
- Tasked all CDC/ATSDR POCs for MI DHHS Request List with providing a daily issue update, begin 3Feb. Intention is to gain a sense of urgency and ask: What specifically needs to happen for issues currently identified as proposed or ongoing, to move to completed?
- Discussed a MDHHS/GCHD fact sheet on advice to pregnant women regarding recommendations to only use bottled or filtered water and advice about blood lead testing; reached consensus on specific edits
- Responded to late inquiry from Detroit Free Press regarding rashes experienced by Flint residents.
- Met with PHST Team representative, Matt Ritchey, who is stationed at the Genesee County Health Department; discussed strategy for a unified approach to integrate GCHD, MI DHHS, EPA, MDEQ, and CDC/ATSDR activities related to water sampling and health concerns among residents
- Facilitated setting up VTC Crisis and Emergency Risk Communication (CERC) training for PHST, AmeriCorps volunteers, and others as invited by state. Training will occur on UM-Flint campus on Thursday, February 4.

Public Health Services Team (PHST)

- Suzanne Cupal of GCHD conveyed urgent need to start support activities.
- Risk communication lead continues ongoing contact with CDC, EPA, and GCHD to vet and edit many educational materials to be used on with outreach efforts.

- Developed Home Visit Assessment template form for home visit use.
- Finalizing script for outreach workers who will follow up on elevated lead results.
- Risk communication education material about breastfeeding and lead—3 documents provided to GCHD for review/use.
- 75 kids and 5 adults identified as needing follow up case management for elevated lead levels.
- Working to develop surveillance strategy with CDC/EPA/GCHD to follow up lead results.
- Water and blood lead levels match-up being done/analyzed now.
- Log of homes tested (approx. 6,000 samples) being tiered for outreach prioritization.
- Met with EPA—developing communication for homes that have been visited (>150 ppb).
- Risk Communication officer developed cover letter for EPA home visit use and will link with EPA. Messaging will be reviewed with GCHD.
- Community demographic data assembled to help frame community outreach needs.

Nutrition & Education Task Force

- FNS continues to support the development of nutrition education resources on important foods to consume to mitigate lead absorption at the State level, and FNS is working with partners to encourage widespread distribution of nutrition education resources.
- FNS' Midwest Regional Office (MWRO) reached out to the State's Nutrition Task force and will provide assistance in reviewing nutrition education materials for consistency and accurate messaging about sources of Vitamin C, iron, and calcium. FNS will serve as part of the Nutrition Task Force as needed.
- FNS is compiling a list of nutrition education resources developed by the state and county. Additionally, many resources are still being developed by the Nutrition Task Force.
- Existing resources have been posted on the State's website: www.michigan.gov/flintwater http://www.michigan.gov/documents/deq/deq-flintwater-Parent-Letter_-FINAL_505194_7.pdf?20160129160356
- MSU Extension notified FNS that they plan to hire a full-time educator position for Flint that will spend 50% of the time working with the Child and Adult Care Food Program, and providing information on target nutrients. They are also planning cooking demonstrations at Farmer's Markets and will plan to use resources provided by FNS, including Recipes for Healthy Kids and the USDA Mixing Bowl. The State Nutrition Task Force also notified FNS that they are pulling together a comprehensive nutrition education plan targeting

all sectors of the community, and will include a social media campaign and local partnerships.
- FNS began discussions related to inquiries from HHS leadership and the State WIC Director on the feasibility of utilizing WIC funds for lead testing. As of 2/2, the State has not submitted an official request to FNS.

Human Service Task Force
- USDA affirmed that the water contamination did not result in new disruption to food access in Flint. WIC food assistance is for children that are not in school. USDA's Food and Nutrition Service supports school age children receive food assistance through the National School Lunch Program, and the Child and Adult Care Food Program. There are no unmet needs for food access that are a direct result of water contamination.
- USDA is working with state's nutrition and education task force to encourage all eligible residents to apply for existing nutrition assistance programs and ensure that the City and County are maximizing existing programs
- Sent request to UCG LNO at CHECC to make introduction and connection to Multi Agency Resource Center (MARC)
- HUD continued follow-up with private owners of HUD assisted properties to ensure water filters are provided to all residents

Water Quality Task Force
- Performed lead sequential sampling at 2 homes.
- Performed grab sampling at 2 homes.
- Performed sampling at 1 home per citizen request.
- Verified and sampled 8 sites for the chlorine monitoring plan.
- Discussed chlorine monitoring with the Administrator of Flint City Schools, who indicated he would prefer EPA not sample at schools, citing concerns with press, parents, and children. In order to proceed, he requested a meeting with MDEQ, a city representative, and EPA. We are waiting for the school district to respond with a time/date for the meeting.
- Met with water team to finalize field data collection tool.
- Worked with ORD to integrate their data collection with field data collection tool.
- Completed Scribe data import for Chlorine data as of 2/1/2016.
- Published Chlorine data to be consumed on Geoplatform.
- Developed flow charts for EPA data management and partner Common Operation Picture.
- Reviewed, tested and made updates to sampling application software.
- Created an FTP site on ER Cloud Server to be shared with Water Division.
- Coordinated EPA press conference featuring Administrator Gina McCarthy and Acting Regional Administrator for EPA's Chicago Office, Robert Kaplan, at the ICP

in Flint.

- Issued a press update Flint residents to take specific steps to reduce potential lead contamination that may be present in the drinking water system—remove debris from faucet aerators, hot water heaters, and whole house filtration systems.
- Developed EPA hotline (800-426-4791) and email address (flintwater@epa.gov) for information about EPA's response efforts. The hotline will provide immediate, telephonic translation in multiple languages.

Return sample and form to either Flint City Hall or the Flint Water Plant.
Samples must be received in the laboratory within 14 days of collection.

DRINKING WATER LEAD AND COPPER SAMPLING INSTRUCTIONS

Thank you for helping to monitor for lead and copper in your drinking water.

It is important that you follow these instructions so we obtain an accurate measurement of the lead and copper in your drinking water.

Do not open the bottle until instructed in step 3. Do not touch the inside of cap or bottle.

1. **The water in the house must not have been used for a minimum of six (6) hours prior to sampling.** The best times to sample are early morning or after returning from work. **Do not flush the sample tap before sample collection.**

2. Select a cold water faucet in the **KITCHEN** or **BATHROOM** that is commonly used for drinking and has been used within the last 24 hours. **No other faucets are acceptable for collection.** If the faucet is connected to a faucet mount filter, water softener, iron filter or reverse osmosis system, etc. the treatment device must be removed or bypassed.

When was the faucet last used before sampling? Date _____ TIME _____ AM/PM

Is there a faucet-mount filter? ☐ YES ☐ NO If YES, was it bypassed? ☐ YES ☐ NO

Is this faucet connected to a home treatment device such as a water softener, a reverse osmosis unit, an iron removal device OR is any kind of additive used in the home? ☐ YES ☐ NO

If YES, please describe: _____

If YES, was it bypassed? ☐ YES ☐ NO

3. Open sample bottle and place below the faucet and gently open the **COLD** water tap. If you have a single handle faucet, turn it fully to the **COLD** side. Fill the sample bottle to within an inch of the top with the "first draw" of **COLD** water.

4. Tightly cap the sample bottle

If any plumbing repairs or replacement has been done in the home since the previous sampling event, please note this information here:

If YES, please describe: _____

5. Fill out the collection information on the front, answer the questions below and sign the form.

6. Attach this form to the bottle and return it to either **Flint City Hall or the Flint Water Plant.**

7. Thank you again for your help. We will send you your individual results within 30 days of receiving them from the laboratory. A summary of information on this year's lead and copper monitoring will be printed in the annual water quality report that will be made available by July 1 of this year. Contact your water supply if you have questions.

If you have any questions contact:

City of Flint Water Plant 4500 N. Dort Hwy. Phone: 810-787-6537 ext. 3501

I have read the Drinking Water Lead and Copper Sampling Instructions and have taken a tap sample in accordance with these directions.

Flint Water Lead Project

Michigan Department of Health and Human Services
Situation Report for January 20, 2016

Governor Snyder declares a state of emergency for Genesee County due to the health and safety issues related to lead in city of Flint drinking water.

The Community Health Emergency Coordination Center (CHECC) is at Level 2 Activation

****NOTE: Contains potentially Identifiable Information- REDACT AS INDICATED****
New items for the day listed first and in bold print.

***Daily Briefing and Situation Report** prepared by Linda Dykema*

Surveillance Indicators: People Tested for Lead 10/1/2015 to 1/8/2016: 2,642;
Children less than 6 years old ≥ 5 µg/dl since 10/1/2015: 28
Children 6 to 17 years old ≥ 5 µg/dl since 10/1/2015: 7
Adults 18 years and older ≥ 5 µg/dl since 10/1/2015: 15
Severity Indicators: Hospitalized/Discharged - 1/1; Deaths - 0

DAILY ACTIVITY SUMMARY

Elevated Blood Level (EBL) Environmental Investigations – ETC Contractors, Wes Priem, Courtney Wisinski

- EBL report through 1/20/2016
  - 23 families contacted
  - 17 EBL investigations completed.
  - 17 Water sampling completed.
  - 8 Homes where water filters were observed
  - **10 EBL Reports Received.**
    - **10 homes with lead dust hazards**
    - 3 homes with lead in soil hazards
    - **9 homes with lead-based paint hazards**
    - **6 homes with lead detected in tap water**
      - 1 home with lead water levels greater than 15 ppb
  - 4 investigations scheduled.
  - **6 applications received for the Lead Safe Homes Program, 1** family enrolled.
- 1 home was found to have elevated lead concentrations (72 ppb) in water from a bathroom tap. The family has been advised not to use the tap for consumption or brushing teeth. An additional filter will be provided to the family and options for replacing the fixture will be explored.

MDHHS/Genesee County Health Department (GCHD) Case Management (CM) Services – Nancy Peeler

- CM report through 1/8/2016:
  - # of contacts attempted: 186 (0-5 year olds) and 12 (6-17 year olds)
  - # offered CM: 134 (0-5 year olds) and 12 (6-17 year olds)
  - # CM started: 25 (0-5 year olds) and 3 (6-17 year olds)
  - # of children receiving CM who live in Flint: 25 (0-5 year olds) and 3 (6-17 year olds)
  - # billed to Medicaid: 14 (0-5 year olds) and 1 (6-17 year olds)
  - # other disposition: 30 (0-5 year olds) and 1 (6-17 year olds)

Epidemiology/Surveillance – Corinne Miller, Patti McKane, Martha Stanbury, Bob Scott, Jessica Cooper

- Developed metrics related to elevated blood lead testing among children < 6 years of age in Flint who are enrolled in Medicaid.
- Held conference call with CDC to discuss development of tools related to identification of and recommendations for facilities at greater risk for transmission of opportunistic pathogens.
- Updated Analysis/Summary on first illness wave investigation with recently acquired patient information and illness-related mortality standard.
- Supplied Legionellosis cases to Vital Records for linkage to ascertain any unreported deaths.

Filter & Water Distribution Sheryl Thompson

- **Filters distributed January 1-20, 2016**

Brita Filters	**1,706**
Zero Water Pitchers	**204**
PUR Filters	**92**
Replacement Cartridges - Brita	**2,157**
Replacement Cartridges - PUR	**382**
Replacement Cartridges - Zero	**247**

Communications/Information Sharing – Linda Dykema, Eden Wells

- **Hosted site visit from ATSDR/NCEH staff.**

Health Education Resources Updates - Michelle Bruneau, Emily Houk

- Continuing to write and coordinate additions to the EBL Case Manager Binder, now known as the MDHHS Lead Safe Family Guide Book. (MB)
- Began work on filter cartridge changing fact sheet; clarifying uses of filtered/vs unfiltered water (MB)

Toxicology - No Updates

WIC - No updates.

Healthcare/Providers - No updates

DEQ Information - Linda Dykema as Liaison

- DLARA plumbers will replace fixtures at Freeman Elementary School that were previously tested and found to have > 15 ppb of lead in the water. MDEQ will conduct a "deep flush" of the school plumbing since many lines have been unused for several months. MDEQ will then retest of the water from the new fixtures to confirm whether or not these efforts have been effective in reducing or eliminating exposure to lead in the water.

Weekly Enhanced Water Quality Parameter Monitoring

Requirements for Licensed Food Establishments Using City of Flint Water

January 13, 2016

Attention: *This applies to licensed restaurants, grocery stores, convenience stores, food* processors and food warehouses.

- The best way to determine if water contains lead is to have it tested. Safe results can be posted to inform consumers.
- To schedule a free collection and analysis of your food establishment's water for lead, call 1-800-292-3939 and state you're a "Flint food establishment requesting a water test." Be prepared to provide a time when your water system can be sampled where water won't have been used for at least 6 hours. Sampling appointments as early as 5 a.m. are available.
- Restaurants with general questions should contact Genesee County Health Department at: 810-257-3612.
- Grocery or Food Processing establishments with general questions should contact MDARD at: 1-800-292-3939.

Unless the water has been tested and found to not have a lead concern, do the following:

- Flush water lines for 5 minutes each day before using or serving water and after 6 hours of no water use. *Then flush other equipment such as pop machines for at least 1-2 minutes.*
- Install an NSF Standard 53 certified filter on the faucet where drinking/cooking water is obtained from. Approved filter information for faucet or in-line filters can be found at: http://nsf.com/newsroom/statement-regarding-flint-water-system-lead-issue-and-to-certification-nsf. Filters must be changed based upon the manufacturer's recommendations.
- Use cold water and store it for immediate consumption.
- Always use cold water for drinking, cooking and cleaning/rinsing food.
- Hot water must be used for dishwashing.

Other equipment that may use city water:

- Ice machines – Install a water filter on the supply line or use bagged ice in drinking water.
- Pop machines – Flush for 1 minute daily or use bottled beverages.
- Coffee machines or Tea Urns – Flush for 1-2 minutes daily or use filtered water. These products may be very low risk as young children under 6 are not likely to consume these.
- Slush machines – Use filtered water.
- Spray misters – Flush for 1-2 minutes daily or use filtered water.

A licensed plumber can check your plumbing and service lines for lead soldering or lead service lines.

DEQ

Michigan Department of Agriculture & Rural Development

Agreement #11870 - 2016

RENTAL AGREEMENT

Between

GAMUT GROUP LLC

A Michigan Limited, Liability Company

and the

State Of Michigan

THIS RENTAL AGREEMENT (hereinafter referred to as "Agreement") is entered into by and between **Gamut Group LLC, a Michigan Limited Liability Company**, as Landlord, whose address is **5591 Creekwood Lane, Haslett, Michigan 48840**, and the State of Michigan, by the Department of Technology, Management & Budget, whose address is 7150 Harris Drive, Suite 3B, Dimondale, MI 48821, for the Department of Environmental Quality (MDEQ), as Tenant, and establishes the following terms, conditions, performance obligations, and covenants between the parties:

1. Premises & Rent –
   - 1.1 Landlord hereby rents to Tenant approximately **1,600** usable square feet of warehouse space and **1,200** usable square feet of office space for a total of **2,800** usable square feet, as further described in Attachment "A" to this Agreement, in the building commonly known as **3306 N. MLK, Lansing, MI 48906** (the "Premises"). The Tenant shall further have non-exclusive use of the parking areas, entrances, hallways, and the restroom facilities of the Premises in common with the Landlord and/or other tenants of the Premises.
   - 1.2 Tenant shall pay to Landlord rent at the rate of **One Thousand Two Hundred and 00/100 Dollars ($1,200.00)** per month. Rent consideration installment payments shall be made during the month for which the installment applies.
2. Term - The term of this Agreement begins on **February 1, 2016** and ends on **January 31, 2017**, subject to the cancellation provisions of this Agreement.
3. Holding Over - In the event Tenant remains in possession of the Premises after the expiration or termination of the Agreement (not to exceed 6 months), it shall be deemed to be occupying the Premises as a Tenant from month-to-month, subject to all conditions, provisions and obligations of this Agreement, and the rent shall remain the same as the monthly rent owing at the end of the Agreement.
4. Cancellation - This Agreement may be cancelled by the Tenant upon ninety (90) days written notice to the Landlord delivered to the address as set forth under the "Notices" Section of this Agreement, or to such other address as either party may designate in writing for the delivery of notices under this Agreement. This agreement will supersede and cancel all prior agreements.

Upon cancellation or termination of this Agreement, the Tenant shall clean the Premises to "broom-clean condition", and shall remove all Tenant furnishings from the Premises. Furnishings remaining in or on the Premises after the cancellation or termination effective date shall be considered abandoned property, and the Tenant shall be obligated to pay the Landlord for all reasonable removal costs.

5. Services and Responsibilities of Landlord - Landlord shall furnish the following at its own expense:
   - 5.1 Heating, mechanical ventilating, cooling (office space only), capable of providing a temperature range of 68°F to 78°F, measured at 30" above the finished floor, and 12" inside any exterior wall.
   - 5.2 Electric service for lights, office machines, and all other electrical equipment. Lighting to be a minimum of 50-foot candles, maintained at desk level. Replacement of light bulbs and tubes as needed.
   - 5.3 Provide and maintain any equipment required by the Fire Inspector for fire prevention and safety.
   - 5.4 Kitchen/break-room access
   - 5.5 Commercial grade, heavy duty locking hardware. Prior to Tenant possession, all doors providing access to the Premises shall be rekeyed and two (2) keys per lock combination shall be provided to the Tenant. Landlord shall be able to access all perimeter gates in case of emergency (MDEQ shall provide keys).

6. Services and Responsibilities of Tenant - Tenant shall furnish the following at its own expense:
   - 6.1 100% payment for metered public utilities used for heating, cooling, illumination, power and water and/or sewer used in the premises.
   - 6.2 Janitorial supplies, equipment, personnel, and supervision to provide cleaning services".
   - 6.3 Snow removal from driveways, steps, porches, walkways, exterior grounds maintenance, including grass and weed cutting, clippings removal, leaf raking, litter removal, sidewalk surface and parking lot surface maintenance.
   - 6.4 Removal of trash and refuse from the dumpsters on Premises.
   - 6.5 Pest Control.
   - 6.6 Telecommunication & Internet services, desk-top telephones, usage of printer/copier/fax machines
   - 6.7 Desktop supplies, postage, and office equipment/furniture (if applicable).

7. Repair and Maintenance -
   - 7.1 The Tenant shall notify the Landlord or his agent of the need for any repairs or replacements, which are not the responsibility of the Tenant to make. Landlord is to provide a list of telephone numbers (ESCR form) to call for maintenance services, including a number for window breakage, if needed.
   - 7.2 The Tenant shall reimburse the Landlord for any repairs to the Premises from damage which exceeds normal wear and tear to be expected from lawful and proper use of the Premises and the sole cause of which was the negligent acts or omissions of Tenant's employees or clients.
   - 7.3 The Tenant shall be responsible for the following repair and maintenance operations: NONE.

7.4 Alterations & Improvements – MDEQ to provide a gate on the SW Corner of the leased property at their discretion.

8. Landlord Obligations -

8.1 Governmental Compliance - Landlord represents and warrants that the Premises will comply with all applicable governmental laws, rules and regulations during the term of this Agreement including, but not limited to, applicable codes and use permits.

8.2 Fire Inspection Report - Landlord shall provide to Tenant, a written fire inspection report dated within five years of the Effective Date on this Agreement, approving the Premises for occupancy.

8.3 Authority to Bind - Landlord represents and warrants that it has legal ownership and authority to enter into this Agreement, and shall provide a recorded warranty deed and/or other documentation necessary to confirm ownership and authority.

8.4 Insurance - Landlord is required to provide proof of General premises liability insurance for the Premises identified in Paragraph 1, which provides full coverage for the Landlord, the Tenant, and their respective agents and employees and which protects against all claims, demands, actions, suits, or causes of action, and judgments, settlements or recoveries, for bodily injury or property damage arising out of a condition of the Premises. The Landlord agrees to maintain minimum policy limits in the amount of $500,000.00 per occurrence for property damage, and $1,000,000.00 per occurrence for bodily injury, with a $2,000,000.00 aggregate. The Landlord shall provide to the Tenant a certificate of insurance listing the Tenant, its several departments, boards, agencies, commissions, officers, and employees as additional insureds, within thirty (30) calendar days following execution and delivery of this Agreement to the Landlord. The insurance policy shall provide that it may not be modified, cancelled, or allowed to expire without thirty (30) days prior written notice given to the Tenant.

8.5 Rent With-Holding - If the Landlord fails to provide supporting documentation, as required by Paragraphs 7.1, 8.2, 8.3 and 8.4, ten percent (10%) of the monthly rent consideration shall be held by the Tenant, until the required documentation is provided to the Tenant.

9. Public Policy Provisions -

9.1 Non-Discrimination - Landlord shall comply with the Elliott-Larsen Civil Rights Act, 1976 PA 453, as amended, MCL 37.2101 et seq., the Persons with Disabilities Civil Rights Act, 1976 PA 220, as amended, MCL 37.1101 et seq., and all other federal, state and local fair employment practices and equal opportunity laws and covenants that it shall not discriminate against any employee or applicant for employment, to be employed in the performance of this Agreement, with respect to his or her hire, tenure, terms, conditions, or privileges of employment, or any matter directly or indirectly related to employment, because of his or her race, religion, color, national origin, age, sex, height, weight, marital status, or physical or mental disability that is unrelated to the individual's ability to perform the duties of a particular job or position. The Landlord agrees to include in every subcontract entered into for the performance of this real estate contract this covenant not to discriminate in employment. A breach of this covenant is a material breach of this Agreement.

9.2 Utilization of Public Facilities by Physically Limited - Premises shall comply with the barrier free design requirements of 1966 PA 1, as amended, MCL 125.1351 et seq.

9.3 Unfair Labor Practices - This Agreement may be canceled by Tenant if Landlord or any subcontractor, manufacturer or supplier of the Landlord appears in the

register compiled by the State of Michigan pursuant to 1980 Public Act 278, as amended, MCL 423.321 *et seq.* (*Employers Engaging in Unfair Labor Practices Act*). A breach of this covenant is a material breach of this Agreement.

9.4 Electronic Funds Transfer - Public Act 533 of 2004 requires that payments under this Agreement be processed by electronic funds transfer (EFT). Landlord is required to register to receive payments by EFT at the Contract & Payment Express website (www.mi.gov/cpexpress) or call (888) 734-9749 to receive payments by EFT.

10. Notices - Any notice to Tenant required by this Agreement shall be complete if submitted in writing and transmitted by personal delivery (with signed delivery receipt), or certified or registered mail return receipt requested, or by a nationally recognized overnight delivery service. Unless either party notifies the other in writing of a different mailing address, notice to the Landlord and/or Tenant shall be transmitted to:

Landlord	Tenant
GAMUT GROUP LLC	Director, Real Estate Division
Attn: Jim Stoll	Department of Technology, Management & Budget
5591 Creekwood Ln	*For private carrier delivery:*
Haslett, MI 48840	General Office Building
	7150 Harris Drive, Suite 3B
	Dimondale, MI 48821
E-mail: James@gamutgrp.com	*For U.S. Postal Service delivery:*
Telephone: 517-712-2427	P.O. Box 30026
	Lansing, MI 48909

	Attn: Mary Kay Hawes
	Constitution Hall, Floor 5
	P.O. Box 30473
	Lansing, MI 48909

The notice shall be deemed on either (i) the third business day following the date of mailing, if transmitted by mail or (ii) the date on which the noticed party receives or refuses receipt of the notice, if transmitted by personal delivery, or a nationally recognized overnight delivery service. Business day is defined as any day other than a Saturday, Sunday, legal holiday, or day preceding a legal holiday. A receipt from a U.S. Postal Service, or successor agency, performing such function shall be conclusive evidence of the date of mailing.

11. Miscellaneous Provisions -

11.1 Governing Law - This Agreement shall be governed by and interpreted in accordance with the laws of the State of Michigan.

11.2 Mutual Drafting - This Agreement shall be interpreted and construed as drafted mutually by both parties.

11.3 Entire Agreement - This Agreement, with all Attachments as listed herein, constitutes the entire agreement between the parties with regard to this transaction and may be amended only in writing, signed by each party.

11.4 Severability - Should any provision of this Agreement or any addenda thereto be found to be illegal or otherwise unenforceable by a court of law, such provision

shall be severed from the remainder of the Agreement, and such action shall not affect the enforceability of the remaining provisions of the Agreement.

11.5 Waiver - Failure to enforce any term of this Agreement shall not be deemed a waiver of the enforcement of that or any other term of this Agreement.

11.6 Effective Date - The Effective Date of this Agreement is the date signed by the Real Estate Director of the Department of Technology, Management & Budget.

11.7 Binding Effect - This Agreement shall be binding upon and inure to the benefit of the heirs, executors, administrators and assigns of Landlord and Tenant.

11.8 Counterparts - This Agreement may be executed in counterparts, each which shall be deemed an original, and all of which together shall constitute one and the same agreement. An electronic, scanned or facsimile signature shall be deemed an original.

11.9 Assignment - The Tenant, through its Department of Technology, Management & Budget may assign or reassign any or all of the Premises to any branch, department, board, agency, commission or other instrumentality of State government without the necessity of obtaining consent of the Landlord.

Notice of Lead Result in Drinking Water-DRAFT

Lead can cause serious health problems if too much enters your body from drinking water or other sources. It can cause damage to the brain and kidneys, and it can interfere with the production of red blood cells that carry oxygen to all parts of your body. The greatest risk of lead exposure is to infants, young children, and pregnant women. Scientists have linked the effects of lead on the brain with lowered IQ in children. Adults with kidney problems and high blood pressure can be affected by low levels of lead more than healthy adults. Lead is stored in the bones, and it can be released later in life. During pregnancy, the child receives lead from the mother's bones, which may affect brain development.

To reduce exposure to lead in drinking water:

- *Run your water to flush out lead.* Run the water until it becomes cold.
- *Use cold water for cooking and preparing baby formula.* Do not cook with or drink water from the hot water tap; lead dissolves more easily in hot water.
- *Do not boil water to remove lead.* Boiling water will not reduce lead levels.
- *Look for alternative sources or treatment of water.* If your lead result is above 15 ppb, you may want to consider purchasing bottled water or a water filter. Read the package to be sure the filter is approved to reduce lead or contact NSF International at 800-NSF-8010, or www.nsf.org for information on performance standards for water filters.
- *Identify if your plumbing fixtures contain lead.* New faucets, fittings, and valves, may contain up to 0.25 percent lead including those advertised or labeled as "lead-free" and may contribute lead to drinking water. Consumers should be aware of this when choosing fixtures and take appropriate precautions.

Although the primary sources of lead exposure for most children are deteriorating lead-based paint, lead-contaminated dust, and lead-contaminated soil, the U.S. EPA estimates that 10 to 20 percent of human exposure to lead may come from drinking water.

For more information, contact us at: _____.
For more information on reducing lead exposure around your home and the health effects of lead, visit the U.S. EPA's Web site at www.epa.gov/lead, call the National Lead Information Center at 800-424-LEAD, or contact your health care provider.

Incident Action Plan

For the

Flint Water Incident

Incident #2015-10-01

2/17/2016

Prepared by the MDEQ-ECC-IMT

INCIDENT OBJECTIVES	1. Incident Name Flint Water 2015-10-01	2. Date 02/16/2016	3. Time 1800

4. Operational Period
02-17-2016 0800 - 1700

5. General Control Objectives for the Incident (include alternatives)

- Provide for the safety and welfare of all responders and residents within the incident area.
- Continue implementation of steps as outlined in the Flint Drinking Water Response Plan to establish safe drinking water utilizing appropriate DEQ staff.
- Ensure implementation of steps to meet the requirements set forth in EPA Administrative Order of January 21, 2016.
    - Enroll at least 402 sites, with at least 60 having lead service lines in the Sentinel Program.
    - Initiate 15 – 149 ppb residential testing operations
    - Develop and implement a plan to identify the 10,618 parcels identified as services with unknown service line types
    - Submit required documentation related to Item #62 no later than 02/18/2016
- Track status and progress of DEQ's actions with respect to EPA Flint Drinking Water Task Force Recommendations.

Safety Message:

- The weather for this week is changing to warmer and possibly windy and rainy days with cold nights. Be careful of possible early morning ice on roads and sidewalks.

Resource Designator	Leader	Number Persons	Trans. Needed	Drop Off Pt./Time	Pick Up Pt./Time
Tech. Specialist	Jim Sygo-DEQ	1	NO	0800/ECC	1700/ECC
Tech. Specialist	George Krisztian-DEQ	1	NO	0800/ECC	1700/ECC
Agency Advisor	Dan Lord-DNR	1	NO	0800/ECC	1700/ECC

7. Group Objectives

- Implement actions in accordance with the Safe Drinking Water Act and EPA Administration Order: The Michigan Department of Environmental Quality (MDEQ) will work cooperatively with the United States Environmental Protection Agency (EPA) and the City of Flint to implement the department's duties under the Safe Drinking Water Act and the EPA Administrative Order issued on January 21, 2016.

- Continue Coordination with the City of Flint: The DEQ and other State agencies will continue to meet with the City of Flint at least weekly to identify additional actions needed until these meetings are no longer applicable.

8. Special Instructions

- Clearly understand assignment and be accountable for meeting determined objectives.
- Complete objectives and timeline for the Flint Water Interagency Committee.
- Review timelines pertaining to EPA order and make sure deadlines are met.
- Data compiled from sentinel sampling sites will be available and delivered to the Director prior to April 15th.
- Assist with efforts of 10,000 plus unknown service lines.
- EPA Item 62 due February 20th.

DIVISION ASSIGNMENT LIST	1. Branch DEQ	2. Group Infrastructure
3. Incident Name Flint Water 2015-10-01	4. Operational Period Date: 02/17/2016	Time: 0800-1700

5. Operations Personnel			
Operations Chief	Lee Osterland-DNR	Division/Group Supervisor	Amy Kohlhepp-DEQ

6. Resources Assigned this Period

Resource Designator	Leader	Number Persons	Trans. Needed	Drop Off PT./Time	Pick Up PT./Time
Tech. Specialist	Paul McDonald-DEQ	1	NO	0800/ECC	1700/ECC

7. Group Objectives

- Inventory City of Flint Lead Service Lines: The DEQ may consult and coordinate with other services (such as plumbers, contractors, etc) to prepare a comprehensive inventory through the use of mapping which covers the inside of the schools in regards to lead service lines in Flint.

- Inventory City of Flint Lead Service Lines: The DEQ may consult and coordinate with other services (such as plumbers, contractors, etc) to prepare a comprehensive inventory through the use of mapping which covers the outside infrastructure of the schools in regards to lead service lines in Flint.

- Identify all faucets at Schools that will be replaced and identify potential replacement faucets at other Public Locations: The Michigan Department of Licensing and Regulatory Affairs will be working in conjunction with DEQ to replace all fixtures in Flint's 200 public schools, anticipated replacements at daycares, and anticipated replacements at other places of congregation.

8. Special Instructions

- Clearly understand assignment and be accountable for meeting determined objectives.
- Work with GIS unit to produce maps showing all the schools within the Flint service water lines and also identifying schools with completed fixture replacement.
- Prepare reports for newly identified high schools.
- Provide any mapping information to GIS support.
- Continue to monitor and update school fixture upgrade/replacement progress.

Prepared by (Resource Unit Leader)	Approved by (Planning Section Chief)	Date	Time
David Lemmien		2/16/16	1909

DIVISION ASSIGNMENT LIST	1. Branch DEQ	2. Group Field (formerly Testing/Sampling)
3. Incident Name Flint Water 2015-10-01	4. Operational Period Date: 02/17/2016	Time: 0800 - 1700

5. Operations Personnel

Operations Chief	Lee Osterland-DNR	Division/Group Supervisor	Liz Browne-DEQ

6. Resources Assigned this Period

Resource Designator	Leader	Number Persons	Trans. Needed	Drop Off PT./Time	Pick Up PT./Time
Tech. Specialist	Steve Sliver-DEQ	1	NO	0800/ECC	1700/ECC
Various DEQ Staff				0800/ECC	1700/ECC
LOFR	Brian Mench	1	NO	0800/CEOC	1700/ECC

7. Group Objectives

- Complete sampling of highest priority homes: The team will visit the 200 identified sites once every two weeks for two months (February-March) to pick up samples, verify integrity of samples and maintain good processes.

- Assure Access to Sampling for all Flint Residents: Outside the greatest risks areas provide additional sampling to all residents. Ensure Residents will receive an official laboratory report, indicating whether or not lead or copper were detected in their water.

- Coordinate monitoring of blood lead levels of residents in High Priority Homes with DHHS. Blood level testing and analysis will occur by the DHHS and/or Genesee County Health Department. Blood level testing will occur in conjunction with the first, second, third and fourth water sampling activities.

- At schools and other public locations the Michigan Department of Licensing and Regulatory Affairs will be working in conjunction with DEQ to replace all problematic fixtures in Flint's 200 public schools, daycares, and other places of congregation.

- Test Drinking Water Distribution System: The DEQ will coordinate with the City of Flint on weekly testing of the drinking water distribution system to determine if there are any issues with lead occurring within the system.

- Verify Lab Results: All residential, school, distribution system, and other tests will be completed at the DEQ laboratory. A random set of samples will be split and samples will be analyzed by the National Science Foundation (NSF) to validate the results.

8. Special Instructions.

- Clearly understand assignment and be accountable for meeting determined objectives.
- Continue planning efforts for the 60/402 Director initiative.
- Continue Sentinel Sampling effort. Resolve any equipment and supply issues. Support operations.
- Begin planning for next phase of testing and data collections.
- Identify future personnel available for implementing group operations.
- Download data from DEQ Laboratory database and sort per established format.

Prepared by (Resource Unit Leader) David Lemmien	Approved by (Planning Section Chief)	Date 2/16/16	Time 1909

DIVISION ASSIGNMENT LIST	1. Branch DEQ	2. Group Public Health
3. Incident Name Flint Water 2015-10-01	4. Operational Period Date: 02/17/2016	Time: 0800 - 1700

5. Operations Personnel			
Operations Chief	Lee Osterland-DNR	Division/Group Supervisor	Richard Benzie-DEQ

6. Resources Assigned this Period

Resource Designator	Leader	Number Persons	Trans. Needed	Drop Off PT./Time	Pick Up PT./Time
Tech. Specialist	Bryce Feighner-DEQ	1	NO	0800/ECC	1700/ECC

Tech. Specialist	Laura Verona-DEQ	1	NO	0800/ECC	1700/ECC

7. Group Objectives

- Establish metrics needed to meet criteria for Safe Drinking Water: The DEQ will coordinate with all partners, including the Department of Health and Human Services (DHHS), the City of Flint, Genesee County Health Department, EPA, and others, to determine what criteria are needed in order to declare the water in Flint Safe.

- Evaluate plan for KWA source; consult long term plan and appropriate leadership.

- Create workgroup to devise Long Term Goals.

8. Special Instructions

- Clearly understand assignment and be accountable for meeting determined objectives.
- Continue efforts to meet February 18th deadline on EPA item 62.
- Implement response plans to identify what actions will take place at specific lead thresholds.
- Coordinate DEQ response plan with EPA and DHHS response plans handling lead results above 150ppb.
- Identify and set up a meeting with the pertinent entities once initial data points are obtained.

Subject: RE: FTP Site - File Transfer of PII to EPA

FYI

Talked to Heather Shoven again, she was asked to set up an FTP site on her side and they were waiting for us to upload to the EPA FTP site. I discussed with Heather that DTMB had set up a secure FTP site for this transfer and that we upload the files to that site. So there was a cross communication issue.

Heather is going to contact Loren Denton with EPA, who was provided the log-in and password for the DEQ FTP site, and download files from DEQ site.

She will follow-up if there are additional issues.

Jerry

Importance: High

The attached documents have been reviewed and approved by our PIO for posting on the Flint Water Website, per Dan Lord's instructions below.

All of the following should be prefaced so that there's clarity with these items are from the City and not the State. Attached you'll find:

Attachment 1-4) Water quality parameter measurements in the distribution system. These files (4) are labeled EWDM, all from January 2016.

- Recommendation that the hyperlinks / buttons for each of these 4 files be called: "City of Flint, Distribution System Weekly Monitoring Report....." with the associated date from the end of the file completing the end of the hyperlink / button name

Attachment 5) The most recent Monthly Operational Report (Dec 2015), which is labeled MOR.

- Recommendation that the hyperlink / button for this file be called: "City of Flint, Monthly Operational Report, Dec. 2015"

Attachment 6) The list of Main Breaks over the last year labeled.

- Recommendation that the hyperlink / button for this file be called: "City, of Flint, Water Main Break Information"

Attachment 7) A list of active water accounts.

- Recommendation that the hyperlink / button for this file be called: "City of Flint, Active Water Account List"

We have information related to disturbances from construction, however this list contains names & addresses which need to be protected. So can we add a generic hyperlink / button labeled "City of Flint, Road & Sidewalk Work" that opens a page that says "location list available upon request". We're going to have a map produced that will show locations generically.

Thank for getting this information up. Feel free to call my cell should you have any questions: 517.290.5603

Attachments: Assessor_RV.XLSX

Update.
I just talked to GIS Section and they think the data from the Assessor's office is more reliable than what can be retrieved from the IPAD app from canvassing to date, so it looks as though we should rely on these numbers and consider this a complete answer rather than partial as mentioned in my original note. Also, I asked whether "Parcel Mast" is the address number, and if so, why some have "0" as the address.

Parcel Mast does = address, so attached is an updated spreadsheet showing that. As to why there is no address number, that is what's in that data set, and those are tied to specific parcel numbers. Thus we may want to give EPA both addresses and parcel numbers.

Subject: FW: Residential - Vacant: RE: EPA Order Tracking

Per paragraph 54.C. of the order, here's what I consider a partial answer to the question "Addresses of currently unoccupied homes". This tally came from the assessor's office. We are waiting for GIS Section a the SEOC to get a download from their "app" from the canvassing, which I'll forward as soon as it's available.

Subject: HEADS UP! FW: Latest Residentail Water Qulity Data Spreadsheet
Attachments: DW Flint Sampling.pdf

I just wanted to inform the ECC that EPA had asked for phone numbers and e-mail addresses of residents. I informed them we are not collecting this information. I discussed with Jeff Lippert and the EPA is not requesting us to start collecting that information. I do have an inquiry into DHHS to see how they/County Health Department contact the residents that our lab notifies them about (when lab results exceed 100 ppb) and will provide that info to EPA upon receipt.

Thanks

Mitch

Hi Jeff

Attached is the sample Request Form and Instructions going out with the test kits. We have not asked for phone numbers and e-mail addresses. Are we being requested to revise the form and seek this information? If so, please recognize that it's at the discretion of the person obtaining the sample whether to include that information or not.

SAMPLE COLLECTION INFORMATION (PLEASE PRINT)

Sample Collector Name	Date Collected	Time Collected ( ) AM ( ) PM

Collector Code
- ( ) 0 - County Personnel
- ( ) 1 - Water Supply Operator
- ( ) 3 - Private Citizen
- ( ) 4 - DEQ Staff other than DW
- ( ) 9 - Other

Collection Site (Street Address)	System/Owner Name	
	Township (If known)	Section (If known)
City / County: Genesee	ZIP Code	Well Number (If more than one)
Sampling Point: ( ) Kitchen ( ) Bathroom	Site Code or Permit Number (If known)	

TEST CODE	INVESTIGATION UNIT #	DRINKING WATER TEST
CCUB	36CC - 1 Liter	Lead/Copper for Investigation

Return sample and form to either Flint City Hall or the Flint Water Plant.

Samples must be received in the laboratory within 14 days of collection.

DRINKING WATER LEAD AND COPPER SAMPLING INSTRUCTIONS

Thank you for helping to monitor for lead and copper in your drinking water.

It is important that you follow these instructions so we obtain an accurate measurement of the lead and copper in *your drinking water.*

Do not open the bottle until instructed in step 3. Do not touch the inside of cap or bottle.

1. **The water in the house must not have been used for a minimum of six (6) hours prior to sampling.** The best times to sample are early morning or after returning from work. **Do not flush the sample tap before sample collection.**

2. Select a cold water faucet in the **KITCHEN** or **BATHROOM** that is commonly used for drinking and has been used within the last 24 hours. **No other faucets are acceptable for collection.** If the faucet is connected to a faucet mount filter, water softener, iron filter or reverse osmosis system, etc. the treatment device must be removed or bypassed.

When was the faucet last used before sampling? *Date* _____ *TIME* _____ *AM/PM*

Is there a faucet-mount filter? ☐ YES ☐ NO If YES, was it bypassed? ☐ YES ☐ NO

Is this faucet connected to a home treatment device such as a water softener, a reverse osmosis unit, an iron removal device OR is any kind of additive used in the home? ☐ YES ☐ NO

If YES, please describe: _____

If YES, was it bypassed? ☐ YES ☐ NO

3. Open sample bottle and place below the faucet and gently open the **COLD** water tap. If you have a single handle faucet, turn it fully to the **COLD** side. Fill the sample bottle to within an inch of the top with the "first draw" of **COLD** water.

4. Tightly cap the sample bottle

If any plumbing repairs or replacement has been done in the home since the previous sampling event, please note this information here:

If YES, please describe: _____

5. Fill out the collection information on the front, answer the questions below and sign the form.

6. Attach this form to the bottle and return it to either **Flint City Hall or the Flint Water Plant.**

7. Thank you again for your help. We will send you your individual results within 30 days of receiving them from the laboratory. A summary of information on this year's lead and copper monitoring will be printed in the annual water quality report that will be made available by July 1 of this year. Contact your water supply if you have questions.

If you have any questions contact:

City of Flint Water Plant *4500 N. Dort Hwy.* *Phone: 810-787-6537 ext. 3501*

I have read the Drinking Water Lead and Copper Sampling Instructions and have taken a tap sample in accordance with these directions.

Summary of Department of Environmental Quality (DEQ) Actions
In Response to the
EPA Emergency Administrative Order
Updated: 02/01/2016 0930

EXECUTIVE SUMMARY:

The EPA Emergency Administrative Order contains 15 overall items to be addressed by DEQ. The status of each of the 15 items has been categorized into ongoing, completed, completed & ongoing, and not completed. The current status of the items is as follows: 7 items are ongoing; 2 items have been completed; 5 items have been completed and are ongoing; and 1 item has not yet been completed. To date, all deadlines imposed in the EPA Order have been met and work continues on several items that require an ongoing effort.

DETAILED INFORMATION:

EPA Order Due Date: 01/21/2016

- **Item 55: "Shall cooperate with EPA for conducting sampling and other diagnostic activities"**
  - The Testing/Sampling Group has been assigned this task.
    - *It is an ongoing process.*
- **Item 60: "Shall not switch water supplies until plans have been submitted and approved"**
  - The Public Health Group has been assigned to this task and they have received an agreement to comply from the City of Flint.
    - *This task has been completed.*

EPA Order Due Date: 01/22/2016

- **Item 50: "Intent to Comply Letter"**
  - The Administrative Group was assigned this task.
    - *This task was completed on 01/22/2016.*

EPA Order Due Date: 01/26/2016

- **Item 51: "Public Website posting all reports, plans, weekly status reports on progress, except Personally Identifying Information (PII)"**
  - The Administrative Group was assigned this task. The information that is currently available has been posted on the website and will be updated as more results become available.
    - *This is an ongoing task.*
  - A representative from the Administrative Group will be working with SEOC to add an EPA Order section.
    - *This is an ongoing task.*

EPA Order Due Date: 01/28/2016

- **Item 63: "Shall engage a panel of experts to advise and make public recommendations to the city on steps needed to mitigate the imminent and substantial endangerment to the health of persons and general operation of the city's PWS to comply with SDWA & NPDWRs"**
    - The Administrative Group has been assigned to this task. A panel of experts had a meeting in Flint on 01/27/2016 at 3:00 p.m.
        - This is an ongoing task.

EPA Order Due Date: 01/31/2016

- **Item 52: "Is progress being made with corrosion control in the City? Respond to EPA Flint Task Force"**
    - The Public Health Group has been assigned to this task. The City of Flint is being asked to provide data.
        - *This task has been completed.*
    - EPA agreed on the dosing level for orthophosphate (01/27/2016).
        - *This task has been completed.*
    - Next step: Conduct weekly status calls with Flint Water Treatment Plant.
        - *This task is completed and is ongoing.*
    - Review Monthly Operational Reports to ensure corrosion control treatment is appropriately maintained.
        - *Task is completed and ongoing.*
    - December Monthly Operations Submitted with Dosages (1st week of January). Data expected from City on 01/29/2016.
        - *Task has been completed.*
- **Item 53:**
    - **A. "Water Quality parameter measurements in distribution system"**
        - The Public Health Group has been assigned to this task.
        - Ensure City conducts/provides WQP data as required and that during their weekly status call, they discuss WQP trends/concerns.
            - *Task is completed and ongoing. (A Monthly Operations Report has been sent to the DEQ by the City of Flint).*
    - **B. "All lead in water testing results for the city since January 2013 including those not used for LCR compliance"**
        - The Public Health Group has been assigned to this task.
            - *Task is completed and ongoing.*
        - Provide any lead results in DEQ files for monitoring since Jan 2013 (target 01/29/2016) to the Administrative Group so that they can vet and send to those who maintain the website.

        - *Task is completed and ongoing. (Residential test results have been posted on the web. Compliance data is being vetted by DEQ staff).*
    - Ensure ongoing monitoring results continue to be provided/posted to website.
        - *This task is ongoing.*
- **C. "Identification of areas by zip code in the city with elevated blood levels"**
    - The Administrative Group has been assigned to coordinate with DHHS.
        - *Ongoing process.*

- **Item 54:**
    - **A. "Existing inventory of homes with lead service lines in Excel or similar format"**
        - The Infrastructure Group and DNR GIS is assigned to the task of compiling this data. Would like to obtain a list of billing addresses that receive Flint Water to aid in mapping.
            - *This task has been completed.*
    - **B. "Addresses of homes that have had water service interruptions or street disturbances (e.g. water main breaks, etc.) within last year"**
        - This task has been assigned to the Infrastructure and Public Health Groups.
            - *This task has been completed.*
        - The Infrastructure and Public Health Groups called the City on 1/29/2016 to get update on status.
            - *This task has been completed.*
    - **C. "Addresses of currently unoccupied homes"**
        - This task has been assigned to the Infrastructure and Public Health Groups. MDEQ is working with the City of Flint Department of Public Works to acquire the data and map these locations. The information for this is not for public dissemination due to safety reasons.
            - *This is an ongoing task.*

- **Item 69:**
    - **A. "Any agent, consultant or contractor used for carrying out this order shall also abide by record retention restrictions under this order"**
        - This task has been assigned to the Administrative Group. The recommended action is to comply with order and provide instruction. Assistant Attorney General (AAG) procured a Document Unit Leader.
            - *This is an ongoing task.*
        - All agents or contractors will be required to comply with the Retention Schedule of the EPA Order.
            - *This task is ongoing.*
        - Identify record retention elements and provide direction to all personnel, agents, or contractors that are or may become involved with the Flint water incident. Also prepare a Documentation Unit Leader task list and identify resource(s) needed to fill the position. This was assign to the Assistant Attorney General.
            - *This task has been completed.*

- **B. "Any agent, consultant or contractor used for carrying out this order shall also abide by record retention restrictions under this order"**
  - This task has been assigned to the Legal Team and the Administrative Group. The Document Unit Leader will work with The AAG and Administrative Group to produce a letter.
    - *This task is ongoing.*
  - It is recommended that a letter should be drafted from DEQ to the City of Flint.
    - *This task is ongoing.*

EPA Order Due Date: 02/04/2016

- **Item 59: "City shall submit to DEQ the following items listed below:"**
  - **A. "Submit a plan and schedule to MDEQ for designated optimal corrosion control and water quality parameters and water monitoring plans"**
    - The Public Health Group has been assigned to this task.
    - Confirm with City that they will have plans completed and submitted by 02/04/2016.
  - **B. "Submit a sampling plan for daily monitoring submitted in a weekly report"**
    - The Public Health Group and Infrastructure Group have been assigned to this task.
    - Confirm with the City that they will have plans completed and submitted by 02/04/2016.
  - **C. "Submit an operations plan for the corrosion control equipment submitted in weekly format including monitoring, calibration, verification and daily monitoring of finished water corrosion control parameters"**
    - The Public Health Group have been assigned to this task.
    - Confirm with the City that they will have plans completed and submitted by 02/04/2016.

EPA Order Due Date: 02/05/2016

- **Item 61: "City must demonstrate and MDEQ must ensure the city has necessary capable and qualified personnel to perform duties in PWS"**
  - The Public Health Group has been assigned to this task.
    - *This is an ongoing task.*
  - MDEQ to get list of all operators employed at the treatment plant and validate that they are properly certified. MDEQ will provide appropriate targeted training for Flint operations staff.

EPA Order Due Date: 02/20/2016

- **Item 62: "City will document and share steps to develop and implement a distribution system water quality optimization plan to MDEQ"**
    - The Public Health Group has been assigned to this in coordination with the City of Flint.
        - *This is an ongoing task.*
    - Establish a realistic due date. MDEQ to contact national drinking water organization currently working on the distribution system optimization plan framework.
    - City to submit proposal by 02/20/2016 to MDEQ and EPA for review/evaluation of the proposal.

EPA Order Due Date: Monthly

- **Item 57: "Shall maintain chlorine residual in the distribution system in accordance to SDW and National Primary Drinking Water Regulations (NPDWR)"**
    - The Public Health Group has been assigned to this task.
        - *This has been completed and ongoing.*
    - Regulatory requirements are already in place for residual chlorine. The City is required to monitor chlorine regularly and report on Monthly Operating Reports.
    - Review Chlorine residual levels in weekly status calls.
- **Item 58: "City shall continue to add corrosion inhibitors at sufficient levels"**
    - The Public Health Group has been assigned to this task.
        - *This is an ongoing task.*
- **Item 68: "Preserve records and data for six years"**
    - The Administrative Group and the Legal Team have been assigned to this.
        - *This is an ongoing task.*
    - To ensure consistency, retain all records following General Schedule #5, specifically GS5.10. When contacted regarding disposal, all records will be put on a litigation hold for one additional year and not destroyed. Training will be conducted by DTMB Record Center to all DEQ staff to ensure consistency and understanding.
        - *This will be an ongoing task.*

EPA Order Due Date: 01/21/2022

- **Item 68: "After six years must notify EPA 60 calendar days prior to destruction of any data pertaining to this order"**
    - The Administrative Group and the Legal Team have been assigned to this task.
    - To ensure consistency, retain all records following General Schedule #5, specifically GS5.10. When contacted regarding disposal, all records will be put on a litigation hold for one additional year and not destroyed. U.S. EPA will be notified when the additional one-year litigation hold is put in place.
        - *This is an ongoing task.*

Summary of Department of Environmental Quality (DEQ) Actions In Response to the EPA Emergency Administrative Order Updated: January 30, 2016

Chapter 54a: Existing inventory of homes with lead service lines in Excel or similar format

EPA Order Due Date: 01/31/2016

The following is based upon historical parcel documentation provided to the Department of Environmental Quality by the City of Flint and Genesee County and does not reflect "as built" construction plans or field verified conditions.

- 56,254 Parcel Records in the database in the City of Flint.
- 29,211 were done previously to the DNR taking on this project. (52%)
- 27,043 parcels tasked to the DNR to get information. (48%)
- As of 3:00pm on Thursday January 28th, 2016, DNR had completed all 27,043 records, along with an additional 130 parcels lying outside the Corporate City Limits of Flint.

- 5,282 parcels showing lead service lines
- 25,302 parcels showing other types of service lines
- 25,800 parcels having an unknown type of service lines

EPA Emergency Administrative Order Task Worksheet
Updated: 01/29/2016 1845

DATE of Initiation	Named Party	Chapter	Task	DUE Date	Status	Recommended Action	Assigned Personnel	Comments
01/21/2016	MDEQ/ Flint	55	Shall cooperate with EPA for conducting sampling and other diagnostic activities	01/21/2016	Ongoing		George Krisztian	Mark Durno, USEPA
01/21/2016		60	Shall not switch water supplies until plans have been submitted and approved	01/21/2016	Agreed		Richard Benzie / Mary Ann	
01/21/2016	MDEQ	50	Intent to Comply letter	01/22/2016	Completed		Director	
01/21/2016	MDEQ	51	Public Website posting all reports, plans, weekly status reports on progress; except PII	01/26/2016	Completed / Ongoing		George Krisztian	George will be working with SEOC to add an EPA order section
01/21/2016	SoM/ MDEQ	63	Shall engage a panel of experts to advise and make public recommendations to the city on steps needed to mitigate the imminent and substantial endangerment to the health of persons and general operation of the city's PWS to comply with SDWA & NPDWRs.	01/28/2016	Ongoing	Panel of experts have a meeting scheduled at 3:00 p.m. on 01/27/2016	Jim Sygo	
11/25/2015	MDEQ/ Flint	52	Is progress being made with corrosion control in the City? Respond to EPA Flint Task Force	01/31/2016	Completed	Data requested from the City	Richard Benzie / Mary Ann Dolehanty	December Monthly Operations Submitted with Dosages (1st week of January). Data expected from City 01/29/2016
					Completed	EPA agreed on the dosing level for orthophosphate (1/27/2016)		Corrosion controls implemented on Dec 09, 2015
					Completed / Ongoing	Next step: Conduct weekly status calls with Flint Water Treatment Plant		
					Completed / Ongoing	Review Monthly Operational Reports to ensure corrosion control treatment is appropriately maintained.		
01/21/2016	MDEQ/ Flint	53	Water Quality parameter measurements in distribution system	01/31/2016	Completed / Ongoing	Ensure City conducts/provides WQP data as required	Mike Glasgow (COF) / Richard Benzie	Mike sent in MOR, Benzie to confirm.
					Completed / Ongoing	During weekly status call, discuss WQP trends/concerns.		
01/21/2016		53	All lead in water testing results for the City since January 2013 including those not used for LCR compliance	01/31/2016	Completed / Ongoing	Provide to George Krisztian so that he can vet and send to person maintaining website, any lead results in DEQ files for monitoring since Jan 2013 (target 01/29/2016)	Richard Benzie / Mary Ann Dolehanty	Residential has been posted, Richard has the compliance data. Can be vetted by Richard for compliance data.
					Ongoing	Ensure ongoing monitoring results continue to be provided/posted to website		
01/21/2016		53	Identification of areas by zip code in the city with elevated blood levels	01/31/2016	Ongoing		George Krisztian to coordinate Linda Dykema	Dykema (DHHS) acknowledged receiving email request and is working on it
01/21/2016	MDEQ/ Flint	54	a. Existing inventory of homes with lead service lines in Excel or similar format	01/31/2016	Completed		Dave Forstat	Billing address for ouside City of Flint
01/21/2016		54	b. Addresses of homes that have had water service interruptions or street disturbances (e.g. water main breaks, etc.) within last year	01/31/2016	Ongoing	Get data from City Flint	Richard Benzie / Mike Glasgow (COF)	Richard Benzie shall call Mike Glasgow 1/29/2016 to get update on status

EPA Emergency Administrative Order Task Worksheet
Updated: 01/29/2016 1845

DATE of Initiation	Named Party	Chapter	Task	DUE Date	Status	Recommended Action	Assigned Personnel	Comments
01/21/2016		54	c. Addresses of currently unoccupied homes	01/31/2016	Ongoing	MDEQ is working with the city of Flint Department of Public Works to acquire the data and map these locations	Richard Benzie / Natasha Henderson	Mitch Adelman will contact MSP. The information for this is not for public dissemination due to safety reasons.
01/21/2016	SoM/ MDEQ	69	Any agent, consultant or contractor used for carrying out this order shall also abide by record retention restrictions under this order.	01/31/2016	Ongoing	Comply with order and provide instruction Get a DOCUL	Jim Sygo / Mark Ducharme	AAG Working on this. Carin Sodeman DOCUL-T All Agents or contractors will be required to comply with the Retention Schedule of the EPA
					Ongoing	Identify record retention elements and provide direction to all personnel, agents, or contractors that are or may become, involved with the Flint water emergency.		
					Completed	Prepare a Documentation Unit Leader task list and identify resource(s) needed to fill the position.		
					Completed	Request assignment of Assistant Attorney General		Richard Kuhl has been assigned.
01/21/2016	Flint	69	Any agent, consultant or contractor used for carrying out this order shall also abide by record retention restrictions under this order.	01/31/2016	Ongoing	Draft letter from DEQ to City of Flint	Jim Sygo / Legal Team Carin Sodeman will work with Jim to produce letter and Kuhl	Draft document by Jim Sygo to be completed 01/29/2016
01/21/2016	Flint	59	City shall submit to DEQ the following items listed below:	02/04/2016				
01/21/2016		59	a. Submit a plan and schedule to MDEQ for designated optimal corrosion control and water quality parameters and water monitoring plans.	02/04/2016	Ongoing	Confirm with City that they will have plans completed and submitted by 02/04/2016	Richard Benzie / Mary Ann Dolehanty / staff	
01/21/2016		59	b. Submit a sampling plan for daily monitoring submitted in a weekly report	02/04/2016	Ongoing		Richard Benzie / Mary Ann Dolehanty / staff	
01/21/2016		59	c. Submit an operations plan for the corrosion control equipment submitted in weekly format including monitoring, calibration, verification and daily monitoring of finished water corrosion control parameters.	02/04/2016	Ongoing		Richard Benzie / Mary Ann Dolehanty / staff	
01/21/2016	MDEQ/ Flint	61	City must demonstrate and MDEQ must ensure the city has necessary capable and qualified personnel to perform duties in PWS.	02/05/2016	Ongoing	MDEQ to get list of all operators employed at treatment plant and validate that they are properly certified.	Richard Benzie

Subject: Flint Drinking Water Response Sit Update #5

I. Water Branch

A. Activities
   1. One team sampled residential homes for Cl
      a. 1301 McIntosh – 0.70 and 0.84 ppm Cl
      b. 2233 Mt. Elliott – 0.69 and 0.52 ppm Cl
   2. One team preparing sample bottles and documentation for upcoming sequential lead sampling
   3. Continued QAPP Preparation
   4. Continued Sequential Lead Sampling Plan

B. Objectives
   1. Deploying three teams for sequential sampling Thursday morning
   2. 5 homes scheduled for Thursday, 1 for Friday, and 2 for Saturday morning
   3. Continue role on Task Force for new water issues
   4. Continue coordination with County, State and Federal Health
      a. Develop sampling plan to assess rash cases
      b. Develop sampling plan to assess filter efficacy
   5. Gather lead data from water plant including mapping details and DS model
   6. Meet with local university technical people to discuss future collaboration efforts

II. Operations

A. Activities
   1. EPA Regional Administrator met with DEQ Director and staff to discuss coordination
   2. EPA ORD and SFD participated with health agencies on rash symptoms and filter efficiency
   3. Reviewed and received briefing on FEMA IAP #3
   4. Coordinated with FEMA and HHS at the command post
   5. Continued development of ICS structure
   6. Updated Organizational Chart

B. Objectives
   1. Continue to coordinate and facilitate operations

III. Logistics

A. Activities
   1. Received water sampling supplies from Chicago
   2. Picked up UPS supplies and established contact with them
   3. Set up printers and tested speaker
   4. Established points of contact with Kettering University facilities and IT support people
   5. Continued set-up and maintenance of new EPA staging area
B. Objectives
   1. Continue to support the operation facilitating logistical needs

IV. Data Management
A. Activities
   1. Created data collection form for tablets for field sampling
   2. Met with ERT to discuss data storage, retrieval and usage
   3. Met on map viewers for private and public use
   4. Met on duties for data uploads to geo platform with Regional GIS group
B. Objectives
   1. Continue to support field sampling teams
   2. Continue to publish sampling data

V. Water Assessment Team
   A. Activities
      1. Met with water treatment plant
      2. Met with health officials regarding filter sampling
      3. Met with local health department
   B. Objectives
      1. Finalize QAPP for Sequential Sampling
      2. Finalize Residual Chlorine and Coliform Sampling Plan

VI. Public Affairs
   A. Activities
      1. Integrated with the FEMA Initial Operating Facility in Flint
      2. Participated in the Interagency Communication Coordination Call with USDA, FEMA, HHS/ASPR, and CDC
      3. Accompanied water sampling team to homes to sample for chlorine
      4. Visited Hispanic community center; Centro Techologico Hispano and spoke to the chairman for additional contacts
      5. Dropped off some ATSDR Lead fact sheets, EPA Lead-in-home and healthy eating Spanish materials at St. Mary's Church in east-side neighborhood
      6. Followed up with contacts at the Genesee County Hispanic Latina Collaborative and Center for Popular Democracy -- two groups identified as assisting the Spanish speaking communities in Flint
      7. Continued to gather FAQs to list generated by residents
   B. Objectives
      1. Will provide congressional representatives with EPA update
      2. Continue to engage the community
      3. Continue to provide information to the public

VII. Safety
   A. No safety incidents

Per your request.

As a FYI – we heard there now may be a press conference in Flint tomorrow with the Governor but I have not added it to the schedule because it hasn't been confirmed quite yet. I will add it to tomorrow's schedule.

Thanks.

Mary Beth

Summary

This is the fourteenth annual report on surveillance of blood lead levels (BLLs) of Michigan residents and adults whose blood was tested in Michigan. It is based on data collected as a result of regulations promulgated October 11, 1997 by the Michigan Department of Community Health (MDCH) to address the health hazard of exposure to inorganic lead. MDCH regulations require laboratories to report all blood lead analyses for both adults and children. The Adult Blood Lead Epidemiology and Surveillance (ABLES) Program was founded nationally in 1992 to track laboratory reports of elevated BLLs in U.S. adults. Michigan is one of the 41 states that participate in this program.

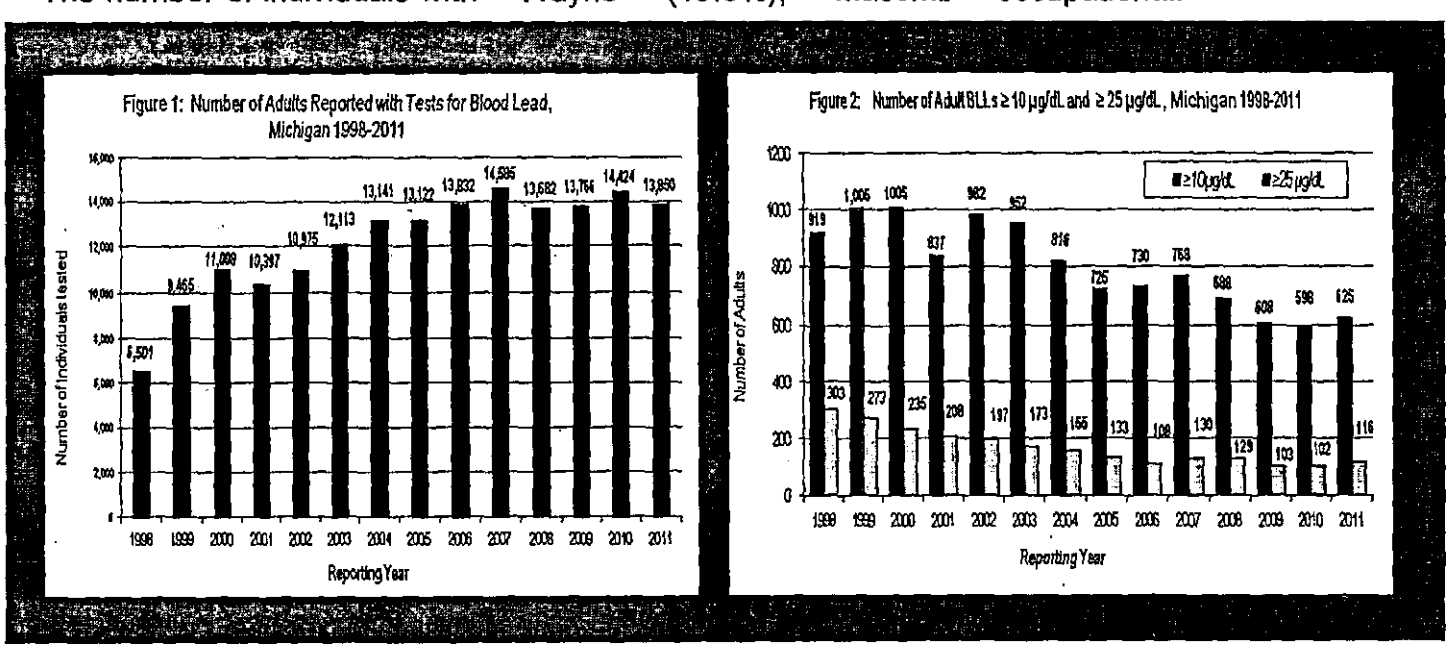
Summary, continued...

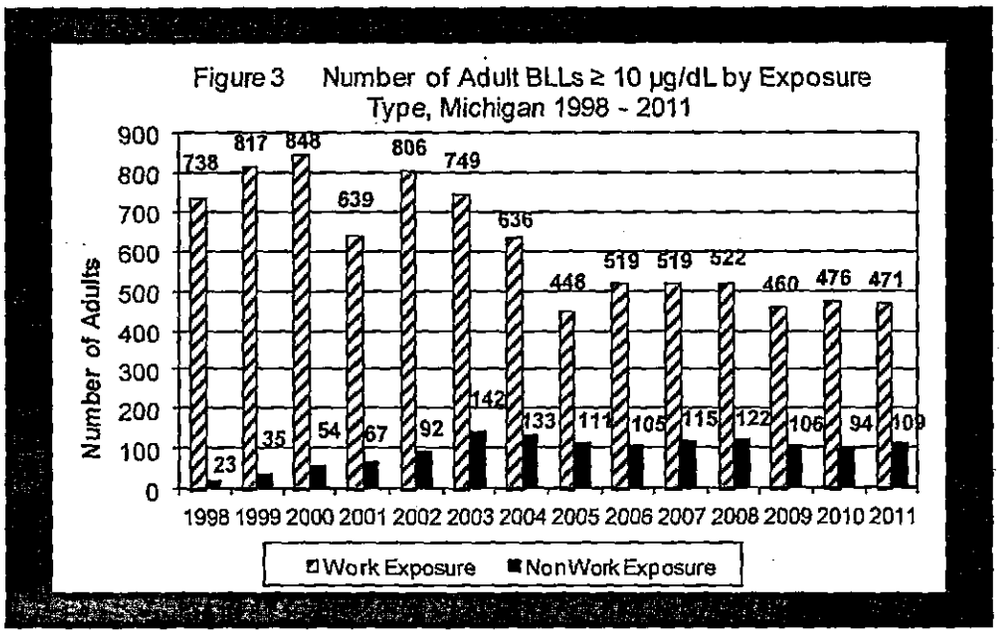
This report summarizes BLLs of Michigan residents and adults whose blood was tested in Michigan defined as sixteen years and older. In 2011, Michigan ABLES received 16,018 blood lead tests for 13,850 individuals ≥16 years of age. Six hundred and twenty-five (4.5%) individuals had BLLs ≥ 10 µg/dL; 116 (18.6%) of those 625 had lead levels ≥ 25 µg/dL and 13 (11.2%) of the 116 had BLLs ≥ 50 µg/dL.

There were 160 more blood lead tests and 574 less individuals reported in 2011 compared to 2010 (Figure 1). The number and the percent of individuals with BLLs ≥10 µg/dL increased from 598 (4.1%) in 2010 to 625 (4.5%) in 2011. The number and percent of individuals with BLLs ≥25 µg/dL increased from 102 (0.7%) in 2010 to 116 (0.8%) in 2011. The number of individuals with BLLs ≥ 50 µg/dL went from six (0.04%) in 2010 to thirteen (0.09%) in 2011. For twelve consecutive years, from 1999 to 2010, there was a downward trend for BLLs ≥ 10 µg/dL and BLLs ≥ 25 µg/dL from the previous year (Figure 2). However, in 2011 the number of BLLs ≥ 25 µg/dL were increased from 103 in 2009 and 102 in 2010 to 116 in 2011. These trends occurred among both occupational and non-occupational exposures (Figure 2). Examining trend separately for work and non work exposures showed a downward trend until 2005 with no further decrease in BLLs ≥ 10 µg/dL from 2006 onward (Figure 3).

The adults with BLLs ≥10 µg/dL were likely to be men (95.4%) and white (83.5%). Their mean age was 44.9. They were most likely to live in Wayne (19.9%), Macomb (8.2%) or Oakland (7.5%) counties. Occupational exposure remains the predominant source of lead exposure (81.2%). In Michigan, lead exposure resulting in BLLs ≥ 10 µg/dL typically occurs where individuals: perform abrasive blasting to remove lead paint on outdoor metal structures such as bridges, overpasses or water towers; cast brass or bronze fixtures; fabricate metal products; or are exposed to lead fumes or dust from firing guns or retrieving spent bullets at firing ranges.

Among adults with BLLs ≥ 10 µg/dL, lead exposure from firing ranges, as well as reloading and casting activities associated with firearms, is the most common cause of non-occupational exposure (79.6%) and 14.9% of all reported known exposure, both occupational and non-occupational.





Firing ranges are a source of lead exposure where individuals qualify for both work and recreational marksmanship standards in commercial as well as private recreation ranges. Private gun clubs and ranges, run by members and volunteers, are not under the jurisdiction of workplace regulations as these regulations only cover businesses with paid employees. Outreach efforts to educate this group of lead-exposed hobbyists remains a challenge.

The fourteenth year of operation of an adult blood lead surveillance system in Michigan proved successful in continuing to identify individuals with elevated BLLs and sources of exposures that could be remediated to reduce lead exposure. Outreach and intervention activities this past year included written contact with 170 individuals, follow-up interviews with 105 lead-exposed individuals and distributing resources on diagnosis and management of lead exposure to 52 healthcare providers who tested patients with elevated blood lead levels. A "how to" guide for home maintenance and renovation from the U.S. Department of Housing and Urban Development was provided to individuals, when renovation was the source of exposure to lead. Three educational brochures continued to be distributed this past year: one on working safely with lead, the second on controlling lead exposure in firing ranges and a third brochure for reducing lead exposure when reloading firearms or casting lead as a hobby. Copies of these brochures and informational literature are at www.oem.msu.edu under "Resources for Adult Blood Lead (ABLES)." In addition, collaboration with MDCH provided a brochure for women of childbearing age and information on the risk of take home lead exposure to occupationally-exposed adults identified with children under the age of six.

In 2011, MIOSHA inspections were conducted and reports completed at eight companies due to elevated blood lead laboratory reports with seven (87.5%) resulting in lead-related citations. Details of inspections completed in 2011 are included in this report.

Occupational exposure remains the predominant source of lead exposure (81.2%). In Michigan, lead exposure resulting in BLLs ≥10 µg/dL typically occurs where individuals: perform abrasive blasting to remove lead paint on outdoor metal structures such bridges, overpasses or water towers; cast brass or bronze fixtures; fabricate metal products; or are exposed to lead fumes or dust from firing guns or retrieving spent bullets at firing ranges.

Background

This is the fourteenth annual report on surveillance of BLLs of Michigan residents and adults whose blood was tested in Michigan. BLLs, including children, have been monitored by the state since 1992. From 1992 to 1995, laboratories performing analyses of blood lead levels, primarily of children, voluntarily submitted reports to the State. The Michigan Department of Community Health (MDCH) promulgated regulations effective October 11, 1997, that require laboratories to submit reports of both children and adults to the MDCH for any blood testing for lead. Coincident with the promulgation of this regulation in 1997, Michigan received federal funding from the Centers for Disease Control and Prevention (CDC), to monitor adult BLLs as part of the ABLES program. Currently 41 states have established lead registries through the ABLES program for surveillance of adult lead absorption, primarily based on reports of elevated BLLs from clinical laboratories. The most recent report of adult blood lead surveillance from 40 states that was published in the *Morbidity and Mortality Weekly Report*, July 1, 2011 / 60(25);841-845 is in Appendix A.

2011 is the fourteenth year with complete laboratory reporting in Michigan since Michigan Department of Community Health lead regulations became effective on October 11, 1997.

THE MICHIGAN ADULT BLOOD LEAD REGISTRY

Reporting Regulations and Mechanism

Since October 11, 1997, laboratories performing blood lead analyses are required to report the results of all blood lead tests to the MDCH (R325.9081-.9087 – Appendix B). Prior to these regulations, few reports of elevated lead levels among adults were received.

The laboratories are required to report blood sample analysis results, patient demographics, and employer information to MDCH in an electronic file (Appendix B). The health-care provider ordering the blood lead analysis is responsible for forwarding the patient information, the physician/provider information and the specimen collection information to the laboratory. Upon receipt of the blood sample for lead analysis, the clinical laboratory is responsible for completion of the laboratory information. All clinical laboratories conducting business in Michigan that analyze blood samples for lead must report all adult and child blood lead results to the MDCH, Childhood Lead Poisoning Prevention Program (CLPPP) within five working days.

All clinical laboratories conducting business in Michigan that analyze blood samples for lead must report all Michigan residents' blood lead results to the Michigan Department of Community Health, Childhood Lead Poisoning Prevention Program (MDCH/

All blood lead results on individuals 16 years or older are forwarded to MSU for a potential interview and then to the Michigan Occupational Safety and Health Administration (MIOSHA) in Michigan Department of Licensing and Regulatory Affairs (LARA) for a potential work-place follow-up. MSU is designated a bona fide agent of the State to conduct this activity.

Laboratories

Employers providing blood lead analysis on their employees, as required by MIOSHA must use a laboratory which meets OSHA proficiency testing for blood lead analysis to be in compliance with the lead standard. Figure 4 details the eight OSHA approved laboratories

in Michigan.

Data Management

When files of BLL results are received at the MDCH, they are reviewed for completeness. For those records where information is missing, paper copies are created and returned to the physician/provider to complete. Lead Registry staff import files of BLL results into a computerized database. Each file imported into the database is visually checked for any data entry errors, duplicate entries, missing data, and illogical data. These quality control checks are performed weekly.

Case Follow-Up

Adults whose BLL is 25 µg/dL or greater are contacted for an interview. Interviews are conducted of individuals with BLLs ranging from 10 to 24 µg/dL if the source of their lead exposure cannot be identified from the reporting form. A letter is sent to individuals explaining Michigan's lead surveillance program and inviting them to answer a 15-20 minute telephone questionnaire about their exposures to lead and any symptoms they may be experiencing. The questionnaire collects patient demographic data, work exposure and history information, symptoms related to lead exposure, information on potential lead-using hobbies and non-work related activities, and the presence of young children in the household to assess possible take-home lead exposures among these children. Trained interviewers administer the questionnaire.

Figure 4 Michigan Laboratories meeting OSHA proficiency testing for blood lead analysis

MICHIGAN BLOOD LEAD LABORATORIES*

Laboratory Name	*City*
DMC University Laboratories	Detroit
Marquette General Health Systems	Marquette
Michigan Department of Community	Lansing
Mt Clemens General Hospital	Mt. Clemens
Quest Diagnostics	Auburn Hills
Regional Medical Laboratories	Battle Creek
Sparrow Health System	Lansing
Warde Medical Laboratories	Ann Arbor

*Laboratories which meet OSHAs accuracy requirements in blood lead proficiency testing as of January 25, 2013. For a complete listing of OSHA approved blood lead laboratories, visit the OSHA web site at http//www.osha.gov/SLTC/bloodlead/program.html

MICHIGAN OCCUPATIONAL SAFETY AND HEALTH ADMINISTRATION REQUIREMENTS

Medical Monitoring and Medical Removal

The MIOSHA requirements for medical surveillance (i.e. biological monitoring) and medical removal are identical to those of Federal OSHA. The requirements for medical removal differ for general industry and construction. For general industry, an individual must have two consecutive BLLs above 60 µg/dL or an average of three BLLs greater than 50 µg/dL before being removed (i.e. taken pursuant to the standard or the average of all blood tests conducted over the previous six months, whichever is longer). For construction, an individual needs to have only two consecutive blood lead level measurements taken pursuant to the standard above 50 µg/dL. However, an employee shall not be required to be removed if the last blood-sampling test indicates a blood lead level ≤ 40 µg/dL. If monitoring shows lead levels above 30 µg/m³ of air (MIOSHA's action limit) but below 50 µg/m³ of air (PEL), an employer also must repeat monitoring every six months, repeat training annually, provide medical surveillance, including blood analysis for lead and zinc protoporphyrin, medical exams and consultation, provide medical removal pro-

ection for employees with excessively elevated blood lead levels. See Appendix C for a more detailed description of the requirements. It should be noted that in the absence of a specific exposure to lead, 95% of BLLs in the adult general population in the U.S. are below 3.8 µg/dL for men and below 2.8 µg/dL for women (1). Also of note, in this past year CDC recommended that BLLs five µg/dL or greater in children should be considered elevated. CDC did not review this issue for adults (2). They had previously considered blood leads of ten µg/dL or greater as a level of concern.

Dissemination of Surveillance Data

Biannual data summaries, without personal identifiers, are forwarded to the Program's funding agency, the National Institute for Occupational Safety and Health (NIOSH). NIOSH compiles reports from all states that require reporting of BLLs and publishes them in the Morbidity and Mortality Weekly Report (MMWR) (3). See Appendix A for the most recent publication of ABLES surveillance results for the period 2008 -2009.

Results

This is the fourteenth year with complete laboratory reporting in Michigan since the lead regulations became effective on October 11, 1997. A summary of all the reports of adult BLLs received in 2011, as well as more detailed information from all interviews completed since 1997 of those adults with a BLL of 25 µg/dL or greater, are included in this report. Also included are the Michigan Occupational Safety and Health Administration (MIOSHA) inspections completed in 2011 at the work sites where these individuals were exposed to lead.

This report also provides information on individuals interviewed since 1997 who had BLLs ranging from 10-24 µg/dL where the source of lead exposure was not identified in the original report submitted from the laboratories. Given the medical evidence of health effects at levels as low as 5 µg/dL (4-7), analysis of available information on BLLs ranging from 5-9 µg/dL is also discussed in this report.

[d] percent of known exposures >25 µg/dL

[e] percent of total known exposures

Blood Lead Levels Reported in 2011

Number of Reports and Individuals

Between January 1 and December 31, 2011, the State of Michigan received 16,018 blood lead test reports for individuals 16 years of age or older. Because an individual may be tested more than once each year, the 16,018 reports received were for 13,850 individuals (Table 1). Until 2007, the overall trend for the number of individuals tested each year has shown a gradual increase (Figure 1). The initial steeper increase in 1999 and 2000 probably was secondary to better compliance by the laboratories with the 1997 reporting regulation. The increase in more recent years is assumed secondary to increased testing while the drop in numbers of tests noted in 2008 and 2009 was likely a reflection of the recent Michigan economic downturn rather than reduced testing compliance.

The following descriptive statistics are based on adults (≥ 16 years) tested in 2011. Where more than one BLL result was reported in 2011, statistics are based on the highest BLL reported for each individual.

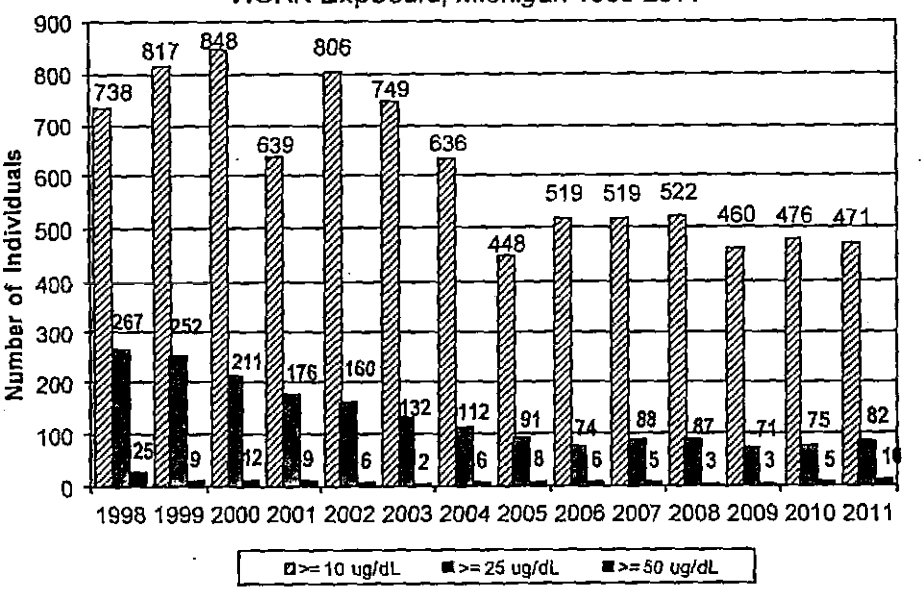
Distribution of Blood Lead Levels

In 2011, 625 (4.5%) of the 13,850 adults reported had BLLs ≥ 10 µg/dL; 116 of those 625 had BLLs ≥ 25 µg/dL and 13 of 116 had BLLs≥ 50 µg/dL (Table 1).

A total of 12,495 (90.2%) of adults reported in 2011 had BLL less than 5 µg/dL, and 730 (5.3%) were from individuals whose blood lead was 5 – 9 µg/dL. Individuals with BLL 5 – 9 µg/dL are not routinely contacted, however when the source of lead exposure was identified, 148 of 169 (87.6%) individuals were identified as occupationally exposed. One hundred and twenty-one (81.8%) of these 148 had been tested in previous years and 51 (42.1%) showed a decrease in their BLL. Among the 509 individuals whose blood lead was 10 – 24 µg/dL, 389 (76.4%) individuals had their source of lead exposure identified as occupational as compared to the 116 individuals with BLLs ≥ 25 µg/dL where 82 (70.7%) individuals had their source of lead exposure identified as occupational.

There was a marked decline in the overall number of individuals with elevated blood lead from occupational exposure from 2000 to 2005, with the number remaining fairly stable from 2006 to 2011 (Figure 5). For non-work exposures, elevated blood lead showed a decline from 2003 to 2006, a slight increase in 2007 and 2008 and then a little change from 2009 to 2011 (Figure 6).

Figure 5 Number of Adults with Elevated BLLs due to WORK Exposure, Michigan 1998-2011



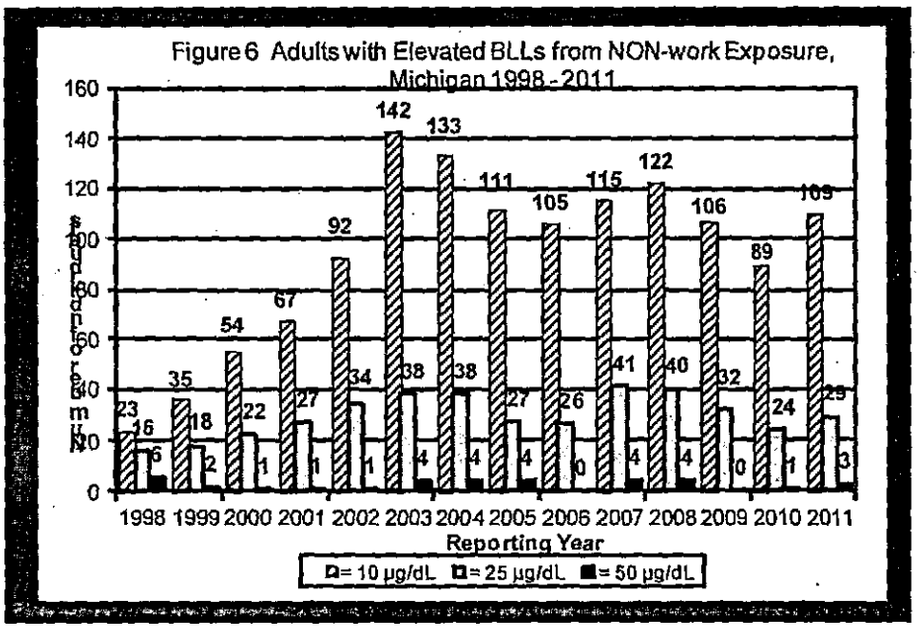


Table 2 Distribution of Gender Among Adults Tested for BLLs, Michigan 2011

	All Blood Lead Level Tests		Blood Lead Levels ≥ 10 µg/dL		Blood Lead Levels≥ 25 µg/dL	
Gender	Number	Percent	Number	Percent	Number	Percent
Male	8,343	60.3	596	95.4	112	96.6

TOTAL	13,849*	100.0	625	100.0

*Age was unknown for 1 additional individual.

GENDER AND AGE DISTRIBUTION

All Blood Lead Levels

Sixty percent of the adults reported to the Registry were male, and almost forty percent were females (Table 2). The mean age was 44.0 and median age 43. The age distribution is shown in Table 3.

BLLs ≥ 10 µg/dL

For the 625 adults reported to the Registry with BLLs ≥ 10 µg/dL, 596 (95.4%) were men and 29 (4.6%) were women. The mean age was 44.9 and median age was 45.

RACE DISTRIBUTION

All Blood Lead Levels

Although laboratories are required to report the patients' race, this information is frequently not provided. Race was missing for 8,825 (63.7%) of the 13,850 adults reported. Where race was known, 4,231 (84.2%) were reported as Caucasian, 640 (12.7%) were reported as African American, 59 (1.2%) were reported as Asian/ Pacific Islander, 58 (1.2%) were reported as Native American, and 37 (0.7%) were reported as Multiracial/ Other (Table 4).

BLLs ≥ 10 µg/dL

For adults with BLLs greater than or equal to 10 µg/dL where race was indicated, 338 (83.5%) were

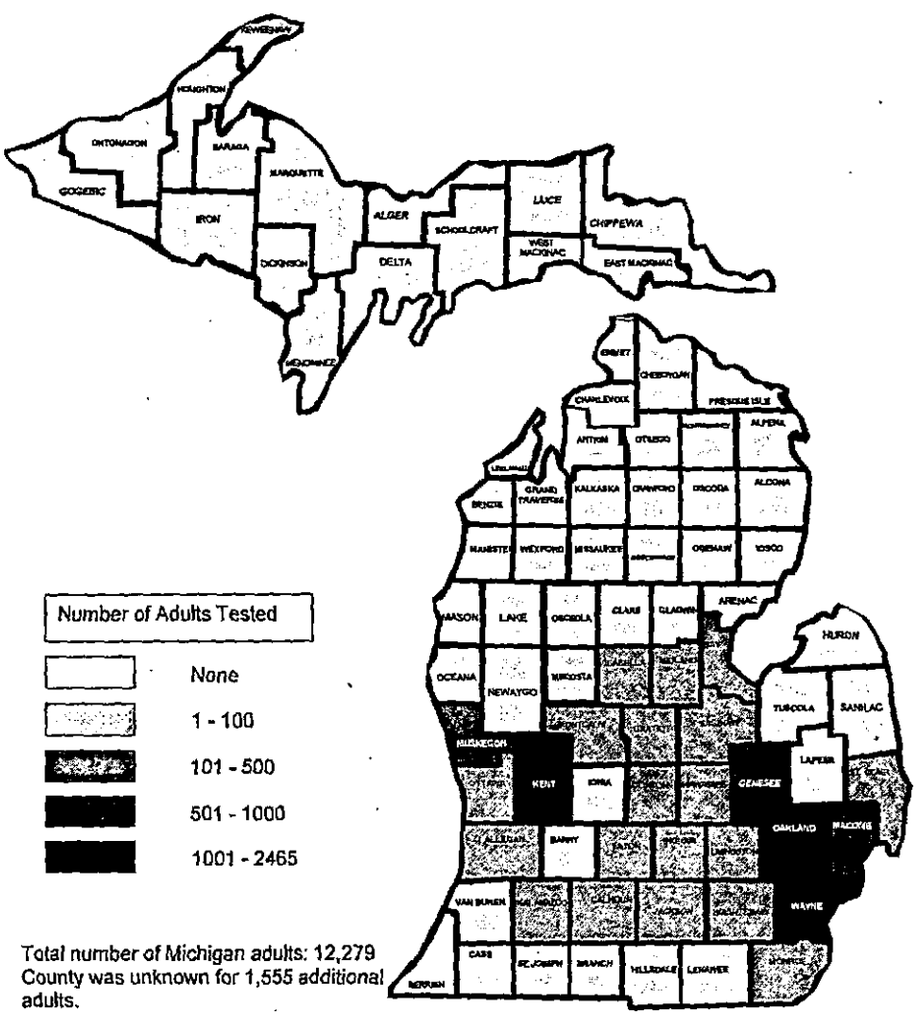
Table 4 Distribution of Race Among Adults Tested for Blood Lead, Michigan 2011

	All Blood Lead Levels		Blood Lead Levels ≥10 µg/dL	
Race	Number	Percent	Number	Percent
Caucasian	4,231	84.2	338	83.5
African American	640	12.7	34	8.4
Native American	58	1.2	13	3.2
Asian/Pacific Islander	59	1.2	7	1.7
Multiracial/Other	37	0.7	13	3.2
TOTAL	5,025 *	100.0	405 **	100.0

*Race was unknown for 8,825 additional individuals.

**Race was unknown for 220 additional individuals.

Figure 7 **Geographic Distribution of Adults Tested for Lead by County of Residence, Michigan 2011**



Wayne and Kent counties had the highest number of adults tested with 2,603 and 1,250 respectively.

reported as Caucasian, 34 (8.4%) were reported as African American, 13 (3.2%) were reported as native American, 13 (3.2%) were reported as Multiracial/Other, and 7 (1.7%) were reported as Asian/Pacific Islander, (Table 4).

GEOGRAPHIC DISTRIBUTION

County of residence was determined for 12,279 of the 13,850 adults reported to the Registry. They lived in all of Michigan's 83 counties. The largest number of adults tested in 2011 lived in Wayne County (2,603, 21.2%), followed by Kent County (1,250, 10.2%) and Oakland County (1079, 8.8%). The county was unknown for 1,555 adults tested for blood lead. (Figure 7 and Table 5).

Figure 8 and Table 5 show the county of residence of the 564 adults with BLLs ≥ 10 µg/dL where county of residence could be determined. The largest number of adults reported with a BLL ≥ 10

(Continued on page 12)

County of residence was determined for 12,279 of the 13,850 adults reported to the Registry. They lived in all of Michigan's 83 counties.

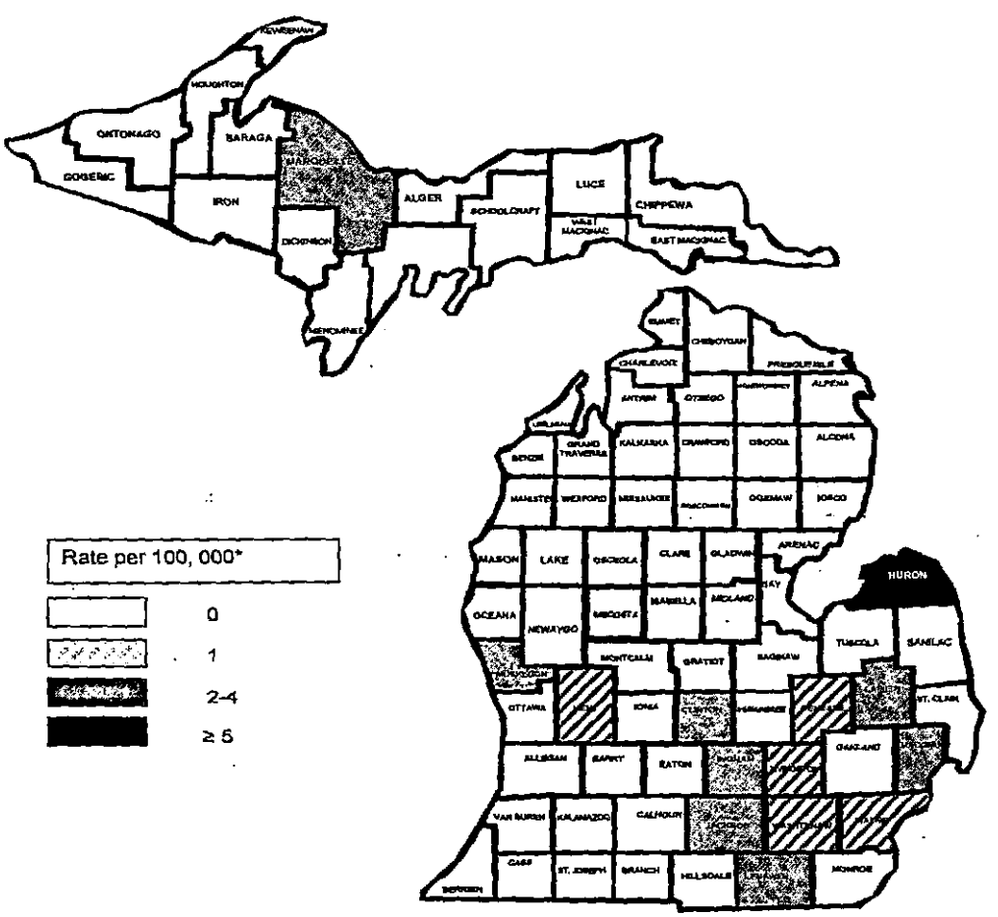
Figure 10 Annual Incidence of BLLs ≥ 10 µg/dL Among Women by County of Residence, Michigan 2011



*Denominator is Rate per 100,000 women age 16+ from US Census Bureau of County Resident Population, Annual Estimate for July 1, 2011

Table 5 shows the percentage of tested adults, within each county, with BLLs ≥10 µg/dL and BLLs ≥ 25 µg/dL. Mackinac (29.2%), Huron (28.0%), Schoolcraft (25.0%) and Saint Clair (23.9%) counties had the highest percentages of adults with BLL ≥10 µg/dL within their respective counties. Alcona (11.1%), Mackinac (9.2%), Benzie and Ontonagon (9.1%) counties had the highest percentage of tested adults with BLL ≥ 25 µg/dL.

GENDER DISTRIBUTION

Figure 10 and Table 6 show the incidence rates of BLL ≥ 10 µg/dL by county for women. There were 28 women reported in 2010 with a BLL ≥ 10 µg/dL, where county was known. Huron (7/100,000), Marquette (4/100,000), Clinton, Lapeer, Lenawee, Macomb and Muskegon (3/100,000) had the seven highest incidence rates.

Three women (10.7%) with elevated blood lead had their exposure from work: one from a correctional institution, one from a sporting goods firing range and one from construction remodeling. One woman (3.6%) with elevated blood lead had her exposure both from work (public safety) and hobby (firearms).

Twelve women (42.9%) with elevated blood leads had non -work exposures: six from firearms, two from pottery

**Total number of men in all 83 counties of Michigan age 16+ years; 7/1/2011 County Characteristics Resident Population Estimates, U.S. Census Bureau http://www.census.gov/popest/counties/asrh/files/cc-est2009-agesex-26.csv

***Rate per 100,000 men, age 16+ years.

making , one from leather tooling, one from home remodeling, one from making stained glass, and one from a gunshot wound. Source of exposure was unknown for twelve of the 28 women.

Figure 11 and Table 7 show the incidence rates of BLL of 10 µg/dL and above by county for men. There were 536 men reported in 2011 with a BLL ≥ 10 µg/dL where county of residence could be determined. Mackinac (407/100,000), Montcalm (89/100,000) and Ionia, (80/100,000) had the highest incidence rates per 100,000 men based on the 2011 County Characteristics Resident Population Estimates from the U.S. Census Bureau. The overall incidence rate for men was 14 times higher than that for women (14/100,000 vs. 1/100,000) in 2011.

SOURCE OF EXPOSURE

For 471 (81.2%) individuals, work was the identified source. For 109 (18.8%) individuals non-occupational activities were identified as the source of exposure. Table 8 shows the non-work related source of exposure of lead for 108 individuals with BLLs ≥10 µg/dL reported in 2011. Of those 109, three non-occupational activities predominated. Eighty-six (78.9%) individuals were exposed from a hobby related to guns, seven (6.4%) were exposed due to a retained bullet fragment and six (5.5%) were exposed due to home remodeling. For an additional 15 individuals, source of exposure is still being investigated. For 30, the source was still unknown after an interview with the individual or review of medical records.

Table 9 shows the occupational sources of lead for individuals reported in 2011. The most frequent reports were on individuals in the construction sector (44.6%) and manufacturing (31.7%).

Figure 12 shows the geographic distribution of the twenty-five non-construction companies that reported at least one adult with a BLL of 25 µg/dL or greater in Michigan during 2011. For two of these companies, we were unable to determine county and one was located out of state. These twenty-five companies included an auto and home supply store, a university and police department shooting ranges, an automotive repair shop, distribution

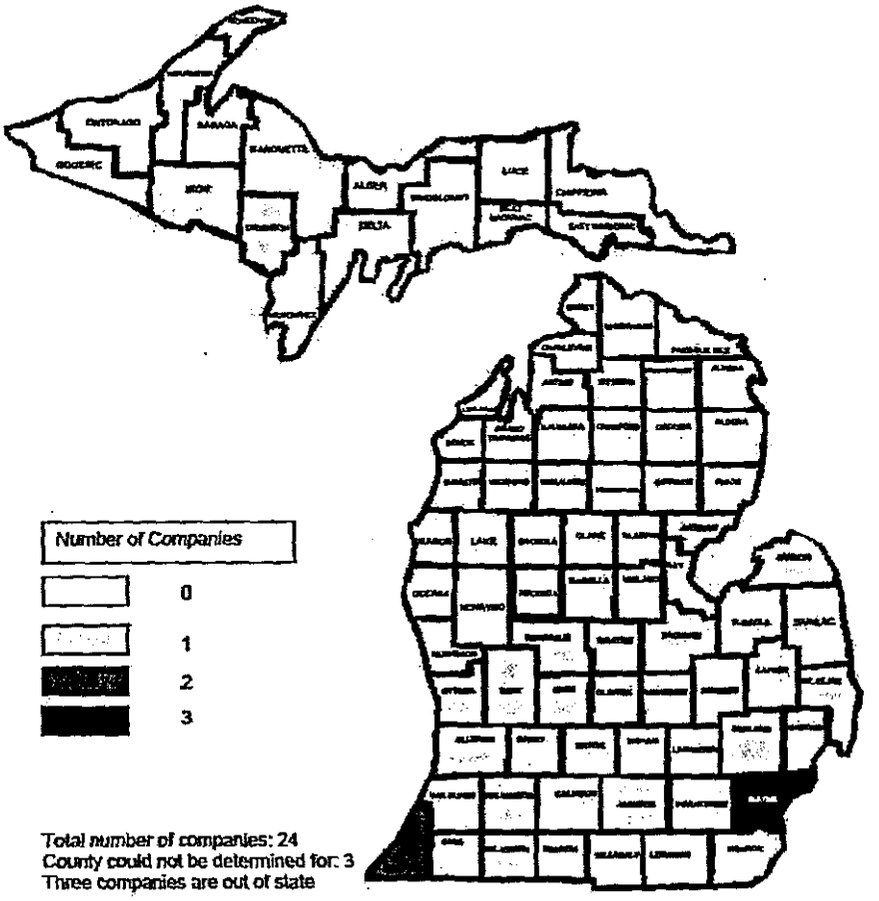
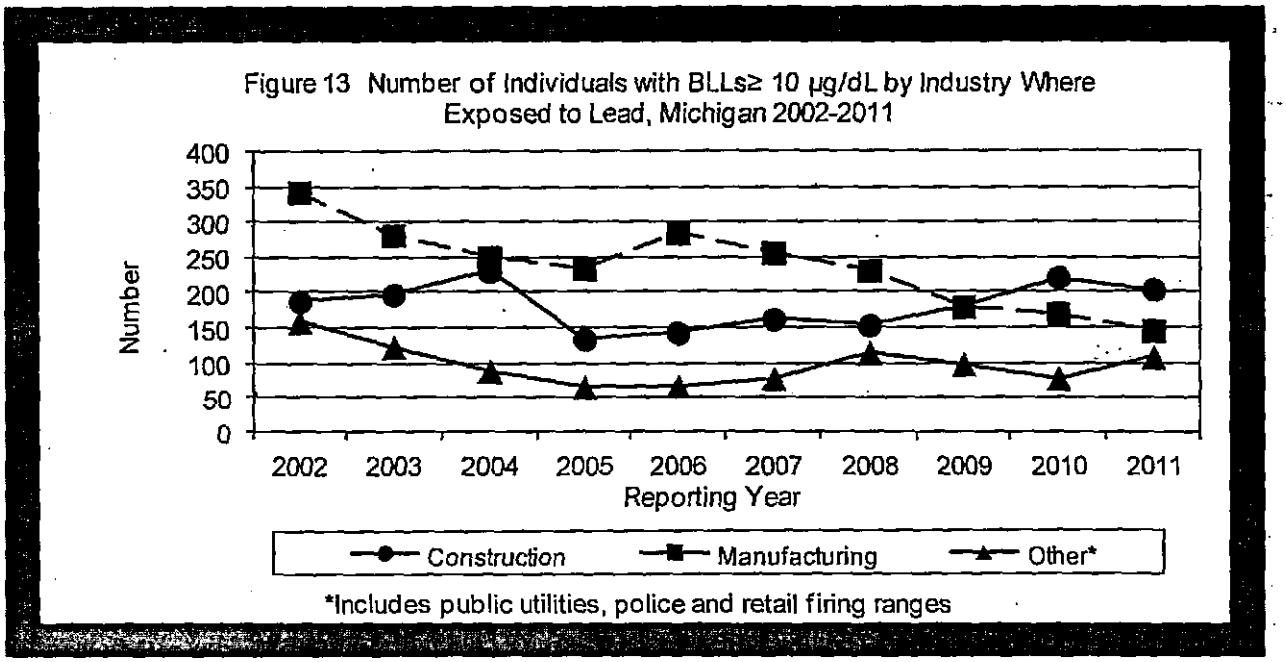
TOTAL	**457 ****		**100.0**

*Standard Industrial Classification.

**Another 14 were work-related, however, the industry was unknown.

Figure 12 Geographic Distribution of Non-Construction Companies Reporting Adult BLLs ≥ 25 µg/dL in Michigan, 2011





and warehousing of scrap and waste materials, wholesale distribution of electrical power equipment, primary metal industries, metal stamping companies, and indoor firing ranges. Of the 471 individuals with blood lead ≥ 10 µg/dL where exposure occurred at work, 134 (28.5%) were from these twenty-five companies. Of the 82 individuals with blood lead ≥ 25 µg/dL and exposure occurred at work, 42 (51.2%) were also from these twenty-five companies.

The recent BLLs have generally been decreasing across all types of occupational sources. Although some of this reduction is due to improvements in work place controls, some of the decrease is presumed to be secondary to closure of manufacturing facilities. Construction is a more frequent source of lead exposure than manufacturing and if the previous trend continues, "Other" which includes public utilities, police and public firing ranges will also be a more frequent source than manufacturing (Figure 13).

SUMMARY OF INDUSTRIAL HYGIENE INSPECTIONS

Follow up of elevated blood lead testing --- 2011

Two of the eight 2011 inspections were conducted in the construction industry, the other six inspections were done by the MIOSHA general industry division and included a university's shooting range, a battery plant, two commercial firearm shooting ranges, a facility that rebuilds and fabricates water turbine engines, and an electroplating facility. There was an additional general industry inspection of a non-ferrous metals processing plant conducted in 2010 that was included in this report because it was not included in the 2010 Annual Report.

One of the construction inspections was completed at a general contractor as the result of four employees with blood lead levels of 33, 40, 47 and 51µg/dL. All seven citations issued pertained to lead exposure due to a job that involved removing a staircase and cleaning de-

SUMMARY OF INDUSTRIAL HYGIENE INSPECTIONS, con't...

bris within the structure. The employer was cited for not determining if any employee performing manual demolition within a structure built prior to the 1900s, was exposed to lead at or above the action level of 30 µg/m^3; for not providing employees adequate respiratory protection, adequate personal protective clothing, change areas, biological monitoring, or training; not implementing engineering and work practice controls, including administrative controls, to reduce and maintain employee exposure to lead to or below the permissible exposure limit to the extent such controls are feasible; not establishing a written compliance program for lead prior to commencement of the job; not providing an adequate training program concerning lead hazards; not making a copy of the "Lead Exposure in Construction" rules and appendices readily available to all affected employees.

In 2011 MIOSHA inspections were conducted and reports completed at eight companies referred by ABLES due to elevated blood lead laboratory reports. Seven of the eight (87.5%) received lead related citations for violation of lead-related standards.

A university's department of military science was inspected as the result of a retired employee with a blood lead level of 39 µg/dL. The indoor rifle range had four shooting lanes. Its ventilation system was not working and had never been used. No respiratory protection was worn by students, the university's police, local municipal police or members of the National Guard who used the range. The MIOSHA inspection found detectable amounts of lead on commonly touched surfaces. The university did not establish a continuing and effective housekeeping protocol to minimize accumulations of lead at the range. One lead citation was issued.

An electrical apparatus and equipment wiring supplies, and construction materials company was inspected as the result of two employees with blood lead levels of 32 and 46 µg/dL. The company repairs and sells new batteries for industrial-type trucks and other industrial applications. The employees used propane and oxygen to weld lead terminals and other equipment onto batteries being serviced. All seven citations issued pertained to lead exposure and included: one employee was exposed to lead at a concentration of more than 50 µg/m^3 of air, averaged over an 8-hour period; the employer had employees exposed to lead above the permissible exposure limit and the action level and the employer did not perform the required exposure monitoring; a written compliance program was not established and implemented to reduce exposures to, at or below the permissible employee exposure limit solely by means of engineering and work practice controls; the employer had not provided and required the use of appropriate respiratory protection; surfaces in the workplace were not maintained as free as practicable from accumulation of lead; employees who worked in areas where airborne exposures to lead were greater than the permissible employee exposure limit did not shower at the end of each work shift; the following warning sign was not posted in each work area where the permissible employee exposure limit was exceeded: "WARNING; LEAD WORK AREA; POISON; NO SMOKING OR EATING."

A gun range was inspected as a result of an

employee with an elevated blood lead level of 66 µg/dL. All four citations issued pertained to lead exposure and included: employee monitoring that was conducted demonstrated that an employee was exposed above the action level, and that employees had potential exposure to lead from surfaces and there was a possibility of skin and eye irritation, and the facility did not institute a training program for the affected employees; surfaces in the workplace were not maintained as free as practicable from accumulations of lead; a medical surveillance program was not instituted for each employee who was or may have been exposed to concentrations of lead greater than the action level for more than 30 days a year.

An internal combustion engines company was inspected as a result of an employee with elevated blood lead level of 30 µg/dL. The company was cited for four lead citations and eight non-lead citations. The lead citations included: when initial monitoring revealed that an employee's exposure to lead-containing dust was at or above the action level, monitoring was not repeated at least once every six months; the firm had no written compliance program to reduce the airborne lead level to, at or below the PEL; the firm had not provided employees with any information and training on the health effects of lead exposure; the firm had not performed routine housekeeping to prevent the lead-containing dust from accumulating on surfaces outside the blasting/painting room.

A firearm shooting range was inspected as a result of two employees with elevated blood lead levels of 84 and 39 µg/dL. The company was cited for 10 lead and three non-lead violations. The lead citations included: an employee was exposed to lead at a concentration of more than 50 $\mu g/m^3$ of air, averaged over an 8-hour period; range assistants were exposed to lead greater than the exposure limit while assisting customers in the gun range; when an employee was exposed to lead above the permissible exposure limit for more than 30 days each year, engineering and work practice controls were not implemented to reduce and maintain employee exposure to at or below 50 $\mu g/m^3$; a written respiratory protection program was not established and implemented for required respirator use; surfaces in the workplace were not maintained as free as practicable from accumulation of lead – wipe samples showed surface contamination of lead as high as 13,000 $\mu g/100cm^2$ behind the range, and 2,200 $\mu g/100cm^2$ on the sales floor; it was not ensured that food or beverages were not present or consumed, tobacco products were not present or used, and cosmetics were not applied in areas where employees were exposed to lead concentrations greater than the permissible employee exposure limit; clean change rooms were not provided for employees who worked in areas where airborne exposure to lead was greater than the permissible employee exposure limit without regard to the use of respirators; showers were not provided; biological monitoring was not made available in the form of blood sampling and analysis for lead and zinc protoporphyrin levels to each employee who was or may have been exposed to concentrations of lead greater than the action level for more than 30

When an individual from a company is identified with a blood lead value of 25 µg/dL or greater, a MIOSHA enforcement inspection is conducted to assess that company's compliance with the lead standard.

SUMMARY OF INDUSTRIAL HYGIENE INSPECTIONS, con't...

days a year; a training program was not instituted for all employees who were subjected to exposure to lead at or above the action level or for whom the possibility of skin irritation existed from exposure to lead; a written compliance program was not established and implemented to reduce exposures to, at or below the permissible employee exposure limit solely by means of engineering and work practice controls; a written hazard communication program was not developed or implemented for employees using cleaning chemicals to clean restrooms and other common areas; no written certification was identified for sales associates who cleaned the restrooms and other common areas using personal protective equipment.

A plating and polishing manufacturer that makes lead anodes two days a year was inspected as a result of an employee with an elevated blood lead level of 25 µg/dL. The company was cited for 2 lead and 3 non-lead violations. The lead citations included: not determining if an employee might have been exposed to lead at or above the action level; the employees were not informed of the contents of appendices A and B of part 310, Lead regulation.

An inspection of a highway, bridge and street construction company found no violations of MIOSHA regulations identified while inspecting a small bridge blasting and re-painting job as a result of an employee with elevated blood lead level of 30 µg/dL.

A scrap and waste materials wholesale distribution company was inspected as a result of an elevated blood lead of 65 µg/dL. The company was cited for 28 non-lead violations. No inspection was conducted in 2011 because the 2010 inspection addressed many violations.

Of the nine companies inspected, eight were identified by an elevated blood lead report collected because of a required medical surveillance program and one was reported by a private health care provider.

Case Narratives

Thirteen Individuals with a BLL ≥ 50 µg/dL in 2011

Work-Related (10 Individuals)

A Caucasian male in his 50s, employed at a company that does wrecking and demolition work, had an elevated BLL of 58 µg/dL in February 2011. His March BLL was 51 µg/dL. He was tested eleven more times and his BLLs varied between 11 and 45 µg/dL. He reported that he has been cutting steel with a cutting torch for three and a half years. When the blood test was taken, he reported that he has been working as a metal recycler and that he had been working outside in the torching area.

A Caucasian male in his mid 40s, employed as a carpenter for a construction company, had an elevated BLL of 51 µg/dL in March 2011. His June BLL was 33 µg/dL. He had a history of previous lead exposure in 2006 when his BLL was 29 µg/dL.

Three men employed at an indoor shooting range had elevated BLLs. The first employee, a Caucasian male of Hispanic origin in his late 30s, employed as the manager, had an elevated BLL of 72 µg/dL in April 2011. The second employee, a male in his early 20s had an elevated BLL of 84 µg/dL in March and 79 in April 2011. The third employee, a Caucasian male in his early 20s had an elevated BLL of 61 µg/dL in April 2011.

A Caucasian male in his mid 20s, employed as the manager at an indoor shooting range, had an elevated BLL of 66 µg/dL in April 2011. He has been employed there for 7 months.

A Caucasian male of Hispanic origin in his late 20s had an elevated BLL of 65 µg/dL in May 2011. He has been employed at a manufacturing company of alloy carbon and resulfurized steel bars and rolled steel as a "picker/sorter". The employee reported working in a small area with no respirator.

An African-American male in his mid 60s, diagnosed with lead toxicity in 2009, continued to have a high BLL, 64 µg/dL, in 2011. His exposure to lead was suspected to be from several sources which include independent employment in renovation of older homes and bullet fragments lodged near his spine since 1985. In August 2009, he reported that doctors removed all operable bullet fragments. His highest BLL of 144 µg/dL, was in January 2009, his lowest level of 52 µg/dL in April 2010. He also reported stopping all renovation and work activities due to his failing kidney function and overall health. Contact was made with Detroit Health Department for further investigation of other possible sources.

In 2011, Michigan ABLES received 16,018 blood lead tests for 13,850 individuals ≥16 years of age. Six hundred and twenty-five (4.5%) individuals had BLLs ≥ 10 µg/dL; 116 (18.6%) of those 625 had lead levels ≥ 25 µg/dL and 13 (11.2%) of the 116 had BLLs ≥ 50 µg/dL.

A Caucasian male in his late 20s, employed at a bridge painting and sandblasting company, had an elevated BLL of 56 µg/dL in September 2011. The employee had been sandblasting bridges to remove paint and cleaning up sand. The employee reported working with no respirator or earplugs.

A Caucasian male in his mid 50s, diagnosed with lead toxicity in 1999, continued to have high BL, 51, in November 2011. He used to be employed at a company repairing and selling industrial equipment for trucks. He is a battery repair technician and has been employed at a battery factory for more than 10 years.

Non Work-Related (3 Individuals)

A Caucasian male in his mid 60s, diagnosed with lead toxicity in 2003, continued to have high BLL, 51 µg/dL, in September 2011. His exposure to lead was suspected to be from casting. He has been melting lead for casting bullets, and diving weights.

A Caucasian male in his mid 60s had an elevated BLL of 59 in April 2011. He is a competitive shooter. He also reported that he stripped paint from wooden doors at home two years ago, and paint from windows of a house built in 1912, six years ago.

An African American female in her mid 50s, had an elevated BLL of 70 µg/dL in November 2011. The source of exposure could not be determined from patient's interview or from patient's doctor but no work exposure was identified.

Fourteen Years of Interviews of Adults with BLLs of 10 µg/dL or Greater

Between October 15, 1997, and December 31, 2011, there were 2,016 questionnaires completed over the telephone of adults with BLLs ≥ 10 µg/dL. The following summary of interview data is based on the 2,016 completed questionnaires.

Most of the 2,016 completed questionnaires were of males (90.2%), which is slightly higher but parallels the gender distribution from the 2011 year lead level reports ≥ 10 µg/dL. Although based on small numbers, the very highest BLLs (≥ 60 µg/dL) showed a higher percentage of African-Americans compared to lower blood lead levels. The percentage of current smokers increased with increasing blood lead levels. The group with the highest lead levels had the youngest mean age of 37.5 (Table 10).

The types of lead-related symptoms reported during the interviews, by lead level, are presented in Table 12. Only individuals who had daily or weekly

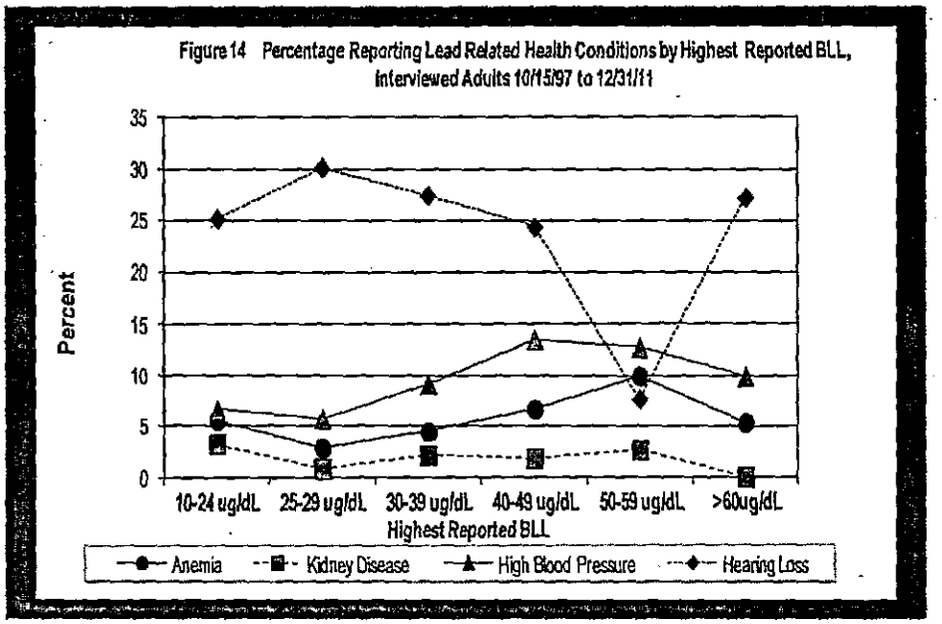
symptoms were included in this table. Loss of 10+ pounds without dieting, continued loss of appetite, frequent joint pain/ soreness, pains in belly, headache, depression, being tired, feeling nervous, waking up at night, ,being irritable and unable to concentrate were statistically significant associated with increasingly higher levels of blood lead. Having any gastro-intestinal, musculoskeletal or nervous symptoms was also statistically associated with increas-



the primary metals industry (non-ferrous foundries). These two industries also showed the highest percentage of workers with the higher blood leads (≥ 25 µg/dL) (Table 15). Table 16 lists the types of working conditions by highest reported lead level. Workers with the highest lead levels reported they were less likely to be tested at work as part of a company screening, have work clothing laundered at work, wash

(Continued from page 26)

ingly higher levels of blood lead.

Table 13 and Figure 14 show the reporting of other health conditions, anemia, kidney disease, high blood pressure and hearing loss, by lead level category. Of these health conditions, only high blood pressure was significantly associated with increasing blood lead levels.

The number of years worked by highest lead level showed that higher blood lead level results were more likely to occur in shorter term workers (i.e. workers in a lead exposed job for five or fewer years) (Table 14). The type of industry by lead level shows that 32.6% worked in special trade construction and 19.0% worked in

Of the types of lead-related symptoms reported during the interviews, loss of 10+ pounds without dieting, continued loss of appetite, frequent joint pain/soreness, pains in belly, headache, depression, being tired, feeling nervous and being irritable and unable to concentrate were statistically significant as associated with increasingly higher levels of blood lead. Having any gastro-intestinal, musculoskeletal or nervous symptoms was also statistically associated with increasingly higher levels of blood lead.

hands before eating or wear respirators as part of their lead work practices. As expected, workers more likely to have been removed from the job had the higher blood lead levels.

Figures 15 and 16 shows the trends in the percent of working conditions and personal habits, by interview year, for the last fourteen years of surveillance. There is variation between years in both the working conditions and personal habits reported over time with no clear overall improvement (Figures 15 and 16).

The questionnaire also asks about children in the household, in order to document the potential for and extent of take-home lead. Five hundred and one (25.4%) of the households where an adult had an elevated lead level had children age 6 and younger living or spending time in the home (Table 17). Children from only 146 (33.0%) of these 501 households were tested for blood lead. Among the 146 households where the child's blood test results were reported, 48 (34.5%) reported a

DISCUSSION

An individual may have a blood lead test performed as part of an employer medical-screening program or as part of a diagnostic evaluation by their personal physician. Whatever the reason for testing, the results are then sent by the testing laboratories to the MDCH as required by law. If the individual reported is an adult, the report is then forwarded to MSU and maintained in the ABLES program lead registry. Individuals with a blood lead level of 25 µg/dL or greater, and individuals with BLLs of 10-24 µg/dL, where lead exposure source is not already known, are contacted by mail and then by a trained interviewer for a voluntary telephone interview. The interview includes detailed demographic information, exposure history and the presence and nature of lead related symptoms. When an individual with a blood lead value of 25 µg/dL or greater is occupationally exposed at a company that has not had a recent MIOSHA inspection, an enforcement inspection is conducted to assess that company's compliance with the lead standard.

In 2011, there were 625 adults with BLLs ≥ 10 µg/dL. Approximately 95.5% were men. The mean age was 44.9. They were predominately white (83.5%) and lived in a band of counties stretching across the southern part of the state from Muskegon to St. Clair. The source of exposure to lead was predominately occupational in origin (81.2%). Exposure occurred during demolition of lead painted metal structures and abrasive blasting to remove paint or during the fabricating of non-ferrous metal parts and metal products.

Evaluation of fourteen years of interviews shows that individuals with the highest blood leads were more likely to be younger (Table 10). We attribute this finding to a higher percentage of younger workers in construction doing abrasive blasting on metal structures. Also younger, less experienced workers may be given the dirtier, less desirable tasks.

In 2011, thirteen adults were reported with BLLs over 50 µg/dL, the maximum blood lead level allowed in the workplace. Nine of the thirteen adults were exposed to lead exclusively at work (four from shooting ranges, one from a wrecking and demolition company, one from carpentry in a construction industry, one from bridge painting and sandblasting in the construction industry, one from repairing and selling industrial equipment for trucks, one from sorting activities in an alloy carbon and resulfurized steel bars and rolled steel shape manufacturer). A retained bullet from a gunshot wound and home renovation activities contributed to the tenth individual's elevated blood lead level. There were three individuals with non-work exposure to lead. Casting activities caused an individual to have blood lead levels elevated over 50 µg/dL. Competitive shooting activities and home remodeling caused elevated blood lead levels. The source of exposure that caused elevated blood lead levels in the thirteenth individual could not be determined, although no work exposure was identified.

Lead exposure remains an important public health concern in the U.S. Environmental Protection Agency (EPA) regulations requiring removal of lead from commercial products such as gasoline, house paint and solder in plumbing pipes and food cans, have greatly reduced exposure to lead in the general population. Average BLLs in the general

population have dropped from 15 ug/dL in the 1970s to the current 1.12 µg/dL (1).

Occupational exposure has not declined as steeply as environmental lead exposure. Data from 40 state lead surveillance systems shows that nationally, 95% of adult elevated lead exposure is work-related (3). Occupational Safety and Health Administration (OSHA) lead standards, established in 1978 for general industry and in 1993 for construction, set the level for removal of a worker from lead exposure in general industry at 60 µg/dL or two consecutive values above 50 µg/dL and construction at 50 µg/dL. These levels were established when general population levels from environmental exposure were much higher than they are today.

Michigan is one of 41 states conducting surveillance of elevated blood lead levels. Michigan requires the reporting of all BLL results, not just elevated levels. Major benefits for reporting all BLLs are the ability to calculate the rates of elevated BLLs in specific groups of interest, to monitor compliance with the testing requirements of the lead standard, and to facilitate the tracking of reports from particular employers to monitor their progress in reducing workers' exposures to lead.

Thirty years of lead toxicity research has demonstrated that lead exposure at levels previously thought to be of little concern can result in an increased risk of adverse chronic health effects, especially if the exposure is maintained for many years, thereby resulting in a progressively larger cumulative dose (4-7). Levels as low as 5 ug/dL have been associated with adverse cardiovascular and neurologic health effects (4-7).

Our interviews with workers show that the current allowable level of lead is also associated with acute symptoms involving the gastrointestinal, musculoskeletal and nervous systems (Table 12). The presence of these symptoms is additional support for the need to lower the allowable blood lead level. Sixty-four percent of individuals in Michigan with blood lead below the general industry allowable level of 60 µg/dL had daily or weekly symptoms consistent with lead toxicity (Table 12). Long term adverse effects of lead can occur even without overt symptoms.

Both the International Agency for Cancer (IARC) and the National Toxicology Program have classified lead to be a probable human carcinogen (8,9), primarily based on findings for lung and stomach cancer, with brain and kidney cancer also being elevated in some studies. Others studies show that lead exposure increases blood pressure in adults (3), making both mortality from stroke and heart disease outcomes of interest. High lead exposure is known to cause non-malignant kidney disease (10), but it is not known if lower levels contribute to this outcome.

Michigan occupations with lead exposure include abrasive blasting to remove lead paint from outdoor metal structures such as bridges, overpasses or water towers; casting brass or bronze fixtures; fabricating metal products; or exposure to lead fumes or dust from firing guns or retrieval of spent bullets at firing ranges. While the use of lead in non-battery products has declined in the U.S., the use of lead worldwide continues to grow, especially in battery applications. Recycling the growing amount of

"e-waste" created by discarded electronic and lead battery consumer products and the increased demand for raw metals and specifically recycled lead worldwide puts a new group of workers at risk to significant exposure to lead.

Since 2002, the Michigan ABLES project has sent letters to laboratories which provide blood lead analysis for Michigan residents, recommending the laboratories lower their upper limit of normal blood lead levels to correspond with current medical knowledge of the adverse health effects of lead. All but one of the laboratories providing blood lead analyses in Michigan, have lowered the upper limit of normal to 10 µg/dL. Given the recent decision by CDC to consider blood leads in children of 5 µg/dL or greater to be elevated and the increasing scientific knowledge about the toxicity of lead at these low levels, we plan to once again contact labs about lowering the upper limit of normal they report out to health care-providers. Recommendations for medical management on lead exposed individuals begin at 5 µg/dL and interpretative language for the health-care providers who ordered the blood lead needs to be compatible with these recommendations since laboratory reports are often their main source of information (11). The March 2013 update of the Fourth Annual CDC Report shows that blood leads in the general population are continuing to fall and the 95th confidence limit for the upper limit of normal in 2009-2010 was 3.57 µg/dL (1.52-2.03) (1).

A further problem for Michigan families is that adults working in lead occupations may bring lead home on their shoes or clothes and expose their spouse and children. Only one in three families with someone exposed to lead at work report that their young children are tested for elevated lead. When these children are tested, almost 35% are found to have an elevated blood lead level (Table 17). While the number of children being tested for lead statewide has markedly increased, there has only been a slight increase of blood lead testing for the children of lead-exposed workers. Michigan's Childhood Lead Prevention Program reports in the 2009 Annual Report on Blood Lead Levels on Adults and Children in Michigan, a successful reduction of the percentage of confirmed elevated BLLs from 7.2% in 1999 to less than 1% of the children tested in 2009. The main focus of Michigan's childhood lead program has been to increase blood lead testing in lower socioeconomic children who predominantly reside in older Michigan housing, which is most likely to contain lead paint. Increased focus needs to be made on lead workers' children who, when tested, have confirmed BLLs ≥ 10 µg/dL 34.5% of the time. There has been ongoing collaboration with the Michigan Childhood Lead Prevention Program to improve this situation and workers exposed to lead should be encouraged to test their children for lead exposure.

In its fourteenth year of operation, the surveillance system for lead continued to prove successful in identifying large numbers of adults with elevated lead levels and sources of exposure that could be remediated to reduce exposures in Michigan. The reduction in elevated blood lead levels, particularly from occupational exposures with an exception of BLLs ≥ 50 µg/dL which has doubled since last year, has appeared to plateau (Figure 5). This plateau along with the reports of individuals that show a lack of improvement in workplace conditions and preventive personal habits to reduce lead exposure at the facilities where they are employed (Figures 15 and 16) has us con-

cerned that the progress in previous years to reduce lead exposure has stalled.

Continued outreach is planned to the medical community on the recognition and management of potential lead-related medical problems in both individuals and their young families. A new OSHA PEL, substitutes of safer compounds, along with expanding education and outreach for employers and workers and their families would all contribute to lower blood lead levels. Ongoing surveillance in future years will continue to target and evaluate intervention activity to reduce exposure to lead.

Adult Blood Lead Epidemiology and Surveillance — United States, 2008–2009

Weekly

July 1, 2011 / 60(25);841-845

Lead exposure can result in acute or chronic adverse effects in multiple organ systems, ranging from subclinical changes in function to symptomatic, life-threatening toxicity. Despite improvements in public health policies and substantial reductions in blood lead levels (BLLs) in adults, lead exposure remains an important health problem worldwide. Approximately 95% of all elevated BLLs reported among adults in the United States are work-related (*1*), and recent research has raised concerns regarding the toxicity of BLLs as low as 5 µg/dL (*2,3*). CDC's state-based Adult Blood Lead Epidemiology and Surveillance (ABLES) program tracks laboratory-reported elevated BLLs. To update rate trends and identify industry subsectors and nonoccupational activities with high lead exposures, CDC collected and analyzed 2008–2009 data from 40 state ABLES programs. The results of that analysis indicated that a decline in the prevalence of elevated BLLs (≥25 µg/dL) was extended, from 14.0 per 100,000 employed adults in 1994 to 6.3 in 2009. Industry subsectors with the highest numbers of lead-exposed workers were battery manufacturing, secondary smelting and refining of nonferrous metals, and painting and paper hanging. The most common nonoccupational exposures to lead were shooting firearms; remodeling, renovating, or painting; retained bullets (gunshot wounds); and lead casting. The findings underscore the need for government agencies, employers, public health professionals, health-care providers, and worker-affiliated organizations to increase interventions to prevent workplace lead exposure, and the importance of conducting lead exposure surveillance to assess the effectiveness of these interventions.

State ABLES programs 1) collect data on adult BLLs from laboratories and physicians through mandatory reporting requirements; 2) assign unique identifiers to each adult to account for multiple BLL records; 3) follow-up on adults with BLLs ≥25 µg/dL with laboratories, health-care providers, employers, or workers to ensure completeness of information (e.g., the industry where the adult is employed and whether the exposure source is occupational, nonoccupational, or both); and 4) code the industry where the adult worked using the 1987 Standard Industrial Classification (SIC) or the 2002 North American Industry Classification System (NAICS). The requirement for laboratories and health-care providers to notify state authorities about BLLs varies among ABLES states, ranging from the reporting of all BLLs to only BLLs ≥40 µg/dL.* Most ABLES states submit data on all BLLs to CDC's National Institute for Occupational Safety and Health (NIOSH), including records from adults whose BLLs fall below the state reporting requirement.

Adults were defined as persons aged ≥16 years. For adults with more than one BLL record in a given year, only the highest BLL was included. Elevated BLLs were defined as blood lead concentrations ≥25µg/dL. Prevalence numerators were either "state residents" (adults residing in the reporting state) or "state residents and nonresidents" (all adults reported by a state) with elevated BLLs (a distinction in the data since 2002); both employed and unemployed persons were included in the numerators. Denominators were the annual employed population aged ≥16 years for the period 2008–2009, as obtained from the U.S. Bureau of Labor Statistics (*4*). To calculate annual state

prevalences, the numbers of adults with elevated BLLs from each of the 40 states reporting† were divided by the state's annual employed population and expressed as a rate per 100,000 employed adults. The combined state numerators and denominators for each year were then used to calculate national (40-state) prevalence rates for 2008–2009. The percentage of adults with BLL ≥40 µg/dL among adults with BLL ≥25µg/dL in each industry subsector was used to identify industry subsectors with the highest lead exposures. Additional information regarding interpretation of specific state ABLES data, definitions, and rate calculations is available at the ABLES program website (5).

A total of 40 states submitted data in both 2008 and 2009. Overall, the prevalence of elevated BLLs (≥25 µg/dL) among state residents and nonresidents declined from 14.0 adults per 100,000 employed adults in 1994 (4) to 7.4 in 2008 and 6.3 in 2009. Rates were slightly lower (7.1 and 6.1 respectively) when only state resident adults were included (Figure 1). The number of states with high prevalence of elevated BLLs (i.e., ≥20 adults per 100,000 employed adults) decreased from six of 17 states in 1994 to three of 40 states in 2009 (Figure 2). ABLES states reported 9,325 and 7,674 state resident adults with elevated BLLs in 2008 and 2009, respectively. State resident prevalence of elevated BLLs for 2008 ranged from 0.5 per 100,000 employed adults (Hawaii) to 37.6 (Pennsylvania); and for 2009, from 0.3 (Hawaii) to 32.0 (Pennsylvania). Prevalence of state resident and nonresident adults with BLLs ≥40 µg/dL declined from 3.5 in 1994 to 1.2 in 2008 and 0.9 in 2009. In 2008, these rates ranged from 0.2 (Arizona) to 6.5 (Pennsylvania) and in 2009, from zero (Alaska and Wyoming) to 4.2 (Pennsylvania).

Thirty-seven states in 2008 and 38 states in 2009 submitted data on industry and exposure source (8,450 and 7,112 state resident adults with elevated BLLs, respectively).§ Among all reported cases of elevated BLLs, exposures at work accounted for 6,081 (71.9%) in 2008 and 4,998 (70.1%) in 2009 (Table). Among only those cases with known exposure type (i.e., occupational or nonoccupational), occupational exposures accounted for 94.8% of cases in 2008 and 93.8% in 2009. The greatest proportions of adults with elevated BLLs were employed in three main industry sectors: manufacturing (72.1% in 2008 and 72.3% in 2009), construction (13.2% in 2008 and 14.4% in 2009), and mining (6.6% in 2008 and 5.1% in 2009). Industry subsectors with the highest numbers of workers with elevated BLLs were manufacturing of storage batteries, secondary smelting and refining of nonferrous metals, and painting and paper hanging (Table). Industry subsectors with the greatest proportions of adults with BLLs ≥40 µg/dL among adults with BLLs ≥25 µg/dL were painting and paper hanging; bridge, tunnel, and elevated highway construction; copper foundries; special trade contractors; and heavy construction industries (Table). Nonoccupational exposures accounted for 337 (4.0%) and 328 (4.6%) of all adult cases in 2008 and 2009, respectively. The most common nonoccupational exposures were from shooting firearms; remodeling, renovating, or painting; retained bullets; and lead casting (Table).

Editorial Note

Job activities known to involve the use or disturbance of lead include the following: handling of lead-containing powders, liquids, or pastes; production of dust or fumes by melting, burning, cutting, drilling, machining, sanding, scraping, grinding, polishing, etching, blasting, torching, or welding lead-containing solids; and dry sweeping of lead-containing dust and debris (3). Since 1994, ABLES surveillance results indicate an overall decreasing trend in the prevalence of elevated BLLs in U.S. adults and a decrease in the number of states with the highest rates (i.e., ≥20 adults per 100,000).

This decrease, in part, might be attributable to a decline in the number of manufacturing jobs with potential for lead exposure over time and prevention measures that have been enacted since the early 1990s, including 1) improved interventions by state ABLES programs,[1] worker-affiliated organizations, and federal programs such as the Occupational Safety and Health Administration (OSHA) National Emphasis Program to reduce lead exposure** and 2) measures implemented by industry (e.g., engineering and work practice controls,†† and respiratory protection). However, the decrease in rates also might reflect low employer compliance with testing and reporting requirements (6).

ABLES data also underscore that elevated BLLs among adults are almost exclusively an occupational health problem in the United States. Those states with higher rates of elevated BLLs might represent 1) states where higher proportions of workers are employed in high-risk industries (e.g., lead-related manufacturing, construction activities involving lead paint exposure, and lead mining), 2) states where workers in high-risk areas are less likely to be protected by engineering and workplace controls, or 3) states where greater compliance with testing requirements by employers and reporting requirements by laboratories result in larger numbers of reported cases of elevated BLLs. Similar to findings in previous years, the 2008–2009 data indicate that five industry subsectors accounted for approximately 65% and 14 subsectors accounted for approximately 80% of adults with elevated BLLs who were exposed at work. Higher lead exposures likely are present in those industries with the greatest proportions of elevated BLLs ≥40 μg/dL.

ABLES data are used to track *Healthy People 2020* objective OSH-7, to reduce the prevalence of persons who have elevated BLLs from work exposures (7). The *Healthy People 2020* target incorporates the new ≥10 μg/dL operational definition for elevated BLLs established by ABLES consistent with guidance from the Association of Occupational and Environmental Clinics and the Council of State and Territorial Epidemiologists (8).

The findings in this report are subject to at least four limitations. First, the number of adults with elevated BLLs reported to ABLES likely is underreported because some employers might not provide BLL testing to all lead-exposed workers as required by OSHA regulations and because some laboratories might not report all tests as required by state regulations (9). Second, because denominators are the numbers of employed persons, aged ≥16 years, unemployed adults who might be at risk for lead exposure, although included in the numerator, are not included in the denominator. Third, although state ABLES programs ascertain the work-relatedness of a lead exposure by following up with laboratories, physicians, employers, or workers, the possibility of misclassification of occupational versus nonoccupational cases cannot be excluded. Finally, analyzing lead exposures using a threshold of 25 μg/dL likely underestimates harmful occupational lead exposure because lead-related toxicity can occur at levels as low as 5 μg/dL and the *Healthy People 2020* target is set at 10 μg/dL.

Progress toward meeting the *Healthy People 2020* target for reducing the prevalence of adults with BLLS ≥10 μg/dL from workplace lead exposures can be aided by improving 1) worker protection programs developed and maintained by employers[10]; 2) government activities such as ABLES programs, which can effectively intervene to prevent lead exposures and the OSHA National Emphasis Program to reduce lead exposure; 3) research and interventions by stakeholder organizations; and 4) education of the public regarding preventing nonoccupational exposures. Emphasis should be placed on those industries identified in this report with the highest numbers of workers with elevated BLLs: manufacturing of storage batteries, secondary smelting and refining of nonferrous metals, painting and paper hanging, and bridge, tunnel, and elevated highway construction.

Acknowledgments

ABLES program coordinators in 40 states who contributed data in 2008 and 2009.
